CALCUTTA SHARE MARKET.

Jute.—This section was quiet in the beginning of the period under review. As the week advanced a steadier feeling set in and Howrahs which has touched Rs. 49-8 improved to Rs. 52-6, while Kamarhattys improved from Rs. 462 to Rs. 484. Hessians also which has gone down to Rs. 10-14 increased in prices to Rs. 11-5, while raw jute from Rs. 34-4 advanced to Rs. 35-12. Among other bigger denominations there was a distinctly easier feeling with buyers taking little interest. Albions dropped to Rs. 270, but later improved to Rs. 274, Ballys opened at Rs. 148 but improved to Rs. 155, Barnagores from Rs. 147 to Rs. 153, Dalhousies from Rs. 377 to Rs. 385, Fort Glosters opened at Rs. 528, were lower at Rs. 520 but improved again to Rs. 530. Orients and Cheviots receded to Rs. 220 and Rs. 238 but were better at Rs. 225 and Rs. 243 at the close. Nationals were easier at Rs. 22-8, while Hukumchand came to business at Rs. 17-8 but improved to Rs. 18. With an abnormal increase in price of hessians and low jute prices, lots of business was diverted to Dundee. The position of the industry is quite sound and mills are making good profits. The position of the shares from an investment point of view appears healthy and investors are advised to take advantage of every reaction.

Cotton.—This section was dull and lifeless with very little turnover. Kesorams were placed at about 3-12, while Bengal Nagpurs had sellers at lower rates.

Coal.—At the end of last week Bengal coal improved to Rs. 217 but again came down to Rs. 210, Amalgamated coal had buyers at Rs. 12-8, while Burrakurs improved to Rs. 10-8. Pench Valley were placed at Rs. 31-4, New Beerbhooms at Rs. 9-2, Kalapaharis at Rs. 8-12 and South Karanpuras at Rs. 2-2.

Miscellaneous.—There was good enquiry for Dacca Electrics at Rs. 14-4, Bengal telephone had sellers at Rs. 15-8, while buying enquiry for Benares Electric seems to have been satisfied for the present. Burma Corporations advanced to Rs. 9 and had buyers at the close at this price. Indian Wood Products improved to Rs. 32-12 with buyers over on rumours of big profit that the company had made. Tritons were wanted at Rs. 168 without many sellers, while Murree Brewery had buyers at Rs. 167 without any offering. Bengal Paper was wanted at Rs. 69, while sellers demanded Rs. 70. Titaghur Paper was lower at Rs. 14-12 on profit taking. In the Engineering group Burn & Co., were on offer. Indian Iron quoted Rs. 5, while Bengal Iron was at Rs. 2-3, Flours came to business at Rs. 14-4, while there were buyers of Hooghly Flour at Rs. 15 without many sellers. B. I C., Ordinary, were wanted at -/14/- Deferred at -/10/- and Preference at Rs. 106. Madan Theatres recorded a solitary deal at -/4/-. Midnapores were dealt in small lots at Rs. 71 but owing to low price of jute buyers of Midnapores did not like to increase their limits. Among sugar shares a distinctly easier feeling was noticeable. Ryams had sellers at Rs. 48, Cawnpores Rs. 35-4, Champarans Rs. 28-4 and Samastipurs Rs. 17-2. New Savan sugar had sellers at Rs. 16-8 without many buyers. Balarampores recorded scattered deals roundabout Rs. 11-12. The general tendency appeared towards still lower levels.

Banks & Railways.—Imperial Banks were quoting Rs. 1,215, while Contributories were wanted at Rs. 293. Central Banks had buyers at Rs. 21-12, while sellers were demanding Rs. 22, Burdwan Cutwas were placed at Rs. 72, while Kalighat Falta came to business at Rs. 72.

Government Securities.—This section was lifeless with very little turnover. 3½ per cent. G. P. notes fluctuated between Rs. 79-8 and Rs. 80; 4 per cent. 1960-70 about Rs. 93-8; 5 per cent 1945-55 came to business at Rs. 109-6. Short-dated bonds were however in request with very little offering. The Bank rate remained unchanged at 3½ per cent.

Tea.—This section was quiet but steady due to profit taking and only a limited business passed. Bishnauths have been marked down to Rs. 19-8, while Eastern Cachars came to business at Rs. 10-2. Kallinugger and Khoreel were better at Rs. 72, while Patrakolas improved to Rs. 721, East Indias were easier at Rs. 13-4, New Terrais at Rs. 9. There were, however, buyers of selected stocks with very little shares on offer.

BOMBAY STOCK EXCHANGE.

(By Wire.)

From our Correspondent.

Bombay, June 15.

Giltedge securities remained lifeless and showed a weakening tendency during this week. To-day, however, the market has firmed up, on receipt of the news of provisional agreement on war debt payments and better London advices. A gradual improvement is expected from next week and it is considered that another rise may occur before a drop. 3½ per cent. Paper declined from Rs. 80-9 to Rs. 79-4. 4 per cent. 1960-70 is quoted at Rs. 93-14 and 5 per cent. 1945-55 at Rs. 109-12. The new loan is finding practically no buyers, and is quoting Rs. 91-6.

The market for industrial and commodities shares shows a broadening tendency. Fresh purchases are being made almost every day in cotton mill shares. The extra protection given against Japanese dumping has given these shares an upward trend. It is expected that higher prices may come to rule in coming weeks. On Monday there was some keen buying in Fazul group and latterly demand has sprung for Swadeshi and New Great. Its remarkable reactionary tendency in cotton has been ignored. Purchase of Bombay Dyeings, Swadeshi, Central Indias and Kohinoors is recommended.

Steel shares were a depressed market early in the week, owing to the report of increased railway freight of approximately Rs. 20 lakhs a year. At the close, however, a better feeling prevailed. Tata Second Preference was quoted Rs. 82½ and Ordinaries Rs. 52.

Tata Power Ordinaries and Belapur Sugar are now placed in the forward list. The former is quoted at the close at Rs. 980 and a further improvement in its price is likely.

Bombay Trams have improved on considerable buying, but other industrial scrips remained comparatively quiet.

The public seems to be indifferent to the cement section.

Bank shares are neglected, with Imperials at Rs. 1,205 and Rs. 292-8 for Fully-paids and Contributories respectively.

COTTON.

(By Wire.)

(From Our Correspondent).

Bombay, June 15.

Local cotton rates advanced during the first half of the week but later developed easiness when Japanese boycott of Indian cotton was confirmed. A notable feature was the increase in difference which came up from Rs. 13½ to 18¾ due to purchases in distant contract and fears of disposing of July-August deliveries at due time. Inflation in the shape of depreciating dollar, increasing consumption of cotton, improvement in cloth and yarn business and imminence of acreage curtailment programme in America have brought up and maintained cotton prices at a high level, despite the unusually prolonged spell of favourable weather and improving crop conditions. Broach July-August rate to-day closed at 212-12 at 5-30. For the present, political developments at Washington and London will influence cotton prices.

The market has been quiet with jobbers marking time. Desi is quoted Rs. 17-10 and Sind American Rs. 22-14. Stocks are estimated at 90,000 bales. Practically no export demand is visible.

WHEAT.

(By Wire.)

(From Our Correspondent).

Karachi: June 15, 1933.

The market is inactive. Ready is quoted Rs. 25-2 and July Rs. 25. The daily offtake is 10,000 bags against arrivals of 20,000 bags. Stocks are estimated at 5 lakhs of bags.

JUTE AND JUTE GOODS.

JUTE.

(From Our Correspondent).

Calcutta, 16th June, 1933.

The market during the week under review, ruled quiet with prices tending lower under pressure of sellers for Ready jute. Both Dundee and Continent seem to have secured their requirements of jute for the time being and with Merchants still carrying stocks of jute on their hands, became nervous with the result that prices experienced a fall of nearly Rs. 3/- per bale during the week. Crop reports continue to be satisfactory and in view of the uncertainties of the development at the Economic Conference, buyers are showing great hesitation in entering into any further commitments at present.

Quotations of the East India Jute Association Ltd. for October Futures are:—

Date	Opened	Lowest	Highest	Closed

Arrivals and Exports of Jute—

Arrivals of Raw jute into Calcutta and into Mills situated outside the Calcutta Trade Block during the week ended June 10, 1933, and the corresponding week of 1932 were 198 and 74 thousand bales respectively. Arrivals from 1st July to 10th June this season and last season were 8,308 and 6,520 thousand bales respectively.

Exports of Raw jute from Calcutta and Chittagong during the week ended June 10, 1933 and the corresponding week of 1932 were 78 and 66 thousand bales respectively. Exports from 1st July to 10th June, this season and last season were 3,221 and 3,096 thousand bales respectively.

HESSIAN.

Calcutta, 16th June, 1933.

The market during the week under review ruled quiet, with consumers taking very little interest. There has been a heavy pressure of sales by second-hand holders and the quiet conditions in Wall Street have further undermined the confidence of buyers who are showing considerable reluctance at present prices. The publication of the report of the Sub-committee, appointed by the Indian Jute Mills Association, has also made buyers very cautious and with the slump in raw jute prices, the position is not very hopeful. Any improvement in prices is not likely before the deliberations of the Economic Conference take some definite shape. The statistical position, however, is sound and this alone may keep up present level of prices.

SHELLAC.

There has been a further decline in the prices of the different varieties of Shellac during the current week, and at the time of writing quotations are down by a rupee on those of last week.

The market is quiet at the time of writing.

Shipments upto June 12 amounted to 12,970 chests.

The quotations are:

T. N.	Rs.	20	0 0

The daily rates of T. N. Shellac for the week ending Thursday the 15th June, 1933 are as follows:—

Friday the 9th June, 1933	22	6
Saturday the 10th June, 1933	22	10
Monday the 12th June, 1933	22	6
Tuesday the 13th June, 1933	22	2
Wednesday the 14th June, 1933 ...	22	12 buyer.
Thursday the 15th June, 1933	22	12 buyer.

Rate for weekly margin payment announced on Saturday the 10th instant Rs. 22-8.

COTTON AND COTTON GOODS

COTTON.

The market during the week under review has ruled easy but with a steady undertone. The greatest depressing factor has been the recent proposed boycott of Indian Cotton by Japanese Mills as a protest against the recent increase in the import duty on non-British Cotton piecegoods from 50 to 75 per cent. In place of Indian Cotton, they propose to consume American Cotton mixed with Chinese; consequently Broach July/August has come down to Rs. 212.

The statement issued by the Japanese Cotton spinners association, after the general meeting of the association held in Tokyo on June 14, says:—

(1) The 75 per cent. *ad valorem* duty, recently levied by India on Japanese cotton goods, is three times higher than those on British goods, which is an astonishingly discriminatory prohibitive tariff;

(2) Two months ago, India disregarded international faith by denouncing the Trade Convention without negotiation, and last week again she disclosed insincerity by abruptly raising the tariffs while negotiations were proceeding for the conclusion of a new treaty.

(3) India's explanation that the recent rise of duty to 75 per cent. is an inevitable result of the decline in the yen is completely unjustified, because Japanese spinners' advantages have been nullified by using raw materials imported at a most adverse price as a result of the decline in the exchange;

(4) Against India's recent discriminatory measures and unfriendly attitude, the Japanese spinners till to-day had been anticipating successful results of negotiations by the Government;

(5) India's reckless action was most regrettable, practically prohibiting Japanese goods and ignoring official negotiations, especially when the World Economic Conference was opening with the object of eliminating trade barriers.

India's attitude had obliged the Japanese spinners to take the undesired action of suspending the purchase of Indian cotton, which will be continued indefinitely, irrespective of advantages or disadvantages, until the Indian and British Governments modify their attitude.

After the meeting, Mr. Fusa Jiro Ave, Chairman of the Association, in an interview, said that he took India's action as an economic challenge against Japan. He asked why India allowed the importation of British goods giving them 50 per cent. preference if the Indian Government really aimed at the protection of Indian mills? "We are not desirous that Indian farmers should suffer as a result of Japan's suspension of the purchase of their products, but Japan has to defend her own industries."

Reports from Liverpool and New York markets are fully bullish. Acreage reduction in U.S.A. is practically assured. Crop and weather reports are favourable. Consumption is tending upward, Liquidation is offset by fresh trade buying. Speculators are bullish in their ideas and are awaiting events at the Economic Conference. The undertone of the market is steady.

THE UNDERWOOD
PORTABLE

Ranks foremost in writing machines because of Lightness in touch—Quickness and ease of action—A type impression which is sharp and distinct—An Alignment of type which long and hard use will not alter.

It is quiet, because of a new carriage return, a new shift key mechanism and a generally subdued key action. It is fast, because incorporated in it are exclusive features that, for years, have made Underwood typewriters the speed typing machines of the world.

Fuller particulars promptly furnished on request or better still, ask for a demonstration.

PIECEGOODS.

The market in Calcutta has shown steadier tendency, but the actual increase in the spot values has been almost negligible. Demand from consuming centres has not materialised to the expectation of the dealers. The business has therefore been more or less of a retail character.

Business in Lancashire, Japanese and Indian goods has been of a poor nature, the dealers desiring to see as to how the market is going to be really affected by the recent increase in the import duties on non-British goods. Business in Lancashire goods was restricted partly due to Whitsuntide holidays and also due to the wide disparity between the prices quoted at that end and those offered on this end. Although there has been no fresh business from Japan during the current week, the general opinion is that fresh business will be negotiated before long.

YARN.

The yarn market has ruled firm during the period reviewed, though bazaar rates experienced a slight setback early in the week in sympathy with the fall in raw cotton prices. Towards the close, values recovered lost ground with sellers holding out for higher prices. The trend of spinners' quotations has continued against buyers with the result that the week's transactions have failed to come up to expectations, no bulk operations having been negotiated. Inquiry for Lancashire yarns has been chiefly centred on fine counts, such as 70s., 80s. and 70/100s. combed and carded Egyptian twist rejects, for June delivery, but nothing tangible has resulted, buyers' indications being unworkable. The same obstacle has prevented forward business in Japanese 40s. grey. Indigenous yarns have attracted most attention but here again traders have experienced considerable difficulty in finding buyers who are willing to pay existing values.

Although demand from consuming centres has not shown any signs of expansion the offtake has been satisfactory. The outlook is more encouraging, as July-October is considered the best season of the year. During that period the ryot has more time to devote to the hand loom industry, resulting in a considerable consumption of yarn, particularly of the coarse and medium counts.

Arrivals and Exports of Raw Cotton.

The imports of Raw cotton into the principal centres by rail and sea during the week ending June 10, 1933 were 13,382 tons against 10,254 tons during the corresponding week in 1932. The arrivals of cotton into Bombay from 1st September, 1932 to 8th June, 1933 were 2,218 thousand bales against 1,848 thousand bales during the same period last season.

Exports of cotton from all ports during the week ending June 10, 1933 amounted to 14,543 tons against 4,554 tons in the same period in 1932. Exports from 1st September to 10th June this season and last season were 3,77,888 tons, and 2,25,012 tons respectively.

BULLION

GOLD.

Small but fairly wide fluctuations in the gold market took place during the week under review. The highest and lowest of the week were Rs. 30-6 and Rs. 30-2. Distress gold is flowing into the towns as usual, and stocks in Bombay have increased to Rs. 4 lakhs of tolas. Exports per s.s. "President Carfield" and "Carthage" amounted to Rs. 12 lakshs and Rs. 111 lakhs respectively. The daily offtake remains unchanged at about 3,000 tolas. Sovereigns are quoted Rs. 19-9-6.

London.

Bullion reserves of the Bank of England against notes amounted to £187,700,000 on the 7th inst., against £187,400,000 on the previous Wednesday, showing an increase of £300,000.

On the 30th of May the Bank of England announced the purchase of £343,171 in bar gold. During Air Mail week, again substantial amounts of gold were purchased in the open market. Gold of a value of £800,000 was on offer on May 30 and of this about £500,000 was purchased for an unknown destination. The demand from the Continent continued as keen as during the previous weeks, and the major portion of the supplies that were offered during the week were taken by Continental buyers. The price, however, has declined so that the premium over the franc parity has almost disappeared.

The following were the United Kingdom Imports and Exports of gold registered from midday on the 22nd inst., to midday on the 29th inst.:—

IMPORTS.

	£
Germany	49,673
Netherlands	618,798
France	1,632,717
Switzerland	352,068
Iraq	19,639

Australia	58,556
Canada	200,820
Other Countries	37,274
Total ...	5,312,069

EXPORTS.

	£
Germany	1,420
Netherlands	190,464
France	27,252
Switzerland	7,400
Italy	1,024,741
Other Countries	600
Total ...	1,251,877

The s.s. "Narkunda" which sailed from Bombay on the 27th May carried gold to the value of about £557,000 of which £540,000 is consigned to London, £11,000 to Amsterdam and £6,000 to Marseilles.

The Southern Rhodesian gold output for April last amounted to 53,559 fine ounces as compared with 49,929 fine ounces for March, 1933 and 46,487 fine ounces for April, 1932.

SILVER.

A steadier tone was prevalent in the earlier part of the week, and business was done up to Rs. 59-6 per 100 tolas on the news that Britain is going to pay the war debt instalment in silver. Later, however, prices declined to Rs. 58-5. The market is again steadier towards the close on the news that America is accepting 10 per cent.

of the instalment due. The undertone of the market is steady. Stocks have slightly gone up to 10,000 bars and the daily offtake has gone down to 35 bars. The *Ashad* settlement is 8 annas above the present one. The highest and lowest rates in London were 19 7/16d., and 19 3/16d. Shanghai dollar has improved from 1s. 3 1/16d. to 1s. 3 5/16d.

London.

During Air Mail week, the market in London showed a steadier tendency prices fluctuating between narrow limits. Opening quietly, quotations eased slightly on account of an absence of demand. Later, the market recovered on a renewal of support from America and speculators, the Indian bazar also being inclined to buy. Selling on behalf of the Continent, mostly contributed to the supplies in the market, but China also sold, attracted by the higher prices available. Considerable uncertainty hangs over the market, although the tone at the close of the week was quite steady.

The following were the United Kingdom Imports and Exports of Silver registered from mid-day on the 22nd inst. to mid-day on the 29th inst.:—

IMPORTS.

	£
Soviet Union (Russia)	110,000

United States of America	32,780
Other Countries	755
Total ...	158,534

The stocks in Shanghai on the 27th instant consisted of about 136,400,000 ounces in sycee, 257,500,000 dollars and 6,960 silver bars as compared with about 141,400,000 ounces in sycee, 255,000,000 dollars and 5,900 silver bars on the 20th instant.

Imports and Exports of Gold and Silver:

The Imports of gold during the week ended 10th June into all ports were of the value of Rs. 1,82,000 against Rs. 51,000 during the corresponding week in 1932. The Exports during the same period were of the value of Rs. 1,24,95,000 against Rs. 90,38,000 in 1932. The net Exports of gold during the period thus were Rs. 1,23,13,000 against Rs. 89,87,000 during the corresponding week of 1932. The Exports of Gold from 1st April to 10th June, 1933 amounted to Rs. 12,42,27,000 against Rs. 9,38,19,000 during the same period in 1932, showing an increase of Rs. 3,04,08,000.

The Imports of Silver during the week ended June 10, 1933, into all ports were of the value of Rs. 47,000 against Rs. 4,85,000 during the corresponding week in 1932. The exports during the same period were Rs. 1,000 against Rs. 1,66,000 during the corresponding period in 1932.

By Wire.

(From Our Correspondent).

Bombay, June 15.

Silver rates fluctuated within a very narrow range of about six annas only, during the course of the week. Hopes have not been entirely lost about rehabilitating silver and it may form an important issue before the World Economic Conference in London.

Rate for ready gold came down to Rs. 30-2-6 by the end of the week, showing a decline of 2 annas.

FLOUR.

During the week, the market continued steady.

	Rs. A.	Rs. A.
Patent Flour	5 14	to 6 0
Superfine Flour	5 10	to 5 12
Household Flour	5 4	to 5 6

Atta 3	3 6	to 3 8
Pollard	2 11	to 2 12
Bran	2 10	to 2 11

TEA AND COFFEE

TEA.

London.

During Air Mail week, the condition of the market for Tea shares continued much the same as during the previous week. The undertone was firm, but the absence of many sellers was responsible for the smallness of transactions.

The prices of tea shares have increased very considerably since the beginning of 1933, and in most cases they have risen by 50 to 75 per cent. The aggregate appreciation in market values of Tea shares since the beginning of the current year amounts to millions of pounds sterling. The following extracts from the speech of Mr. J. F. Muir at the Annual meeting of the Consolidated Tea and Lands Company indicate his view of the prospects of restriction.

Should regulation fail, he said, the outlook would be black indeed, but just for that reason it seemed to be almost inconceivable that it should be allowed to fail. He was, therefore, distinctly hopeful that they might be entering on a period of moderate prosperity, and that next year they would have a much more hopeful profit and loss account.

At the Amalgamated Tea Estates meeting Mr. Muir dealt with the important question of consumption in India, a matter which has given rise to considerable discussion. When world conditions improved, he said, India would perhaps be the country in which prospects for increased consumption would be brightest. The requirements there were estimated at 60 millions lbs. per annum, but that quantity fell short of the difference between a normal Indian crop and the amount which could be exported during the current year. Even allowing for some increase, it was evident that unless the crop in India were restricted, the supplies available there would knock prices down to a very low level. In estimating probabilities, therefore, they must allow not only for the necessity for reduced production, which would raise the cost per lb., but must also calculate on the company's share of the Indian demand realizing perhaps such a low figure as would leave nothing towards overhead expenses. In regard to the question of increasing world consumption, Mr. Muir stated that India and Ceylon and Java and Sumatra seemed likely to combine in providing funds for this work.

for the Air Mail week's sales with the comparisons with previous week and previous year are as follows:

	This week.	Last week.	Corresponding sales 1932.
	s. d.	s. d.	s. d.
N. India ...	9.47	9.59	7.23
S. India ...	10.53	10.51	8.30
Ceylon ...	11.13	11.20	9.79
Java ...	7.37	6.88	5.04

Offerings at the London Tea Sales this week were 52,632 packages of Indian, 26,632 of Ceylon and 13,566 of Java teas.

There was keen demand at the auctions of Indian Tea on the 12th instant, especially for low kinds, and any changes in quotations were in the favour of sellers. New Season's Darjeeling teas sold well.

At the London auctions on June 12, 53,000 packages of Indian tea were submitted for sale.

There was a good general demand which became quieter later. Common and low medium qualities were firm and were a farthing per lb. higher. Other descriptions were rather irregular but there was a little change in prices.

Following are the lowest prices fetched during the day's auction:—

Common Pekoe last auction 8d., to-day's auction 8d. lb.: Common Broken Pekoe last auction 8d., to-day's auction 8½d. lb.: Common Orange Pekoe last auction 8d., to-day's auction 8¼d. lb.: Common Broken Oranke Pekoe last auction 8d., to-day's auction 8½d. lb.: Common Broken Pekoe Souchong last auction 8d., to-day's auction 8¼d. lb.

Following are the value prices:—

Clean Common Pekoe last auction 8d., to-day's auction 8¼d. lb.: Clean Common Broken Pekoe last auction 8¼d., to-day's auction 8⅜d. lb.: Clean Common Orange Pekoe last auction 8½d., to-day's auction 8½d. lb.: Clean Common Broken Orange Pekoe last auction 8½d., to-day's auction 8⅝d. lb.: Clean Common Broken Pekoe Souchong last auction 8¼d., to-day's auction 8¼d. lb.

At the London auctions on June 13, 26,600 packages of Ceylon tea were submitted for sale.

There was a keen competition at firm rates. Common sorts were sometimes a farthing per lb. higher. Mediums were in good demand and were often a half penny per lb. higher.

The following were the lowest prices fetched during the day's auction:—

Common Pekoe last auction 7¾d., to-day's auction 8¼d., lb.; Common Broken Pekoe last auction 8¼d., to-day's auction 8½d. lb.; Common Orange Pekoe last auction 8d., to-day's auction 8¼d. lb.; Common Broken Orange Pekoe last auction 8½d., to-day's auction 8⅝d. lb.; Common Broken Pekoe Souchong last auction 8¼d. lb.

The following are the value prices:—

Clean Common Pekoe last auction 8¼d., to-day's auction 8¼d. lb.; Clean Common Broken Pekoe last auction 8½d., to-day's auction 8½d. lb.; Clean Common Orange Pekoe last auction 8¼d., to-day's auction 8⅜d. lb.; Clean Common Broken Orange Pekoe last auction 8¾d., to-day's auction 9d. lb.

Arrivals and Exports of Tea.

During the week ending 10th June, 1933, arrivals of Tea into Calcutta were 3,427 thousand lbs. against 4,111 thousands lbs. in the correspondig week of the previous year. Exports by sea from Calcutta and Chittagong during the same period were 2,472 thousand lbs., against 2,766 thousand lbs., in the same period in 1932.

COFFEE.

At Bangalore, the price of coffee has continued at the same level as during the previous week. At London, however, there has been a decline of 10sh. per cwt. for East Indian superior variety.

The quotations at Bangalore on May 29, were as follows:—

Nilgiri Peaberr	... Rs.	78 0 to 80 per cwt.
Native ,,	... ,,	57 8 to 58 ,, ,,
Nilgiri Parchment	... ,,	76 0 to 77 ,, ,,
Native Flat	... ,,	47 0 to 48 ,, ,,

London Quotation on June 9 was:

East Indian Superior ... 130sh. 0d. per cwt.

SUGAR

During the week under review the sugar market in Calcutta has ruled quiler and values are slightly lower over the previous week. Hand to month buying was the feature of the week. Buyers are only interested in immediate supplies. The present price level is not considered high but the dealers are not prepared for long term commitments.

Stocks in Calcutta godowns are estimated at about 4,000 tons, while those at the main Indian ports are:—

(In Bags, 10 bags=1 ton).

	1933.		1932.
Calcutta (7th June) ...	28,860	(8th June)	30,000
Bombay (8th June) ...	50,000	(8th ,,)	70,000
Madras (5th June) ...	10,100	(6th ,,)	32,000
Karachi (9th June) ...	75,000	(10th ,,)	160,000
Rangoon (5th June) ...	15,360	(6th ,,)	15,360

Foreign.—Markets overseas have been after the last rise, ruling uninteresting. There is not much of demand noticeable. But the weather conditions being unsatisfactory specially on the continent, a bullish feeling is noticeable.

Quotations are:—

Java White Ready	Rs. 10-5-0
Java White Afloat	,, 10-7-0
Cawnpore Ready	,, 10-2-0
London Futures June	5s 10½d. sellers.
,, ,, July	5s. 9½d. ,,

Sugar Conference:

Ministers of Agriculture and Industries and their technical advisers from important sugar producing provinces have been invited by the Government of India to attend a conference in Simla on July 10 to consider how orderly development of the sugar industry, which has expanded with remarkable rapidity, can best be secured with special regard to the interests of the sugarcane grower.

Unofficial representatives of agricultural and sugar manufacturing interests of certain Provinces are also being invited to the conference through the Provincial Governments.

It is the intention of the Government of India, says a communique, that the discussion at the Conference should relate to the consideration of the following questions:—

(1) Whether the present rate of development of the sugar industry is satisfactory, excessive or inadequate;

(2) Whether the benefits of protection granted to the industry are being fairly distributed between the different interests;

(3) Whether it is desirable and practicable to regulate relations between the sugarcane growers and sugar manufacturers, either by fixation of cane prices, zoning and licensing of factories or other means; and

(4) Whether any legislation is necessary for better regulation of the Indian sugar industry.

This conference is entirely distinct from the Industries Conference, which, says the communique, is purely an official one, designed principally to enable the Ministers, responsible for administering Industries, to meet and discuss the various industrial questions confronting them.

The latter conference will commence on July 13 and will not deal with any question particularly related to the sugar industry.

Despatches and Imports of Sugar:

The despatches of refined and unrefined sugar from Calcutta, Bombay and Karachi, during the week ending June 10, 1933 were 55,573 cwts. against 91,766 cwts. during the corresponding week in 1932.

The imports of Refined Sugar into all ports during the week ending June 10, 1933 was 116,454 cwts. against 70,173 cwts. during the corresponding week in 1932. The Imports from January to April, 1933, were 124,000 tons against 166 and 324 thousand tons in the same period in 1932 and 1931 respectively.

GRAINS AND SEEDS

WHEAT.

After ruling a shade easier during the earlier part of the week, the market has been steadier towards the close. The steadier feeling was due to the better sentiment in other commodities, specially rice and the absence of sales.

The world markets have generally ruled steady and trading has been carried on from a fair to a good scale. The crop figures in India and America just published are viewed as bullish.

The quotations are:—

	Last week	This week
Chicago (July) per Bushel	$0.72⅞	$0.77⅛
Liverpool:		
Rosafe	22s. 6d.	22s. 6d.
Baruso	22s. 3d.	22s. 0d.

Exports from all ports during the week ending June 10, 1933 ...	71 tons.
,, During the corresponding period in 1932	48 tons.
Imports of Foreign Wheat during the same period	Nil.

GROUNDNUTS.

The advantages of groundnut cultivation in Bengal in preference to jute and *aus* paddy were stressed in a message broadcast from the Calcutta Wireless Station on Monday night.

As an article of food, groundnut, commonly known as *china badam,* is papular throughout the province but the latter depends for its supply from other provinces. Arguments in favour of its cultivation are that in addition to its high food value it improves the soil, can be sown in the monsoon or the rabi season, does not require irrigation, needs little cultivation, is free from disease and the shells make valuable fodder.

The cost of cultivation is low compared to that of *aus* paddy and jute and will give a better return than either of these. It requires only one weeding and inter-cultivation and the value of a good crop can be taken at Rs. 50 per bigha.

Further details regarding the cultivation of groundnuts can be obtained from the Director of Agriculture, Bengal.

RANGOON RICE.

Forward quotations outside the rice market on June 14 for Big Mills Specials were Rs. 167-8 (July and August); Rs. 170 and Rs. 172-8 (September).

Quotations in the rice market were: Big Mills Specials Rs. 167-8 to Rs. 170; Small Mills, Rs. 177-8 to Rs. 180; Special Quality, Rs. 187-8 to Rs. 190 and Meedone the same.

Boiled rice prices were Long Rs. 215 to Rs. 232-8; Milchar, Rs. 192-8 to Rs. 202-8; Yathalay, Rs. 202-8 to Rs. 215; Broken, Rs. 90 to Rs. 105 and Meal, Rs. 17-8 to Rs. 20.

Paddy was Rs. 63 to Rs. 64 (river) and Rs. 61 to Rs. 63 (rail). Arrivals of paddy 158,000 baskets.

COUNTRY PRODUCE.

Myrabolans.—Jubbulpore average at Rs. 2-2 per md. Jubbulpore No. 1 at Rs. 2-8 per maund, Crushed No. 1 at Rs. 3-8 per maund nominal.

HIDES, SKINS AND LEATHER.

The hide market remained very firm throughout the week and prices have further risen in all grades. The prices obtained for higher qualities were proportionately higher than those for lower grade stocks. Purchases both by shippers and Madras tanners have been on a lower scale this week, on account of their unwillingness to follow the rise in the market prices with alacrity.

There is no support for the rise in the hide and skin market from the Indian tanners, as the demand for leather of every kind throughout India continues to be very poor. The Boot and Shoe trade is also very dull. The seasonal dullness is also adding to the absence of any substantial demand for leathers from the boot factories. The strength in the hide market is entirely due to the shortage of supplies and firmness in the foreign Hide markets.

Agra and Cawnpore hide and skins markets continue to be very firm in sympathy with Calcutta.

To-day's prices for hides and skins in Calcutta market may be quoted as follows:

Cow Hides.

	Per 20 lbs. Rs. A.	Rs. A.
Dry framed Agras arsenicated ...	7 8	to 11 8
Darbhangas	5 8	to 6 0
Patnas	4 0	to 4 8
Dry Salted	4 8	to 5 0

Buffalo Hides.

Dry arsenicated	3 0	to 3 8

Goat Skins.

	Rs.	Rs.
Good quality per 100 pieces ...	110	to 150
Ordinary quality ,, ,, ...	70	to 100
Rejects ,, ,, ...	40	to 50

During the month of April, 1933, India exported 1,750 tons of cow hides to foreign countries as compared with 838 tons for April, 1932 and 1,579 tons in 1931. Out of 1,750 tons exported during the month of April, 1,487 tons were taken up by the Continent and only 79 tons by the United Kingdom, while out of a total export of 665 tons of tanned cow hides during the month of April, 659 tons was taken up by the United Kingdom, and only 6 tons by other countries.

The prices of bark tanned cow hides suitable for export have shown a sharp rise during the last three weeks and the prices ruling in the Madras market at present are round about 14 annas per lb., while tanned buffs are about 8 annas per lb., sheep skins Re. 1-4 to Re. 1-8 per lb. and goat skins Re. 1-4 to Re. 1-10 per lb.

The Chinese tanned chrome leather for shoe uppers are also being quoted ½ anna per sq. ft. higher, but sales are very restricted on account of absence of demand from Agra.

FREIGHT.

The market during the week has ruled quieter with only a small business passing.

(*Continued from page 1131.*)

appear that the final settlement as between America and Britain was arrived at only in the course of June 14. The same night, Mr. Chamberlain announced in the House of Commons that he had bought the silver from India. In the interval between his knowing that America had accepted his terms and making the pronouncement in the House of Commons, had Mr. Chamberlain time enough to fix up the deal with the authorities in India? If the payment was to be made in silver, could the Government of India have kept, ready for delivery in London, so large a quantity of silver as 40 million ounces? Did Mr. Chamberlain anticipate some such development and arrange, beforehand, for the India Office bringing down this amount of silver from India to London? Or did Mr. Chamberlain merely take for granted that if he asked the Indian Government to sell him a specified quantity of silver, the latter were bound to sell it. Or did the India Office, without any reference whatsoever to the authorities in India, agree to the proposal of the British Chancellor of the Exchequer, stating at the same time that though the necessary quantity of silver was not available in London, an early shipment could be arranged for? Have the Indian Government as much as 40 million ounces of *refined* silver? While Britain will be getting credit at 50 cents per ounce, what will be the rate she will be paying India? If it is the market rate of 36½ cents, does it mean that were Britain to buy from the open market so large as quantity as 40 million ounces, the price will still remain at 36½ cents per ounce? When important transactions of this kind are in question, the British Chancellor of the Exchequer has to make a clear and early statement of what all has happened; is the Indian Chancellor of the Exchequer to be at liberty to do everything in *purdah*, without any obligation to explain his actions to the public? We do wish that we have the right to ask for, and get, information on transactions and operations of this nature. Our authorities can do anything and everything with impunity and tell the Indian public that their curiosity is sheer impertinence. Whatever India's Finance Minister and India's Secretary of State do must be right. They can do no wrong. Why should they be, then, asked to explain their actions.

Editorial Comments

CENTRAL BANK THREE-YEARS CASH CERTIFICATES ARE AN IDEAL INVESTMENT.

WAR DEBT PAYMENT.

Mr. Ramsay MacDonald's "awkward hurdle" has been rendered less awkward and forbidding by the eleventh hour agreement between the British and th American Governments regarding the June 15 instalment of war debts. As a result of the exchange of notes between the two Governments, it was finally agreed that Britain should make a token payment of $10 million in silver, valued at 50 cents an ounce, which is the maximum rate prescribed for this purpose in the Thomas Amendment to the Farm Bill. As our Overseas columns will show, this escape from the embarassments of the June 15 instalment was fairly well talked about in London during Air Mail week. But a token payment was probably too much to be expected. It was believed that ultimately America might be persuaded to accept the June instalment in silver bought at 19d. an ounce from the Government of India and credited by the Government of the United States at 50 cents an ounce. This would involve a payment of £12 million from the British Treasury as against £29½ million required to meet the obligations which fell due on December 15th last. But there was more concern about the effects of payment or default on the prospects of a wholesale settlement of the question of war debts than on the exact mode of payment or of its effects on the national budget. The British Government had naturally fought shy of both full payment and of default. The former, whatever form it might take, coming after all the close and detailed arguments embodied in the successive notes of December last would have signified an acquiescence in the war debt settlement which would be dangerous to the cause of revision and reduction. Likewise, the loss of respect for contractual obligations implied in default is foreign alike to British nature and British interests. An obvious *via media* lay in a token payment in silver; and apart from the merits of this settlement, which we shall presently go into at length, it is a matter for gratification that what Mr. MacDonald called the awkward hurdle did not altogether frightened the World Economic Conference away from even attempting to clear it.

* * *

The significance of the last minute understanding between America and England must be examined from the standpoint of the two countries, of India, from whom the requisite silver is acquired, of the World Economic Conference and, last but not least, of current business. The Governments of the two countries have reason to be satisfied. Not only have they found a way out of the *impasse* which threatened more than all the World Economic Conference, but they have also been able to placate all sections of political opinion in their respective countries. In America, the President has consistently subordinated his own convictions to the requirements of his political position and popularity. Some of his most intimate advisors are reported to have warned him that any appeal to the Congress for power to negotiate on war debts would prove to be "political suicide," And Mr. Roosevelt himself temperamentally was inclined, as the *Financial News* points out during air mail week, to lead his followers from behind and that he is unfitted to lead where he cannot follow. His own statement that "in view of the British representations and the fact that the payment was an acknowledgement of the debt itself, he had no hesitation in saying that he did not characterise the resultant situation as a default" shows what amount of sophistry he can employ to placate the extreme sections of opinion in his country. In Britain, though there is hardly the same divergence of opinion between the Government and the public, it is certain that any wholesale payment would have visited the Government with a degree of unpopularity with it can ill-afford to face to-day. But what matters to the world at large is that Mr. MacDonald and Mr. Roosevelt would still be in the Conference with "their hands united."

* * *

But it must still be asked: How much of real international good will does this understanding promise? Even as between England and America, it would be rash to conclude that the differences have been narrowed. Considering the acuteness of the present situation, with the World Economic Conference just assembled, with public opinion in debtor countries swaying violently towards default, with the unmistakable threat of losing the entire war debt in an effort to secure only one instalment, it is not surprising that America chose to give in at the last moment and prevent England from making common cause with France. For our part, we find it difficult to suppose that the present understanding is anything more than the President's deference to a momentary expediency. The problem of war debts would still continue to divulge marked differences of opinion between the British and the American delegates. We have also to consider the effect of this understanding on French attitude and policy. France is already sore that England and America have practically joined hands over the question of inflation and devaluation of currency. There is as yet no sign that French opinion has relented from the attitude taken up by the Chamber of Deputies in December last. In fact, an official affirmation of that standpoint has been made again with reference to the June 15 instalment. It remains to be seen how far Great Britain will be able to play the *role* of a mediator between the two extreme views represented by the United States and France. It may, of course, be granted that on June 15 Great Britain has more in common with the French standpoint than a half-year ago. By insisting that she would make only a token payment, she has emphasised the French view that no regular payment under the old settlement would be made pending a revision of war debts. By disclaiming all intention to default she has kept touch with America. Whether such action has increased her value as a mediator or has tended to alienate both parties alike remains to be seen in the negotiations of the next few days. But if it should prove that France views the payment as calculated to cement further the Anglo-Saxon combination against the French viewpoint, the prospects of the World Economic Conference should seem very gloomy.

* * *

In India, the payment of war debts to America in silver acquired from this country must raise most unhappy thoughts and recollections. In a deal between America and Great Britain this country figures largely, but without any regard for its wishes or interests. On Wednesday the Chancellor of the Exchequer announced that America had consented to accept a token payment in silver and that the requisite stocks are to be acquired from the Government of India. But our enquiries show that no responsible authority in this country had been consulted before-hand either about the effects of such a sale of silver on this country or the price at which it would be effected. India has simply been taken for granted; and the utmost that could have been

done to respect constitutional forms was a consultation by Mr. Neville Chamberlain with Sir Samuel Hoare, whose only service to India consists in showing that the authority of the India Office on this country has no bounds whatsoever. The points which must disturb and distress every Indian are, indeed, legion. In the first place, the silver sales had been, to all appearances, decided on over the heads of the Government of India. There is no indication of the price at which the silver would be handed over to the British Government; and from the manner in which the sales had been decided on, it is reasonable to presume that the sales had not been effected at anything more than the current market rate. It is hardly convincing to argue that India is entitled to anything more than the current market rate. For the equitable rate is not what is current in the market now but what it would be, if the British Government were to acquire all they wanted from the open market. Besides no Indian can overlook the fact that the silver handed over to the British Government will be credited at 50 cents an ounce as against the present rate of 36⅛ cents. Nor can it be forgotten that the bulk of the silver now sold at, say, 19d. an ounce was originally bought from America itself at the thoroughly artificial and fabulously high rate of 80d. an ounce under the Pittman Act. So that while much of America's loss in the apparent overvaluation of Britain's silver is compensated by the undeserved profits of bygone days, and Britain makes a decent profit represented by the difference between 36⅛ cents and 50 cents, India is a double loser. She lost when, against every conceivable interest of hers, she was forced to acquire silver from America at 80d. an ounce. She has lost during recent years when she had to dispose of her surplus stocks in an ever-falling and bottomless market. But now to pecuniary loss is added the poignant sight of others making ill-gotten gains at her expense. It would have been some consolation if the enormous losses on account of silver, which we estimate in the neighbourhood of Rs. 15 crores, had at least led India nearer to that gold standard for which the Hilton Young Commission recommended a policy of silver sales. But what has happened is that in place of silver we have been left with only the *adhoc* securities to represent the difference between the original cost and the price at which sales have been subsequently effected. The latest sale of silver has the further demerit of having been effected on the eve of a recovery in the price of that metal. With such a record, it would have been magnanimous if Britain had consented to pass on a part of her gains to this country.

* * *

The settlement regarding the June 15 payment promises well for the immediate prospects of world trade and finance. There is not, it is true, much evidence that the uncertainties, that hung over this question, were interfering seriously with business. The sterling dollar cross-rate, over which the full payment of the June instalment in dollars might have exerted great influence, was, on the whole, unaffected by the prevalent uncertainty. Possibly, the manner of payment resorted to in December last led the market to believe that a similar experience would on this occasion also save the market from any appreciable fluctuations. But with all that, it is well that the uncertainty has been removed, and if we remember that of late there have been signs of a tentative understanding between New York, Paris and London as to the operations of the respective "controls" in regard to the exchanges, there is reason to believe that, during the time the World Economic Conference is continuing its deliberations, the course of the principal exchanges will be comparatively smooth. So far as the rupee-sterling exchange is concerned, it is reasonable to suppose that the proceeds of the silver sales would be paid in sterling to the India Office and that, to the extent the cash balance of the Secretary of State has improved, exchange must, in the future, be firmer. There is a less intricate way of tracing the effect of the silver sales on the rupee-rate. If we view the recent sales of silver as merely an addition of silver exports to the gold exports which have now become a feature of India's export trade, it will be seen that, to that extent, the balance of trade is more in our favour and the rupee-rate must, *pro tanto*, be firmer. But these minuter questions apart, it is no small encouragement to world trade in its present position of reasoned hopefulness the nations have shown themselves accommodative to each other in the first serious conflict of opinions. It can only be hoped that the ensuing negotiations over war debts and other questions will be characterised by the same spirit of accommodation and be crowned with a substantial achievement.

JAPANESE OFFENSIVE IN EXPORT MARKETS.

The trade relations between India and Japan are of late so strained and the recent controversies have generated so much heat, that it would be useful to set the whole question in the larger background of world trade. The Indian industries, that have been threatened by the flow of Japanese imports in this country are apt to think that Japan has contrived an unfair concentration of her attack on the Indian market. To realise that during recent years Japan has, for various reasons, expanded her export trade to the detriment of more than one of her competitors would blunt the edge of resentment that is felt as well in this country as in remote places like Lancashire. Both in her political and in her economic ascendency, Japan has had a way of advancing herself, which is all her own. Just as she has utilised the embarassments of Europe and America to consolidate her political position in the Far East, she has taken advantage of the prevalent chaos of currencies and markets to acquire for herself an increasingly bigger slice of the foreign markets open to her. On the one hand, was the possibility of exploiting the currency chaos for the purpose of acquiring decisive advantages to herself in competitive markets abroad. On the other, there was the threat of the Chinese boycott impelling Japan to keep in reserve some manner and degree of compensation for what she might lose in the land of her historic enemy. And at home, she had the incalcul-

Dated Calcutta, the 16th June, 1933.

able advantage of a highly frugal, but highly modernised and efficient, population, able to adapt itself to the needs of modern competitive industry.

* * *

The big offensive noticed during the last year and half is undoubtedly, due in large part to the depreciation of the yen and the exact timing of such depreciation. The Japanese statesmen must have recognised that the return to the gold standard in January, 1930, was a supreme stroke of illuck, in as much as it brought Japan into a more organic relation with a world economic system that had just started on a disastrous course of depression. The two years ending December, 1931, proved to be a period of more poignant distress for Japanese trade and economy than for other countries, as Japan, could, with a little foresight, have remained aloof from the deflationary effects which over-whelmed the outer world. The fall in wholesale prices from 134 in June, 1930 to 97 in November, 1931 and particularly, the price of raw silk, which is the most important Japanese export barring cotton manufactured, meant a state of severe distress, in which a government solicitous of the interests of its people would naturally be on the watch for a favourable opportunity to retrieve the disaster. The last quarter of 1931 found the nations gradually slipping away from the deadly grip of the gold standard. Britain abandoned it in September, 1931 ; and with her came off the gold standard more than one member of the British Empire and also other nations. Japan's luck or wisdom consisted in continuing on the standard for some time, so that with the higher exchange value of the yen she could acquire the necessary stocks of raw material at favourable prices. But it was evident by December, 1931 that the advantage which Britain gained by reason of the devaluation of sterling had proved too much for Japan and the gold standard was abandoned. The course of the yen-sterling exchange during the period is given below.

	Apr. 29	1/2 15/16
	May 31	1/2⅝

The yen depreciated from 3/10¾, at which it stood during the middle of December, 1931 to 1/10¼ at the end of February. The depreciation has continued since then till the level of 1/2⅝ was reached towards the end of May last. It must be remembered that during December, 1931 to January, 1931 there was no increase in internal prices, commensurate with the depreciation in the external value of the yen. For there was at first no inflation. The absence of inflation suggests that the fall in the yen was the result of more or less purely speculative causes. But by February, 1932 prices had risen to 116 as against 103 in December, 1931. The middle of 1932, however, saw a setback. But by the autumn of that year, a substantial inflation resulted from the decision to finance the budget deficit of 1933-34 of about 1,000 million yen, by issuing bonds to be taken up by the Bank of Japan. The effect of this forced inflation was seen in the rise of wholesale prices from 103 in June to 138 in December. It was during this period of rising internal prices and falling exchanges that the first big expansion in production and export trade took place.

* * *

It is necessary at this stage to examine the significance of the changes in currency and exchange. The continuance on the gold standard between September and December, 1931 enabled Japan to acquire the stocks of raw cotton and other raw materials at excessively favourable rates. And the depreciation of the external value of the yen gave Japanese exports a valuable advantage in the foreign markets. The inflation of the internal price level

double advantage, because even during the years 1930 and 1931 Japan had succeeded unlike other countries in effecting a reduction in wages and costs, and the inflation which took place after June, 1932 meant increased economies.

* * *

It is only to be expected that the triple advantage mentioned in the foregoing paragraph has enabled Japan to launch a big and wellnigh irresistible offensive in foreign markets. In India especially, she has been active to clear a tariff wall of American proportions; and the following table shows the trade between Japan and India.

INDIA'S TRADE WITH JAPAN.

(In lakhs of rupees).

	Imports from Japan.	Exports to Japan.	Balance of Trade.
1929-30 ...	19,87.3	25,71.5	+5,84.2

The total of Japanese exports which had fallen in 1931 to 1147 millions yen from 1470 million yen in 1930 again rose to 1410 million yen in 1932. Against the loss in exports to China, there was the gain in exports to Manchuria. Cotton piece-goods rose from a monthly average of about 100 million square yards at the beginning of 1932 to 200 million square yards at the end.

The increased exports were freely partaken by all the countries. Against an increase of 82 million yen in exports to India there was an increase of 37 million in the case of Dutch East Indies, 19 millions to Egypt and to Australia. 1933 has more than sustained the improvement. The trade returns for the last month show that, as compared with April, 1932, exports rose by 40.3 million yen, or 43.4 per cent. while imports increased by 14.9 million yen, or 10.5 per cent. the excess of imports over exports being reduced by more than 50 per cent. to 24.3 million yen.

* * *

The greatest disquiet has been caused in Great Britain who sees the Far Eastern markets being torn from her hands. But the present position is largely the result of Britain's complacent assumption that Japan's wage levels would not affect till eternity the relative costs of production and that temporary crises in Far Eastern markets could be solved by an assertion of political power. The present phase of Indo-Japanese relations is more the result of Britain's fears of Japanese ascendancy than of any accurate appraisement in India of the dangers which Japanese export competition portends to the indigenous industries of this country. Not that this question has a simple solution of the basis of absolute free trade between the two countries. But its is worthy of careful analysis and cool judgment; and we intend this article to be a prelude to an examination in a later issue of the commercial relations between India and Japan.

HIDE EXPORT DUTY.

Our Commercial Correspondent writes :—

The demand of the Council of Cawnpore Indian Merchants Chamber for the abolition of the small export duty of 5 per cent. on Hides and Skins is inopportune and unconvining. The pros and cons of the question were throughly threshed out in the Legislative Assembly when in 1927 Government provided for its removal in the Finance Bill. The proposal was thrown out; and the Government ultimately proposed to replace it by an export cess which should be devoted to the improvement of the industry as a whole. It appears as if the entire question has been

meant a lowering of the real wages and the costs of production. In the case of Japan this meant a shelved and no notice has been taken of the recommendations of the Hide Cess Enquiry Committee.

* * *

It would have better if the Cawnpore Merchants Chamber had urged upon the Government of India to give effect to the recommendations and suggestions of that body which had submitted such a useful and exhaustive report on the Hide and Skin industry of India.

* * *

The suggestion of the Cawnpore Chamber that the hide export duty was responsible for bringing about the fall in hide exports, from Rs. 51 lakhs in 1930 to Rs. 28 lakhs in 1932 shows that even well known economic facts cannot prevent an abuse of statistics. There are any number of commodities, bearing no export tax, which have suffered likewise if not wrose, on account of the world trade depression, and hides and skins could be no exception. The serious state of trade depression in Germany which was the principal buyer of our raw hides has had its serious repercussions on our hide exports to that country. The same has happened in the case of our skins on account of the state of affairs in America which was the principal destination of raw goat skin exports.

* * *

We doubt if there was ever anything qualitative in our hides. In fact our hides, both cow and buffalo, have always been considered of every inferior quality in every foreign market. It was Germany alone, generally, that could use our hides with profit on account of their superior skill in tanning. The inferiority is mostly due to the very bad treatment to which the hides are subjected by our ignorant producers in the process of preservation.

* * *

We had always the adventage of quantity which we have not yet lost. The reason why African and South American hides are being approved in preferance to Indian hides, is not due to their comparative cheapness, but because of their being exported in a better preserved state, and that is what a tanner most cares for. Surely, the abolition of 5 per cent. duty would not alter the situation in that respect.

* * *

As regards the contention that qualitatively the raw hides exported are different to the tanned hides shipped abroad, we would like to have further proof on this point. Our information, so far as it goes, does not support this theory. The Indian Merchants Chamber themselves do not seem to be consistent in their argument for the abolition of the export duty. While refuting the plea of Indian tanners for the retention of the export duty, they aver that qualitatively the raw hides exported are different from the tanned hides shipped abroad, which are tanned by Indian tanners for export purposes; and later on, they also argue that an Industrial interest which has to face competition in foreign markets should not safeguard itself by taxing the raw material by competing interests abroad.

* * *

In the case of goat skins exports we have the advantage of both quality and quantity. We produe nearly one-third of the world's supply of these skins and as regards the quality, our goatskins are considered practically the best. We understand that the very texture of these skins is such that the ignorant and poor Indian producer cannot spoil it, to the same extent as the heavy hides.

* * *

It is only the export of raw buffallo hides which has suffered a really serious setback, which is irrespective of the general world depression. The reasons for this are obvious. Our transport facilities are limited both for internal and external transhipments. These being the heaviest class of hides, they deteriorate easily, and consequently the quality suffers badly; while the transport charges are proportionately high. Hence they cannot compete with this class of hides from other countries in the foreign markets; which are brought there in a better state of preservation.

During the last four months there has been a better demand for our hides and skins in the foreign markets. Our exports have improved, compared to the same period of the last year, the only exception being buffallo hides which have fallen to about one-third, both in value and quantity, compared to those of the last three years.

What is really wanted is not the abolition of export duty, but that the recommendations of the Hide Cess Committee should at once be given effect to by the Government of India, and that an organised effort should be made by all the interests concerned to improve the quality of hides which are exported from this country. To a tanner a difference of five per cent. does not matter much if the hide is better preserved. We have a bad name in foreign markets for our hides. The 5 per cent. duty can hardly alter the scales.

It is really difficult to understand the extraordinary delay that takes place in the announcing of the *personnel* of the delegation for such important functions as the International Labour Conference, the Annual Session of the League of Nations and the World Economic Conference. The members, on whom the final choice falls, get such short notice that it is all hustle and bustle with them if they have to catch the boat in time. Why should not the Government make up their minds much earlier and announce the names in such time as will enable the the delegates and the advisers to make the necessary arrangements with some measure of leisure? The procedure adopted in the case of the World Economic Conference is,—I regret to have to use a strong word,—a perfect scandal. The Conference was to meet on June 15, the final list of the names of the delegates was made known only three or four days prior to the date of the Conference. A decision of this nature has meant that the Government could select only those persons as were already in London on some kind of errand or other. Or, the Government should have made up their minds, long ere this, that they will confine themselves only to such persons as could be available at a moment's notice to the London Conference. It cannot be argued that all competence and wisdom is confined only to those men whom some manner of mission or other has taken to London. The belated way in which the announcement was made was thus responsible for restricting the field of choice. With their freedom of choice so narrowed, it should be no matter for surprise that the delegation as now composed will be mainly the mouthpiece of the India Office. I reproduce below the press *communique* as regards the constitution of the Indian delegation to the Economic Conference:

> Sir Samuel Hoare, Secretary of State for India; Sir C. P. Ramaswami Aiyar; Sir Padamji Postonji Ginwala; Sir George Rainy; Sir George Schuster; and Sir Henry Strakosch.
>
> Sir C. H. Kisch, Sir H. Denning, Mr. H. A. F. Lindsay and Mr. E. J. Turner (Advisers). Mr. A. F. L. Brayne will act as Secretary.
>
> Sir George Schuster, who will not arrive in London until about June 23, will be engaged primarily on discussions which are to take place about the contsitution of the Reserve Bank. Responsibilities in India will necessitate his return on the conclusion of these discussions and his place at the Conference will then be taken by Sir C. H. Kisch.
>
> For the purpose of consultation at the Conference, the delegation will be assisted by the following committees:
>
> Sir Edward Benthall, Mr. A. H. Ghuznavi, Sir Akbar Hydari, Mr. A. Rangaswami Iyengar, Sir Phiroze Sethna, Sir Osborne Smith and Sir Purshotamdas Thakurdas.

It will thus be seen that there are three different stages of importance in the plan finally decided upon. There are the real delegates at the top; there are the members of the consultative committee at the bottom; in between, there are the advisers. So far as the main delegation is concerned, the only two persons who can at all be described as even distant cousins of non-officials are Sir C. P. Ramaswami Aiyar and Sir Padamji Pestonji Ginwala. Let me examine their credentials. The *Vigadan* of Madras has described Sir C. P. as the Member holding the *port folio* of Vacant Jobs. If a law membership is vacant, he is the handiest man; if it is a Commerce Membership, the versatile Sir C. P. will prove quite equal to it; if it is the World Economic Conference, who can show himself to better advantage than Sir C. P.? While as vacancies occur Sir C. P. is handy, a permanent job has been under-written for him by the Travancore Durbar. So far as Travancore is concerned, he leaves it and joins it according as he has to fill a vacancy, or be relieved by the permanent incumbent, in Olympia. He has recurrently acted in the top jobs which are in the gift of the Government; and it is difficult to say whether he is on foreign service from Travancore to British India or from British India to a Native State. While he was still the Constitutional and Legal Adviser of His Highness, the Maharaja of Travancore, he was sent to the Joint Perliamentary Committee as a representative of British India.

* * *

Here is one who has a definite job in a Native State and who gets a substantial salary for it. The emoluments are paid in order that he may protect the interests of that particular Native State in question and of the order of Ruling Princes in general. In his capacity as a representative of a State, he was elected Chairman of an important committee of the Princes Chamber. One with such strong associations with Indian India is selected by the Government as a representative of British India. It is the same person who is fixed upon for the World Economic Conference. His leanings have been such as to mark him out as an official rather than as a non-official. As for Sir Padamji Ginwala, he was President of the Tariff Board for a number of years. Then he retired from this job and has also more or less retired from India. His main contact has been with official life. His contact with India is now of the meagerest description. To describe him as a non-official representative of India would be farcical. In other words, the main delegation of India to the World Economic Conference consists of six members of whom four are Britishers and two Indians. Of the two Indians, neither could be said to be a representative of non-official opinion. For all practical purposes, the delegation can be the spokesmen of only the official side of the case. As for the advisers there is not one Indian; and everyone is or was an official of the Government.

* * *

In such circumstances, it is not surprising that Sir Purshotamdas Thakurdas and Mr. A. Rangeswami Iyengar have declined the invitation to the

CHRYSLER

PLYMOUTH

The Chrysler Plymouth Six has new beauty and new performance, and it has Floating Power.

THE CAR THAT PUTS SAFETY FIRST!

ONE PIECE STEEL BODY

electrically welded together in one solid unit. Light, immensely strong, practically indestructible. There are times when the all steel body may mean the difference between life and death. Under the fiercest impact it guards you and yours with its unbreakable protection. Body squeaks are, moreover, eliminated.

HYDRAULIC BRAKES

Self-energising, self-equalizing. Smooth and direct in action, these brakes are the most efficient type known. No rods, cross rods, operating arms to need lubrication. Unequalized brakes, the commonest cause of skidding, is impossible with Plymouth hydraulic 4 wheel brakes.

RIGID X FRAME

gives low centre of gravity, immense rigidity and particularly good road holding ability. Corners may be taken faster without dangerous side sway.

UNUSUAL ACCELERATION

a vital need with traffic conditions of today. Many an accident has been avoided by sure acceelleration at the right moment. Great saving of time is possible. It enables you to whip out of traffic jams whilst other drivers are still fumbling with their gears.

There are over 35,000 motor vehicles on Calcutta roads today. Those roads have been made faster. Cars have been made faster too. You should consider SAFETY FIRST when deciding on your new car.

FRENCH MOTOR CAR CO., LTD.

DELHI ∴ ∴ CALCUTTA ∴ ∴ LUCKNOW

consultative committee. Sir Phiroze Sethna is, like Hamlet, hesitating and arguing to himself as to what he should do. As for the others, there can be no question of non-acceptance of the invitation. But whether they are in the Consultative Committee or whether they are not in it, there is not much useful work that they could do. It would appear that it has been definitely decided that the World Economists who will meet in London should know only the official side of India's case.

* * *

The Indian Officers' Association was asked to send three representatives to give evidence before the Joint Parliamentary Committee. Sir T. Vijayaraghavachariar and Mr. Bhandari have already proceeded to London as witnesses ; and the Association was keen that the third witness should be a Moslem. I understand that it has now been decided that Mr. Ghulam Mahomed is to proceed *post-haste* to London as the third member. No happier choice could have been made. But for nitrigues and monouverings, Mr. Ghulam Mahomed should have been, by this time, Director of Railway Finance. He is, admittedly, the cleverest Moslem in the Railway Board ; but the higher authorities would seem to have no use even for a Moslem if he but shows any independence. Any other Mahomedan with his qualifications should have risen to the topmost rung ; but Mr. Mahomed was kept on odd kinds of special jobs, so as to be at a safe distance from the sacred precincts of Olympia. Bhopal persuaded him, in these circumstances, to join their service on the basis of "loaning" from the Indian Government. Mr. Ghulam Mahomed's inclusion in the delegation from the Indian Officers' Association makes a strong team all the stronger. He is proceeding by the Dutch Air Mail this Saturday ; he will be in London Wednesday evening —that is, three days prior to his colleages who have undertaken the prosaic steamer journey. Fancy being in London on the evening of the fifth day from the time of leaving Calcutta. The enterprise of the Dutch Air Mail is nothing short of a marvel.

* * *

Mr. S. N. Gupta, as he started life, must have been, I suppose, a youngster, of drive and dash in him. That is why, selecting a line in which attainment of sensational success while preserving one's self-respect is no easy matter, Mr. Gupta has built for himself a great position—the envy of inefficient climbers of the ladder, and the inspiration of the deserving aspirants to progressively higher and higher status in life. The experience of a man in Mr. Gupta's position should be valuable to young Bengal, which is best on seeking and securing its due and proper place in Clive Street. *A. B. C. of Insurance Salesmanship*, of which Mr. Gupta is the author, is a neat little pamphlet wherein Mr. Gupta endeavours to condense the lessons he has learnt in his career, for the benefit of others with like ambition.

FROM OUR READERS

TREASURY BILLS POLICY.

SIR,

One would imagine, reading your recent articles under "World of Indian Finance" and in particular the two articles of the 2nd and 9th inst., that the issues of Government Treasury Bills are made solely to enable banks to employ their spare short-term funds.

This, of course, is not the position and I am sure that many of your readers do not agree with your persistent demand that the Government of India should issue six month and nine month Treasury Bills for the benefit of banks and of the money market generally.

Until the end of August, the Government should issue only three month Treasury Bills and these should be issued for the minimum amount possible each week. Banks will then be forced to employ their spare funds in other directions.

They will, in the first place, bid gradually higher prices for short-dated Government loans falling due during the next two or three years and, as these are found to be unavailable, they will have no option but to invest in medium-dated issues and so eventually into long-dated issues.

Such a movement can be engineered during the next two months, so enabling the Government to issue a new conversion loan, on similar terms to those of the last issue, before the 15th August when Rs. 8.90 crores of the 6 per cent. 1933-36 loan has to be paid off.

If between now and the end of August, the Government issue six or nine month Treasury Bills, no new conversion loan will be possible.

Yours faithfully,

Bombay, June 12. E. F. GROOMBRIDGE.

[No one could be more solicitous than *Indian Finance* for the well-being of the Indian giltedge market. Throughout its career, its criterion of a healthy money market has been the health of giltedge. Its main criticism of Government's monetary policy has been that they have never shown proper judgment in backing their own securities and that their operations, on most occasions, have disrupted their credit. If Mr. Groombridge is anxious that everything possible should be done to bring back giltedge prices to the level prevalent on the eve of the last rupee loan and that, in the better atmosphere thus created, the last instalment of the conversion programme should be put through, we may assure him that our objective and his are identical. We believe, however, that the strength to giltedge will come not from artificial plethora of funds in the market, but from the reinvestment of the Rs. 15 crores and odd that are to be released from maturing loans, and from an increasing confidence in the *bonafides* of the Government's credit policy. The Finance Member has not so far thought it worth the while to vouchsafe any gesture calculated to restore confidence. In this situation, mere accumulation of short-term funds in banking circles will not do the miracle which Mr. Groombridge fondly anticipates.—*Ed., I. F.*]

SUGAR.

SIR,

I have just received your interesting *Industries Supplement* and would like to refer to one item of which you make no mention, *i.e.*, the production of molasses.

By the end of next year, the production of molasses is expected to be in the neighbourhood of 350,000 tons and the last price quoted was $\frac{1}{4}$th of an anna per maund, against Rs. 2-12 per maund taken as a credit in the Tariff Board's calculation of rate of protective duty which should be levied.

But it is more the actual quantity of molasses than the price which is a cause of disquietude.

The position is being examined carefully and it is to be hoped that a solution will be found.

If consumption of sugar comes back to 1,200,000 tons against the 940,000 tons to-day, then there is room for another 50 to 60 factories, floated on the lines indicated by you in your Supplement.

Yours faithfully,

G. MORGAN, C.I.E., M.L.A.

[Our main purpose in this week's *Industries Supplement* was to state the Sugar Problem of India and to emphasise its importance in relation to this country's agricultural, rural and industrial economy. There are many aspects of the sugar industry, which it will be the purpose of the subsequent issues to study in detail. We are grateful to Mr. George Morgan for his drawing our attention to the serious problem created by the phenomenal fall in the price of molasses. We shall now gather the relevant data and hope to deal with this development in the July issue of the *Industries Supplement*—*Ed., I. F.*]

SORABJI N. POCHKHANAWALA

TRIUMPH OVER HEAVIEST ODDS

If the number of handicaps one has to contend against is a measure of one's greatness, Mr. Sorabji N. Pochkhanawala, the Managing Director of the Central Bank of India, is one of the greatest Indians living to-day. He started life in a small way; but, from the beginning, he hitched his wagon to a star. At every stage, he has had some complicated problem or other to solve; the moment clears one hurdle, another obstructs his path straightway; and, all the time, the odds have been all against him.

In facing and conquering troubles in seemingly endless array, he has, on his side, been ever single-handed. He has had no friends to encourage him in successes; he has had foes *galore* to taunt him in his reverses, to gloat in his discomfiture. He has had to face the implacable hatred of men whose sole passion in life has been to hound him to ruin and humiliation. Amidst a sea of troubles, he has ever steered forth in a majestic and triumphant way.

To start with, Sorabji's initial educational equipment was poor. He is no "scholard" in any sense of the term. I will not be surprised if I am told that his early study did not take him as far as a college course.

If his general education was thus a negative factor, his early training in the banking profession was in no sense of an outstanding character. He was in a comparatively junior "job" when he left the Bank of India to start an institution which, in his reckless ambition, he wished to make the rival of the one from which he was, if I remember right, parting in a huff. He was young in years when he started the Central Bank; he could, therefore, have had no great experience. He had filled no top appointments; he could, therefore, have had no opportunities.

Here was what one might almost call a callow youth, with no general or specialised education, with no large experience or particular equipment, with no fortune of his own, with no influential connections worth mention. A youth so situated and so equipped pushes himself to the notice of Sir Pherozshah Mehta, then the uncrowned King of Bombay, and propounds to the great man of worldly wisdom his dream of a great banking institution, owned by Indians, directed by Indians, manned by Indians and run with an Indian policy for the development of Indian business. The man of experience is struck and awed by the fervour and idealism of the inexperienced youth. Whatever the imperfection of your scheme, whatever the pitfalls in the way, I am your man and I will stand by you through thick and thin—says Sir Pherozshah; and young Sorabji is happy in being vouchsafed the fortune of the materialising of an audacious dream.

Thus was the Central Bank created.

It has had two great advantages—the momentum given by its association with a magnetic and powerful personality like Sir P. M. Mehta and the devoted service of Sorabji, to whom ambition is made of the stuff of dreams, and whose doggedness and determination to make the dreams come true is like unto religious fanaticism.

Otherwise, the Central Bank has had to contend with violent gales, treacherous shoals and dangerous rocks throughout its journey through an uncharted sea. The man at the helm had never before embarked on so perilous a voyage, had not been master of so vast a vessel. The barque is now safe in the harbour; but the harbour itself is exposed to heady and unexpected storms. Returned, without damage or repair, to the haven, the trusty master of the ship is not yet free to feel relieved that it has safe and good anchorage, but must needs continue to be as vigilant as ever and as alert to any development.

If Sorabji's life illustrates one lesson, and illumines one moral, more than any other, it is this: Whatever one's lack of initial qualifiations, if only one were earnest in his work, single-minded in his loyalty, keen on humbly equipping himself in all ways for his allotted task, one may be sure of attaining hundred per cent. efficiency; and no obstacles can impede the onward progress of one so resolute, so sincere, and so eager in quest of knowledge.

Sorabji is a man whose mind admits of only "one-way traffic." He is, first, second and last, a banker. His interest in aught else in life is a negative quantity. Even his domestic duties are secondary to his duty as the Head of the Central Bank. He has no hobbies. He has no other attractions or distractions in life. He has, in fact, never felt the need of any such attraction or distraction or hobby. To run the Central Bank is his full-time job—it is his family, his property, his hobby and attraction and distraction rolled into one. The Central Bank may, if it tries, get a man with resplendent academic qualifications, with impressive claims to banking experience in many climes, with *chits* from world authorities in finance and banking. But only in Sorabji could the Central Bank get a man to whom the institution he takes care of is the be-all and end-all of existence.

In all my experience, I have never come across one to whom love and service of the institution he is connected with is all that he asks of life. Sorabji is a monomaniac in the best and proudest sense of the term.

Let me give herein a catalogue of the handicaps he has had to fight; and you will have a fair idea of the stamina of the man and of the glory of the triumph he has achieved.

(1) His initial equipment by way of general educotion was less than in most of his compeers.

(2) No great experience or special opportunities in the period prior to his starting the Bank.

(3) During all this quarter of a century, he has rarely stepped into any other Bank in India to study the working of contemporary institutions.

(4) He started at the top and learning from others was forbidden.

(5) He had to educate himself at each stage and through all the stages.

(6) At no time did he have a strong or influential directorate. In case of 'runs' or like adverse happenings, not one of his director could come to his rescue with practical help.

(7) Some of his directors have been positive drags on him. Rumours of failures of one or more of them occasioned the severest raids on the Bank's deposits.

(8) The man he took with a view to train him up as his successor did all he could to dig Sorabji's grave.

(9) Shamdasani tactics have pursued him for a dozen years.

(10)Any adverse development in the Indian banking world causes the Central Bank to be the target of the first attack by nervous depositors.

(11) The Hindus of Bombay have never taken kindly to Sorabji. In their bias against a Parsi Managing Director who, they believe, has a Parsi bias, they would rather give their custom to banks run by non-Indians.

Despite every manner of difficulty in every phase of progress, Sorabji has brought his bank to the proud position of being the first amongst Indian joint stock banks alike in regard to total capital, total of capital and reserves, and total deposits.

Unassuming in his manners, almost unconscious of the nature and extent of his own achievement, simple of habits, affable to one and all, painstaking and detailed in his methods, Sorabji N. Pochkhanawala has done signal service to India by demonstrating that by relying entirely on Indian *personnel* and Indian support, the biggest bank on modern lines could be securely built and successfully run. What Sorabji has done and done in such remarkably fine style is the proudest feather in the cap of India's accomplishment in the world of business.

(*Continued from page 1161*).

idea of equilibrium between the economic forces and this was the signal for mathematicians of all grades to apply their ideas to economics. No doubt, their exposition of some aspects of the problems of economic science has been better than what a mere economist could have contrived. But by imputing permanence to some of the transient features of economic life they have misdirected the efforts of many a student. And what is worse, businessmen have claimed the postulates and conclusions of an equilibrium economics as a virtual defence of all their methods and practices. But now comes the stage in which the physicist and the chemist, the engineer and the technologist claim to have a say in economic science; and what the effect of this latest invasion—the start was made by the priest and the theologian—will be, we cannot say. But I fancy just as the mathematician gave clarity and precision to the basic concepts of economists, the technocrat, if I may call him so, will impart the same qualities to our knowledge of present day conditions. This is a task which does require the biggest association of scientists of all kinds we can gather. But the problems of economic organisation in its present phase, at any rate, is a problem of individual and social psychology. What the technocrat will do in this regard, I simply wonder!

Industry Year Book and Directory 1933: Industry Book Department, Keshub Bhaban, 22, R. G. Kar Road, Shambazar, Calcutta; Price Rs. 5/-; Pages 1000.

The Industry Year Book and Directory 1933 has always had an attraction, peculiarly its own. No other book affords within the scope of such a small volume, information at once clear, compact and comprehensive. It is unpretentious, but solidly useful; unambitious, but with a creditable record; and small in size but wide in scope. The latest volume is in many respects an improvement on the old and is calculated to embrace its usefulness.

THE READING ROOM

The ABC of Technocracy: By Frank Arkright; Hamish Hamilton, Publishers; Price 1s. 6d. net; pages 96.

I have my own conception of the function of a book reviewer, which, I do not know how far others in the line share. It is neither to summarise nor to offer a critique, but to determine the exact place which a new publication occupies in the already existing volume of literature on the subject. In so far as this involves summary and criticism, they are admissible; and my readers, I trust, will have noted my attempts to adhere to this rule of conduct. But the book under review must baffle any such attempt, so far at least as I am concerned. Technocracy as a word, I am fairly well acquainted with. As a subject, I know no more of it than of differential calculus or relativity or Raman effect. I fancy it is a new name foisted on a set of old ideas, with a view to impart to them emphasis, prominence and an identity distinct from closely or remotely rival ideas. "Rationalisation" was one such. And "Technocracy" is another. They have their origin with a few enthusiasts and faddists. They creep into the headlines of daily newspapers, compel a reference in the more sober and staid periodicals with a name and a historic reputation. Pamphlets and booklets issue from publishers who exploit, not in its sinister sense, the moderner's craving for novelty in ideas and literature. Of the future of such ideas, we can say but little. They depend on so many extraneous circumstances, not the least of which is the fate of a social organisation in a state of terrific flux, that their future is best not speculated on.

What matters now is the content of the ideas implied by Technocracy. I have read only the *A B C of Technocracy*; and, though I believe it is quite valid to doubt whether its alphabet has gone further than the A B C, the little booklet is sufficient to inspire a sense of respect for the first attempts to provide an escape from the immensely aggravated antithesis between the organisation of economic society and the development of modern technology. But with a sense of respect is mingled a sense of awe. The Introduction refers to an organisation known as Technocracy. And the Director of the group recently described it thus:

"Technocracy is a research organisation, founded in 1920, composed of scientists, technologists, physicists and biochemists. It was organised to collect and collate data on the physical functioning of the social mechanism on the North American continent, and the magnitude of its operation in quantitative comparison with other continental areas of the world. Its methods are the result of a synthetic integration of the physical sciences that pertain to the determination of all functional sequences of social phenomena."

The work has steadily gone forward, the author tells us. Funds have been provided in increasing amounts. And if one visits the Institute, its achievements would probably, be presented in the shape of huge charts whereon the results of the research are graphically shown. Their exposition would involve the use of formulas and equations, highly disconcerting to the self-esteem of men endowed with a strong common sense, average intelligence and a somewhat extraordinary love for new subjects.

Mr. Frank Arkright fortunately attempts to expound, not the results, but only the motive ideas of technocracy. The association of scientists technologists and engineers, to which the term technocracy primarily refers, recognises that what matters in the world is energy, which is the capacity to work and the sustenance of the sources from which the energy is derived. In the creation of such energy man has more or less completely ceased to be an important factor. Power and mechanical contrivances have displaced men from the jobs they have been doing in the past. And certain developments, of which the booklet under review gives a few instances, point to the utter elimination sooner or later of man as a factor of production. The control and conduct of such a system in the interests of the few means an inevitable trend towards a deadlock in the system of distribution. It means the piling up of debts over debts till the entire economic system passes into the stranglehold of overload of indebtedness.

The book under review describes in an arresting style these features of modern economy. But little is known of the relation which Technocracy bears to the historic systems of economic thought. In the cover page the words "capitalism" "socialism" and "communism" appearing above "Technocracy" are scored out with a line across to suggest that the last mentioned supersedes the others which must be discarded as out of date and inapplicable to present conditions. Mr. Arkright dismisses capitalism as trying to balance a pyramidal structure of debts on its apex. Socialism and communism, while trying to avoid the more baneful effects of indebtedness regarding capital and instruments of production, still attempt to preserve a price system, which technological developments must inevitably throw out of gear. But of what technocracy offers instead, the reader of this booklet, at any rate, must remain in the dark. We are told that the exposition of the results of the research would involve the presentation of formulas and equations incomprehensible to the average man. The association of scientists, technologists and engineers are presumably, using their special equipment to determine the exact character of human needs and the equipment we have at present to satisfy them. We were told some time ago that a similar association was satisfied that with the resources in America the entire population could be maintained in comfort with a seven hour day and five day week. Mr. Arkright points out that only 7 per cent. of the energy output of America is devoted to the direct provision of sustenance. Ninety-three per cent. is used to keep the social scheme going—and the cities towns and densely populated districts are completely dependent upon a steay flow of this 93 per cent.

If this is a sample of the results of the research, I should for my part, think that the emergence of the word, "technocracy" marks a new age in the history of economics. This science has always been the prey of inroads of scientists from other spheres. The industrial revolution brought to prominence the

OLYMPIA

If Sir Basil Blackett were here?: Mr. P. R. Rau or Mr. Taylor might have got the chance to act as Finance Minister: And many other things might have happened: But why speculate on "if"?:

Simla, June 14.

Ever since the Muslim revolt in Kashmir was suppressed, the Viceroy has been contemplating a visit to that beautiful hill valley. When the Maharaja of Kashmir visited Delhi in March last, he pressed upon His Excellency to accept his invitation to spend a portion of the summer in his State. The Viceroy, after Countess of Willingdon's departure to London this week, was keenly looking forward to his visit to Kashmir next month. And, accordingly, a fortnight's programme was prepared. But the feuds between the two factions of Muslims which started a few weeks ago have not shown any sign of abatement and the European population there, according to the latest report, is already suffering from want of rations.

* * *

It must be noted that the provision merchants of Kashmir are mostly Muslims; and when they are engaged in an internecine warfare, the whole population is upset and the normal life is at a standstill. In the circumstances, on receipt of a report from the Prime Minister in Kashmir, Lord Willingdon had reluctantly to cancel his visit to Kashmir. This does not mean that when the situation is eased, His Excellency will not renew his idea of spending a few days with His Highness. But, for the present, the tour is cancelled and the responsibility for this lies not on the Maharaja but on the Muslim subjects who have been indulging in factional disputes. So long as the trouble is confined to the Muslim community, there is no danger of its developing into a serious affair requiring outside intervention.

* * *

The cancellation of the Kashmir visit might result in slightly prolonging the proposed visit of Lord Willingdon to Naini Tal. According to the present arrangements, His Excellency will stay at Naini Tal from June 16, to June 21, but this period may be extended, as His Excellency has got through in Simla most of the urgent administrative problems by holding successive meetings of the Executive Council. During all these discussions, Sir B. B. Ghosh, by the way, will have his acting appointment as Law Member extended as there is every likelihood of Sir B. L. Mitter agreeing to attend the League of Nations as the leader of India's delegation in September.

* * *

His Eminence, the Grand Mufti of Jerusalem has seen the Viceroy. The object of his deputation has been publicly stated as that of founding an International Muslim University containing four faculties. But before raising funds in India, His Eminence had to take formal permission of the Viceroy. The permission has now been given. The local Muslim Community has been excelling itself in arranging receptions in his honour. Sir Fazli Hussain and Malik Sir Ferozkhan Noon were the first to set the ball rolling. To-day the Young Mens Muslim's Association and the Anjuman-i-Islamia of Simla gave a reception in his honour at the Islamia school near the Idgah when the Grand Mufti and Mohammad Pacha, Egyptian Ex-Minister, dwelt on their mission in India.

* * *

Sir George Schuster has left for London, with three conferences in his diary. Sir Alan Parsons, who was to return about the middle of next month and to take over the acting Finance Membrship for the second time, is rather unfortunate in that his medical advisers have suggested extension of his leave. Mr. A. H. Lloyd, therefore, will continue to act as Finance Member till Sir George Schuster's return which is expected to be in August. There is an unconfirmed rumour that as regards the acting incumbent, Sir George Schuster recommended Mr. Taylor, the Financial Secretary but that the Viceroy backed Mr. Lloyd on the ground that he is "the most senior officer at present in the department." Normally, however, the Secretary always acts for his chief in the latter's absence but this principle was given the go-bye on the present occasion.

If it is true that Sir George stood up for Mr. Taylor and stood up in vain, one is led to wonder what might have been the position if Sir Basil were the Finance Member. Sir Basil had keen eye for the right man; once he got hold of the right man, he backed him with all his strength. Mr. A. V. V. Aiyar, who was acting Controller of the Currency, was made the joint secretary of the Hilton Young Commission. Mr. Aiyar, unfortunately, fell ill within a few weeks of his appointment. To the vacancy so caused, Sir Basil appointed Mr. V. A. Ayangar, a junior thirtyfive years old, who was, till a few months prior to it, the Personal Assistant to the Controller of the Currency. It needs some courage and some confidence in his men, when to the vacancy caused by the illness of the officiating controller of the currency, the latter's personal assistant was chosen. Sir Basil never hesitated in these matters. He made up his mind quick about his men; once tried, he was a tower of strength to them.

* * *

If Sir Basil Blackett were now Finance Member? A piquant and poignant query! The Financial Secretariat would not be chokeful of non-Indian officers. Mr. V. S. Sundaram would have been, long ere this, a member of the Revenue Board. Rai Bahadur A. C. Mukerji, the trusty Deputy in the Treasury Building, Calcutta, would not have to yield place to the novice, Mr. Coates. Mr. P. R. Rau would certainly have been made the Acting Finance Member. In any case, if Mr. J. B. Taylor was to be backed, he would not have been backed in vain. Mr. V. K. Ayangar would not be pushed about, as he has been for five years, from pillar to post. That is, if Sir Basil were Finance Member!

But why speculate on "if"? It is futile and fruitless. Suffice it to say that while Mr. P. R. Rau is versatile, keen, and versed in the lore of the Finance Department, and Mr. Taylor has proved a remarkably successful Controller of the Currency and no less successful as Financial Secretary, the Hon'ble Mr. Lloyd, while knowing everything about customs or income-tax, has had no opportunity of knowing what all a Finance Member has to know. I suppose, the appointment has been made on the principle that when bungling is the rule and higher and wholesome finance the exception, what matters who bungles!

* * *

Your readers in Calcutta will see the first Air Mail plane arriving on July 7, from Karachi in the proposed service by the Trans-Continental Airways. From the same date the Government of India are introducing cheap airmail postcard throughout India. These two steps will accelerate commercial correspondence in the principal cities of India. It is not known when the National Airways Limited will commence their feeder services to the Trans-Continental Line, but private advices from Lahore show that the Hon'ble Lala Ramsaran Das who will be one of the directors of the National Airways and his son Mr. Rupchand are exerting their best towards the earliest inauguration of the service. Lala Ramsaran Das who has gone to London will meet Mr. Tymms, Director of Civil Aviation, and Mr. Pinhorn, the President of the Aero Club, and consult them in

the matter of selecting pilot instructors and ground engineers, for the Northern India Fying Club which has its headquarters at Lahore.

* * *

The Aero-Club of India held a committee meeting last evening at the Chelmsford Club, Simla, when it was decided to improve the contents and get-up of the Aero-Club Journal; and a discussion was held as to the best way of giving help to the Northern India Flying Club in the matter of extending their activities. Mr. S. P. Varma has been made a member of the General and Finance Sub-committee.

* * *

The Assembly members, who conveniently escaped the heat of the plains in order to decide in Simla what should be the conditions on which pension should be granted to the disabled soldiers, were roused to some excitement by Mr. S. C. Mitra, not with reports as to what actually happened in the Andamans but what the Government of India say they do not know or don't make public. And so a deputation was arranged, and Mr. B. V. Jadhav being the eldest was pitched upon as the leader. As there is no news of any kind either from the Andamans or from the Government of India, the statement which the deputation read out was all a prayer for information on the basis of public suspicion aggravated by the circumstances of the triple tragedy that has been enacted in the Cellular Jail at Port Blair. Sir Harry Haig's reply to the deputation was, as usual, non-committal; and as Colonel Barker is already nearing the Andamans with all his knowledge of forced feeding for hunger strikers, the Home Member promised to obtain facts. But Mr. S. C. Mitra, whose indignation originally led him to table a resolution for the withdrawal of the present Chief Commissioner, has, in his calmer moments, modified his own request by the alternative suggestion that all political prisoners confined in the Cellular Jail at Port Blair should be transferred to jails in India.

HILLBIRD.

SOUTH INDIAN RAILWAY COMPANY, LTD.

(Incorporated in England.)

GENERAL STORES DEPARTMENT.

An Auction Sale of stores consisting mainly of new, best Yorkshire iron and steel bars of sizes, Electrical goods, Lowmoor iron and copper rivets, bolts, nuts and washers of sizes, gauge glasses, Engineering tools, carriage fittings, wrought iron scrap, clocks, watches, Typewriters lamps of sorts and other unserviceable and surplus Railway materials will be held at 11 a.m. on Monday the 10th July, 1933, and the following days at the Landing Supervisor's Office, Madras Egmore. Printed list of items to be sold may be had on application to Messrs. V. Perumal Chetty & Sons, 5, Stringer's Street, G. T. Madras, or to the Landing Supervisor, South Indian Railway Company, Limited, Madras Egmore.

J. T. DIXON,
Ag. Superintendent of Stores.

Office of the Supdt. of Stores,
Negapatam, 8th June, 1933.

GATEWAY OF INDIA.

Over the carcass of the Indian cotton grower, a Battle Royal is raging. Say the irate stalwarts of the Japan textile trade: We will famish him—we will starve him to death—we will kill him, and no mercy. Our own industrialists, who claim to be stout champions of the masses, give the retort: We challenge you to kill him we won't have your bluff because we can bluff one better. This bluff and counter-bluff would be a most intriguing affair and fun-exciting performance if it were not that one senses impending tragedy.

The following news was cabled from Tokio on June 8:

> "The boycott of Indian cotton as a retaliation for the increases in the Indian tariff has been decided on at an urgent conference of the Cotton Spinners' Federation Committee, held at Osaka.
>
> The committee of the Japanese Cotton Spinners' Association decided this afternoon to submit to the general meeting of the Association on Tuesday a resolution urging the discontinuance of the purchase of Indian cotton. This move is a retaliatory measure against India's discriminating tariff against Japanese cotton goods.
>
> The committee consisting of member companies representing 80 per cent. of the total spindles in Japan have agreed not to buy Indian cotton with effect from to-day".

The Japanese Consul-General from Simla, the Japanese Consul from Bombay and a leading Japanese merchant from Calcutta have all given press interviews, in which they do not mince words in stating their views but from which it is manifest that they want to steer clear of the breaking point in negotiations. Japanese cotton merchants reinforced the Tokio threat by selling nearly 50,000 bales of cotton on the Bombay market. There can be no doubt that Japan and her businessmen have been stirred to fury by the latest increases in the import duty on non-British piecegoods. It is evident that the Japanese in India are watching the situation and developments carefully and would be sending timely and speedy communication to the people at home as regards the effectiveness or otherwise of retaliation both from the historic and practical points of view.

* * *

That Japan is serious in her threat to boycott Indian cotton is a matter on which there need not be any dispute. She does not bluff when she says that she does not want to buy any more Indian cotton. She is quite serious in her policy of reprisal. Our friends here are wrong when they charge Japan with indulging in bluff. But the question is whether this is a threat which Japan is in a position to carry out. In other words, even if she is most anxious to non-co-operat with Indian cotton, will she be able to avoid completely all purchases of raw cotton? If, for any reason, she is unable to enforce her threat, she must be said to be bragging. Japan is serious about her threat; this means that she is not bluffing. Japan may not be able to execute the threat; this means that she may turn out to be a braggart.

* * *

The case of Bombay is that whether she likes it or not, Japan has jolly well to buy Indian cotton in her own intterest. She is not buying Indian cotton to oblige India. It is not the solicitude for the Indian cotton-growers that was responsible for the Japanese preference for short staple cotton. Buying our cotton during all these years was a business proposition. Business consideration might well demand a continuance of the purchase of a material which has suited the Japanese in every way. But it might be argued that, in her present phase of indignation, Japan would be willing to pay even a slightly higher price for any other cotton so long as she is able to have her vengeance on India for the latter's inpertinence in daring to defy the greatest power in the Far East.

The following are some of the opinions expressed in this centre as regards Japan's ability to fulfil her threat :

"If, however, Japan were to go in for American cotton, she would have to pay more, and it remains to be seen whether she would incur the additional cost. Moreover, Japan would require Indian cotton for mixing purposes as the same quality of cotton she could not get elsewhere."

"Japanese millowners found the Indian market the cheapest in the world and as such they would find it very difficult to do without Indian cotton. If Japan boycotted Indian cotton her machinery would have to be altered."

"The Japanese particularly who are industrious and businesslike people do not require to be told that boycott is the weapon of the weak and that their threatened retaliation is not the proper remedy at this stage, because boycott of Indian cotton may react very seriously on the textile industry of Japan."

"A boycott of certain Indian products by some countries there would be good reason to fear, but a Japanese boycott of Indian cotton is likely to do more harm to Japan than to India. That explains why the threat is taken so calmly, and why it may not fortunately stir up too much ill-feeling. As is pointed out by a Bombay broker and others, the Japanese cotton industry would only be increasing the costs of production by refusing to buy relatively cheap Indian cotton. Supplies would have to be purchased from America and they would on an average be more costly. Extra expense would not end there because there would have to be some adaptation of machinery for the purpose of using solely the finer grades of American cotton."

It is also argued that, in any case, the Indian cotton-grower would not suffer. If Japan buys American cotton, the price of the latter would go up. If this price improves, the price of Indian cotton should, sympathetically, rise. At the same time, European countries, finding American cotton too costly, would turn to East Indian cotton; and whatever retrogression there might be by Japan's non-co-operation would be offset by the appreciation as a result of Europe's increasing co-operation. The following is the line of argument.

"The change-over of the Japanese demand to the American market would raise raw cotton in New York and thus would favour further purchases of Indian cotton by European countries which use it, and would use more if American prices rose. Then a boycott of Indian cotton would inevitably lead to reprisals here and a refusal to buy Japanese piecegoods. Indian mills would have to fill up the gap in supply, thus taking much of the Indian cotton which had lost a market in Japan. There is a certain amount of scope in the Japanese textile industry for ringing the changes on different varieties of cotton, but not, except at a cost, for giving up Indian cotton entirely."

To sum up, Japan has but a limited freedom of choice. Even if this is not so, the ultimate result to the Indian cultivators will not be at all as unfovourable as is now apprehended.

Despite these defiances and retorts, the commonsense view of the matter is simple. If India is bent on taking very much less of Japanese piecegoods and if the tariffs are to be used towards this end, it follows that Japanese cotton mills will have, as a matter of course, to reduce their output. There should, therefore, be less consumption of Indian cotton. Threat or no threat, the effectiveness of the present duties must naturally result in lesser demand for Indian cotton from Japan. Is it not fair and reasonable to expect that those, who have gained as a result of the barrier built against Japan, should make up to the Indian cultivator for what he has lost by Japan's reduced custom? There can be no doubt that Indian mills will benefit by the 75 per cent. duty. Nor can there be any doubt that Lancashire stands to gain greatly by the preference of 50 per cent. she receives in this transaction. Will the cotton mill owners of India and Lancashire be prepared to play the game by the Indian cultivator? Whatever may be said of Japan's trade relations with India, there can be no gainsaying the fact that she fully repaid India's patronage of her manufactured goods by taking a lion's share of the total requirements of raw cotton from this country. From the point of view of the Indian cultivator, the essential factor is that Japan did play the game and he has now to wait and see if the Indian cotton mills and the Lancashire cotton mills would play their part in a gamely spirit.

In my last communication I gave the figures for the imports of foreign cotton into India. I also referred to the remarks of the Director of Agriculture of the Bombay Government—remarks which have caused some bitterness amongst our industrialists here. The Director of Agriculture said that the duty on foreign raw cotton imposed in September, 1931, was giving no protection to the Indian cotton grower. He added : "Hence the question of raising this duty is receiving serious consideration". He was clear in his mind that much of the foreign cotton imported in recent years was displacing Indian grown cotton in Indian mills. One would like to know whether the Director of Agriculture has any inside information when he makes a categorical statement to the effect that the question of raising the duty on foreign cotton is receiving serious consideration. It is to be hoped that there is some truth in this remark. On their own volition, the Indian mill owners should desist from buying foreign cotton ad give more or less their entire custom to Indian cotton. If they will not do this of their own accord, they must be made to.

It is far from graceful on their part to argue that because foreign cotton is cheaper or more suitable, they have perforce to buy it. Equally could the Indian public argue that Japanese cloth is cheaper and Lancashire cloth is finer. If the Indian public are prepared to prefer the less fine productions of Indian mills at more costly prices, the cotton mills must show their due appreciation of this fact by preferring Indian cotton even if it is of a shorter staple and of a higher price. You cannot plead patriotism when it suits you and plead business considerations when it does not suit you. The cotton mills in India cannot have it both ways.

As for Lancashire, their attitude in this matter is so great a scandal that even many British friends have had to enter on a plea on behalf of Indian cotton. For generations and generations, Britain has been selling her cloth to India in quantities which at one time used to cost us anything like Rs. 50 crores. But she has never cared or condescended to buy Indian cotton. It is time that in recognition of the 50 per cent. prefenence that has been accorded to Manchester cloth, Manchester is made to buy at least 50 per cent. of its cotton requirements from India.

In fact, the balance sheet as between Britain and India has been all one-sided. I have taken the figures for the last six years. In 1927-28, we imported Rs. 119.21 crores of goods from Britain and exported only Rs. 78.87 crores. On balance, we had to pay Britain Rs. 40.34 crores. In 1928-29 our adverse balance was Rs. 43.34 crores. In 1929-30 this adverse balance was Rs. 36.54 crores. From 1930-31 there has been a tendency for the unfavourable balance to decline. The figures for 1930-31, 1931-32 and 1932-33 are Rs. 9.40 crores, Rs. 1.93 crores and Rs. 11.22 crores respectively. The last three years were, however, abnormal. It may be taken that, on balance, in the international trade account as between Idia and Britain, there is a deficit of about Rs. 15 crores annually against this country.

Let it not be forgotten that in respect of what are called Home Charges, the Indian Government have to remit anything like £30 million every year. This is equivalent to Rs. 40 crores or thereabouts.

Let it also not be forgotten that remittances on account of the incomes derived by Britishers on their investments or business in Idia would mean an outflow of funds from this country of Rs. 20 crores annually.

Yet another important factor is the large amount of money that is remitted to England for the education of Indians taking their training in that country and for the galavanting of our Ruling Princes and other fat men of means.

In all, in the international balance sheet between India and Britain, taking both visible and invisible

items, there is a recurrent adverse balance of anything like Rs. 75 crores. In this a healthy state of affairs? In these days when the civilised world seems to understand the full import and real tragedy of what is called the "transfer problem", is it fair and just to India that a situation should be allowed to continue in which she has to transfer Rs. 75 crores every year from her currency into foreign currency? The *Times* (London), writing on the eve of the World Economic Conference and with particular reference to the action taken against Japan, has laid down a formula as to the proper criterion to be observed between debtor and creditor countries. The *Times* is, evidently, satisfied that this criteria is being respected in the trade relations between Britain and the Dominions. The following passage must set people thinking :

> "It was borne constantly in mind that Britain, as a creditor nation, must recognise that a large proportion of her imports from the Dominions was not in exchange for British exports, but in payment of debt obligations. The Conference which opens next Monday, will make a useful contribution towards international economic disarmament, if it is able to agree upon a sole and similar guiding principle for the regulation of tariffs and some similar recognition of the responsibility of creditor countries towards their debtors".

It is obvious that so far as India is concerned, Britain, the biggest and the only creditor, does not give an opportunity to India to pay her in goods. On the other hand, she forces more and more goods on India ad thus has made the "transfer problem" increasingly onerous. Gold exports have, over the past 1½ years, solved the "transfer" complications. But what happened to the foolish prince, who in choosing the casket in the *Merchant of Venice*, put his faith and choice in gold?

"WATCHMAN"

(*Continued from Page 1173.*)

(*d*) The Secretary shall cause silver certificates to be by the Treasurer of the United States in payment of any obligations of the United States.

Authorisation of Silver Coinage

(*e*) The silver so accepted and received under this section shall be coined into standard silver dollars and subsidiary coins sufficient, in the opinion of the Secretary of the Treasury, to meet any demands for redemption of such silver certificates issued under the provisions of this section, and such coins shall be retained in the Treasury for the payment of such certificates on demand. The silver so accepted and received under this section, except so much thereof as is coined under the provisions of this section, shall be held in the Treasury for the sole purpose of aiding in maintaining the parity of such certificates as provided in existing law.

Any such certificates or reissued certificates, when presented at the Treasury, shall be redeemed in standard silver dollars or in subsidiary silver coin, at the option of the holder of the certificates: Provided, that, in the redemption of such silver certificates issued under this section, not to exceed one-third of the coin required for such redemption may, in the judgment of the Secretary of the Treasury, be made in subsidiary coins, the balance to be made in standard silver dollars.

(*f*) When any silver certificates issued under the provisions of this section are redeemed or received into the Treasury from any source whatsoever, and belong to the United States, they shall not be retired, cancelled, or destroyed, but shall be reissued and paid out again and kept in circulation, but nothing herein shall prevent the cancellation and destruction of mutilated certificates and the issue of other certificates of like denomination in their stead, as provided by law.

(*g*) The Secretary of the Treasury is authorised to make rules and regulations for carrying out the provisions of this section.

Change in Reserve Requirements

Sec. 46. Section 19 of the Federal Reserve Act, is amended by inserting immediately after paragraph (*c*) thereof the following new paragraph:—

"Notwithstanding the foregoing provisions of this section, the Federal Reserve Board, upon the affirmative vote of not less than five of its members, and with the approval of the President, may declare that an emergency exists by reason of credit expansion, and may, by regulation during such emergency, increase or decrease from time to time, in its discretion, the reserve balances rquired to be maintained against either demand or time deposits."

Approved May 12, 1933.

INDIAN FINANCE

YEAR-BOOK 1933-34

TO BE READY IN LATTER PART OF JUNE.

OUTSTANDING FEATURES:

1. A CONCISE AND COMPREHENSIVE REVIEW OF INDIA'S TRADE, BUDGET FINANCE, BANKING, INSURANCE, TRANSPORT INDUSTRY AND AGRICULTURE.

2. LUCID EXPOSITIONS AND COMPARATIVE STATISTICS.

3. TEN YEAR FIGURES ARE GIVEN IN MOST CASES.

4. OVER 200 STATISTICAL TABLES.

5. WHERE NECESSARY, CORRESPONDING STATISTICS OF INTERNATIONAL VALUE ARE GIVEN.

THE "HINDU": Non-official enterprise has been able to achieve what the Government failed to do.

THE "TIMES OF INDIA": . . . . . A compilation which nobody . . . . . ought to miss.

THE "LEADER": Excellent book of reference and information.

THE "INDIAN REVIEW". A mine of information, statistical and historical.

THE "HINDUSTHAN REVIEW". . . . The politician and the journalist the legislator and the businessman, cannot prize too high.

THE "STATIST". An exhaustive review.

THE "INVESTORS' CHRONICLE". First compilation of its kind in India. No previous attempt has been made either by the Government or by private agency to bring into a single volume all available economic information and relevant economic statistics.

SIR OSBORNE SMITH: Astonishing production.

SIR R. N. MOOKERJEE: Remarkable achievement.

MR. G. D. BIRLA: Undoubtedly a compilation of very useful information.

SIR BASIL BLACKETT. There is hardly any financial or economic information regarding India which does not find some place in the volume.

J. SCHUMPETER: All the more economists all over the world must be grateful to you.

Price Rupees Five only.

To subscribers of "INDIAN FINANCE" Rs. 3 only.

Rs. 4 for extra copies to subscribers.

The Managing Editor,
"INDIAN FINANCE," 20, British Indian St.,
CALCUTTA.

Sir,

I send herewith Rs. for of "Indian Finance Year-Book" on the basis of concession allowed to subscribers.

OVERSEAS' NEWS:

By Air Mail

GREAT BRITAIN.

AGREEMENT RE: EXCHANGE.

Another week has passed with no indication of the Government's course of action in regard to the June 15 instalment of war debts. Much was expected from the speech of Mr. Neville Chamberlain during mid-week, but the Chancellor only stated what anybody would have guessed, that anything that he might say was liable to be misunderstood on the other side of the Atlantic. In the country, however, the conviction is growing that the merits of the case, as well as the present situation in American politics, renders it necessary that Government should act decisively. Journals like the *Economist* hint at the possibility that payment to-day might involve a far less onerous burden, pecuniarily, than in December last; for if the Government were to take advantage of the provision in the Farm Bill, authorising the American Treasury to accept silver up to a maximum of 200 million dollars in payment of debts due by any foreign Government to the United States at a price of not more than 50 cents an ounce, the June 15th instarment of war debts would require approximately £12 million as against £29½ million required in December at the rate of exchange then current. It is a question whether the President, in whom vests the authority to execute the provision referred to above, would give the full benefit of it to the British Government. To accept silver bought at the present price of 19*d.* per ounce as the equivalent of 50 cents is too obvious a hardship to the American taxpayer to be lightly acquiesced in either by the President or the country at large. But the *Economist* itself lays little or no emphasis on this partial escape or no escape at all from the perplexing problem of war debts payments. The problem arises at all owing to the nervousness, which still persists in all responsible sections of opinion in Great Britain, at the idea of a unilateral repudiation of obligations formerly accepted in the past. But at present payment by the British Government would imply further emphasis and confirmation of the binding character of an agreement which is becoming increasingly and patently impossible of fulfilment. The *Financial News* would seem to suggest that default at the present moment would not only serve British interests but would also have the saving grace of rescuing the American President from a situation before which he is apparently helpless. It has been pointed out frequently in these columns that Mr. Roosevelt's indecision and marked unwillingness to give a lead to the Congress on the question of war debts and his unquestionable anxiety for an equitable revision and amicable settlement of war debts suggest that he would regard the British default at this time rather with feelings of gratitude than of resentment. But the British Government do not seem ready to oblige Mr. Roosevelt in this regard; and the uncertainty still continues.

The Agricultural Marketing Bill.

The cause of the World Economic Conference is being prejudiced by the British Government both by errors of commission and omission. Just as there is a hesitancy about a default, which would undoubtedly be helpful to better understanding between America and the Powers, there is an anxiety to push ahead with schemes which, in the spirit which actuates them as well as in their undoubted effects, must tend to put new obstacles in the path of the World Economic Conference and world economic recovery. The week will be important in British economic history for the first long step towards the regulation of economic life even in the minute details of production and distribution. The Agricultural Marketing Bill moved by Major Elliot in the House is a more deadly blow at the capitalist notion of *free* trade than socialists themselves would have been anxious to deal. The Bill contains a significant sub-section:

> "The making of an order in pursuance of this section shall be conclusive evidence that the requirements of this Act have been complied with, and that the order and the scheme approved thereby have been duly made and approved and are within the powers conferred by this Act."

Sir Herbert Samuel rightly characterised it as the "new despotism." The *Financial News* dubs it "the quintessence of socialism." And yet the debate showed how schemes and principles like those embodied in the Marketing Bill could cause for a time a radically new alignment of parties. The Labour Members generally made a stand against the measure, which in principle would seem to support their historic views. Sir Stafford Cripps, however, supported the Government and urged:

> "This is an excellent precedent, which will be followed widely in the future, and seems to us in every way to be desired. We shall be delighted when, on future occasions, we have to draw the attention of Hon. Members opposite to the excellence of the precedent."

And in the division, there was an overwhelming majority of Liberals in the "Noes"; and among them, strange to say, was Mr. James Maxton. Major Elliot's defence of the measure consists in the view that, while import duties are liable to be nullified by exchange depreciation, a quota system would ensure the realisation of the objectives of the Government. Whether one supports or opposes the measure, it is essential that the character of the bill should not be mistaken. There are provisions which impose heavy penalties even on small inaccuracies in the returns of petty traders regarding their stocks. Control is sought to be made not only in regard to agricultural products but in regard to their derivatives which, as the *Financial News* points out, "includes almost everything except metallic products". And what is more, it is less a scheme for the regulation of imports flowing in an embarrassingly heady stream than a scheme of long-term planning for all agricultural activity.

Exchange Stabilisation.

All this was only to be expected from Mr. MacDonald's declaration after his return from Washington that Britain should not be treated in the same way as other nations in the matter of tariffs and trade barriers, as her economic "defences" were incomparably weaker than those of countries like the United States. From all this, it follows that the course of the World Economic Conference would prove true the worst apprehensions of Lord Snowden. The week has, however, afforded one comfort to the well-wishers of the Conference. For there are signs that the supreme triangle of international finance namely London, Paris and New York have come to a sort understanding as to the degree and nature of interference in the exchanges. In saying this it is necessary to sound a warning against any exaggeration of the purport of such understanding or its significance. It is manifestly impossible that any agreement should have been arrived at so soon, as to the external value of each of the currencies. France could not have acquiesced in the extent of the depreciation of the dollar and the pound in relation to gold. Mr. Roosevelt could not have surrendered the dictatorial powers conferred on him by the Thomas amendment to the Farm Bill. Nor could Great Britain agree that the ruling rate of 4 dollars to the pound marks the level at which the external value of sterling could be stabilised for an indefinite period.

Air Mail Week.

American Legislation Misunderstood.

More than all, there is no official announcement in any of the three countries concerned to this effect. The understanding has rather to be inferred from the course of exchanges and the general talks current in the market. On Saturday May 27, the dollar had a sharp fall owing to the proposal of the gold legislation and the unofficial interpretation of it. The fall took the market by surprise as the exchanges had been comparatively stable during the past few weeks, and hopes were entertained that no serious upsets either way would happen till the close of the Economic Conference. The rise is attributed not so much to the legislation repudiating the gold clause as to the prevalent opinion that the uncertainty in regard to the clause was one of the obstacles in the way of inflation and that its removal portends a more vigorous pursuit of the inflationary policy. The rumours regarding the establishment of a free market for gold in New York also helped the fall of the dollar. For, with the establishment of such a market the offer of a premium on gold by the American Exchange Equalisation Fund would have the effect of depressing the dollar. In that case, the American public would be allowed a free hand to bid for gold and the slump in dollars would be further accentuated.

Evils of Free Gold Market in New York.

The consequences of such a development are not difficult to foresee. It would mean a wholesale flight of American capital from the dollar. It is doubtful whether even the "control" in Britain was affected by such fears. Anyway, the British Exchange Equalisation Fund started for the first time since the suspension of gold standard in America to buy dollars in a futile attempt to check the depreciation of American currency. It is not clear why this more direct, but unquestionably futile, course was preferred to the well-tried method of trying to check the appreciation of sterling by the continued purchase of gold in the open market. If the authorities had been dissuaded by the premium, that now exists on gold as against sterling, it is only to be regretted. Obviously, it is far less risky to pay the premium on gold that to acquire a currency whose fate is not known even to those in whose hands its fortunes now rest. On Monday, the dollar rate opened at 3.98½ and at one time touched 3.99. Further depreciation was checked by the intervention of the authorities ; and it is believed in usually reliable quarters that the official buying of dollars was done by the authorities in conjunction with the American authorities in a joint effort to prevent depreciation of the dollar.

Provisional Stabilisation a Misnomer.

That the control ceased to interfere as soon as the American markets opened and that from that time the dollar has been steadier is possibly the only circumstance, on which is based the theory that there is some sort of understanding in London, Paris and New York as to the relative stability of the currencies for some time. Even with this understanding the position would seem to be full of dangers. It is not known whether it includes, for instance, the agreement of France and United States to the seasonal depression of sterling during autumn. Nor is it known how far the American authorities have been able to reconcile the claims of their inflationary programme with the idea of a stable exchange for the dollar. As the *Financial News* points out in an editorial, there is an inescapable contradiction in the term "provisional stabilisation," for if it is only provisional, traders could not base any long-term transactions thereon, and to be stabilisation, it cannot by any means be provisional. But for the moment, with the World Economic Conference looming so near, any understanding amongst the three financial nations is a small mercy for which the market can feel grateful.

Inflation and Long term Interest Rates.

The extraordinary ease of monetary conditions has received strength and emphasis from the indifference displayed by the market towards the June 1 payments. Formerly, the payments of interest on the war loans and the dividends of companies together made such a large difference in the position of the money market that the plans of banks and financial houses used to be formulated far ahead in the light of such developments. But now, for one thing, the conversion has reduced the Government disbursements by nearly £15 million. Secondly, there is such a plethora of funds in the market that no amount of addition would make any serious difference to short term interest rates, though probably there is still some scope for decline. It is certain that its significance to lenders of short term money is little or nothing. That the movement towards cheapening of short term credits still continues is evident from the reduction of the bank rates of the Reserve Banks in America and the Greek, Swedish and Danish banks on the Continent. This is a welcome development, in as much as there are still large disparities among the bank rates of the world which require to be smoothened out. At the moment, what is of far greater importance is the movement of long term rates. A writer in the *Financial News* suggests that the first signs of real inflation should have the effect of stiffening up interest rates. And his arguments in this connection are worthy of note, if only because they will not meet with ready or alround acceptance.

> "Although cheap money conditions may help inflation, the moment inflation becomes noticeable, interest rates are bound to stiffen. This is only natural, for once creditors realise that the real value of their claims tends to decline they expect to be compensated to some extent in the form of higher interest rates; as for debtors, it is worth their while to pay higher interest rates because they are more than compensated by the rise in the price of goods they buy or produce with the aid of the loans. Paradoxical as it may seem, the inflationary expansion of currency tends, therefore, to be accompanied by a firm trend in interest rates. So long as the trend is still weak, it indicates that neither creditors nor debtors take the much-promised raising of the price level too seriously."

UNITED STATES OF AMERICA

MORE SIGNS OF REVIVAL.

The boom, which began with the first anticipations of inflation has persisted, though with a marked recession in the middle of the week. On Saturday, May 27, a flood of buying orders from all over the country, with probably, a fair sprinkling of enquiries from abroad, drove Wall Street prices to levels higher than the highest touched in September last. The turnover was 4.3 million against 1.3 million shares on the Saturday previous. Commodities were also firm, wheat gaining 2⅞ cents in Chicago and 1¾ cents in Winnipeg. Cotton registered an advance of 17 points and coffee 15 points. On Monday, not only was there no reaction but higher levels were reached both in point of prices and in point of turnover, which totalled 6,950,000 shares compared with 4,350,000 shares on Friday. On Wednesday, however, the market encountered a sudden check, as the sharp turn of the early part of the week had induced profit-taking on a scale, too large to admit of prices being sustained. But the recovery was neither slow nor negligible. On Thursday there was again a broad buying movement by the general public and the less active issues were found to undergo sharp advances. The leading speculative issues of recent origin were, however,

Air Mail Week.

somewhat irregular. The movement was more marked on Friday, June 2nd. Prices rose with increasing vigour. Turnover on the scale which has now become familiar was again resumed and the improvement was freely partaken by all sections.

Genuine Courses Behind the Boom.

While the present boom undoubtedly, derived its first impetus from the talk of inflation and the progress made therewith by the Administration, it is now evident that each of the principal sections in the stock exchanges has its own bullish outlook, as apart from the general incidence of the inflationary policy. Railroad shares, for instance, advanced as a result of better car loading figures. Gold issues were supported by the belief that by causing dollar depreciation, inflation would put a premium on gold. The operators in oil shares are presumably, actuated by the belief that the regulation of the industry by Government would facilitate, or even enforce, if necessary, a curtailment of output. In the automobile section, General Motors are to have had larger sales of the Pontiac up to date than during the whole year 1932. The steel industry has a distinctly better outlook, as the proportion of working to capacity has been steadily on the increase and orders are being booked in increasing numbers.

Signs of Recovery.

The monthly bulletins of the two big American banks, namely, the Guarantee Trust Company of New York and the National City Bank of New York have borne out the reading of the present business situation given in these columns during the last three weeks. The *Guarantee Survey* confirms the fact that "last month has witnessed the most impressive advances in business activity and the price levels since the beginning of the depression". The *Survey* inclines to the view that, considered carefully and comprehensively, the advance in prices, which has now materialised, is more the result of genuine recovery than the depreciation of the dollar or of the anticipation of further inflation. It is obvious that, if the changes were due to purely monetary causes, their value as pointers towards a revival of trade is considerably diminished. But the facts to be remembered in this connection—facts which point to the genuineness of the revival—are :

(1) That practically no money or credit expansion has yet taken place, although on May 23, the Secretary of the Treasury authorised the Federal Reserve Banks to buy 25 million dollars of government securities in the open market. From which it follows that if inflation has played any part in recent developments, it has done so only by anticipation.

(2) The recession has already continued well into its fourth year; and seldom, if ever, in the past has a violent and continuous reaction extended over such a long period without effecting the necessary readjustments and paving the groundwork for a sound recovery.

(3) That the revival did begin last summer and attained considerable momentum, but it was halted primarily by the growing distrust of the banking situation; and this obstacle now seems to have been removed.

(4) Though at the beginning the advance in prices was primarily a function of dollars depreciation, it is now possible to suggest that the aggregate advance in prices of some of the most important domestic and international commodities have considerably exceeded the depreciation of the dollar from its gold parity.

The National City Bank points out that "in May for the first time in nearly 4 years the volume of trade and industrial production has exceeded that of the same month in the preceding year." It adds with a light and buoyant cheerfulness that "prices are better and in a good many lines where the struggle has been to keep down the red figures black ink is being used again.

It must be said that the cheerful outlook of the share markets and the banks is also reflected in the practical life of the people. Not only are the heavy industries and the security and basic commodity markets showing the clearest evidence of recovery, but scattered reports also indicate that in other branches, where statistical information will not be available for some time to come, the same constructive influences have also been felt. Increased employment and higher wage rates have already taken the new optimism to the lowest strata of society.

The Steagall Bill.

The legislative fever in the Congress still continues to rage and bills of far-reaching significance and, it must be added, of considerable ambiguity, have been thrown on the Congress and the country in a surprisingly steady stream. The inflationary amendment to the Farm Bill was one such. And on May 26, a joint resolution was introduced in the House of Representatives, it is said, with the approval of the President, by Mr. Steagall, Chairman of the Banking and Currency Committee, for "the assurance of the uniform value of coins and currency of the United States". The principal clause is to the effect that "every obligation heretofore or hereafter incurred, whether or not such provision is contained therein or made with respect thereto, shall be discharged upon payment, dollar for dollar in any coin or currency which at the time of payment is legal tender for public and private debts. Any such provision contained in any law authorising obligations to be issued by or under the authority of the United States is hereby repealed, but the repeal of any such provision shall not invalidate any other provision or authority contained in such law." And in explaining the significance of this provision, Mr. Steagall stated that it would take the United States off gold by statute. But this statement was afterwards contradicted, as being erroneous since the bill does not affect the Gold Standard Act of 1930. Actually, it deals only with the abolition of gold clause and is only a legislative recognition of previous executive action. The bill does not, as was believed in some circles at the beginning, either abandon the gold standard or attempt to postpone for ever the question of stabilisation. It only sets the seal of legislative approval on the repudiation of the gold clause.

The opposition to the Steagall Bill is as bitter at home as abroad. Senator Carter Glass denounced it as "rank repudiation" and declared "They can talk themselves black in the face and not make anything else out of it." The *New York Times* stigmatises it as "a repudiation by formal Congressional act of a solemn and explicit engagement, of which the Government has long since repeed the benefit." But the opposition, however bitter, is by no means considerable. Senator Glass's proposal to exempt obligations owed to, or by, the United States Government from the scope of the Bill was defeated in the Banking Committee of the Senate.

One result of the introduction of the bill is the rumour that a free gold market might be established in New York where the price of gold may be allowed to rise to natural levels. It is on such rumours that gold mining shares rose, during the week, as obviously the premium on gold would represent a gratuitous addition to the profits of the gold mining companies unless, of course, they are to be taxed as now proposed in South Africa. Mr. Woodin's denial of such rumours has so far failed to have any serious effect. Meanwhile, an export of 7,623,900 dollars of gold has been made and gold earmarked in the bank's vaults on foreign account has shown a corresponding decrease.

The Administration is apparently determined that the promise (or threat?) of inflation should not fade away from the popular mind. Though it is more or less certain that the President would not decide on a big drive, till the close of the World Economic Conference, the Government is averse to letting the

Air Mail Week.

inflationary iron grow cold. The authorisation of the Federal Reserve Banks to buy 25 million dollars of government securities has not achieved the desired ends. Though, doubtless, floating funds have been augmented, the action of the Government and the Reserve Banks has been neutralised by the refusal of the member banks to take deposits against a hundred per cent. government bonds. As the New York correspondent of the *Financial News* observes, Mr. Roosevelt had taken the horse to the water when he authorised the purchase of securities by the Reserve Bank. Now he makes an attempt to make it drink by authorising the purchase of 100 million dollars in government bonds by the Postal Savings System, the deposits in which have swollen enormously since the bank holidays. The effect of this action would be to make the postal system a self-contained unit providing a direct market for government bonds; and commercial banks would naturally offer opposition to this action of the Government.

The other legislative measures that are in the forefront of American politics and business to-day are the Industrial Recovery Bill, Railway Co-ordination Bill and the Johnson Security Bill. The first mentioned occupies an important place in the President's programme of engineering, better conditions of trade and industry. The underlying idea is to render possible the co-operation amongst industrial units through a virtual repeal of the anti-trust laws. It provides for the appointment of a federal supervisor to see that re-organisation is carried out. Among its provisions, the Bill contains an amendment to income tax laws which has directly resulted from the Morgan Bank enquiry. Under the amendment capital losses will not be deducted from income tax assesment from this year. It also provides for an increase in income tax and petrol tax rates and for the taxation of corporate dividends to provide some of the funds of the employment programme of the Administration. The Railway Co-ordination Bill, which is also passed through Congress, provides for further co-ordination with a view to eliminate wasteful competition between road and rail. The Johnson Securities Bill provides for a strict federal supervision of all issues, domestic and foreign, in order to prevent frauds. The Securities Bill has caused great confusion. Section 12 of the Act, which provides that "any person who sells a security, which includes an untrue statement of material facts, or fails to state a material fact, shall be liable to the person purchasing such security from him," has created intense nervousness amongst brokers and investment houses. The selling of securities has been stopped pending the receipt of competent legal advice as to the exact scope of this provision. It is believed that the scope of the provision is too wide to leave ordinary business as a safe venture.

The cheapening of short term money rates has received further emphasis during the week. Last week, the Federal Reserve Bank of New York reduced its official rates to 2½ per cent. on Friday. The Federal Reserve Bank of Boston has cut its rediscount rates from 3½ per cent. to 3 per cent. The Chicago Reserve Bank has also followed suit. All this is a clear indication of the fact that the Federal Reserve System is determined to support the Government in its policy of cheap money. It is significant that during the week banks have also effected reductions in the official rates.

GERMANY.

FOREIGN DEBTS MORATORIUM.

The Conference of the Reichsbank with the representatives of foreign holders of German bonds has held the stage during the week. With the convention of this meeting Dr. Schacht has succeeded in the first task he undertook after he succeeded Dr. Luther at the presidency of the Reichsbank. It was the object of the hero of the stabilisation that the real financial position of Germany should be disclosed in all its seriousness to the eyes of the foreigners. Two things stood in the way of the statement of the Reichsbank reflecting adequately its true position. One was the continuance of the international credit extended to the Bank, by the Bank for International Settlements. The other was the foreign obligations of the Gold Discount Bank. As regards the first, Dr. Schacht insisted on the loan being returned; and as regards the second, he carried out changes in the statement of the Reichsbank so as to make allowance for the liabilities of the Gold Discount Bank. The effect of all this was to reduce the reserve cover of the Bank from about 25 per cent., at which it had stood formerly, to about 8 per cent. Such a position, considered in relation to the increasing decline in Germany's foreign balance of payments, was an incontestable case for special treatment of Germany's obligations abroad.

Dr. Schacht's Statement.

This position was explained at length to the representatives of Britain, America, France, Holland, Sweden and Switzerland assembled in the large hall of the Reichsbank building. Dr. Schacht said at the outset that the Standstill Agreement was no solution to the present crisis in Germany as it only postponed the evil day. The German currency has been kept stable, not because of any vitality in the economic system, but by means of a strict control of currency dealings. The foreign credits had been contracted by Germany, partly for the purpose of the Reichsbank reserves, but mainly to cover the cost of the raw material and to finance export nndertakings. But

or to any of the Company's other offices as undernoted:

AGRA, AJMER, AHMEDABAD, ALLAHABAD, AMBALA, BANGALORE, BAREILLY, BEZWADA, BHOPAL, COLOMBO, DACCA, DELHI, GAUHATI, JALGAON, KARACHI, KUALA LUMPUR, LAHORE, LUCKNOW, MADRAS, MANDALAY, MARCARA, MOMBASA, NAGPUR, PATNA, POONA, RAIPUR, RAJSHAHI, RANCHI, RANGOON, RAWALPINDI, SINGAPORE, SUKKUR, TRICHINOPOLY, TRIVANDRUM, VIZAGAPATAM

of these credits, nearly half had been utilised for the payment of reparations. And the other half has proved not only unhelpful but positively injurious, in as much as the trade barriers and the state, to which world trade has been reduced, have rendered it impossible for Germany to repay the credits in the only form in which they can be repaid, namely goods and services. "Now that Germany's currency cover in gold and foreign currencies", said Dr. Schacht, "has dropped to 8 per cent., the situation has become so grave that further withdrawals must result in inflation of catastrophical consequences."

Reichsbank Returns.

In fact, even as he spoke, the figure had dropped from 8.3 per cent. to a fresh low level of 7.5 per cent. according to the statement of the Reichsbank made up to 31st May last. This is probably due to the usual month-end currency demand, on account of which the notes circulation has risen by 223 million reichsmarks. The domestic bill portfolio is also for the same reason up by RM 270.6 million. The gold holding is practically unchanged at RM 372.3 million but foreign exchange holdings are down by RM 9.5 million.

Conference Communique.

This should, doubtless, have weighed a great deal with the representatives of foreign creditors. The unanimous *communique* which was issued by the German conference on June 2 shows that Dr. Schacht has carried conviction to those whom his present policy primarily affects in an adverse manner. It is evident from the *communique* that there had been a free exchange of all relevant facts and arguments. The Reichsbank, it is said, "has submitted voluminous material bearing on the German trade *devisen* and debt position" and the representatives of the creditor groups have for their part, "presented the facts of their particular situation in order that the effect of any reduction of transfer below full debt requirements might be fully appreciated by the German authorities". It was recognised as a result of the recommendations that, if further reductions occurred in the reserves of the Reichsbank, "the exercise by the Bank of the full functions of a central bank may be impaired" and that "it is preferable that these reserves are gradually increased thereby fortifying the Reichsbank in its successful endeavours to maintain the stability of the German currency". It was also recognised, according to the *communique*, that the declining surplus from Germany's foreign trade services makes it necessary to consider the protection and extension of Germany's reserves of foreign exchange.

The best testimony to the goodwill that has been created, continued and furthered in the recognition that the "Standstill agreements are a vital contribution to the maintenance of Germany's international trade and credit" and that "the maintenance of relations between the parties to those agreements is in the interests of all creditors". Perhaps there is no atmosphere more conducive to a sense of the solidarity of world trade and economy than that which prevailed in the Berlin Conference. The facts of the situation left no room for doubt that the resumption of payments to foreign creditors in their own respective currencies would be impossible, unless Germany is enabled to expand her foreign trade and realise a bigger and a more stable balance of trade in her favour. The *communique* significantly observes :

> "In view of the important position of the German economic system in world affairs and the magnitude of its debt problem to be dealt with, it is assumed that one of the most important and urgent objectives of the World Economic Conference will be to facilitate a prompt and permanent solution of the German transfer problem."

Touch with Creditors.

More than this, it was in the nature of things impossible for Germany or her creditors to accomplish at the moment. No definite proposals were put forward by the creditors; for the avowed purpose of their sojourn to Berlin was to get into contact with the President of the Reichsbank and to study and appraise the volume of evidence in favour of declaring a partial moratorium. All that the creditors were particular about was that "whatever action the Reichsbank might feel obliged by circumstances to take, the Reichsbank will use every effort not only to maintain contact with the various creditor groups, but also to facilitate joint consideration of the situation with the creditors, with the intention of reaching mutual understanding and agreement."

Proposed Reichsmark Bonds.

Speculation in financial circles is trying to make good what the Conference has, of necessity, omitted. According to the *Borsen Courier* a scheme which is receiving the special attention of the Conference is the issue of reichsmark bonds which would be handed over instead of foreign currencies to meet the services of Germany's foreign debts. The bonds, it is said, would bear interest at 4 per cent. per annum. The distinct feature of this scheme is the extension of the guarantee of the Reich to Germany's commercial obligations. Payments would, however, be made in German currency. The merits and demerits of this scheme are not hard to divine. The holders of Germany's commercial obligations will, no doubt, set a high value on the guarantee of the Reich, where formerly they had only the individual commercial interests to account to them. But the scheme more than offsets this advantage by its suggestion of con-

TALKING ABOUT INVESTMENTS

—the claims of a profit-sharing Endowment Assurance Policy merit most careful consideration. Such a Policy for, say, Rs. 10,000 creates a capital which can never depreciate, gives full protection for wife and child from the moment the first premium is paid, forms an acceptable security to your Banker for the purpose of an over-draft, and materially increases in amount as time passes.

Life Assurance receives practical Government encouragement in the shape of Income Tax rebate. It is the only form of Investment favoured in this way by Government. You will be wise to take full advantage of it.

The Standard Life Assurance Company is the Pioneer of Life Assurance in India, and is a Mutual Company over 100 years old and with funds amounting to over £23,000,000. No Office in the world carries out its valuation on a more stringent basis, which means immense reserves and great bonus-earning capacity.

The Company's position is well summed up in the following extract from a recent article in the financial press:—

> "It is one of the outstanding life offices of the world; and every year its accounts carry fuller evidence of thorough soundness from top to bottom, which means a high level of security and a high rate of profit for the policyholders."

Write-to day stating date of birth, when full particulars will be sent to you, without obligation on your part.

Air Mail Week.

verting the loans in foreign currencies to obligations in Reichsmarks. While at other times this conversion would not be regarded as involving any dangerous risks, the present atmosphere of international finance is hardly calculated to secure the easy or unanimous acceptance of this change.

Foreign Fears of Inflation.

It is a question whether Dr. Schacht will be able to preserve for all time his present abhorrence of all inflationist measures. It is possible that the lessons of the pre-stabilisation days are still fresh in his memory. It is also possible that his anxiety to secure the consent of Germany's foreign creditors has induced the President of the Reichsbank to aver again and again that" inflation would never come again and that there was no ground for unrest regarding the German currency". It is all well for Dr. Schacht to assert that the Reichsbank "recognises the problem and knows how it must be solved and has the courage and determination to solve it". But the foreign creditors might well ask: What about the schemes of Government expenditure on new projects? Already, the Nazi Government are thinking of ways and means of satisfying, in some measure at least, the extravagant hopes that had been raised in the popular mind in order to ensure a wider support for their ascendency to power. Once the foreign liabilities had been converted to Reichsmarks, German currency policy might again take the reins in its mouth and run away. With such apprehensions, it is impossible that the Berlin Conference could come to any speedy or definite solution. The Conference is again to meet in London on June 12th, and it is a great gain that it will meet with the recollection of a close and intimate understanding between the two parties concerned.

AUSTRALIA

Australia has taken up the first big step in lightening the load of her foreign indebtedness.

On Tuesday, the underwriting was duly arranged for the issue of £11,409,965 Commonwealth of Australia 3½ per cent. Stock of 1937-38, which is offered at 99 per cent. Holders of the new South Wales, South Australia and Tasmania 6½ per cent. Stocks of 1930-40 may exchange for the new stock.

The terms of the conversion are: Holders who convert will receive on August 1 next (*a*) a cash payment of £1 per cent., representing the difference between the price of the new 3½ per cent. stock and the redemption price of the 6½ per cent. stock, (*b*) six months' interest at the rate of 6½ per cent. per annum due on that date, and (*c*) an interest payment of 5s. per cent., less tax, representing the difference for one month (August 1, 1933, to September 1, 1933) between interest at the rate of 6½ per cent. on the old loan and at the rate of 3½ per cent. on the new. The first full six months' interest on the new 3½ per cent. stock will be paid on February 1 next. The unconverted portion of the loans will be paid off in September first next at par together with one month's interest from August to September 1, 1933.

The new loan is a combined cash and conversion issue. The lists for conversion remain open till June 10. The Commonwealth Bank of Australia is at the same time authorised to receive cash subscriptions to an amount sufficient to make up, with the stock converted, the total of £11,409,965. The new loan gives a flat yield of £3-10-9 per cent. or approximately £3-15 per cent. if held to final maturity on February 1, 1938. The statement of the Chancellor of the Exchequer has made it clear that the Australian loan would be a short-dated issue, and it was

WHY YOU SHOULD SHOP AT CURRIMBHOY'S

There are three chief reasons why you should shop at Currimbhoy's. Firstly, you can be certain that the very best quality cloth is being supplied to you because you can rely on the famous Currimbhoy group of mills where the cloth is made. Secondly, you are supporting Indian Industries when you purchase at Currimbhoy's Cloth Depot. Thirdly, Currimbhoy's fabrics are unequalled in India for their durability and lasting colours.

BUY SWADESHI FABRICS

C. I.

surmised in market circles that it would be 3½ per cent. 5 year bonds at 99½ or even par. That it was priced as low as 99 makes it certain that the issue would be very popular and rapidly taken up. It is believed that, as in the case of Great Britain and latterly of India, the task of conversion will be tackled only by stages.

MONETARY DICTATORSHIP IN AMERICA

FULL TEXT OF "INFLATION AMENDMENT" HOW ROOSEVELT MAY RAISE PRICES

The full text of the Thomas Inflation Amendment to the Farm Bill, which passed through the United States Congress on May 10, runs as follows:—

Sec. 43. Whenever the President finds, upon investigation, that (1) the foreign commerce of the United States is adversely affected by reason of the depreciation in the value of the currency of any other Government or Governments in relation to the present standard value of gold, or (2) action under this section is necessary in order to regulate and maintain the parity of currency issues of the United States, or (3) an economic emergency requires an expansion of credit, or (4) an expansion of credit is necessary to secure by international agreement a stabilisation at proper levels of the currencies of various Governments, the President is authorised, in his discretion—

Open Market Operations

(*a*) To direct the Secretary of the Treasury to enter into agreements with the several Federal Reserve banks and with the Federal Reserve Board, whereby the Federal Reserve Board will, and it is hereby authorised to, notwithstanding any provisions of law or rules and regulations to the contrary, permit such reserve banks to agree that they will, (1) conduct, pursuant to existing law, throughout specified periods, open market operations in obligations of the United States Government or corporations in which the United States is the majority stockholder, and (2) purchase directly and hold in portfolio for an agreed period or periods of time Treasury bills or other obligations of the United States Government in an aggregate sum of $3,000,000,000 in addition to those they may then hold, unless prior to the termination of such period or periods the Secretary shall consent to their sale.

No suspension of reserve requirements of the Federal Reserve banks, under the terms of section 11 (*c*) of the Federal Reserve Act, necessitated by reason of operations under this section, shall require the imposition of the graduated tax upon any deficiency in reserves as provided in said section 11 (*c*). Nor shall it require any automatic increase in the rates of interest or discount charged by any Federal Reserve bank, as otherwise specified in that section.

The Federal Reserve Board, with the approval of the Secretary of the Treasury, may require the Federal Reserve banks to take such action as may be necessary, in the judgment of the Board and of the Secretary of the Treasury, to prevent undue credit expansion.

New Note Issue Authorised

(*b*) If the Secretary, when directed by the President, is unable to secure the assent of the several Federal Reserve banks and the Federal Reserve Board to the agreements authorised in this section, or if operations under the above provisions prove to be inadequate to meet the purposes of this section, or if for any other reason, additional measures are required in the judgment of the President to meet such purposes, then the President is authorised—

(1) To direct the Secretary of the Treasury to cause to be issued in such amount or amounts as he may from time to time order. United States notes, as provided in the Act issued in such denominations as he deems advisable to the total number of dollars for which such silver was accepted in payment of debts. Such silver certificates shall be used entitled "An Act to authorise the issue of United States notes and for the redemption of funding thereof and for funding the floating debt of the United States," approved February 25, 1862, and Acts supplementary thereto and amendatory thereof, in the same size and of similar colour to the Federal Reserve notes heretofore issued and in denominations of $1, $5, $10, $20, $50, $100, $500, $1,000, $10,000, but notes issued under this subsection shall be issued only for the purpose of meeting maturing Federal obligations to repay sums borrowed by the United States and for purchasing United States bonds and other interest-bearing obligation of the United States: *Provided*, that when any such notes are used for such purpose the bond or other obligation so acquired or taken up shall be retired and cancelled.

Such notes shall be issued at such times and in such amounts as the President may approve, but the aggregate amount of such notes outstanding at any time shall not exceed $3,000,000,000. There is hereby appropriated out of any money in the Treasury not otherwise appropriated, an amount sufficient to enable the Secretary of the Treasury to retire and cancel 4 per centum annually of such outstanding notes, and the Secretary of the Treasury is hereby directed to retire and cancel annually 4 per centum of such outstanding notes.

Such notes and all other coins and currencies heretofore or hereafter coined or issued by or under the authority of the United States shall be legal tender for all debts public and private.

Reduction of Dollars Gold Content

(2) By proclamation to fix the weight of the gold dollar in grains nine-tenths fine and also to fix the weight of the silver dollar in grain nine-tenths fine at a definite fixed ratio in relation to the gold dollar at such amounts as he finds necessary from his investigation to stabilise domestic prices or to protect the foreign commerce against the adverse effect of depreciated foreign currencies, and to provide for the unlimited coinage of such gold and silver at the ratio so fixed, or in case the Government of the United States enters into an agreement with any Government or Governments under the terms of which the ratio between the value of gold and other currency issued by the United States and by any such Government or Governments is established, the President may fix the weight of the gold dollar in accordance with the ratio so agreed upon, and such gold dollar, the weight of which is so fixed, shall be the standard unit of value, and all forms of money issued or coined by the United States shall be maintained at a parity with this standard, and it shall be the duty of the Secretary of the Treasury to maintain such parity, but in no event shall the weight of the gold dollar be fixed so as to reduce its present weight by more than 50 per centum.

Sec. 44. The Secretary of the Treasury, with the approval of the President, is hereby authorised to make and promulgate rules and regulations covering any action taken or to be taken by the President under subsection (*a*) or (*b*) of section 43.

Silver in Liew of War Debts

Sec. 45. (*a*) The President is authorised, for a period of six months from the date of the passage of this Act, to accept silver in payment of the whole or any part of the principal or interest now due, or to become due within six months after such date, from any foreign Government or Governments on account of any indebtedness to the United States, such silver to be accepted not to exceed the price of 50 cents. an ounce in United States currency. The aggregate value of the silver accepted under this section shall not exceed $200,000,000.

(*b*) The silver bullion accepted and received under the provisions of this section shall be subject to the requirements of existing law and the regulations of the mint service governing the methods of determining the amount of pure silver contained, and the amount of the charges or deductions, if any, to be made, but such silver bullion shall not be counted as part of the silver bullion authorised or required to be purchased and coined under the provisions of existing law.

Issue of Silver Certificates

(*c*) The silver accepted and received under the provisions of this section shall be deposited in the Treasury of the United States, to be held, used, and disposed of as in this section provided.

TRANS-ADJAI COLLIERIES, LTD.

NOTICE

NOTICE is hereby given that the Twenty-Second Half-Yearly Ordinary General Meeting of the above-named Company will be held at the Registered Office, No. 12, Mission Row, Calcutta, on Friday, the 30th day of June, 1933, at 3-20 p.m. for the purpose of receiving and considering the Directors' Report, the Statement of Accounts and Balance Sheet for the half-year ended 31st March, 1933, and to transact any other ordinary business of the Company.

The Share Transfer Books of the Company will be closed from the 23rd to the 30th June, 1933, both days inclusive.

By Order of the Board,
MARTIN & CO.,
Managing Agents.

Dated Calcutta, the 16th June, 1933.

STATISTICAL INFORMATION

INDIAN CUSTOMS REVENUE.

According to returns received in the Department of Commercial Intelligence and Statistics, the grand total of gross Indian Sea and Land Customs Revenue (excluding salt revenue) collected during the month of May, 1933, amounted to Rs. 4,04 lakhs as against Rs. 3,97 lakhs in the preceding month and Rs. 4,15 lakhs in May, 1932. The total revenue realised in the two months ended May, 1933, was Rs. 8,01 lakhs as compared with Rs. 8,54 lakhs in the same period last year. To this import duties contributed Rs. 5,92 lakhs, export duties Rs. 61 lakhs, excise duties on motor spirit Rs. 87 lakhs and on kerosene Rs. 52 lakhs and Land Customs and miscellaneous Rs. 9 lakhs. Increases were noticeable in import duties on cotton piecegoods, silk and artificial silk piecegoods, liquors, motor cars, wood pulp and toys, games and sports goods, in export duties on jute, raw, and in excise duties on motor spirit. On the other hand, import duties on sugar, raw cotton, kerosene, iron and steel, tobacco unmanufactured, artificial silk yarn and thread, motor spirit, silver, dyes and colours, cotton yarn and thread and pneumatic rubber tyres and tubes and export duties on jute, manufactured and excise duties on kerosene and land customs receipts showed noticeable decreases. The protective special duties on private imports during the two months ended May, 1933, aggregated Rs. 2,06 lakhs. The duties on Government stores inclusive of protective duties collected thereon, amounted to Rs. 2 lakhs, as compared with Rs. 7 lakhs in the corresponding period of the preceding year.

FOREIGN TRADE OF KARACHI.

The statistics of the foreign trade of the port of Karachi for May, 1933, issued by the Collector of Customs, show that the total value of import (merchandise) amounted to Rs. 1.15 crores, an increase of Rs. 3 lakhs and that of exports to Rs. 94 lakhs, a decrease of Rs. 4 lakhs as compared with the figures for May, 1932. The progressive totals for the two months, April and May, 1933, show an increase of Rs. 9 lakhs or 4 per cent. under imports but a decrease of Rs. 2 lakhs or 1 per cent. under exports.

Comparative figures of the principal imports and exports for May, 1932, and 1933, are given below:—

Imports.

In May, 1933.

	Quantity.	Value.
	Tons.	Rs.
Cotton manufactures	...	38,21,593
Vehicles	...	4,58,535
Liquors	...	3,68,330
Woollen goods	...	2,94,696
Oils	...	10,83,413
Cotton, twist and yarn	...	13,510
Sugar	4,001	4,46,633
Machinery and mill work ...	...	6,80,558
Metals and ores	...	6,16,423

Increase or decrease as compared with May, 1932.

	Quantity.	Value.
	Tons.	Rs.
Cotton manufactures	...	+1,86,410
Vehicles	...	+1,79,762
Liquors	...	+1,31,074
Woollen goods	...	+1,19,410
Oils	...	+38,694
Cottons, twist and yarn	...	+4,642
Sugar	−4,960	−4,66,278
Machinery and mill work ...	...	−2,20,833
Metals and ores	...	−1,85,379

The increase under cotton manufactures occurred in receipts of grey and white goods. Imports of grey goods amounted to 2¾ million yards valued at Rs. 3 lakhs as against 4,56,000 yards valued at Rs. 79,000, while those of white goods totalled 15½ million yards valued at Rs. 24 lakhs as against 12½ million yards valued at Rs. 22 lakhs in May, 1932. Imports of coloured goods at 4¾ million yards valued at Rs. 9 lakhs showed a decrease of nearly one million yards in quantity and Rs. 3 lakhs in value. The total imports of cotton piecegoods during the two months, April and May, 1933, amounted to 47½ million yards valued at Rs. 77 lakhs showing an increase of 17 per cent. in quantity and 4 per cent. in value as compared with the corresponding period last year. The share of the United Kingdom in the total imports of cotton piecegoods during the first two months of the current official year was 39¼ million yards valued at Rs. 66 lakhs, an increase of 18 per cent. in quantity and 7 per cent. in value, while that of Japan was 8¼ million yards valued at Rs. 11 lakhs, an increase of 19 per cent. in quantity but a decrease of 3 per cent. in value as compared with imports in the corresponding period of 1932-33. The increase under vehicles occurred mainly in receipts of motor cars from the United Kingdom and cycles and parts from the United Kingdom and Japan. The improvement under woollen goods was most noticeable in receipts of woollen piecegoods from France and Belgium. Imports of sugar, on the other hand, showed a decrease which occurred in receipts from Java. The total quantity of sugar imported during the two months, April and May, 1933, was 12,220 tons as against 14,301 tons in the corresponding period last year. Reduced arrivals of electrical machinery from the United Kingdom mainly accounted for the decline in imports of machinery during the months under report. The decrease under metals occurred notably in arrivals of tin plates from the United Kingdom.

Exports.

In May, 1933.

	Quantity.	Value.
	Tons.	Rs.
Rapeseed	4,256	4,66,082
Wool, raw (Indian and Foreign) ...	709	4,88,427
Wheat flour	893	93,601
Barley	15	925
Cotton, raw	12,272	60,52,902
Skins, raw	681	7,23,877
Hides, raw	156	87,819
Wheat	28	2,709

Increase or decrease as compared with May, 1932.

	Quantity.	Value.
	Tons.	Rs.
Rapeseed	−13,196	−18,26,628
Wool, raw (Indian and Foreign) ...	+61	−3,11,960
Wheat flour	−1,297	−1,36,574
Barley	−1,415	−95,699
Cotton, raw	+3,623	+19,42,251
Skins, raw	+149	+2,54,738
Hides, raw	+38	+30,035
Wheat	+22	+2,249

The decrease under rapeseed was due to Italy having made no purchases during the month under report as against an export of 13,901 tons valued at Rs. 18 lakhs in May, 1932. Shipments of wheat flour decreased as the result of reduced purchases by Anglo-Egyptian Sudan and Arabia. The drop in exports of barley occurred in shipments to Germany. Exports of cotton, on the other hand, showed an increase of 3,623 tons which was most noticeable in shipments to Japan. The total quantity of cotton exported during the first two months of the current official year was 28,746 tons (160,980 bales) as against 16,425 tons (91,979 bales) in the corresponding period of 1932-33. The increase in exports of raw skins occurred mainly in shipments of goat skins to the United States of America.

COMPANY REPORTS

ASSAM OIL CO.

A decrease in net profits of £176,158 to £75,997 is reported for 1932 the Company, which is controlled by Burmah Oil Company. The Assam Company has properties at Digboi (where oil is produced) and at Makum, Assam. Provision of £200,000 was again made for depreciation, but the tax reserve allocation in 1931 of £60,000 is not repeated. The loss carried forward is reduced from £153,502 (against £345,657) to £77,505.

With crude supplies more than ample to serve the full designed capacity of the refinery, throughout had nevertheless to be restricted by reason of competition in the Indian market from foreign oil imports. Arrangements were made at the end of the year to resume testing operations at one of the outside areas. Stocks of stores appear at £294,193 (against £329,698) and stocks of crude oil, etc., at £379,445 (£352,682).

MIM TEA CO., LD.

Synopsis of Balance Sheet:

Debts	...	4,816	Outlay	...	2,873
Profit & Loss	...	3,899	Outstandings	...	3,677
			Cash & Invests.	...	83,760
Total	...	2,58,715	Total	...	2,58,715

Extracts from Directors' Report:

Report relates to season 1932.

Revenue Account shows a profit of Rs. 1,017-6-4, and after making sundry adjustments and providing for depreciation there remains Rs. 3,899-4 at credit of Profit and Loss Account, which we recommend be carried forward. The sum shown previously at credit of Equalisation of Dividend Fund have been merged with the Reserve Fund.

A crop of 1,170 maunds was secured and realized an average of annas 11-11 per lb. comparing with a crop of 1,221 maunds last ear for which an average of annas 13-6 per lb. was obtained. Severe damage was done by hail storms in the early part of the year resulting in considerable loss of leaf. Growing conditions, however, improved materially during the latter part of the season.

Estimates for the current season provide for a crop of 1,100 maunds on a basis of restriction, to cost Rs. 52,077 at the Garden and Rs. 21,566 in Calcutta.

The planted area remains unaltered at 445½ acres. The renovations carried out during recent years have resulted in a substantially improved condition of the garden.

SYLHET TEA CO., LD.

Crop harvested for 1932, amounted to 338,080 pounds, against estimate of 320,000 lb. Yield in 1931 was 310,480 lb. Revenue amounted to £9,186, and expenditure to £9,112, showing profit of £74. On transfer of this sum to profit and loss account, which has also received £190 for interest, £751, balance of taxation reserve no longer required, an available balance onf £996 remains. Directors recommend dividend of 2½ per cent., less tax, absorbing £375, leaving £621 to be carried forward. Cost per pound was 6.47d. (1931 7.68d.) and average sale price 6.52d. per pound (6.63d.). Al crop of about 3,300 maunds is estimated for 1933, based on proposals of control of exports recommended by Indian Tea Association.

EAST INDIA AND CEYLON TEA CO., LD.

Loss for 1932, £10,313 (against £7,494 for 1931). After deducting £106 brought in from the previous accounts and £5,622 tranferred from taxation reserve, a debit balance of £4,585 remains to be carried forward. The tea crop for the season amounted to 1,832,695 lb., (against 1,832,319 lb.): the quantity sold was 1,752,013 lb., which realized a gross average price of 7.50d. per lb., approximate London equivalent (against 9.22d.). The rubber crop amounted to 264,900 lb., and the gross price realized was 2.05d. per lb., approximate London equivalent Floating assets, £20,558; current liabilities £13,833.

LEBONG TEA CO., LD.

The crop secured in 1932, was the smallest obtained over a number of years, being only 658,237 lb., (against 706,246 last year). The average price realized was 15.08d. per lb. (against 18.31d.). Operations for the year resulted in a loss of £1,328 (against a profit of £18,425), which reduces the sum carried forward to £4,352. No dividend is recommended (against 25 per cent.).

CUTTACK ELECTRIC SUPPLY CO., LD.

Synopsis of Balance Sheet:

Liabilities		Rs.	Assets.		Rs.
Capital	...	4,50,000	Block (nett)	...	4,08,431
Reserves	...	23,328	General Charges etc.	...	28,342
Debts	...	75,031	Stocks	...	25,410
			Outstandings	...	9,868
			Cash	...	5,147
			Profit & Loss	...	71,161
Total	...	5,48,359	Total	...	5,48,359

Extracts from Directors' Report:

Report covers the year ended 31sft December, 1932.

Accounts.—The Revenue Account shows the working of the year to have resulted in a loss of Rs. 29,112-12-2 as compared with a loss of Rs. 29,284-13-1 for the previous year. After adding the loss for the year to the balance of Rs. 42,078-0-9 brought forward from the previous year and deducting a sum of Rs. 30 being the profit realised on the sale of Government Promissory Notes there is a balance of Rs. 71,160-12-11 to be carried forward at debit of Profit and Loss Account.

Progress.—The supply of electricity has been satisfactorily maintained. General trading conditions in Cuttack showed no improvement during the year under review and the Directors regret to report that the Company's business has not developed to the extent anticipated. With a view to securing additional consumers and a consequent increase in revenue a canvasser has been appointed and the number of consumers connected to the Company's mains at this date is 348. Your Directors have carefully considered the question of expenditure and economies have been effected recently which will result in a reduction in the most of running the Station. It has been recommended that Orissa should be formed into a separate Province under the New Constitution and if this is carried out it is likely that Cuttack will be the Capital.

There were 317 consumers connected to the Company's mains at the close of the year as compared with 256 at the close of the previous year.

MADRAS ELECTRIC SUPPLY CORPORATION, LD.

After providing for Debenture interest, taxation and allocating £40,000 (against £35,000) to depreciation and renewals fund, the net profit for 1932 amounted to £77,602 (against £66,657 for 1931). In May last year the capital was increased by the issue of 125,000 Five-and-a-half per cent. Preference shares, at 22s. a share, and 125,000 Ordinary shares at 25s. a share. The dividend for the year on the Ordinary shares is to be maintained at 8 per cent., tax free, with a final payment of 5½ per cent., but the amount absorbed by the dividend is larger at £44,791, against £37,856, owing to the new capital. The preference dividend also absorbs a larger amount at £23,130, against £17,974. No allocation is this time to be made to general reserve (against £10,000), but the balance forward is increased from £11,452 to £21,193.

Units sold increased from 23,984,372 in 1931 to 29,595,764 and the number of consumers connected rose from 8,024 to 8,530.

The Company again received a dividend of 5 per cent., free of tax, from its holding of Ordinary shares in the Tramways Company.

ELGIN MILLS COMPANY.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital ...	32,00,000	Block (net) ...	33,31,055

Profit ...	85,359	Cash balance ...	11,901
Total ...	67,64,338	Total ...	67,64,338

Extracts from Directors' Report:

Audited accounts relate to the half-year ended March 31, 1933, showing a profit on revenue and account of Rs. 1,08,425 ; add credit balance carried forward on September 30, 1932, Rs. 36,934; total Rs. 1,45,359. Deduct amount placed to debenture sinking fund, Rs. 25,000, and amount placed to depreciation, Rs. 35,000, leaving a balance at credit of profit and loss account of Rs. 85,359. It is recommended that this amount be disposed of as follows:—To payment of a dividend on the preference shares of 4 per cent. for the half-year to September 30, 1931, free of income-tax, Rs. 44,000 ; carry forward, Rs. 41,359. Prices obtainable for cloth have been unfavourably affected by the increasing competition from imports of Japanese goods at very cheap rates. The recent installation of new ring frames has enabled the company to improve the quality of its weaving yarns and, therefore, notice was given of a new basis of piece work rates for cloth to come into force from March 1. Work was carried on normally until the third week of March, when a small minority of the workers started to incite the men to stop work. On March 30 the men generally ceased work and it was necessary to close the mills. The directors, however, are pleased to report that work was resumed on May 8, the workers returning unconditionally.

CAWNPORE TEXTILES.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital ...	19,06,215	Block (nett) ...	19,45,112
Debentures ...	5,12,187	Stores ...	54,282
Reserves ...	51,029	Stocks ...	6,04,209
Loans ...	2,05,629	Outstandings ...	70,743
Debts ...	1,68,232	Advances ...	21,098
		Investments ...	1,758
		Cash balance ...	175
		Loss ...	1,45,915
Total ...	28,43,292	Total ...	28,43,292

Extracts from Directors' Report:

Audited accounts cover the half-year ended March 31, 1933, showing a loss on revenue account of Rs. 27,126. This amount has been carried to profit and loss account which now shows a balance at debit of Rs. 1,45,915. The demand for yearn has been irregular and market rates have given no margin of profit. The company has had to meet increasing competition in its hosiery business from Japanese imports which has unfavourably affected prices. The managing agents have agreed to forego Rs. 1,500 per mensem of their allowance for the past half-year. Raw materials have been taken at cost and manufactured goods at or under market value. Mr. H. A. Wilkinson has been appointed managing agents' representative on the board in place of Mr. S. H. Taylor who has retired from India.

HYDERABAD (DECCAN) CO., LD.

The accounts for the 16 months ended 30th April show a net profit of £44,988. This, however, is after crediting two dividends of 5 per cent. each received on the shareholding in the Singareni Collieries Company, representing distributed earnings from the working of the collieries for the two years 1931 and 1932. The Hyderabad Company's main income is derived from this shareholding. A dividend of 2s. a share or 3½ per cent., was paid in May last year. It is now proposed to pay a further dividend of 2s. a share and to place £1,683 to reserve, the balance forward then showing little change at £4,002 (against £5,496).

BOMBAY, BARODA AND CENTRAL INDIA RAILWAY.

The Directors recommend, in addition to the half-year's guaranteed interest of 1½ per cent., a final dividend of 1½ per cent., making a total distribution of 6 per cent. for the year to 31st March (the same as for the previous year).

BARAREE COKE COMPANY.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital ...	12,00,000	Block (nett) ...	9,69,078
Reserves ...	1,00,000	Stores ...	89,964
Deposits ...	10,492	Stocks ...	1,72,978
Unpaid dividends	1,203	Outstandings ...	96,372
Debts ...	49,113	Cash balance ...	1,29,262
Profit ...	96,841		
Total ...	14,57,649	Total ...	14,57,649

Extracts from Directors' Report:

Audited accounts cover the half-year ended March 31, 1933. The profit for the half-year is Rs. 54,266 to which has to be added Rs. 84,660 brought forward from the last half-year, making Rs. 1,38,926. After providing for depreciation Rs. 42,085 the balance for disposal is Rs. 96,841. It is proposed to deal with this amount as follows:—Pay a dividend of 2 per cent. (being at the rate of 4 per cent. per annum), Rs. 24,000 ; carry forward to next half-year, Rs. 72,841. Manufacture and despatches during the half-year were as follows:—Manufactured—coke 23,419 tons, tar and pitch, 1,000 tons, sulphate of ammonia, 390 tons, benzol, 33,211 gallons; Despatched—coke, 18,918 tons, tar and pitch, 785 tons, sulphate of ammonia, 396 tons, benzol 30,361 gallons. The sulphuric acid plant was shut down from January 12, to March 20, 1933, for general overhaul.

POOBONG TEA COMPANY.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital ...	3,00,000	Block (nett) ...	2,85,000
Reserves ...	2,40,000	Stores ...	10,108
Debts ...	3,286	Tea sales receivable	17,464
Profit ...	33,832	Advances ...	3,584
		Investments ...	2,01,333
		Cash and other balances ...	59,629
Total ...	5,77,118	Total ...	5,77,118

Extracts from Directors' Report:

Accounts relate to the year ended December 31, 1932, The result of the season's working is a profit of Rs. 4,225 which has been transferred to profit and loss account. After sundry adjustments there is a balance at credit of that account of Rs. 33,832. They recommend that a dividend of 5 per cent. be declared at the annual meeting leaving Rs. 18,832 to be carried forward. Crop weighed out at 1,693 maunds tea against 2,200 maunds estimated and 2,002 maunds in 1931. The short crop is due to hail damage and drought early in the season. The average selling price is 10 annas 1 pie per pound as compared with 10 annas 2 pies per pound the previous year. The total area under cultivation remains at 500½ acres. Estimates for 1933 provide for a crop of 2,200 maunds for an outlay of Rs. 96,308 including inland freight and sale charges.

BANSRA COAL CO., LD.

Extracts from Directors' Report:

Accounts of the company cover the year ended December 31, 1932. An assessed loss of 32,078 pounds of green leaf through hail damage was sustained in April 1932. The insured value recovered from the underwriters is credited in the accounts. The season's working resulted in a profit of Rs. 63,983. Receipts:—Nett proceeds of 235,072 pounds tea sold, partly estimated, Rs. 1,77,989; recovered from insurance company for hail damage Rs. 21,460; interest, Rs. 7,722; miscellaneous receipts Rs. 360; total Rs. 2,07,531. Expenditure:—On garden, Rs. 93,189; in Calcutta, Rs. 43,249; total Rs. 1,36,438; Surplus, Rs. 71,093; less commission to manager and managing agents, Rs. 7,109. After adjustment and writing off advances, Rs. 351, the profit and loss account shows a balance at credit of Rs. 48,505 which it is proposed to deal with as follows:—To payment of a final dividend of 10 per cent. making 20 per cent. for season 1932 (free of income-tax), Rs. 29,990; to carry forward Rs. 18,515. Assuming the scheme of regulation of exports and restriction of crop is agreed to, the estimates for 1933 provide for a crop of 248,000 pounds tea at a cost of Rs. 125,100 at 8 annas ¾ pies per pound.

Extracts from Director's Report:

Audited accounts relate to the half-year ended March 31, 1933. After providing the sum of Rs. 22,122 for depreciation the profit and loss account shows a nett loss for the half-year of Rs. 12,366 deducting amount at credit brought forward from last half-year, Rs. 2,388, leaves a debit balance of Rs. 9,978 which it is proposed to carry forward. They have again had to contend with increased cost of raw materials. Fortunately by the exercise of strict economy they have not only been able to offset this increase in cost, but also show a considerable improvement in the trading position. Further economies have been made during the current half-year, which should be reflected in their next account. A number of new kinds have been placed on the market and their volume of sales well maintained.

Extracts from Directors' Report:

Report covers the year ended 31st December, 1932.

Crop.—The crop harvested during the year amounted to 231,850 lb. against the original estimate of 170,000 lb. and revised estimate of 220,000 lb. The company had an excellent cropping season during the year with rainful very evenly distributed throughout the year and this mainly accounts for the very good crop obtained during the year. The yield per acre was 754 lb.

Cost of Production and Price.—The F. O. B. cost worked out at As. 3-9 per lb. and the "All in" cost including depreciation, debenture interest and all other expenses amounted to As. 4-10 per pound.

The nett price realised for tea was As. 5-3 per lb.

1932 Results.—The results of the year's working after paying Rs. 4,500 debenture interest, and Trustees fees and writing off Rs. 8,005-6-8 as depreciation, show a profit of Rs. 15,781-9-1 which together with Rs. 13,447-9 brought forward makes a total of Rs. 29,229-2-1.

The Directors recommend the payment of 5 per cent. dividend payable on 15th June, 1933, which will absorb Rs. 10,000 and the transfer of Rs. 5,000 to debenture redemption account and that the balance amount of Rs. 14,229-2-1 be carried forward to next year.

1933 Crop and Expenditure.—Estimated crop for 1933. 210,000 lb., estimated F. O. B. cost per lb. As. 4, estimated "All in" cost per lb. As. 5-3.

PHŒNIX ASSURANCE CO., LD.

The report for 1932, shows that in the Fire Department the net premiums, amounted to £2,915,272 (against £3,085,536 for 1931). Claims amounted to 54.5 per cent. and expenses (including taxes abroad) to 48.5 per cent. of the premiums, together absorbing £3,002,022. After adjusting the Reserve for unexpired risks a sum of £18,249 has been transferred from Profit and Loss. The fire funds amount to £1,166,500. For 1931 £88,457 was transferred to Profit and Loss.

In the Marine Department the net premiums amounted to £680,809 (against £709,444). The claims settled in respect of 1932 amounted to £213,110. The expenses (including taxes abroad) amounted to £127,933 and £30,000 (against £20,000) has been tranferred to Profit and Loss. The Marine funds amount to £716,578.

Net accident premiums amounted to £3,396,220 (against £3,673,078), and the claims and expenses (including taxes abroad) to £3,424,081. After adjusting the Reserve for unexpired risks a sum of £82,139 (against £110,455) has been transferred to Profit and Loss. The accident funds, excluding the reserve for outstanding claims, amount to £1,360,000.

In the sinking fund and capital redemption department the net premiums amounted to £169,905 (against £36,212). The sinking fund and capital redemption funds amount to £1,133,900.

New business in the Life Department was £3,583,932 (against £3,195,756), of which £148,159 (against £94,000) was re-assured with other companies. The life funds amount to £16,002,739.

The Profit and Loss Account shows a net sum of £133,890 (against £248,912) transferred from the underwriting accounts. Interest amounted to £504,001 (against £529,694). For dividends payable in 1933 £527,625 (against £518,831) has been set aside. The balance carried forward amounts to £1,322,372 (against £1,421,189). The Directors recommend a dividend of 14s. per share, less tax, payable in two instalments of 7s. each on 15th June, and 15th December next, being the same as that declared a year ago.

The total assets of the Company amount to £34,042,805.

The rate of exchange of $4.85 to the pound has again been used in connexion with business in the United States of America and Canada. If the rates of exchange current on 31st December, 1932, had been used in valuing the assets in the general funds the aggregate value would have been greater than the amount of such assets as set out in the balance-sheet without taking into account the investment and contingencies reserve.

SIEMENS BROTHERS AND CO., LD.

In their report for 1932, the Directors state that the volume of work passing through the shops during the year was substantially greater than in 1931 and the wages bill was higher, but owing to keen competition and the fall in prices the monetary value of the turnover showed a considerable reduction. The net profit for the year amounted to £224,011, compared with £243,469 for 1931. As already announced, a final dividend of 4 per cent. is recommended on the Ordinary shares, making 6½ per cent. for the year (against 7½ per cent.). The balance forward is increased by £9,761 to £3,81,916. The balance-sheet shows a large surplus of floating assets over current liabilities, the former totalling £2,038,826 (excluding interests in subsidiaries) and the latter £447,982.

BENGAL-NAGPUR RAILWAY.

The Directors have declared from the reserve an interim half-yearly dividend of ½ per cent. on the Ordinary stock (the same), payable on 1st July, making with the guaranteed interest of 1¾ per cent., then due, a total payment of 2 per cent.

TEZPORE-BALIPARA TRAMWAY COMPANY.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital ...	4,00,000	Block (nett) ..	4,87,240

Commission to local agents and staff	1,813	Traffic account ...	9,807
Debts ...	11,383	Cash and other balances ...	27,281
Profit ...	27,262		
Total ...	5,55,247	Total ...	5,55,247

Extracts from Directors' Report:

The audited statement of accounts for the half-year ended March 31, 1933, shows that the result of the half-year's working is a balance at credit of nett revenue account of Rs. 24,335, to which must be added Rs. 2,927 brought forward from the previous half-year, making a total of Rs. 27,262, which they propose to deal with as follows:—Pay a dividend at the rate of 6 per cent. per annum on the preference shares, Rs. 6,750 ; pay a dividend at the rate of 4 per cent. per annum on the ordinary shares. Rs. 3,500 ; transfer to replacements and renewals account, Rs. 3,000 ; transfer to reserve, Rs. 10,000 ; carry forward, Rs. 4,012. During the half-year under review, owing to general depression in trade, the total earnings were less by Rs. 5,799 than during the corresponding period of last year. Coaching earnings, however, were Rs. 980 better, which is satisfactory. Drastic economies were brought into effect early in the New Year and considerable reductions in staff were effected, which have resulted in a saving in expenditure of Rs. 18,582 as compared with the corresponding period of last year. The same economical method of working the railway will be continued. No new track is to be arranged for at the moment but provision is being made for new first class sleepers which are now available at greatly reduced rates as compared with those ruling hitherto. As soon as trade conditions improve, it will be necessary to continue the replacement of the track, and for this reason provision is being made under replacements and renewals accounts for the necessary expenditure.

SUN INSURANCE OFFICE LD.

The report for 1932, shows that the net fire premiums amounted to £2,352,323, compared with £2,454,739 in the previous year. Net claims paid and outstanding, including contributions to fire brigades, were £1,151,484, against £1,161,078. The credit balance of £249,929 (against £297,270), which includes net interest of £83,423 (against £84,058), has been transferred to Profit and Loss Account.

Net Accident premiums were £1,460,283 compared with £1,473,884 and the claims paid and outstanding were £835,201, again £834,614. The credit balance of £127,761 (against £90,135), which includes net interest of £36,778 (against £36,185), has been transferred to Profit and Loss Account.

In the Marine account the net premiums amounted to £608,034, compared with £567,269. The net claims paid and outstanding were £519,864 (against £455,789). The credit balance of £99,981 (against £71,408), which includes net interest of £29,981 (against £21,408), has been transferred to Profit and Loss Account.

Total interest for the year amounted to £260,085, of which £109,902 has been credited to Profit and Loss Account. The balance brought forward on Profit and Loss Account was 838,634. This, by the operations of the year, has been increased to £1,315,704, and from this amount there has been carried to pension fund £50,000, and £175,000 has been transferred to a Head Office premises account, leaving a balance of £1,090,704. An interim dividend of 1s. 3d. per share, less tax, was paid in January last, absorbing £114,375, and the Directors have declared a further dividend (being the 418th since the foundation of the Office) of 1s. 5d. per share, less tax, payable on 1st July, which will require a further sum of £129,625, leaving unappropriated £846,704. The dividend for 1931 was the same. The total funds of the Office amount to £7,237,336.

ROYAL INSURANCE CO., LD.

The accounts for the year 1932 show that in the Fire Department the net premiums amounted to £5,740,376, losses to £2,928,379, and that a profit of £281,385 has been carried to Profit and Loss Account. A sum of £1,000,000 having been transferred from the additional reserve in this department to general contingencies fund, the fire fund amounts to £5,796,150, equal to 101 per cent. of the premium. In the Life Department the new business was £3,852,929, and the total premiums, after deducting re-assurances, £1,915,574. The life and annuity funds amount to £24,529,238. In the accident and general departments the net premiums amounted to £5,061,028, the claims paid and outstanding to £3,071,555. A profit of £33,682 has been carried to Profit and Loss Account. The funds amount to £5,026,625, equal to 99 per cent. of the premiums. In the Marine Department the next premiums for the year 1932 amounted to £917,876, and the claims paid on account of that year to £254,893. The 1931 account has been closed, and a profit of £105,394 carried to Profit and Loss Account. The fund carried forward amounts to £1,546,967, equal to 168 per cent. of the 1932 premiums.

In addition to the underwriting profits of £420,461 from the fire, accident and marine departments, and £40,000 one-fifth of sharehalders' proportion of life profits for 1925-1929, the Profit and Loss Account has been credited with £155,789 from profit realized on sale of investments and £1,278,353 for interest not carried to other accounts. After providing for interest on Debenture stock and for final dividend for 1932 and other outgoings, a balance of £1,565,201 is carried forward. The total funds at the end of the year show an increase of £1,114,746 and amount to £43,503,486. An interim dividend of 3s. 3d. per share was paid in November last, and the Directors now recommend a final dividend of 3s. 3d. per share, payable on 30th May, making in all 6s. 6d. per share, less income-tax, for the year 1932, or the same as for the year 1931.

COMMERCIAL UNION ASSURANCE CO., LD.

The Company issued 7,246 New Life policies assuring £4,151,012, during 1932. The premium Income (Single and Annual) applicable to the net new business amounted to £223,751. The amount reassured with other offices was £165,149, the net amount retained being £3,985,863. The claims by death and maturity amounted to £1,040,424 and the Life Assurance Fund at the end of the year was increased by £1,334,154 to £20,600,869.

The quinquennial valuation has resulted in a total surplus (excluding Interim Bonuses already paid) of £2,041,673, of which the Directors have decided to divide £1,620,182. Of this sum £1,442,935 (in addition to £152,286 paid as Interim Bonuses during the Quinquennium) belongs to the Policy-holders and £177,247 to the shareholders. The amount carried forward undividend is £421,491.

In the Fire account the net premium amounted to £6,018,352 being a decrease of £297,863 as compared with the previous year. The claims paid and outstanding, amounted to £3,263,683. The Fire Insurance Fund now stands at £6,924,657.

The Marine premium income amounted to £587,098 being a decrease of £146,659 as compared with the previous year. The claims paid and outstanding amounted to £317,600. The sum of £150,000 has been transferred to Profit and Loss Account, leaving the Marine Insurance Fund at £1,201,877.

The Accident premium income amounted to £7,161,133 being a decrease of £684,473 as compared with the previous year. The claims paid and outstanding amounted to £4,128,222. The sum of £150,000 has been transferred to Profit and Loss Account, leaving the Accident Insurance Fund at £5,346,100.

From the balance of the Profit and Loss Account, amounting to £562,455, the Directors recommend the payment of a Final Dividend of ten Shillings and three Pence per share less Income-tax, which, with the Interim Dividend of ten Shillings and three Pence per share less Income-tax paid in November last, makes a total dividend for the year 1932, of one Pound and six Pence per share less Income-tax.

INDIAN AND GENERAL INVESTMENT TRUST, LD.

The net revenue for the year ended 30th April amounted to £24,614 (against £28,050 for 1931-32). As already announced, a final dividend of 7 per cent. is proposed on the Deferred stock, making 15 per cent. for the year (against 16 per cent.). There is little change in the amount to be carried forward at £5,136 (against £5,879). Investments appear in the balance-sheet at £1,004,274. The valuation, based on Stock Exchange prices on 30th April, showed a depreciation of 27.01 per cent. on the balance-sheet figure (against 35.84 per cent. last year), or, taking into account the reserve funds, 6.18 per cent. net. A list of the investments, which number 306, accompanies the Report. Of the total funds £613,540 are invested in Bonds, Debentures, or Debenture Stocks, £211,745 in Preference shares or Stocks, and £178,989 in Ordinary shares or Stocks.

WORLD OF INDIAN FINANCE

Friday, June 23.

There has been no change in the money market, with interbank call money freely offering at ½ per cent to ¾ per cent., and borrowers remaining totally uninterested. The persistence of easy money is accounted for by the considerable shrinkage in the volume of money lent out by the market to the Treasury on short-term account, and by the regular release of funds, of the order of 1 1/3 crores per week, against Government's purchase of sterling. Our Treasury Bills table shows the floating debt total at Rs. 13.69 crores on June 19. At the beginning of this financial year, Treasury Bills outstandings stood at about Rs. 26 crores. Within eleven weeks, the floating debt has gone down by nearly Rs. 12½ crores. This represents the additional resources that have flowed into the banking circles since the beginning of this financial year. With trade extremely stagnant and requiring no finance worth mention, the return to banks of so large a sum as Rs. 12½ crores is certainly calculated to emphasise and accelerate easy conditions of money. But for the diversion of some amount to the last Rupee loan, credits should be even more unusable than they are at the moment. In spite of the cash section of the 3½ per cent. loan having provided the Treasury with all the requirements for the meeting of the commitments in respect of maturing loans in the course of this year, thee present ways and means position of the Treasury is such as to need immediate and substantial replenishment. There is nothing anomalous in the position witnessed to-day, wherein the Government have already borrowed the money for all their future requirements but are still suffering from depleted cash balance. To understand this apparent anomaly, one has to remember that the first three quarters of the fiscal year show an excess of current expenditure over revenue ; and that the last quarter shows a very appreciable surplus of revenue. The additional funds secured by the cash loan should, presumably, have been used up for the providing of the deficit on current revenue-expenditure account. For such further commitments as have to be met, short-term borrowings have now to be effected, in the hope that they are to be liquidated out of the surplus that is sure to accrue in the final quarter.

In general terms, it may be stated that such surplus in January is about Rs. 12 crores, in February Rs. 10 crores and in March Rs. 8 crores or Rs. 30 crores in all in the last quarter. Thus, even if provision has been made for the maturing loans, it would be still necessary to bridge the gap between a time of year in which there is deficit accruing month after month, and the period when a surplus of anything like Rs. 30 crores will be available for the discharge of the short-term accommodation. The proper function of Treasury Bills is to bridge this gulf between the early half of the financial year and the final quarter. There can, therefore, be no objection, on strictly economic grounds, to the issue of short-term Bills in one part of the year, to be automatically liquidated in the latter part. By the adroit use of this device, a healthy condition of elasticity in the money market is preserved. Otherwise, we should be witnessing a period of extreme plethora of funds due to all the money being with the public, followed by a spasm of extreme stringency due to all the money having flowed into the coffers of the Treasury.

We are not in any way worried that expansion of the floating debt for legitimate purposes is at all likely to interfere prejudicially with the giltedge or any other market. If Treasury Bills policy were unscientific ; if short-term accommodation were being raised at fantastically high rates and for amounts beyond the capacity of the market, then giltedge will, certainly, be affected adversely by such Treasury Bills operations. On the other hand, if the amount borrowed by the Government is such as can be easily put up by the market ; and if the Treasury insists on most competitive rates, we maintain that the very device of borrowing could be utilised for the enforcing of cheap money conditions. By a progressive decline in the average rate of accepted tenders, the Government have certainly played an important part in the steady decline that has taken place in the rates which banks have to offer to attract deposits. We have, therefore, no qualms of conscience in reverting to the much-discussed theme of six months Treasury Bills. In examining the Treasury Bills operations of the Government, it seemed to us last week that the impression could be drawn that the Controller of the Currency, for the time being, had no intention of switching off to six months Bills and that he would rather prefer securing his increased

requirements from larger sales of three months Bills. From an appreciation of all the circumstances, we come to the view that the continuance of three months Bills, the increase in the weekly offer and the inauguration of intermediates for three months Treasuries must be considered natural and intelligible operations. At the same time, we added:

> "If, however, sales of intermediates in the next week or two should prove to be on the small side, the advisability of the introduction of six months Bills will have to be more seriously considered. For our part, we believe that at the present rates, there is a strict limit to the amount of money that would flow into Treasury Bills. We would not be surprised if, when results are made known next week, it is found that sales of intermediates have not fetched even Rs. 1 crore. If the response should continue poor, the alternative is, of course, six months Bills. By that time, we would be well into July; and it is to be hoped that the international situation would also considerably improve."

Our apprehensions have proved only too true. Intermediates sold between June 14 and June 19 came only to Rs. 73 lakhs. Possibly, a portion of this represents foreign funds contracted in advance against a likely introduction of six months Bills. For this reason, we are inclined to think that the results, which will be made known next week, will show a similar poor response from banks for intermediates. As against this view, it may be urged that further accentuation of the present plethoric conditions would drive banks into intermediate Treasuries even at the current law rates. From this point of view, it may be considered worth the while to wait a week or two more before any decision is taken for the inauguration of six months Bills. We do not see any harm if there should be a delay for this reason. Such delay should, in fact, suit the Treasury admirably. The next week's tender day is June 27; payment will have to be made on June 30. It would be far better to wait till July before six months Bills are made available. The essential point to be borne in mind in this connection is that the repayment will have to occur from the second or third week of January onwards.

During the last year, six months Treasuries were introduced as from the auction of July 5. Applications were invited in the form of both six months Bills and three months Bills for a total amount of Rs. 2 crores. As from July 13, intermediate six months Bills were made available. Between July 5 and August 3, Rs. 6 crores was secured on the tender day from six months Bills; and Rs. 19½ crores by sales of intermediates. The rate also fell from 3½ per cent. to 3 per cent. It was abundantly proved, in last year's experience, that July is the most suitable period for the issue of six months Bills. We should, therefore, think that in the Treasury Bills *communique* of the first week or second week of July, the Controller of the Currency would do well to announce the introduction of six months Bills. It would not be necessary for him to offer anything like the rates in the summer of 1932. He might make a start with 2¾ per cent.; and it is quite likely that by the competition of banks, the rate is brought down to 2¼ per cent. by the first week of August. During this period, there is every chance of his securing all that he needs by way of short-term Bills. In which case, the subsequent Treasury Bills operations will be confined to the weekly offer on the tender day and the reduction of the offer to Rs. 1 crore. The majore part of the funds that would flow into six months Bills would be money borrowed from London; and harm can occur to the giltedge market on this account. On the other hand, the very fact that the Government secure all that they need within a short space of time and are thus able to revert to the simple plan of Rs. 1 crore per week should enable government securities to recover more rapidly in the favourable conditions created by the large inflow of funds from maturing loans.

In the Editorial section, we have endeavoured to solve some of the conundrums that were propounded in last week's issue in regard to the sale of silver by the Indian Government to the British Treasury. Confirmation is now available that the 20 million ounces of fine silver was transferred to the British Treasury on, or a day prior to, June 15; and that this sale was effected on the basis of about 19½d. which was the ruling price on that date. What we would like to know is why, when the very purpose of this deal was to reveal the intentions of the American authorities to take active steps for the improvement of the price of silver, the Indian Government did not cry halt to their policy of selling silver. By all tokens, there is every justification for hoping that silver has a brighter future. Where was then the necessity for selling the white metal at the present moment? Where was the hurry, where was the necessity? Moreover, it is not fair to India that a facile assumption is made that all she is entitled to is the market price. If so large an amount as 20 million ounces were bought up from the market, the price should have risen substantially. In other words, if, instead of the deal being concluded in a quiet fashion between the British Chancellor of the Exchequer and India's Secretary of State, Mr. Chamberlain had come on the market to buy the required quantity of silver and India had sold on the market, we would have got a far better price.

It was an extremely dull week in the exchange market with very little doing. There was just a handful of export bills offering, mostly for forward positions. There was no merchant demand for remittance for near or forward deliveries. On the weekly sterling tender day, against £1 million on offer, £355,000 at 1s. 6 1/16d. was received and allotted in full. Lower tenders were rejected. The offer for the next week will be £1 million.

The closing rates are: 1s. 6 1/32d., June-October T.T., with 1s. 6 3/64d., available for a fortnight; 1s. 6d., November-December T.T.; and 1s. 5 31/32d., January-March T.T.

Bills may be quoted: 1s. 6 1/8d., right up to the end of the year. Some banks are quoting 1s. 6 9/64d., for September-December. Banks are demanding full rates on account of the tendency of higher discounts forward.

Call money went abegging at ½ per cent. to ¾ per cent. Union rates were ½ per cent. to ¾ per cent. for call, three days notice and seven days notice money. Onemonth, twomonth and threemonth deposits were quoted 1, 1¼ and 1½ per cent. respectively.

[The Statistical and Information section of *Indian Finance* has been greatly expanded and considerably strengthened. We are now in a position to offer a competent service to such readers as seek elucidation in regard to any facts or figures bearing on finance, trade and industry.—Ed., *I. F.*]

OTHER INDIAN MONEY MARKETS

(By Wire).

(From our own Correspondent).

Bombay, June 22,

There is no sign of money getting into the market, interbank call being quoted throughout the week at 1 per cent. nominal, though the amount of weekly offering on account of Treasary Bills tenders has been raised to Rs. 1½ crores and intermediates also sold in addition.

Exchange has been quietly steady, weekly tender accepted by Government for sales of sterling being, after many weeks, for a comparatively small amount of £1/3 million.

At close, banks quote to sell T.T. at 1s. 6 1/32d. June-September ; 1s. 6d. October-December and 1s. 5 31/32d. January-February and 1s. 5 15/16d. March.

(By Wire.)

(From our own Correspondent).

Karachi, June 22.

Exchange has been quiet, there being buyers of ready T.T. at 1s. 1 1/16d. and sellers at 1s. 6 3/64d.

Three months bill are quoted 1s. 6 1/8d. In forward positions there are buyers of December position at 1s. 6 1/32d. and sellers offering this rate for October-November.

Money rates in the bazar are as much as 4½ per cent., due to greater need to finance the movement of crops. Banks, however, offer 1 to 1½ per cent. for call, being fully supplied with funds.

FINANCE ABROAD

The reports of the World Economic Conference so far received constitute such a jumble of proposals and criticisms, of rumours and contradictions, of movings forward and backward, that the net result is difficult to gauge. All that can be gathered is that the Conference has, like the Indian Round Table Conference—an ominous comparison, that !—quickly resolved itself into a number of committees and sub-committees and that they are at the time engaged rather in settling the order in which the questions will be taken up than in the actual discussion of any of them. But in one respect, uncertainty has been cleared up, though only to increase the prevalent gloom. At the moment of writing, it seems certain that all hopes of temporary stabilisation of currencies have to be abandoned. It would seem that early in the week, the delegates of Britain, France and America had agreed on a scheme of temporary stabilisation, to which the American representatives were a party. It was reported on June 19 that an agreement of sterling-dollar stabilisation might be reached before the week-end through an understanding between the central banks of England, France and America, instead of the more difficult agreement between the three governments concerned. But latterly, it was known that President Roosevelt had definitely rejected the temporary currency stabilisation schemes, and Mr. Acheson, Acting Secretary to the Treasury, announced that, while admitting the importance of currency stabilisation to the recovery of international trade, he would make it clear that little assistance could be expected from the United States in securing even a temporary agreement at the present time. Readers of *Indian Finance* will remember that on more than one occasion we pointed out that it was hard to expect President Roosevelt to surrender the powers that had been conferred on him by the inflation amendment to the Farm Bill.

The exact reasons which have impelled Mr. Roosevelt to torpedo the whole conference are not yet known. But one may well understand the resentment that is felt both in London and in Paris at the manner in which Mr. Roosevelt has so lightheartedly raised an insuperable obstacle to the further progress of the Conference. Naturally, the French critics recall former occasions when agreements subscribed to by the representatives of America had been disclaimed by the Government at home. It is said that French opinion is bitter on this "American habit of disavowing its accredited representatives at international conferences." It is incomprehensible how the Conference could come to any agreement in regard to either a tariff truce or the reduction of import tariffs and other trade barriers when no nation can be certain as to what the policy of the American Government in regard to exchange and currency might be.

Even if one could view with equanimity President Roosevelt's unwillingness to be a party to a currency and exchange stabilisation, it is difficult to remain unperturbed by the news that Professor Raymond Moley, considered to be an economic isolationist, will soon be arriving in London, in effect to supersede Mr. Cordell Hull, who is in favour of lower tariffs.

The practical result of the breakdown of the stabilisation scheme is that the slump in the dollar has continued un-interrupted during the week. The following rates during the week will show the effect of the breakdown on the trend of the cross rate :

June 16	...	...	4.07⅜
June 17	...	...	4.07⅛
June 19	...	...	4.14¼
June 20	...	...	4.19¼
June 21	...	...	4.16¼
June 22	...	...	4.24

CHEQUES :

Although the use of cheques has increased beyond all anticipation during the past twenty years, there are still many payments settled by other means which could, with advantage, be made by cheque. Comparatively few years ago it was, generally speaking, only persons of means who kept private Banking accounts, but modern methods aim at providing Banking facilities for the million. Lloyds Bank will open an account with a very modest amount, and the facilities it offers to customers cannot be excelled.

LLOYDS BANK
LIMITED.
(Incorporated in England.)

Subscribed Capital £73,302,076
Paid-up Capital £15,810,252

NATIONAL INSURANCE CO., LTD.

7, COUNCIL HOUSE STREET,
CALCUTTA.
(Established—1906.)

Before taking out a life assurance policy it is better to apply all the rigid tests for a good company.

The "National" will surpass any other Company in these tests.

(1) Indian Capital—Indian Management—for the benefit of Indians.
(2) The Company has never contested a claim on a technicality.
(3) The low safe rates of premium provide maximum assurance at minimum cost.

The "National" keeps well ahead of the times and its policy of "fair and square dealing" which began with its founding, ever since 1906, has been continuous.

R. G. DAS & CO.,
Managers.

National Fire & General Insurance
COMPANY, LTD.

The Company issues Policies covering :—

FIRE,

Loss of Profits by Fire, Fire and Material Damage following Riot AND Civil commotion.

MOTOR CARS - - -
MOTOR CYCLES - - -
COMMERCIAL VEHICLES

NATIONAL INSURANCE BUILDING,

COMMUNIQUES AND RETURNS.

TREASURY BILLS.

The Controller of the Currency notifies that tenders for Rs. 1½ crores of three months' Treasury Bills were opened on Tuesday, June 20. The total amount offered was Rs. 2,71,25,000. Tenders at Rs. 99-11-9 were accepted in full and those at Rs. 99-11-6 were allotted approximately 51 per cent. Lower tenders were rejected. The total amount accepted was Rs. 1½ crores, the average rate of accepted tenders being Re. 1-1-10 per annum.

Tenders for Rs. 1½ crores of three months' Treasury Bills will be received on Tuesday, June 27. Successful tenderers should make payment on Friday June 30. Other conditions are as usual.

Three months' intermediates will be sold from June 21 to 26 at Rs. 99-12-0 per cent. subject to the condition that the sale of intermediates may be discontinued without previous notice at any time during this period.

Three months intermediates sold from June 14 to 19 amounted to Rs. 73,00,000.

STERLING TENDERS.

The Controller of the Currency notifies that on Wednesday June 21 tenders to the amount of £355,000 at 1s. 6 1/16 d. were received and allotted in full. Lower tenders were rejected.

On Wednesday, June 28, £1,000,000 will be offered for tender on the same conditions as previously announced.

THE GOLD STANDARD RESERVE.

The balance of the Gold Standard Reserve on the 31st May, 1933, amounted to £40,000,000 and was held in the following form:—

	£
1. Cash at short notice at the Bank of England	257
2. British Treasury Bills	16,954,558
3. Other British and Dominion Government Securities	9,582,851
4. Gold—	
In England	2,152,334
In India	11,310,000
Total ...	40,000,000

CALCUTTA SHARE MARKET

Jute.—With prices in the hessian and raw jute markets going down to Rs. 10-10 and Rs. 33-4 respectively, it was natural that Howrahs receded to Rs. 49-6 and Kamarhattys to Rs. 468. As the week advanced a better feeling was noticeable and Howrahs improved to Rs. 51-8 and Kamarhattys to Rs. 490. Among other bigger denominations Anglo-Indias were wanted and improved from Rs. 355 to Rs. 365, Barnagores and Ballys also touched Rs. 145 and Rs. 150 but recovered to Rs. 150 and Rs. 155. Clives and Nationals were well supported at Rs. 27-8 and Rs. 23-4. Presidencys were wanted at Rs. 5-12, while Hukumchand had sellers at Rs. 18. There were scattered dealings in other stocks and business was more or less of a retail nature with no feature of outstanding interest.

Cotton.—This section was dull and lifeless with very little turnover. Kesorams had sellers at Rs. 3-8 on report of no dividend for ordinary shareholders. New Victorias had buyers at Re. 1-11 and sellers at Re. 1-13, while Dunbars were steady at Rs. 114 with no keen buyers. Bengal Nagpores had sellers at Rs. 22, while buyers were not prepared to offer more than Rs. 21-4.

Coal.—Limited enquiry was noticeable in this section, while the general tone was somewhat irregular. Bengal coal on rumours of lower dividend dropped to Rs. 204, while Burrakurs had buyers at Rs. 10-2, sellers Rs. 10-4, New Bheerbhom moved down from Rs. 9-4 to Rs. 8-11 and had buyers at this lower level. Standards were placed at Rs. 24-2, Seebpores had buyers at Rs. 15-8 premium with no sellers. Talcher were wanted at Rs. 1-6. Amalgamated coalfields had buyers at Rs. 12-8, while Bokaro and Ramghur were quoted at Rs. 6-8. Ghusicks recorded a solitary deal at Rs. 1-8. There is nothing in the industry itself to warrant a big rise.

Miscellaneous.—This section was well supported with the exception of sugar which recorded a big fall during the course of the last week to rally a part of the lost ground during this week. Balarmapurs recorded a large turnover, roundabout Rs. 11-8, Samastipores improved to Rs. 17-4, Champarans to Rs. 28, Cawnpores had buyers at Rs. 35-8, sellers asking Rs. 36, South Behars and Rohtas sugar came to business at -/4/- to -/6/- premium. Murree brewery were well supported at Rs. 170 ex-dividend with few sellers. Among the electric concerns Barackpore had buyers with no sellers, Benares, Patna, Dacca and Rawalpindi had buyers with some shares on offer. In the Mining group Burma Corporation were easy after the recent rise and had sellers at Rs. 9, buyers Rs. 8-14. In Chemical industries, Bengal Chemical, ordinary, had buyers at Rs. 295 with no sellers. In the Engineering group Bengal irons and Indian irons had more sellers than buyers prices being Rs. 1-14 and Rs. 4-6; Burn & Co. had sellers roundabout Rs. 140 without attracting many buyers. In the Flour section prices were well maintained at last week's levels but the volume of turnover was very limited for want of scrips. Tritons had buyers at Rs. 170 on investment account. B. I. C. ordinary, defd. and preference were wanted at -/13/-, -/9/- and Rs. 109 without many sellers. Indian wood products after their recent rise to Rs. 34-8 had sellers at Rs. 33-12 while Madan Theatres were wanted at -/5/-. Paper shares were well supported. Bengals had buyers at Rs. 70. Howrah oils had sellers at Rs. 10, while British Ceylon Corporation were quoting Rs. 6-12, Midnapore Zemindary were unchanged at Rs. 70. Among the Shipping concerns, Calcutta Landing and shipping improved to Rs. 7-8, while India General Navigation had buyers at Rs. 98, Port Shipping were well supported at Rs. 12-4.

Banks & Railways.—Central banks were steady at Rs. 21-12, while sellers were demanding Rs. 22. Imperial Banks fully paid and Contributories were placed at Rs. 1,205 and Rs. 292. There were scattered deals in Railway shares, Mymensingh-Bhairab Bazar guaranteed came to business at Rs. 81 in small lots, while Sara Serajgunge were placed at Rs. 81.

Government Securities.—Business in this section had been of a retail nature and fluctuations were confined to narrow limits. 3½% Government paper improved from Rs. 80-2 to Rs. 80-8 but again dropped down to Rs. 80-3. 3½% New Loans were quoting Rs. 91-4, while 4% 1960-70 were wanted at Rs. 94-6. 5% 1945-55 were firm at Rs. 109-12. Bank rate remained unchanged at 3½%.

Teas.—With an improvement in the prices of common teas at the last auctions, there was better enquiry in this section during the period under review and prices were well maintained. Hantapara came to business at Rs. 332, Hassimaras were placed at Rs. 33-4, Dauracherras were wanted at Rs. 11, while East Indias were steady at Rs. 13-4. Betjan, Dimakusies were wanted at steady rates. Kaliti were dealt at Rs. 11 against the last quotation of Rs. 9-4. Moheemas had more sellers than buyers, while Hathikhiras improved to Rs. 17-8. The undertone was very strong.

BOMBAY STOCK EXCHANGE.

(By Wire.)

(From our Correspondent.)

Bombay: June 22.

Giltedge securities ruled quietly steady, fluctuating within a very narrow range. London advices contine to be the dominating influence. There was better feeling at the close with odd scrips appearing. Practically all scrips were neglected. 3½ per cent. Rupee Paper fluctuated between Rs. 80-12 and Rs. 79-15, closing at Rs. 80-7 which is the same as on last Thursday. 5 per cent. 1945-55 is steady at Rs. 110.

All throughout the week, the share market was animated and lively. Mills and steel shares continue to attract the largest attention, though the former ruled quiet showing slight easiness except Pearls. It is considered that a fresh incentive is needed to impart buoyancy to cotton scrips. At present, Bombay Dyeings at Rs. 820, Central India at Rs. 345 and Svadeshi at Rs. 275 look cheap and attractive.

Tata Steels continued firm. The Second preferences especially, were better on investment enquiry at Rs. 84-12.

Cements are again coming into favour. On hopes of increase in import duty, prices appreciated. Indian Cements quoted Rs. 265, Katni Rs. 276, Punjabs Rs. 14-8 and Shahabads Rs. 271.

Electric shares have been again in request. Tata Powers after touching Rs. 1,000 have closed at Rs. 992. Andhra Valley was quiet at Rs. 1,387. Tata Hydros closed at Rs. 147.

Imperial Bank fully paids are again easier at Rs. 1,191 having dropped by Rs. 15, and partly-paids at Rs. 290. Bank of Indias are in demand up to Rs. 104.

Belpaur Sugar have been enquired for upto Rs. 193¾. Bombay Burmas were steady, but to-day slumped by Rs. 20 on the news that interim dividend would not be paid. Bombay Trams with investment enquiry have risen to Rs. 135-8. Central Provinces Railway were placed at Rs. 31-12.

JUTE AND JUTE GOODS.

JUTE.

(From Our Correspondent).

There has been a further decline in the price of raw jute during the week under review. The market is ruling quiet with buyers taking very little interest. October futures which were being quoted round about Rs. 36 at the begginning of the week came down to Rs. 33 and closed at Rs. 33-8 per bale. This decline is to be attributed partly to a rather weak tone of the jute goods market, and partly to the pressure which the approach of the fresh crop is exerting on sellers. The month of June is the last one of the season 1932-33 and outside dealers who are holding old crop are anxious to dispose it of.

Crop reports are very satisfactory and cutting of jute has already started in low and chur lands in the districts. The yield is anticipated to be not less than normal. Weather conditions so far have remained satisfactory, and according to private estimates, the area under cultivation is placed at 22 lakhs of acres, with a probable yield of 75 lakhs of bales.

If no early agreement of a satisfactory character is reached at the World Economic Conference, prices are bound to go down with the advent of the new crop in the mofussil. Prices being much higher than what they were at the time of the arrival of the new crop last year, cultivators will be very anxious to dispose of all their jute at the present level of prices.

Fair business in old crop has been done by the mills, during the current week, and good business has been reported to be done in the London market at the decline. Shippers at this end, however, have not fully covered their June requirements, and it is probable that they might come out as buyers at these levels. Considering the present levels of prices of jute goods, the price of raw jute is low enough to interest genuine buyers. Buying at every decline is therefore desirable for short profits.

JUTE CROP.

Messrs. Sinclair, Murray and Co. in their Jute Crop report for the week ended June 17, say:—

General.—During the week under review weather conditions have been satisfactory and the crop is making good progress. Cutting of the low and "chur" land crop is proceeding on a small scale.

Narayanganj.—The weather has been favourable and weeding operations are completed. Plants are healthy and range in height from 3′ to 7′. Cutting is proceeding slowly on "chur" lands. The river is rising steadily and is approximately 6″ higher than at this date last year.

Chandpur.—The weather has been favourable but a spell of sunshine would be beneficial. Plants are healthy and range in height up to 6′—6″. Cutting has begun on a small scale on low and "chur" lands. The river is slightly below last year's level at this date.

Chaumuhani.—The weather has been favourable but a spell of sunny weather would be beneficial. Weeding is completed. The condition of plants is fair and they range in height from 3′ to 7′. Cutting has begun on a small scale on low lands.

Akhaura.—The weather has been favourable and weeding has been completed. Plants are healthy and range in height from 2′—6″ to 5′—6″. The river is rising steadily and is approximately 1½′ higher than at this date last year.

Niklidampara.—The weather during the week has been favourable and weeding operations are nearing completion. The general condition of plants is satisfactory and they range in height from 2′—4″ to 5′—4″. Cutting has begun on a small scale on low lands. The river has risen about 1′—8″ during the week and is now approximately 8″ higher than at this date last year.

Sarishabari.—The weather has been favourable. Plants are healthy and range in height from 3′—6″ to 6′. Cutting is proceeding very slowly on low lands. The river has risen about 2′ during the week and is now approximately 1′ lower than at this date last year.

Mymensingh.—The weather has been favourable. Plants are healthy and range in height from 3′—6″ to 7′. The river is rising but is still about 1′ lower than at this date last year.

Serajgunge.—Conditions have been satisfactory. Plants are healthy and range in height up to 6′—8″. Weeding has been completed. Cutting has begun slowly on low and "chur" lands. The river has risen about 1′ during the week and is estimated to be about 2½′ lower than at this date last year.

Bhangoora.—The weather has been favourable. Plants are healthy and range in height from 1′—3″ to 7′. Cutting has begun slowly on low and "chur" lands. The river has risen 1½′ during the week and is at approximately the same level as at this date last year.

Madaripore.—The weather has been favourable but more sunshine would be beneficial. Condition of plants is satisfactory. Weeding has been completed. Cutting of the Mesta crop has begun on a small scale. The river is rising steadily and is about 6″ higher than at this date last year.

As a basis of comparison we take last season's crop as 16 annas.

JUTE MANUFACTURES.

(From Our Correspondent).

During the week under review, the market has ruled quiet but steady. Fresh business from the consuming centres has not been received and consequently there is an easier tendency in the market. Values as compared with the previous week are slightly lower. Hessian nineporters touched Rs. 10-14 and after rising to Rs. 11-4 closed at Rs. 11-2. Markets for heavy goods is weaker than that of hessians, the business in this section being of a poor nature. The stock position in heavy goods is also not so strong as that of hessians. Even in hessians, the shortage is most keenly felt in 8 and 7½ oz. weights. 10 and 10½ oz. quality is weaker, with sellers predominating. A big holder is reported to have sold large quantities of hessians both nine and eleven porter for all positions up to the end of the year. This is partly due to profit taking and partly due to his "option" deal. In spite of this there is not much of nervousness in the market and the shortage of nine porter is by itself enough to sustain the market. Shipment during the month, though not up to expectations, is in no way disappointing. However, fresh business is urgently needed, specially from South America, which will immediately tone up the eleven porter market.

Statistically, the position of hessian is getting more and more sound each month, shipments are larger than the monthly production. For this reason there is no fear of any considerable decline in the present price levels. If the heavy goods market shows a little more improvement, the values of hessian will surely go up in the same proportion.

Exports of hessians up to the middle of June are larger by about 5 crores of yards, when compared with the corresponding period last year, while the stocks are down by the same amount, thus the technical and statistical position are sounder than before.

COTTON AND COTTON GOODS

COTTON.

(*By Wire.*)

(From Our Correspondent).

Bombay, June 22.

During the week, American cotton markets alternately declined and advanced but on the whole a steady tone is maintained. The plan about average curtailment has been announced but is conditional upon farmers' willingness. Processing tax is also disapproved by many. Weather continued favourable but now rains are needed. America is averse to stabilising dollar which means continuation of inflation.

The local market, however, ruled very weak due to continuous hammering by some big operators and option dealers. Owing to their manipulations, Indian cotton prices have become cheaper by about Rs. 15. However, they have piled up huge short interests while purchases have passed in strong hands. Hence a sharp advance is anticipated in the near future.

(*By Wire.*)

(From Our Correspondent).

Karachi, June 22.

The cotton market was weaker and inactive. Sind Desi July after going down to Rs. 16-11-6 yesterday has regained slightly and stands at Rs. 16-14. Sind American has lost a rupee during the week and quoted Rs. 21-13.

During the week under review the cotton market has ruled quiet with a steadying tendency. The day to day fluctuations in the home as well as foreign markats were within narrow limits. There has been a further decline in the price of Broach, July/August having come down from Rs. 212 to Rs. 203. The weakness in the markets was partly due to the threat of Japan that she would boycott Indian cotton, and partly due to the progress in the Economic Conference in London not being as satisfactory as it was expected to be. Technically the position is sounder. Long bulls have liquidated their holdings, and a buying enquiry in trade is visible at the lower levels. Speculators also are showing more interest at these levels and the unfavourable weather conditions in U. S. A. are responsible for the steadier conditions. Crop prospects are generally satisfactory in U. S. A., but the immediate fall of rain is eagerly expected.

The talk of a process tax in U. S. A. is a depressing factor in the market, but this is counterbalanced to a certain extent by the fact that the reduction of acreage is now considered an accomplished fact. The market is however nervous and erratic but the general expectation is that, ultimately, higher prices will prevail. The position there is still doubtful. The Japanese threat, though not taken seriously is still a disturbing factor. Fresh, small, business is, however, being received from Japan. Europe has also shown a little more interest. Indian mills have been good buyers recently. The inflationist policy of U. S. A. is likely to raise the price of American cotton to further higher levels; as a consequence there is reason to expect that Indian cotton will not fall to lower levels. The tendency is therefore for a rise.

PIECEGOODS.

The conditions in the piecegoods market have remained more or less unchanged. The undertone of the market was steady but the actual amount of new business was very small. The price of cotton and other commodities have shown a decline after touching higher levels consequently the dealers prefer to watch and see how far the same will be reflected in piecegoods.

However the trading conditions were not idle and transactions, though of a smaller size, were still numerous. Retail dealers have shown a little more interest and a fair enquiry has been received from that quarter. Due to the increased tariff on Non-British goods, Lancashire staples are receiving better attention. Japanese business at the moment is at a standstill. No fresh forward business is reported as done during the week.

There was more enquiry for Lancashire Dhooties and grey shirtings but much business could not take place owing to the wide disparity between the buyers and sellers prices. It however appears at the moment that Lancashire goods will receive more attention, until Japan comes out as a fresh seller at reduced rates. The advantage of the increase in tariff has at present, been more in favour of Lancashire than Indian Mills.

There has not been much business to report in Swadeshi section. There has been some business in grey Dhooties and fancy seasonal goods, but the quantity is not large. Upcountry dealers are not willing to pay advanced rates, the general belief being that the lower levels will be soon seen again. Pooja sales were very disappointing last year, the demand for this season is expected to be better. But the bazar is not willing to commit itself to large scale purchases on a mere expectation of larger demand.

Imports in May.

The total number of packages imported into Calcutta from all producing countries, including those from Indian ports during May are returned at 34,721 packages *viz.* 10,097 packages from Indian ports and 24,624 packages from outside ports. This compares with 30,070 packages for the corresponding period last year; 29,996 packages for April; 37,592 packages for March; 38,875 packages for February and 42,442 packages for January. It will be seen from the following comparative figures of imports during the past five months from the three main sources of supply, that Japan is responsible for the improvement in May, having exported about 35 per cent. more than in the preceding month, whilst other figures, especially for Great Britain, reveal a marked falling off in trade:—

	From Gt. Britain Pkgs.	From Japan Pkgs.	From Indian Ports Pkgs.
January ...	6,340	11,687	22,399
February ...	5,269	9,740	19,999
March ...	8,683	12,553	14,380
April ...	6,922	10,418	10,577
May ...	4,772	14,129	10,097

The contraction in imports from Indian ports is no criterion, as a considerable number of packages are now being despatched to Calcutta by rail instead of by steamer.

BULLION

GOLD.

There has not been much charge in the Gold market during the week under review and the fluctuations are also very narrow. The stock position has not been much altered and offtake remains unchanged at previous week's levels.

Quotations during the week were:—

	Ready.	First Settlement.	Second Settlement.
	Rs. A.	Rs. A.	Rs. A.
June 15	58 0	58 0	58 12
,, 16	57 13	57 13	58 7
,, 17	57 8	57 8	58 1
,, 19	57 0	57 6	57 14
,, 20	57 7	57 12	58 4
,, 21	57 6	57 10	58 3

London.

Bullion reserves of the Bank of England against notes amounted to £188,200,000 on the 14th instant against £187,700,000 on the previous Wednesday, showing an increase of £500,000.

The price of Gold per fine ounce during the week under review was as follows:

June 14	£6 2 1
,, 15	£6 2 2
,, 16	£6 2 1
,, 17	£6 2 2½
,, 19	£6 2 2
,, 20	£6 2 1
,, 21	£6 2 2

During Air Mail week the prices in London ruled between £6-2-0 and £6-2-11. Substantial amounts of Gold were available in the open market and purchases were made on continental account.

India's Imports and Exports of Gold.

Imports of gold into all ports during the week ending June 17, 1933 and the corresponding week of 1932 amounted to Rs. 1,20 and 1,00 thousands respectively. Exports during the same period amounted to Rs. 1,32,92 and 1,69,96 thousands respectively. Imports from 1st April to 17th June, 1933 amounted to Rs. 14,47 thousands against 14,50 thousands during the corresponding period in 1932. Exports during the same period were of the value of Rs. 13,59,65,000 and Rs. 11,08,16,000 respectively.

The following were the United Kingdom imports and exports of gold registered from midday on the 29th ultimo to midday on the 2nd instant:—

Imports.	£
Germany	69,868
Netherlands	115,594
France	17,352

Total ...	2,210,061

Exports.	£
Netherlands	235,875
France	194,233
Switzerland	19,800
Other Countries	994
Total ...	450,902

SILVER.

The market during the week under review has ruled quiet and easier with a decline in prices. Up to the time of writing last week the tone of the market was steady on the belief that Great Britain will buy silver for payment of war debts to U.S.A. in the open market. But the reports since received, that a deal has been negotiated by the Government of India, the latter selling the required silver to U.K. at market rates, have made the long holders nervous, since there can be no limit to the Government of India's sales. This has acted very adversely on the silver market and the prices have fallen by over Rs. 2 per 100 tolas. It is very unfortunate that at a moment when all efforts are directed towards the raising of the price of silver in particular, and other commodities in general, the Government of India should negotiate a deal which though not harmful to the Government Treasury, has proved a great depressing factor to the silver market.

From the information received, the market is placing great faith in silver. The concensus of opinion has been that before the recent rise which took place in the price of commodities, silver first went up. Now if silver declines, there is little hope that the rise in the price of other commodities will be maintained. Whether it be a correct interpretation of the market or not, the prices invariably fluctuate in the light of what the majority of people think. It is therefore worth the consideration of the Government of India, that they do not act in a way which will adversely affect the silver market.

The stock position remains unchanged while the daily offtake has shown a decline.

Imports and Exports of Silver.

The imports of silver into all ports during the week ended June 17, 1933 and the corresponding week of 1932 were of the value of 16 and 2,62 thousand rupees respectively. Exports during the same period amounted to Rs. 1,89 thousands and Rs. 16 thousands respectively. The imports from 1st April to 17th June, 1933 and the corresponding period of 1932 were Rs. 18,98 thousands and Rs. 44,23 thousands respectively while the exports were Rs. 12,86 thousands and 12,20 thousands respectively.

London.

The market opened quiet during the week under review. Somewhat steadier conditions prevailed on the announcement that England was to pay America $10,000,000 in silver at 50 cents per ounce. Again there was a reaction and on America coming forward to sell, the market ruled dull. In the absence of support, the market declined and speculators bought at the decline. Continent sold and India both bought and sold. The market is quietly steady at the close.

The Price of Silver during the week was:

	Spot.	Forward.	New York.
June 14 ...	19 7/16d.	19 7/16d.	36 1/8
June 15 ...	19 9/16d.	19 5/8d.	35 1/2

TEA AND COFFEE

TEA.

Sale No. 2 was held in Calcutta on June 19 and 20, 1933. More tea was catalogued from Assam, Cachar and Sylhet than in Sale No. 1. Darjeeling quality was generally inferior. Assams was in small supply but was in good demand.

Tea for internal consumption was slightly lower in prices when compared with the previous week. There was good enquiry for leafy teas and brokens. Enquiry was mainly for Fannings, which were better, and were paid at 3 pies over the previous week's quotations.

Chests.

Internal consumption average price ...	-/5/5	-/5/3	-/4/7	...

London.

At the London auctions on June 19, 28,600 packages of Indian tea were submitted for sale. There was a good demand for common and medium qualities and prices on the whole were firmer.

The following were the prices fetched during the day's auction:

	Last auction per lb.	To-day's auction per lb.
Common Pekoe	8d.	8½d.
Common Broken Pekoe ...	8d.	8¼d.
Common Orange Pekoe ...	8¼d.	8¼d.
Common B. O. Pekoe ...	8¼d.	8¼d.
Common B. P. Souchong ...	8¼d.	8¼d.
The following are the value prices:—		
Clean Common Pekoe ...	8¼d.	8½d.
Clean Common Broken Pekoe	8⅜d.	8⅜d.
Clean Common O. Pekoe ...	8½d.	8⅝d.
Clean C. B. O. Pekoe ...	8⅝d.	8⅝d.
Clean C. B. P. Souchong ...	8¼d.	8¼d.

The following were the average prices of tea in the London market during the week ended June 15, Indian tea (Northern) last week 9.47d., this week 9.57d. lb.; Indian Tea (Southern) last week 10.53d., this week 9.68d. lb.; Ceylon tea last week 11.13d., this week 10.79d. lb.; Java Tea last week 7.37d., this week 7.29d. lb.; Sumatra Tea last week 6.49d. this week 6.99d. lb.

Ceylon Tea.

At the London auctions on June 21, 26,300 packages of Ceylon tea were submitted for sale.

There was a good demand for common and finest sorts which were firm. Other descriptions were irregular and often below last values. Teas suitable for export met with good support and were frequently dearer.

The following were the lowest prices fetched during the day's auction:—

	Last auction per lb.	To-day's auction per lb.
Common Pekoe	8½d.	8d.
Common Broken Pekoe ...	8½d.	8½d.
Common Orange Pekoe ...	8½d.	8d.
Common B. O. Pekoe ...	8⅝d.	8½d.
The following are the value prices:—		
Clean Common Pekoe ...	8½d.	8½d.
Clean C. B. Pekoe ...	8⅝d.	8⅝d.
Clean C. O. Pekoe ...	8⅝d.	8⅝d.
Clean C. B. O. Pekoe ...	9d.	9d.

Java Tea.

At the London auctions on June 15, 13,600 packages of Java and other teas (including Sumatra) were submitted for sale..

There was a good demand for all sorts. Keen competition was in evidence for all teas suitable for export which showed an irregular advance and were from three farthings to a penny and farthing per lb. higher. Common sorts were generally a farthing per lb. higher. Medium Broken Orange Pekoe teas improved and were from a half penny to three farthings per lb. higher.

The following were the lowest prices fetched during the day's auction:—

Common Pekoe last auction 5¾d., to-day's auction 5½d. lb.; Common Broken Pekoe last auction 5d., to-day's auction 5½d. lb.; Common Orange Pekoe last auction 6d., to-day's auction 6½d., lb.; Common Broken Orange Pekoe last auction 6d., to-day's auction 6d. lb.; Common Broken Pekoe Souchong last auction 6d., to-day's auction 6½d. lb.

The following are the value prices:—

Clean Common Pekoe last auction 6d., to-day's auction 6¾d. lb.; Clean Common Broken Pekoe last auction 6¼d., to-day's auction 6⅝d. lb.; Clean Common Orange Pekoe last auction 6½d., to-day's auction 7d. lb.; Clean Common Broken Orange Pekoe last auction 6⅝d., to-day's auction 6⅞d. lb.; Clean Common Broken Pekoe Souchong last auction 6d., to-day's auction 6¾d. lb.

Exports from India (Northern) from April 1, to June 20:

	1933-34. lbs.	1932-33. lbs.

SUGAR

SUGAR.

During the week under review the sugar market in Calcutta has ruled featureless. There has been very little business passing in Java, as well as in Indian sugar. The enquiry is, however, for a special grade of sugar in the market, commanding two to three annas premium, and this has been responsible for a steadier undertone.

The quotations are:

Java White Ready	...	Rs. 10-6-0 per md.
Afloat	...	... ,, 10-7-0 ,, ,,
Forward	...	... ,, 10-7-0 ,, ,,
Cawnpore	...	... ,, 10-0-0 ,, ,,

Stocks in Calcutta godowns are estimated at 4,000 tons while at the main Indian ports they are:

	(In bags, 10 bags=1 ton).	
	1933.	1932.
Calcutta	38,080	24,250
Bombay	45,000	96,000
Karachi	65,000	80,000
Madras	8,000	28,000
Rangoon	10,360	10,300

Bombay.

There was a fair enquiry during the week under review, for near delivery and spot, and the turnover of business was satisfactory.

Stocks are sufficiently low. An importing house bought back the June shipment due to diversion of the goods to other ports, which in turn lent strength to the market. Business in forward positions was, however, small.

In other Kathiawar ports the same strength was not visible. Stocks are fairly large and sellers are feeling constrained to reduce their holdings.

Karachi.

There has not been much change to report except the fact that the offtake has slightly improved. Better enquiries are being received from Punjab markets.

World Markets.

London and New York markets have ruled easier during the week under review. It is only a reaction after a rise that took place during the previous weeks. Stocks in London are estimated at 247 thousand tons against 134 thousand about the same time last year.

Quotation for London Futures are:—

	June				July			
	Sellers		Buyers		Sellers		Buyers

TO THE EDITOR,
Indian Finance.

SIR,

With the great increase of sugar factories, the output of molasses has become a serious problem.

As I wrote you on 15th instant the output of molasses in 1934-35 is expected to be somewhere in the neighbourhood of 350,000 tons. It is now not so much a question of being able to get rid of the stuff. The Council of Agricultural Research has been examining this position for sometime, and the various uses to which molasses could be put. These are:—

1. Manufacture of Power Alcohol.
2. Cattle food.
3. Manure.
4. Fuel.

The first mentioned is really the important one from the sugar factories' point of view.

The idea is that if legislation on the lines of what has been done in many other countries could be enacted, then about half of the molasses output could be used for this item alone.

Other countries have legislated for the mixture of some 10% to 15% Alcohol with Petrol. If this legislation were carried out in India, then capital could be found for at least two large distilleries to serve the important sugar producing areas. An arrangement would have to be made whereby all the production of alcohol is sold to the oil companies who would have to do the necessary mixing.

I have been going into a scheme and have mentioned the matter to Government, but no Capital could be obtained unless Legislation for the mixture was passed in the first instance.

I am afraid the molasses position, purely from a quantity point of view, will be a very serious matter before we can hope to get any Government action.

Yours faithfully,
G. MORGAN, C.I.E., M.L.A.

SILVER.

(By Wire.)

Bombay, June 22.

Silver for second settlement has steadily declined from Rs. 58-11, which was the last quotation on Thursday, the 15th instant, to Rs. 57-4 to-day, touching the lowest at Rs. 57-2-6. Hopes about its rehabilitation do not look bright and this explains the reactionary tendency.

Gold prices have remained stagnant throughout the week. Fluctuations have been confined within one anna. Ready and Azad rates to-day are being quoted at Rs. 30-2-6.

London.

During Air mail week the market was well supported with a fair amount of speculative demand. India was a free buyer, while America was not forcing sales. On the contrary, efforts were made to support the market. Continent and China, however, came out as sellers though the undertone was steady.

The following were the United Kingdom imports and exports of silver registered from midday on the 29th ultimo, to midday on the 2nd instant:—

IMPORTS.

	£
Soviet Union (Russia)	131,546
Germany	21,519
Iraq	9,946
Portuguese East Africa	5,840
France	2,754
Australia	13,783
Canada	15,521
Other countries	2,920
Total ...	203,829

EXPORTS.

	£
Denmark	2,345
U. S. A.	91,060
British India	55,651
French Possessions in India	10,550
France	2,971
Irish Free State	1,221
Other countries	1,796
Total ...	165,594

WHEAT.

By Wire.

(From Our Correspondent).

Karachi, June 22.

On account of lower Punjab advices together with rumours of reductions in railway freight, the wheat market has a bearish complexion. Price for July touched Rs. 24-5-6 yesterday but has since improved to Rs. 24-7-6.

SHELLAC.

During the week under review the market has ruled quiet but steady, sellers being reserved. Demand from consuming centres has been very poor. The fluctuation in price has been small. Sticklac in scarce in the manufacturing centres. Buyers are to be found for forward positions, sellers are however very few.

The quotations are:—

	Per Md.
T. N.	Rs. 20 8
S. T. I.	,, 21 0
I. T. N.	,, 19 0
Sperfine	,, 23 8
Seedlac	,, 15 8
Sticklac	,, 12 0
Kirilac	,, 3 0

The daily quotations for T. N. Shellac, July delivery, for the week ending Thursday, June 22, 1933 are as follows:

Friday the 16th June 1933	Rs.	22 14 per md.
Saturday the 17th June, 1933 ...	,,	22 10 seller
Monday the 19th June, 1933 ...	,,	22 2 buyer
Tuesday the 20th June, 1933 ...	,,	22 12 firm
Wednesday the 21st June, 1933 ...	,,	23 4 buyer
Thursday the 22nd June, 1933 ...	,,	23 6 buyer

Arrivals (in tons) up to June 17 ...	801	1,077
Shipment (packages) ,, ,, ...	17,829	13,466

HIDES, SKINS AND LEATHER.

(From Our Correspondent).

Calcutta, June 22.

Hides.—Shortage of supplies continue to lend strength to the market, but demand from shippers as well as Madras tanners has not been as keen as in the previous week. Prices, however, have remained more or less steady for almost all grades. Buyers are not prepared for any further advances for the present, because overseas reports are not decisive in their tendency. Agra and Cawnpore continue to be steady but business has remained on a restricted scale. Imports from upcountry in the Calcutta market were considerably less during the week. To-day's prevailing prices in the Calcutta market may be quoted as follows:

Cow Hides.

	Per 20 lbs.
	Rs. A. to Rs. A.
Dry framed arsenicated Agras ...	7 0 to 8 0
Darbhangas	5 0 to 5 8
Patnas	4 0 to 4 8
Dry salted	4 4 to 4 12

Buffalo.

Dry arsenicated	3 0 to 3 8

Goat Skins.

Goat Skins.—Supplies were good, but prices have continued to be very steady; about 150,000 skins were purchased by the shippers during the week. The rise in prices has stimulated imports from upcountry. Prices prevailing in the Calcutta market may be quoted as follows:

	Rs. Rs.
Good quailty per 100 skins ...	... 110 to 150
Ordinary ,, ...	... 80 to 100
Rejected ,, ...	... 40 to 45

Leather.—Trading conditions in the leather market were somewhat better during the week under review. Although there has been no particular advance in the prices, yet transactions were more numerous, although they were mostly of a retail character. There were a few enquiries for bigger lots also, especially for chrome tanned box sides for shoe uppers, both from Bombay and Agra, but none resulted in actual transactions. Some offers for box sides from South Africa were also received by local merchants but these also did not materialise in actual business. The prices offered were too low to be accepted by local tanners who are insisting on increase in prices in view of the continued strength of the hide market. The lowest price for Chinese tanned box side leather is 3 annas per square feet, while better selections are being sold up to 5 annas per square feet. The National Tannery upper leathers are also being quoted ½ anna per square feet higher in the market; but the Punjabi leather merchants who are the principal wholesale buyers are not as yet agreeable to accept the advanced quotations, hence business on a wholesale basis is still absent.

There has been no change in the price of local rough tanned sole leather which is, if anything, a little weaker owing to the absence of any substantial demand from consumers. Demand for better qualities of sole leather is being mostly met by importations from Cawnpore and Madras. Chrome Leather Company sole leather is being much approved by the better class *chappal* manufacturers of Calcutta.

There was not much activity in the sale of foreign leathers. Constant fluctuation in the American exchange is having an adverse effect on the sale of patents. Imported *chamois* leathers are being replaced in the market by Indian manufacturers of late. The National Tannery also have placed these skins in the market lately; their quotations for the best qualities being Rs. 36 per dozen skins for 24"×24" and upwards.

CENTRAL BANK GOLD BARS (FIVE TOLAS AND TEN TOLAS) ARE AN IDEAL GIFT.

Editorial Comments

CENTRAL BANK THREE-YEARS CASH CERTIFICATES ARE AN IDEAL INVESTMENT.

MORE LIGHT ON SILVER DEAL

From the side of the Indian Government, the first intimation to the public as regards the operations involved in the recent sale of silver to the British Treasury for the mid-June payment to America is contained in the statement of the Paper Currency for the week ended June 15, 1933.

Speaking in the House of Commons on June 14, Mr. Neville Chamberlain said, in the course of his reference to the settlement with President Roosevelt, that the requisite silver had already been purchased from the Indian Government. This statement has led to considerable comment in India; and the authorities are being asked to answer a long list of questions in this behalf.

When was the sale concluded? What is the total amount of silver involved in the deal? What price did the Indian Government receive from Britain? Is it the market rate cr the price on the basis of which America was to give credit in her books? Did the Controller of the Currency have, ready in London, so large a quantity of silver? Was there, in fact, enough of refined silver in stock? How were the sale proceeds paid—in sterling or gold?

A good few of the questions thus posed may now be solved on a scrutiny of the latest return of the Paper Currency Reserve.

As the American Treasury accepted silver on the basis of 50 cents per ounce of fine silver, the amount of the white metal needed for the payment of 10 million dollars was 20 million ounces of fine silver.

The price of silver in London on June 14 was 19½d., per standard ounce. Standard silver on the London market is 37/40 fine. In terms of fine silver, the June 15 price should have been 19½d. × 40/37 or 21d. 20 million ounces at 21d., should have cost £1·75 million.

£1.75 million converted into rupees at 1s. 6d., per rupee equals Rs. 2.33 crores.

Turning to the P. C. R. return, we find that gold stocks are shown to have increased by Rs. 2.45 crores. If the Indian Government had been paid on the basis of 19½d., per standard ounce, that is, the the rate ruling on June 14; and if the rupee equivalent was calculated on the customary basis of eighteenpence, the increase should have been only Rs. 2.33 crores. How is the difference of Rs. 12 lakhs to be accounted for?

If the earlier returns of P. C. R. were studied, it will be noticed that, on recurring occasions, gold stocks were being added to by small amounts varying from Rs. 8 lakhs to Rs. 15 lakhs. These accretions represent the receipts of the normal silver sales that are, from time to time, being effected. It may, therefore, be safely inferred that of the Rs. 2.45 crores shown as increase under gold bullion, Rs. 2.33 crores represents the receipt from the British Treasury in respect of the latter's War Debt payment; and Rs. 12 lakhs represents the proceeds from the routine silver sales.

* * *

At this stage, a warning must be uttered lest the inference should be drawn that Britain made the payment in gold. The India Office should have received about £1¾ million in sterling. This should have been utilised in purchasing sterling securities; these sterling securities should have been lodged in the London Branch of the Gold Standard Reserve. Against those securities, gold of the corresponding value (that is, Rs. 2.33 crores) should have been withdrawn from the Indian Branch of G. S. R. and transferred to the Paper Currency Reserve. Incidentally, this means only the reversing of the process in the pre-September, 1931 days when gold was being transferred from P. C. R. to G. S. R. for releasing sterling securities against payment for Reserve Council sales.

As silver in P. C. R. is valued on the basis of Re. 1 per tola of standard silver, that is, 11/12 fine, against 20 million ounces of fine silver sold to Britain, the P. C. R. should show a loss of 20 million × 12/11 or 21.8 million standard ounces or approximately 65 million tolas. The actual reduction under Silver Bullion is Rs. 6.36 crores. The balance of Rs. 15 lakhs or so is to be explained by the routine transactions and changes noticed under this head.

As silver bullion is valued in the Reserve at Re. 1 per standard tola, and as the sale price is very much less, there is always a loss in every sale of silver. This loss is covered by the addition of *ad hoc* securities to the P. C. R. The *ad hoc* created on the present occasion are shown at Rs. 3.95 crores.

* * *

From the discussion outlined above, it is possible to attempt answers to the questions raised, in various quarters, in regard to the last silver sale to Britain.

1. Presumably, the Government of India had, on hand, refined silver to an amount of 20 million ounces.

2. The deal was put through prior to the making up of the return for the week ended June 15.

3. India has been paid on the basis of about 19½d., (or nearly 36½ cents.) per standard ounce, that is, the rate prevalent on June 14.

4. The sale proceeds should have been paid in sterling.

5. The sterling assets have been lodged in G. S. R. and gold transferred to P. C. R.

6. Our sterling resources have been augmented by this transaction by about £1¾ million.

7. The disparity between the book value of silver and sale price is nearly Rs. 4 crores.

Inclusive of this sale, the Government of India should have sold 170 million ounces of silver since they started selling in 1927. This means that about £10 million should have been realised and *ad hoc* for Rs. 20 crores created against the difference between the nominal value and the bullion value.

BACK TO PRE-WAR TIMES?

The *Economist* has brought out in Air Mail week a special supplement on the Issues before the World Economic Conference on the eve of its meeting in London. It may be guessed that as a solution to the present ills of world trade the *Economist* recommends a return to the free trade of pre-war years. The complexity of the problems to be discussed and the unquestionable authority and standing of the *Economist* should, doubtless, lead the delegates to give the views expressed in the supplement the most careful consideration. While we have no fear that the supplement will greatly influence the ultimate decisions of the Conference, we deem it quite likely that it may tend to retard a correct apprehension of the problems of world economy and divert the activities of the World Economic Conference along channels of dangerous sterility. We believe that the

views urged in the *Economist* are coloured too much by its view of the needs of British economy and that there is little consideration for world economy as such. While we are against bolstering inefficient industry at the cost of the consumer, we cannot accept that the salvation of the world at this juncture lies along the path of unalloyed free trade. And because protectionism of one kind or the other has been guilty of excesses in almost every country of the world, there is apt to be a revulsion of feeling in the average individual against it. But it is not as if we have a clear-cut choice between protection and free trade; the problem of world economy is far more complex; and it is with a view to urge a standpoint that has too little currency that we are obliged to examine the supplement of the *Economist* at some length.

* * *

The Supplement covers nine pages of foolscap, of which the Annotated Agenda of the Preparatory Committee takes but a column and a half. The rest of the space is devoted to a delineation of the background and a discussion of the problems of Monetary Policy, Tariffs and Trade Obstructions and International Indebtedness. "The Background" is a fabric of exquisite workmanship, into which have been woven all the diverse facts preceding, and relating to, the present depression. There is a singular freedom from the effects of any particular theory, either the deflationary theory of Gustav Cassel, or the mere over-production theory or the Socialist theory of defective distribution among the classes. Even the *Economist's* own view, that the whole calamity is due to the abandonment of the principles of free trade, is only implicit in the narration. But the effects of this view has unmistakably extended beyond their natural limits. It is indeed quite understandable, and illuminating, too, to begin the story of the depression from the Geneva Conference of 1927 or even the Brussels Conference of 1920. One may also regret that the remedies recommended by these Conferences were applied only half-heartedly. And it may also be conceded that the present crisis would have been far less severe and complicated if, after checking "the destructive torrent of uncontrolled inflation" and starting on the new "triple basis of balanced budgets, currencies linked to gold and central banks freed from political pressure," the nations had heeded to the League's warning against "the pursuit of the mirage of economic self-sufficiency."

* * *

But it can hardly follow from this that the return to prosperity lies in retracing our steps to the cross-road at which the alleged wrong track had been chosen. There never is a problem in life which can be solved by a mere return to the past. It is too simple to be in accord with the complexities of life. It ignores the place which recent developments must inevitably have in the evolution of the future. It reckons little of the cost in human suffering of retracing our steps and plodding back along the path which we have just trodden. It glorifies unduly the conditions and beliefs of a bygone age and shirks the difficult task of appraising them in relation to the present and the times that are yet to be.

* * *

In the *Economist's* remarks on Monetary Policy and International Indebtedness, there is little to disagree with. But we wish there were more practical recognition of the fact that no nation would commit itself to any definite currency and exchange policy, unless it is assured that the new economic order sought to be established is one capable of sustaining the stability of its exchange, and satisfying its requirements of safe and progressive economic well-being. If it is granted that, except in the case of America now and perhaps, France five years ago, depreciation of the exchange and exchange control are only the result of economic disequilibrium, then it must be accepted that currency and exchange stability could be easily restored after the institution of a system of adequate internal production and rational and equitable foreign trade. For with such a system the dangers of unfair economic warfare would disappear and there would be little or no incentive to protect a currency by injurious controls.

* * *

What the *Economist* apparently overlooks is that the so-called 'barriers to world trade', except in the case of America, and recently of Britain, too, are only the defences erected by weak nations against the attacks of economically strong countries. A little analysis of the question may not be out of place. We have first the case of America where high tariffs are the combined result of a natural faith in the economic adequacy of self-succiency and the political power of interested producers. Then we have the tariff walls of the new states of Europe, which owe their origin to the Treaty of Versailles, due partly to the extension of nationalism to the sphere of economics and partly to the genuine difficulty of constructing any economic system in the face of the powerful industrial nations of the West. There are countries like India, too, where the theories of free trade are invalidated by the simple fact that their premises are not true to the conditions existing here. And in the last category we must put the tariffs which are meant to be a counterblast to exchange depreciation, which is itself a result of the economic hostilities of advanced industrial nations fighting for markets in other countries.

To none of these, except to America, would a sermon on the truth and value of free trade be appropriate. But because America is now a creditor country which has to realise in some form the interest and instalments of principal, and she has come to rely to some extent on foreign markets for the health, if not the survival of some of her industries, she may be inclined to accept the dictates of what in her case is, undoubtedly, economic sanity. But for all the others, the advocacy of free trade is just a plea for putting the pieces back in their places and having the War all over again. If the World Economic Conference is to seek the solution only along the lines of theoretical free trade, it would mean that the world has no alternative except that between the present distress and mutual warfare leading again to the very position from which it is now seeking relief.

The *Economist's* faith in the cure does not, however, blind it to the difficluties of applying it. "It would be unreasonable to expect," our contemporary admits, "that countries in which important sections of the population have been forced into occupations, which could not exist without protection, will be prepared suddenly to abandon these industries to their fate. Any attempt to secure at the Conference a sudden abandonment of tariffs is, therefore, doomed to failure." But it says later on, after toying with the idea of "a programme of gradual and progressive reductions," that the "Conference should, in our judgment, set itself the definite object of ultimately restoring to international trade, the comparative freedom from restrictions which it enjoyed before the War." But the alternative methods of approach, of uniform reduction or of a defined maximum level are equally unsuitable. "We are, therefore, driven back on a sectional plan among those countries which are prepared to act immediately."

* * *

We wish that the implications of this were more carefully examined. Sectional plans are impossible, except in the light of some pre-conceived scheme of national economy for each of the participants in the plan. In fact, the world has, for whatever reason, arrived at a stage in which no nation would be prepared to accept any proposal merely because it has the sanction of orthodox, classical economics. Even Great Britain insists, through the demand for a low exchange value of sterling, the same safeguard for its exports, which other countries desire to secure for their internal industries by means of import

duties. There is thus no nation on the face of the earth which is prepared to trust its fortunes to the inscrutable care of free trade. The advanced industrial nations are nervous of their standard of life. The weaker nations are afraid of the competition of the stronger.

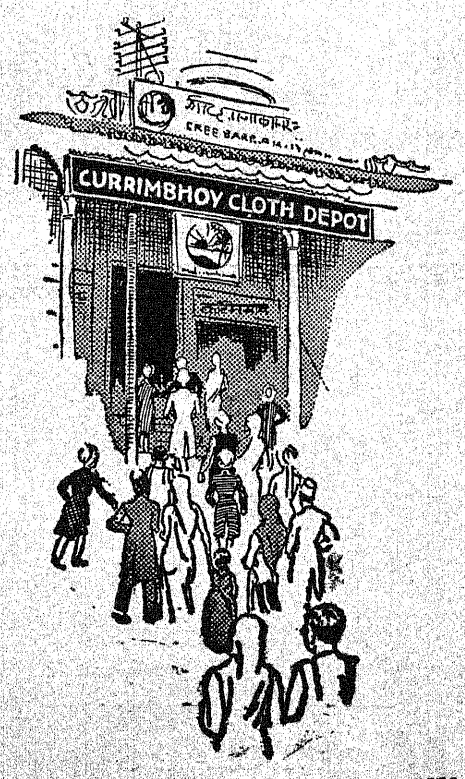
* * *

In such circumstances, it would be well if the World Economic Conference instead of trying to force *a priori* theories or resolve the conflict of un-co-ordinated national self-interest, were to get clear about the economic system which it would like to see established in the world. In the medley of tariffs and currencies, of debts and moratoria, the simplest way of straightening the muddle is to try to define the place each country would have in the scheme of world economy. It is time that authoritative journals like the *Economist* try to examine why it is, indeed, that the seemingly perfect economics of international free trade, strengthened as it is by the conclusions of successive international conferences over nearly two decades, has failed to commend itself to the nations. The fallacy, to our mind, appears to be in the tacit assumption, made in all these discussions, of the identity between international trade and world economy. This fallacious assumption and its deleterious effects on modern economic thought were examined in a series of special articles published in *Indian Finance* in the last quarter of 1932; and the plea was made therein for an international body taking the initiative in outlining a scheme of world economy in which the conflicts, which have reduced the world to the present *impasse*, would be at their very minimum. We are not aware that such a scheme has been advocated elsewhere; but the following remarks of the *Economist* form a pointed, though unconvincing, answer to it :

> "The alternative conception of "planned" national economies would unquestionably fix the *status quo* even more rigidly than the present network of high tariffs, while an international plan which attempted to do more than tide over temporary gluts or scarcities would throw into the arena of international politics a hundred burning questions of national interests, prejudices and ambitions. We do not envy the task of the Conference of statesmen who had, for example, to decide how much of the world's textile trade is to be assigned to Eastern nations or where the raw material is to be grown."

* * *

The task may be unenviable; but we do not see how else the problems of world economy can be solved. International trade can exist only when there is an acceptable distribution of productive activity among the nations. Take, for instance, the Indian market for cotton goods. If it is not a question of deciding between the rival claims of the Indian mills, Lancashire and Japan, we wonder what it is. And how can the claims be decided except with reference to the effects of the award on the countries concerned? This is typical of the World Economic problem to-day. For in it are gathered all the important problems, of an undeveloped country, of competition between two industrial nations for a market, of differences in the standards of living between one country and another, of currency depreciation and exchange war and of tariffs, though not so far, of quotas. Can it be contended that this question can be solved by a reversion to the regime of free trade? With free trade, not only would Britain be driven out of the market, but the Indian mills would be wiped out of existence and India would have to find another export trade with which to balance the increased imports of cotton piecegoods. On the repercussions of forced exports in a new line, we need hardly dilate. The example we have cited should suffice to show that every problem of modern world economy is at bottom a problem of the apportionment of productive activity. Even the apparently exceptional question of the services of international debts must come within its scope, as it is part of the problem of balance of payments, and there can be



WHY YOU SHOULD SHOP AT CURRIMBHOY'S

There are three chief reasons why you should shop at Currimbhoy's. Firstly, you can be certain that the very best quality cloth is being supplied to you because you can rely on the famous Currimbhoy group of mills where the cloth is made. Secondly, you are supporting Indian Industries when you purchase at Currimbhoy's Cloth Depot. Thirdly, Currimbhoy's fabrics are unequalled in India for their durability and lasting colours.

BUY SWADESHI FABRICS

CURRIMBHOY'S

CLOTH DEPOT, 156, HARRISON ROAD, CALCUTTA

C. I.

no payments except in goods. Is it not well that the problem of the World Economic Conference is frankly recognised as such and discussions taken on to this sphere? We repeat what we said at an earlier stage: There never is a problem which can be solved by a mere return to the past.

STATUTORY RAILWAY BOARD

The World Economic Conference has thrown into the shade the smaller committees, national and international, that are sitting at about the same time in London. But India can hardly afford to forget that questions of the utmost significance and of the most far-reaching consequences to herself are being not only discussed, but even decided on, now in London. While we may make a virtue of necessity and regard with stoic indifference the cruel distortion of the future constitution of India, the machinations connected with the Statutory Railway Board compel our attention and demand our most vigorous protests. Our views on this question are by now well-known to our readers. We are in favour of safeguarding the administration of such a vast commercial enterprise as the State Railways of India from political influence. But political influence in this context can mean only the influence of the politician, who has been defined as one who wants the country to do something for himself, in contradistinction to the statesman who wants to do something for the country. But the authorities apparently mean by political influence the influence of every political authority, in the country, however constituted. Obviously, external domination or control is no escape from political influence. And yet safeguards of whatever kind and for whatever purposes mean, for the present Government, only the imposition of external control.

The peculiarity in the case of the Railway Board is the extent of its patronage. And the public has yet no idea of the powerful and incredibly malevolent forces that are at work to incapacitate the Raliway Board of the future for real service to this country. The *Morning Post* is responsible for the forecast that the Statutory Railway Board is to consist of seven members, two to be appointed by the Governor-General on his own unfettered discretion, two by the Governor-General on the recommendation of the Federal Executive, and two selected by the Chief Commissioner and the Financial Commissioner of the Railways. As already foreshadowed in the proposal of the White Paper, the Railway Board is to be constituted by Act of Parliament and the Federal Legislature will not be competent to interfere either with its administration or to alter its constitution.

* * *

The reason for instituting this *imperium in imperio* is altogether incomprehensible. And the only explanation can lie in the fact that the Railway administration has always been impatient of the control which the Legislature has sought to impose on it; and British interests have been anxious all along to end the system of Indianisation, not only in regard to the services but in regard to such matters as purchase of stores. The Statutory Railway Board, as it is now contemplated, is proof positive of the intentions of the British Government to tighten their hold on the economic advantages of their domination over India while pursuing a policy of piecemeal concession to the demand for political freedom. And it is precisely for this reason that the proposals indicated by the *Morning Post* should be resisted by all sections of opinion in the country.

THE NEW GERMANY.

Capt. E. F. Hashagen, formerly of the Imperial Navy in Germany writes:—

During the past few months Germany has witnessed an evolution which has entirely changed its countenance. This development is nothing extraordinary if we recall to our minds the political events that have immediately followed the Peace dictation of Versailles and put the whole economic and political machinery of the European Continent and the world at large out of gear.

Germany has always asseretd her right to stand on an equal footing with the nations of the world in order that the stability of the world economics and politics may at last be restored and peace may reign again.

Contrary to her ardent efforts to restore the peace of the world, there is a tireless and malicious propaganda for fruitless blackmailing of Germany. But I venture to hope that readers of these lines will take the word of a responsible officer who has fought on the front when he says thast the New Germany is a nation which has specially taken the task of promoting the peace of the world under a

Government which does not wish anything more than to live in peace with other nations on equal footing.

* * *

The real source of the National Socialistic wave, which has risen in Germany during the past few years and eventually flooded the whole country, lies in the so-called Peace Treaty of Versailles. By this Treaty, the world war was only formally terminated but actually continued by other means. This forced order of 1919 with all its dangerous errors and half-done actions not only forbade the very existence of Germany but also became more and more a source of new trouble among the victorious nations themselves. It was the intention to wipe out Germany from the face of the earth but the Dictators of the Peace Treaty of Versailles themselves soon found out that the economic and political equilibrium of Europe and the world at large could not be restored by the destruction of a nation of 65 million which has been the backbone of European cultural and industrial development. The world crisis is the direct consequence of the reparations and, therefore, of the Treaty of Versailles It was only by the undeterred efforts of Germany that this tragic chapter of reparations could be closed amicably by the Treaty of Lausanne. This was the first step that Germany led towards the promotion of economic equilibrium and mitigating the terrible effects of a world-wide depression. It is, perhaps, no exaggeration to say, that this example has since been followed by leading statesmen of other nations, who are now endeavouring to solve the appalling world crisis by wiping out the question of debts which is so heavily telling upon the economic recovery of the world.

Though the Treaty of Lausanne has been signed and reparations practically terminated, "war guilt" still continues to stick to Germany. The burning passion to wipe out the taint of this unjust accusation is the inspiration of the National Socialistic movement.

* * *

We, Germans, do not wish any forcible solution of the revision of the present European order but we want to convince the world that Europe must undergo the same fate as Germany if the latter is to be destroyed by the iniquitous Treaty of Versailles.

In his recent speech at the Reichstag Herr Hitler, the Chancellor observed:

> "Three factors, which are the fundamentals of our revolution do not in any way contradict the interests of the rest of the world: firstly, to hinder the threatening communist revolution; promotion of a people's state which combines the various interests of classes and states and the saving of the term 'property' as the fundament of culture; secondly, the solution of the most difficult social problem of providing work to our deplorable army of millions of unemployed; and thirdly, to reinstate a stable and authoritative Government supported by the confidence and the will of the people which will at last enable this big nation to stand on equal footing with the rest of the world.
>
> Though I speak in this moment as a German national socialist, I declare in the name of the National Government and the whole national rising that we in this young Germany bring forward the same feelings and notions as ourselves for the well founded prosperity of other nations. The generation of this young Germany, which has uptil now known only distress, misery and lament of its own people, has suffered too much under its own frenzy to wish the same to others. Our National socialism is a principle which axiomatically binds us as a doctrine. When we cling to our own people and folk in unbounded love and fidelity we respect the national rights of other nations also out of the same notions which have formed us and want to live with them from the bottom of our heart in peace and friendship."

In the Disarmament Conference Germany does not ask for anything more than equality. This equality is due to Germany not only by her right of existence as a nation but even the Treaty of Versailles promises the right of Germany to equality which has been further laid down in the agreement of December, 1932.

* * *

It is an astounding lack of responsibility of this malicious propaganda which is trying to propagate a new danger of war. Also in this connection the Leader of the present Germany Herr Hitler has made the situation clear in the following manner:—

> "Treaties which have been contracted between nations for the maintenance of peace carry a real meaning if they are made by a candid equality of status of all the parties concerned. It is just where the chief causes of the world tumult of the past years lie, but it is in the interest of all to finally solve the present problems in a just manner.
>
> *No new European War* can replace the unsatisfactory conditions of to-day with better ones. On the contrary both from the point of view of world economy and politics the use of force in Europe would worsen the situation miserably. Even in case of a successful European forcible solution, the result would be that the equilibrium of the European politics will be more disturbed and at the same time form the root of new trouble and complications. New Wars, new sacrifice, new unstability and a new economic distress would be the result. The outbreak of such a new madness without end would surely mean the destruction of the very root of the present day society and state."

The German nation does not only not want a new war, she is also not able to enter into such a dangerous undertaking. Germany is entirely disarmed. She possesses a small army of only 100,000 soldiers allowed by the Treaty of Versailles. This small army is not even able to protect its own boundries against millions of heavily equipped neighbouring armies. Germany does not possess any kind of aggressive weapons. She does not possess aeroplanes, heavy guns and no weapons of any modern defenct.

Having thus explained the impossibility of German participation in a war, I hold that an eventual war even between other nations of world power would mean a simple and direct death-blow to European society. The military experiences that have been gathered during the war and the technical improvement of the aggressivt weapons after the war have made future warfare so formidable that no statesman can shoulder the responsibility of such an undertaking. A war in Europe is impossible. It is senseless and will not take place because it would mean just the opposite of what the world requires to-day. Even to speak about war or to think about it is in itself a crime; how much more so a malicious and irresponsible propaganda for war?

WORLD ECONOMIC CONFERENCE

NEWS OF THE WEEK AND AIR-MAIL WEEK

(From Our Special Correspondent.)

(*By Cable*).

London, June 22.

The World Economic Conference finds itself up against a wall of American recalcitrance, a wall taller than the import tariffs in the States. Mr. Roosevelt's rejection of the stabilisation agreement is the first wet blanket; but it is feared that more are yet to come, owing to the rumoured supersession of Mr. Cordell Hull, known to be an advocate of lower tariffs and freer trade, by Professor Raymond Moley, the Economic Munroe. But it is still hoped that Mr. Roosevelt's action only betokens a desire to keep the question of stabilisation in reserve as a bargaining point rather than a cooling down of the President's fervour for the cause of the Conference. This, however, makes no difference to the progress of the Conference, as France will not move except after an agreement regarding the exchanges.

The main work of the Conference must, however, proceed, if at all, only slowly. The tangle of problems and proposals must take time to unravel. But the emergence of so many discordant notes such as American resentment against the reference to war debts, or the Irish protest against the British reprisals is definitely disheartening. It is still difficult to single out any development as a definite advance. The committees and sub-committees have been formed and a kind of genealogical tree is published to show their inter-relation. Mr. Hull's motion for the removal of artificial barriers and reduction of import tariffs by bilateral agreements is the first sign of the Conference coming to grips with a major problem. But the ghost of exchange chaos is bound to haunt the Conference; and France, which has just asked the Chamber for tariff making powers, will not give in. The first week-end of the Conference sees no improvement in international economic goodwill.

DAY-TO-DAY DIARY OF EVENTS.

June 10:

Official announcement of programme of the Conference at which over 2,500 representatives of 67 nations would meet at the opening in London on June 12. King George to open the Conference, after which Mr. Ramsay MacDonald would take the chair.

The Conference is expected to last several months and the main problems to be discussed were stated as :—

(1) Monetary and credit policy.
(2) Commodity prices.
(3) Resumption of the movement of capital.
(4) Restrictions on international trade.
(5) Tariff and Treaty policy.
(6) Organisation of production and trade.

The French Government has asked the Chamber to authorise customs sur-taxes as a "reprisal to measures by foreign governments injurious to French trade."

June 12:

The King opened the Conference with a fine speech which is a message of hope and an appeal for goodwill and co-operation.

Mr. Ramsay MacDonald the British Premier delivered his opening speech. He made a passionate appeal for international co-operation.

Points from the Premier's Speech :

(1) Since 1929 prices had fallen well below the line at which production can be remunerative.

(2) Quotas and exchange control have reduced world trade to less than three-quarters of its former value.

(3) World unemployment had reached a total of 32,000,000.

(4) The question of War Debts must be taken up without delay.

(5) Lausanne settlement must be completed and the vexed question settled once and for all.

(6) The problem would have to be tackled before every other obstacle to world recovery has been removed.

June 13:

Two sessions of the World Economic Conference were held, when proposals were received from a number of delegations.

(1) M. Daladier (France) advocated the restoration of the free movement of gold, public works for unemployed and the adoption of a 40-hour week.

(2) General Smuts (South Africa) favoured the appointment of two expert committees, to examine financial and economic questions.

(3) Singor Jung (Italy) urged that the settlement of war debts was the preliminary problem to the raising of prices and the removal of trade barriers.

(4) Viscount Isshi (Japan) stood for reduction of tariffs and the unrestricted applications of the most favoured nation clause.

(5) Sir Atul Chatterjee (India) presented the resolution adopted by the International Labour Conference on unemployment. He pointed out that the estimates of 30 millions world unemployed was a low one, as there were millions in India and China, who owing to fall in prices, were unable to secure the barest necessities of life.

June 14:

Report of an unexpected hitch which developed at the Conference in London.

It is believed that Mr. MacDonald's outspoken reference to the war debt question which is outside the scope of the Conference resulted in the absence of the American delegats from the Conference.

Mr. Neville Chamberlain in his speech also referred to the war debt problem. He outlined Britain's proposals to end the trade slump. The chief points from his speech are :

(1) A final settlement of war debts was essential if measures in other fields were to be effective.
(2) Exchange controls must go.
(3) Resumption of international lending.
(4) Reduction of excessive tariffs.
(5) Restoration of a satisfactory international monetary standard with gold as basis.

He declared that the abandonment of the gold standard had "prevented the further depreciation of our economic position".

June 15:

Britain paid America $10,000,000 in silver at 50 cents per ounce. This removed one of the most formidable obstacles to the progress of the Conference.

Reports of a fierce conflict behind the scenes at the Conference, between France and the United States over the chairmanship of the Monetary Commission. France advances the contention that the conferment of the chairmanship on the United States would entail

World Economic Conference:

the danger of a lead being given to inflationist policy.

Mr. Soong, the delegate from China, emphasised that China had no intention of following a policy of national or regional isolation, but would pursue the economic development of the country, by means of which she would advance international co-operation. "We desire to maintain", he said, "a fiscal policy which will not prevent the entry of foreign goods." Canada supported the policy of Britain in its entirety.

A German-Latvian crisis developed which is considered a bad omen. Cessation of trade between Germany and Latvia is reported imminent, unless the respective delegates come to a settlement in London.

June 16:

Considerable progress is being made in London towards the conclusion of an agreement on the stabilisation of currencies on which delegates appear to agree "as an essential complement to a tariff truce." Bankers and Treasury experts of Britain, America and France met again to-day, and it is hoped an agreement will be announced in a few days.

Senator Borah of the United States has issued a warning to all debtor nations against trying to mix the war debt controversy with the Economic Conference. "If the Conference breaks down" he says, "it will be due to the attitude of debtor nations, which seem determined to make debts the whole matter of discussions."

Both the Monetary and the Economic Committees were inaugurated by their Chairmen in brief speeches. The chairmanship of the Monetary Conference was conferred on Mr. James Cox, ex-Governor of Ohio. Mr. Georges Bennet (France) the rival candidate, has been appointed *rapporteur*.

Dr. Colijn (Holland) is to preside over the Economic and Trade Commission.

June 17:

The Committee of the Monetary and Financial Commission recommends the creation of two sub-committees, one on immediate measures of financial reconstruction and the other on permanent measures for the re-establishment of an international monetary standard. The Economic Committee will begin discussions on Monday.

It is announced that 41 nations representing approximately 80 per cent. of the world's trade have signified their adherence to the temporary tariff truce.

June 19:

Delegates are convinced that the success of the Conference depends on stabilisation, and it is possible that an agreement on sterling-dollar stabilisation may be reached before the week-end, through an understanding between the Banks of England, France and America, instead of an agreement between the three governments.

June 20:

The proposals for stabilisation of silver submitted by American representatives include:

Lower legal gold cover with a uniform 25 per cent. coverage; remonetisation of silver, and use of gold to be confined as a cover for circulation and as a medium of settling international balance of payments.

Mr. Naville Chamberlain's proposals for the restoration of equilibrium between cost and production were:

(1) The cessation of deflation, and
(2) Cheap and plentiful credit.

Sir Henry Strakosch who represents India at the Conference declared that the essential need in India was an increase in prices. A further large reduction in costs would bear heavily on India's agricultural population.

June 21:

A period of uncertainty is present at the Conference which is expected to be cleared by the arrival of Prof. Moley, Mr. Roosevelt's personal adviser on economic questions. Prof. Moley, who is a strong advocate of an isolationist policy for America, is expected to make the American position clear.

Meanwhile, the Economic Commission has surveyed the whole field of international trade and are at the stage when they can put forth concrete proposals.

INTERNATIONAL CHAMBER OF COMMERCE

RESOLUTIONS AT VIENNA SESSION

The following are the more important resolutions passed in Air-Mail Week at the Vienna meeting of the International Chamber of Commerce:—

The International Chamber of Commerce regards with grave anxiety the present position on the international capital market, both in its bearing on the world depression and in regard to the outlook for the future. For more than a century, the loan of capital, both short-term and long-term, has been an indispensable factor in the economic development of the world, by means of which the current bow of commodities has been assisted.

Furthermore, the relatively weaker have been able to draw upon the more ample resources of the economically stronger nations for the purpose of building up the material equipment of society.

Believing that without a renewed flow of capital in the future, neither world trade nor the internal development of many parts of the globe will proceed as rapidly as is desirable in the interests of industry, trade and employment, the International Chamber of Commerce desires to place upon record the following statement of its views upon the vital issues involved in the existence of debtor-creditor relationships arising out of short-term or long-term borrowing for productive or economic purposes.

Debtors' Responsibilities.

(1) The International Chamber believes that debtors must realise the responsibilities which rest upon their shoulders. The first duty of debtors is to pay their debts. Default or threatened default for the purpose of bringing pressure to bear upon creditors, or brought about without adequate attempts to satisfy the just claims of creditors, must inevitably result in the capital markets of the world being closed to such borrowers.

Such defaults necessarily result in grave hardship to those who have directly or indirectly furnished the funds by which the internal economic develop-

World Economic Conference.

ment of the debtors has been built up. In the long run the result will be a further diminution in the aggregate volume of world savings, in the willingness to save, as well as a sharp contraction in the amount of foreign issues which can be placed in the lending markets.

Position of Creditors.

(2) (*a*) The position, however, of creditors imposes upon them the necessity of recognising that international debts in the case of countries without foreign assets can only be liquidated without danger of disruption of the economic system if the debtor areas are afforded an opportunity of disposing of such goods and services as in their actual state of development are suitable to their situation.

Debts which can only be liquidated by the process of further borrowing or by the loss of the gold stocks of the debtor countries, are a cause of disequalibria which grow in significance as the scale of international indebtedness expands, and must ultimately result in the collapse of the whole system.

Equitable Adjustments.

(2) (*b*) Creditors must, moreover, recognise the difficult situation into which debtors have been forced by the catastrophic fall in the market prices of their exportable products, and must be willing to cooperate with them in an impartial examination of their difficulties, with a view to such equitable adjustments, temporary or permanent, as are necessary.

The establishment of impartial and independent bodies for such purposes on lines already approved by the International Chamber of Commerce and referred to in the report of the Preparatory Committee of the World Economic Conference, will facilitate the removal of many obstacles to world recovery.

Governments as Borrowers.

(3) The International Chamber of Commerce believes that many Statesmen have paid insufficient attention to the effects of interference with the processes of international invessments by the manipulation of the monetary standard. Whatever ends may be aimed at or served by such manipulations, currency depreciation and the abandonment of provisions, inserted into debt agreements for the express protection of the creditor, must impair faith in the written and spoken words of debtors, public and private.

In view of the fact that Governments are increasingly appearing on the capital market as borrowers, not only for budgetary purpose, but also in connection with the financing of industrial, public utility and other productive enterprises, the International Chamber of Commerce believes that such arbitrary treatment of the creditor class is disruptive in its effects upon credit, and calls upon the Governments of the world to adhere to the same standards in such matters as have long been expected from the business men of all nations.

Return to Free Market.

The International Chamber of Commerce, disturbed by the serious reactions upon economic conditions throughout the world resulting from the currency control instituted in so many countries; because therein lies one of the most alarming results of the crisis, since that control itself gives rise to fresh difficulties which impede world trade to ever-increasing extent; considers that the question of currency control is one of the most immediate problems; and as such brings it to the notice of the World Monetary and Economic Conference and Governments.

The opinion of the International Chamber of Commerce on the economic crisis and the methods and principles it considers most likely to end it are to be found not only in the resolutions of the present congress, but also in the report to be submitted to the World Monetary and Economic Conference.

The International Chamber of Commerce wishes, however, to draw the attention to the fact that the Governments can only contemplate the removal of control when they will be able to adopt at the same time a stable international monetary standard. One important condition is a gradual removal of the barriers now impeding the exchange of goods and services.

Essential Conditions.

Among the other essential conditions, the following should be borne in mind: the adjustment of short term debts (including the so-called "stillhalte debts") as well as that of long term debts, to decrease the danger of sudden and large transfers; balancing of national budgets.

Without wishing to recall the causes and consequences of the development of foreign exchange control, the International Chamber of Commerce considers it advisable to emphasise:—

(1) That this control is instituted in several countries (particularly those which had passed through a period of currency inflation) as a result of heavy withdrawals of capital by foreign creditors, and huge transfers of domestic capital abroad during the last few years. These withdrawals and transfers have endangered national currencies and have assumed a still more serious aspect in that they have been aggravated by speculation. It is principally to these irregular movements of capital that the great fluctuations in currency and the consequent measures to control the market are due;

(2) That this policy has given rise not only to the establishment of new barriers to exchanges, but also to the introduction of clearings, and agreements of compensation in form of goods reached in certain cases have brought trade to follow artificial lines without improving the general situation in the distressed countries.

Establishment of Equilibrium.

The International Chamber of Commerce considers that proportionately as the effort required to place national economics on a sound basis gains strength, and a normal equilibrium between assets and liabilities in the balance of payments (not of the trade balance) in the various countries is gradually established, so foreign exchange control will have to be abolished.

Pending the establishment of such equilibrium it will be necessary to devise appropriate methods to alleviate the consequences of foreign exchange control and to pave the way for its abolition.

For that reason the International Chamber of Commerce recommends:—

(1) That in proceeding to place their financial system on a sound basis, the countries with depreciated currency which have instituted restrictions on foreign exchange transactions endeavour to stabilise their currency *de facto* where this has not yet been done.

(2) That commercial exchanges be rapidly freed from the barriers imposed by a policy of restricted exchange. Such restrictions ought never again to be utilised as an instrument of commercial policy.

(3) That, for countries with depreciated currency, on the initiative of central banks the gradual introduction of a free foreign exchange market be permitted and encouraged. A measure of this nature will not only be very useful in promoting the return of monetary stability, but

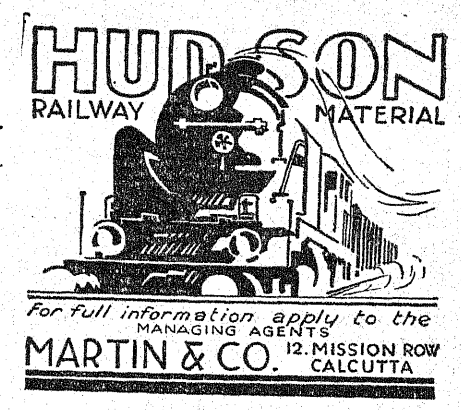
Clive Street Gossip



I cannot congratulate Mr. S. N. Pochkhanawala on the memorandum he has prepared on the Reserve Bank scheme for the special edification of the committee now in London on an errand to know the *what, why* and *how* of a central banking institution for India. For one thing, few of the members of that committee know even the A. B. C. of a Reserve Bank; what is the use, then, of trying to instruct them in A to Z of such a project? For another thing—and it grieves me greatly to say it—Mr. Pochkhanawala does not appear to be particularly qualified for the *role* of a teacher. I should rather think that he has drafted this document in great hurry and without the necessary references near at hand. Otherwise, I cannot account for its poor draftsmanship, half-baked ideas, impracticable proposals and lack of precision. To start with, it is said on the cover page of the brochure that the memorandum is submitted "to the members of the Reserve Bank Bill Select Committee". Well, no Reserve Bank Bill is as yet ready. The delegates who have undertaken the jaunt to London are to discuss the proposals in its varied aspects; and I suppose, the Bill is to be thereafter prepared on the basis of the talks and such conclusions as emerge from those talks.

* * *

Possibly, Mr. Pochkhanawala has in mind the draft bill brought in in the Assembly after the publication of the report of the Hilton-Young Currency Commission. But the Bill underwent quite a number of transformations, and there are, I believe, at least three printed versions. Besides, there were considerable negotiations of an informal character between Sir Basil Blackett and Mr. S. Srinivasa Iyengar, the acting Leader of the Opposition in 1927; and further changes were agreed to, though these were not placed on record formally. From the side of the Government, no indication has so far been given as to the extent of variations which they would be prepared to accept on the first draft of the Reserve Bank Bill. Of this there need be no doubt, that the original bill was thrown into the dust heap long ago and that there is no chance of anybody trying to retrieve it at this stage. My own idea is that the regional plan of capital distribution and directorate, which was the last proposal in the field, is the one over which there would be the least controversy. However, it is, in present conditions, useless to offer any comments on any specific points or on the more detailed provisions of the Reserve Bank proposal. Such comment should be held over till the Government have shown their hand and placed on the table their concrete suggestions. Meantime, all that we can do is to emphasise the fundamentals that should be kept in view in any project for establishing a Reserve Bank in India.

* * *

There are three definite ideas in Mr. Pochkhanawala's pamphlet:

1. He believes in the possibility of converting the existing Imperial Bank of India into (*a*) the Imperial Reserve Bank and (*b*) The Imperial Bank of India Ld.

2. He is most particular that the Reserve Bank should be only Bankers' Bank and should not have such functions and rights that would result in its competing with scheduled member banks.

3. Precautions should be taken to prevent the Imperial Bank from becoming a monopolist institution enjoying formidable advantages and succeeding, by virtue of those advantages, in ousting other indigenous banks.

* * *

The proposal for the *analysis* of the Imperial Bank into two components and the *synthesis* of the two sections into (*a*) a central banking institution and (*b*) a commercial bank was first put forward in the memorandum dated January 15, 1930, submitted by the Central Bank of India to the Indian Central Banking Enquiry Committte. The suggestion was clumsy, cumbrous and impracticable. We would, in the result, have neither a smooth-working central bank nor an efficient commercial bank. This scheme did not appeal at the time either to the public or the Banking Committee. Mr. Pochkhanawala says that "very often, in well-informed circles, the question is asked whether or not it would be possible to transform the existing Imperial Bank of India, by eliminating its commercial banking departments in a way as would satisfy the public in general and the commercial community in particular, and the bank's own shareholders, into a body able to take the place of the Reserve Bank." I think, I can safely claim to be equally in touch with "well-informed circles", and I have never heard this question seriously asked by anyone.

* * *

Sir Purshottamdas Thakurdas was the only member of the Hilton-Young Commission who believed in the possibility of the Imperial Bank being converted into the Reserve Bank, presumably on the analogy of the Bank of France. But he could not persuade any other member to his view. Again, on the Joint Select Committee which considered the first Reserve Bank Bill, he could not win any seconder for his pet scheme. Barring Sir Purshottamdas Thakurdas and, I think, the late Mr. B. F. Madan, the only supporter for this project I have so far come across is the Central Bank of India. Once you set about refashioning the structure of the Imperial Bank to serve new objects and to fulfil new plans, it will become an ill-shaped, ill-balanced, ill-functioning thing. At this stage of progress in central banking technique, the revival of the proposal to convert the Imperial Bank into a reserve bank is

meaningless because nobody will pay any heed to any arguments on these lines ; for everybody knows that, except for modifications necessitated by local conditions and requirements, standard specifications for a central bank are available. Mr. Pochkhanawala has taken a wrong step tactically by juxtaposing his main idea with a proposal which has no chance of securing any attention. I need only quote the following passage from the Hilton-Young Commission report :

> "The idea of utilising the existing organisation of the Imperial Bank is tempting at first sight, but on close consideration it will be found that, whatever advantages there may be in this course, the disadvantages outweigh them. If the Imperial Bank were required to discharge the duties of a true Central Bank its charter would have to be amended radically in the direction indicated. It would thus be precluded from undertaking a great many tasks which it now successfully performs as a commercial bank. The country would then lose the benefit of the elaborate and widespread organisation which has been set up, through the length and breadth of India, to make available to the community the increased commercial banking facilities, which are so urgently needed, and to assist in fostering, among the people as a whole, the habit of banking and investment. This consideration alone negatives the idea of disturbing the present functions of the Imperial Bank".

* * *

His next idea that the Reserve Bank should not compete with member banks is likewise subsidiary and unimportant. Nobody ever suggested that the Reserve Bank should be anything but a Bankers' Bank. Sorabji says that "if, under the Reserve Bank Bill, it (the Reserve Bank) is allowed to receive deposits at interest, make advances to the public and discount bills to parties other than banks," it would result in undue competition with the other banks in the field. If he had studied the various bills, he would have found that the Reserve Bank was clearly forbidden from taking money on interest. In the first draft, the clause ran thus :

> "The accepting of money on deposit without interest from, and the collection of money for, the Secretary of State in Council, the Governor General in Council, Local Governments, banks and other persons".

In the draft as amended by the Joint Select Committee the above section ran as under :

> The accepting of money on deposit without interest from, and the collection of money for, any person.

* * *

To suggest that the Reserve Bank should not accept, even without interest, deposits except from member banks is too tall an order. Sorabji is entirely in the right in insisting that no interest should be allowed ; and, by way of answer, I have quoted the assurances already contained in the provisions of the earlier bills.

* * *

As for his suggestion that the Bank should not make advances to the public and discount bills of parties other than banks, the original bill did provide that, normally, of the two signatures to all documents, one of them shall be that of a bank. The Joint Select Committee changed this to the extent of providing that one of the signatures should be that of a scheduled bank.

* * *

In drawing up the list of the business that the Reserve Bank might do and might not do, the aim was that its functions and capacities should be so organised as to secure that it should be made use of without suspicion or jealousy as the Bankers' Bank. It is for this reason, that, in ordinary circumstances, one of the two signatures should be that of a bank. Direct operations in the bill market by the Reserve Bank was not contemplated as a regular or usual part of its business. But, as the Hilton-Young Currency Commission pointed out, a provision for resort to direct operations in the bill market is essential if the Reserve Bank is properly to discharge its primary duties of regulating credit and maintaining the stability of the currency. But the report adds :

> "In the present stage of development of the bill market in India, we do not consider that open market operations by the Reserve Bank are an indispensable method for carrying out its credit policy". The views of the Commission are thus amplified :
>
> "Rather we think that this development should follow in the wake of banking progress and the growth of a large and healthy bill market. Experience in other countries shows that with the creation of a Central Bank, and the consequential development of a sound banking system, the bill market comes into being in a surprisingly short time. In India, where the *hundi* or internal bill of exchange has been in existence for many years, we hope the growth of the habit of drawing bills instead of opening cash credits will be more rapid than elsewhere. In order to provide for such future development, the charter should enable the Reserve Bank to apply to the Governor General in Council for power to buy and sell in the market bills of exchange, promissory notes or other commercial paper arising out of *bonafide* commercial or trade transactions bearing two or more good signatures and having a maturity not exceeding 90 days, if and when it finds such powers necessary to the performance of its function of regulating the supply of credit. In deciding whether to grant or refuse this application, the Governor-General in Council would, of course, give due consideration to the possible effect, on the various classes of persons concerned, of the operation of the proposed new procedure".

* * *

In pursuance of this recommendation, the original bill contained a provision that "after such date as the Governor General in Council may fix in this behalf the bank may . . . . . purchase, sell or discount any bills of exchange or promissory notes arising out of *bonafide* commercial or trade transactions bearing two or more good signatures and maturing within 90 days from the date of such purchase or discount." The Joint Select Committee modified these proposals for open market operations by providing for such direct intervention in the Bill market on occasions "when, in the opinion of not less than two-thirds of the directors present at a meeeting of the Board, it is necessary or expedient that action should be taken under this section in the interest of Indian trade or commerce or for the purpose of enabling the bank to perform any of its functions under this act." Without this power to undertake open market operations as and when necessary, the Reserve Bank would never be able to enforce its credit policy on the money market. It is, of course, always understood that, normally, the Reserve Bank would not use its powers under this section. Mr. Pochkhanawala need have no apprehensions that the special power for exceptional situations conferred by this section is likely to lead the Reserve Bank to undertake operations of a competitive character with member banks.

* * *

Now I come to Sorabji's third point, namely, the increasing competition which Indian joint stock banks will have to encounter from the Imperial Bank. With this part of the memorandum I am in entire agreement. Mr. Pochkhanawala and others like him who are in charge of indigenous banks have my fullest sympathy. In fact, in 1927-28, I took up this question with Sir Basil Blackett, and I did succeed in making him realise that while the rights and privileges of the Imperial Bank were fully secured in the Bill, they were secured in a manner that would seriously jeopardise the growth and development of Indian joint stock banks. I put a number of counter suggestions in this behalf ; and before they could be considered, the debacle over the Reserve Bank Bill happened. However, I found, at the time, that the most serious handicap in the way of anyone who wished to help Indian banks was that the banks themselves would not co-operate for a common plan of action ; that the authorities in charge had spent but little thought or time over devising remedial measures ; and that, while every other interest affected was, in Delhi or Simla, canvassing opinion for its point of view, the bankers in charge of Indian

institutions were nowhere on the scene. It is a sad reflection that the managers of the various indigenous institutions should have so much mutual jealously, and that, even when a grave situation threatened them, they could not wake up from their apathy and indifference.

* * *

To prove my point, I need only mention that in a letter that was prepared as representing the views of the Indian banks, the only four signatories were the Central Bank of India, the Allahabad Bank, the Punjab National Bank and the Indian Bank (Madras). The Bank of India and the Bank of Baroda chose to stand aloof and to send separate representations. On this question of the undue powers to be conferred on the Imperial Bank, the Bank of India was complacent enough to add that it is not "prepared to say that the Imperial Bank is receiving too great consideration." As for the various items of remuneration to the Imperial Bank, the Bank of India could not give a properly considered opinion "in the absence of more detailed information." Thus, the case of the Indian banks was about to go by default, while the victims were engaged in a quest for more detailed information. From this point of view, I am glad that Mr. Pochkhanawala has had the courage and enterprise to state his views frankly and freely so far as competion from the Imperial Bank is concerned.

* * *

The case of Mr. Pochkhanawala is very simple. (1) Through the establishment of the Reserve Bank, the Imperial Bank will have many of its existing restrictions removed. It should, therefore, offer fiercer competition both to exchange banks and indigenous banks. (2) It will act as agent to the Reserve Bank in places where the latter has no branches; it will, therefore, have ample resources free of interest. (3) It will continue to be in charge of Government Treasuries at all stations where there are no branches of the Reserve Bank. It will, therefore, continue to retain the prestige of being the depository of Government funds. This should enable it to secure deposits at lower rates of interest than other banks. On the one hand, it will have an ampler scope for business. On the other hand, it will be able to maintain the present size of resources and will, as a consequence, be able to offer better facilities at more competitive rates. (4) It will be in charge of Government Treasuries and would, therefore, make considerable profits by transmitting of funds. (5) As the Reserve Bank is not likely to have branches except in a few centres, most of the public bodies in India will continue to give their custom to the Imperial Bank. In regard to prestige, resources, and contact with the Government, the position of the Imperial Bank in the new conditions will remain more or less unaltered. But its freedom for business will be greatly enlarged. It will be ridiculous to suggest that by the setting up of the Reserve Bank, the Imperial Bank will stand to lose either in status or profit-earning capacity.

* * *

While this is the position, the Imperial Bank is to receive emoluments and facilities of various kinds on the plea that the Reserve Bank would be taking away a portion of its custom. At the time when the arrangements detailed in the Second Schedule to the first Reserve Bank Bill was devised, the unexpired portion of the contract between the Government and the Imperial Bank was four years. It was urged that as compensation for the Bank giving up its rights over the unexpired portion of the contract, special inducements were being offered. In the agreement between the Reserve Bank and the Imperial Bank, the following provisions were intended to be included:

(1) At all centres where the Reserve Bank has no office or branch, the Imperial Bank was to be its *sole* agent.

(2) For doing work at such branches, the Imperial Bank was to receive a commission calculated on the total of the receipts and disbursements dealt with annually on account of Government by the Imperial Bank on behalf of the Reserve Bank. Such commission was to be 1/16 per cent. on the first Rs. 250 crores of such total and 1/32 per cent. on the remainder.

(3) As reward for continuing to maintain the existing number of branches, the Imperial Bank was to be allowed cash balance on the following scale:

(*a*) during the first five years—3 crores free of interest;

(*b*) during the second five years—2 crores free of interest and, at the option of the Imperial Bank of India, an amount not exceeding 1 crore at 2 per cent. per annum;

(*c*) during the third five years—1 crore free of interest and, at the option of the Imperial Bank of India, an amount not exceeding 2 crores at 2 per cent. per annum; and

(*d*) during the last 10 years—at the option of the Imptrial Bank of India, an amount not exceeding 3 crores at 2 per cent. per annum.

(4) As further reward for engaging in fresh branch-banking activity, the Imperial Bank was to be allowed free cash balance of Rs. 3 lakhs for the first 5 years and Rs. 2 lakhs for the second 5 years for each branch opened.

* * *

A statement was prepared by the Government in which a calculation was made of the remuneration payable to the Imperial Bank under the proposed arrangement. It was shown that, outside of Calcutta, Bombay and Madras, the other branches of the Imperial Bank had a turnover of Rs. 3,28 crores during a twelve-month period in 1926-27. According to the percentage commission proposed, the Imperial Bank would have received, on this aggregate total of receipts and disbursements, a commission of Rs. 18 lakhs per annum. Secondly, an average return of 4 per cent. was assumed in respect of the deposits to be allowed to the Imperial Bank. On this assumption, the value of the free balances to the Bank was shown as Rs. 12 lakhs in the first five years, Rs. 10 lakhs in the second five years, Rs. 8 lakhs in the third five years and Rs. 6 lakhs in the last ten years. No account was taken of the remuneration proposed for opening of new branches as it was considered that the terms were not unduly generous. It was, therefore, calculated that the arrangements proposed in Schedule 11 would give the Imperial Bank:—

(1) Commission on the Government business in the mofussil	...	Rs. 18 lakhs
(2) Value of free balances	...	,, 12 ,,
Total	...	Rs. 30 lakhs

* * *

In other words, the Bank would obtain a benefit of Rs. 30 lakhs per annum during the first five years of the agreement which would be reduced to Rs. 28 lakhs during the second five years, Rs. 26 lakhs in the third five years, and Rs. 24 lakhs in the last ten years. This would have been the remuneration in case the agreement between the Reserve Bank and the Imperial Bank on the suggested lines had been concluded. In the existing order of things, when

ICE

103, Clive Street, Calcutta.

the Imperial Bank is the sole agent of the Government, it derives the following direct or indirect remuneration:

(1) Profit on the administration of the public debt	...	Rs.	2.81 lakhs
(2) Interest on Government balance at Bank rate (quinquennial average)	...	,,	32.91 ,,
Total	...	Rs.	35.72 lakhs

It was, therefore, argued that while the Imperial Bank was deriving Rs. 35¾ lakhs, it would get only Rs. 30 lakhs under the proposed new scheme. By way of justification for the payment of Rs. 30 lakhs, it was urged that the remuneration was just sufficient to compensate the Bank (1) for the cost of conducting the Government's business in the mofussil and (2) for the loss of the development of branch banking in India. The following was the argument used in this connection:—"The cost of maintaining Government account at all branches is, according to the statement furnished by the Imperial Bank, Rs. 16.75 lakhs per annum. The aggregate loss for the two past half years suffered by the Imperial Bank, on account of the opening of the 100 branches in conformity with its agreement with Government, is Rs. 16.20 lakhs, making a total on account of two items (1) conducting Government business and (2) developing branch banking, of Rs. 32.95 lakhs."

* * *

So far as the new branches were concerned, it was reported that of the 107 new branches and pay offices opened by the Bank, 26 were on a paying basis, 18 were expected to be on a paying basis by 1931, 32 might possibly be on a paying basis by 1931 and 31 were unlikely ever to pay their way. In considering this agreement in the conditions prevalent to-day, it has to be remembered that the Imperial Bank can no longer claim any privilege on the score of giving up rights in respect of any unexpired portion of the contract. Moreover, on its own admission, 76 of the branches should, by this time, have begun to pay their way. It means that no "bribe" has to be offered in order to induce the Imperial Bank to give up rights under any agreement; and that, even if it is agreed that compensation for the losing branches is to be paid, such compensation should be considerably less than what it should have been in 1927. In any case, there can be no justification whatsoever for the revival of the Second Schedule in the form in which it was planned in the first draft. Considerable modifications are called for in the changed situation. Another factor to be taken note of is that the function of the Reserve Bank would be not only to ensure the growth of the Imperial Bank but the healthy growth of all other indigenous institutions. As the Indian Merchants Chamber pointed out at the time, the liberation of the Imperial Bank and the heavy subsidies proposed to be granted to it would kill all banking institutions in the country and should be avoided at all cost. Keeping these three points in view, I am of opinion that the following should be the relation between the Reserve Bank on the one hand and the Imperial Bank and Indian Banks on the other hand:—

(1) Regarding the agency of the Imperial Bank, there is not the slightest justification for the proposal that the Imperial Bank should be the sole agent. On the other hand, at any place where the Reserve Bank has no branch, it should invite tenders from the Indian joint stock banks on the approved list, asking them to state the terms on which they will agree to act as agents of the Reserve Bank at such centres. The lowest of the tenders should always be accepted. Only Indian joint stock banks satisfying the prescribed conditions and enrolled as member banks of the Reserve system should be eligible to tender for the agency of the Reserve Bank. This arrangement will give a valuable impetus to the development of Indian banking as everyone of the approved banks will be able to shine in greater lustre before the public in so far as it handles Treasury work.

(2) Regarding the allowance of deposits, this is no longer tenable as the Imperial Bank itself admitted, six years ago, that by 1931 most of the branches would be on a paying basis.

(3) Turning now to the provision for subsidising new branches, I am of opinion that everyone of the scheduled Indian joint stock banks should be entitled to interest-free balance from the Reserve Bank for every new branch opened by it with the approval of the Reserve Bank in addition to the branches already existing on the date on which the Reserve Bank comes into operation. The scale of intertest-free balance should be:

(*a*) During the first five years, Rs. 3 lakhs;
(*b*) During the second five years, Rs. 2 lakhs;
(*c*) During the third five years, Rs. 1 lakh;

provided, however, that they can always have Rs. 2 lakhs for each such new branch at 2 per cent. interest in addition to the amount of balance maintained by the Reserve Bank.

(4) The Imperial Bank should take steps to convert itself into a joint stock bank under the Indian Companies Act.

* * *

Sir R. N. Mookerjee is eighty to-day. Indians and Europeans, Swarajists and non-Swarajists are at one in this—that the biggest asset of Bengal is the example of Sir Rajendra's life and career. From a million hearts the earnest prayer goes for many more returns of this day to Sir Rajendra. I cannot do better than extract here the letter I am just sending him:

"On this, your eightieth birthday, I offer you my sincerest wishes for continued health, increasing prosperity and fulfilment of every heart's desire. Thanks to K. C. Mahindra, Bengal, which has united, irrespective of parties, in honouring you, has now the means of benefitting from the inspiration which the life and personality of one like you means to society. I wished to call on you and tender my respects personally. But extreme pressure of work due to Publication Day has left me no other alternative than to send this note."

SIR PURSHOTTAMDAS THAKURDAS

MODERATE IN TACTICS—EXTREMIST IN ECONOMICS

In the ranks of the Indian commercial community, Sir Purshottamdas Thakurdas is the most aggressive and the most pugnacious personality, with a clear and definite mind of his own, and with an unequivocal way of expressing his mind. It is, therefore, no matter for surprise that he makes either devoted friends or implacable foes. On his side, he is equally susceptible to strong likes or strong dislikes. The reaction of one of his nature to the world, and the reaction of the world to him are, for this reason, quite a piquant study.

In the days prior to his advocacy of the virtues of the lower ratio, Sir Purshottamdas was generally considered a super-loyalist, a moderate of moderates, almos a *jo hukum* typt. He had, in that earlier period, an important status in the business world of Bombay ; but he had no place in "public life." His emergence as a leader and a public man is entirely due to the ratio controversy and the prominent part he took therein.

The moderate of the pre-eighteenpence days became the extremist of the eighteenpence *regime*. The fervour of propaganda completely transformed the man. One, whose creed had been that the Government could do no wrong, was found challenging their motives and actions and policy in strident style.

Herein is the key to the understanding of all his actions. He has been brought up in a school which believes in temperate language, sober comment and dignified poise. The events of the last few years have, often, landed him in situations where violent language, bitter comment and histrionic tactics are the vogue. It has not been easy for Sir Purshottamdas to adapt himself, entirely or gracefully, to the demands of the changing fashion.

In the strength of his conviction, in the passion of the moment, he has, not infrequently, set at naught the pose and behaviour of earlier years. Nor less frequently, on the other hand, have the qualities of "head" asserted themselves ; and Sir Purshottamdas has broken away from his new associates and decided on his own course of action in splendid isolation.

In his heart of hearts, Sir Purshottamdas is not averse to being splendidly isolated. For one thing, this very uniqueness confers on him the status of being the observed of all observers. For another, he is not the type of timid and self-diffident man, who worries all the time what the others say of him.

"They say ; what say they ? ; let them say !" This expresses the attitude of Sir Purshottamdas to public opinion. He is fully aware that, once in public life, he could not escape some manner of comment or other. He is keenly solicitous of knowing all the comments made. Where he sees any point in the criticism, Sir P. T. has no false sense of self-importance ; and he will readily thank the critic and benefit from the advice. If, however, he *bonafide* feels himself to be in the right and the other one to be in the wrong, he just gets ahead, intent on his own purpose and unruffled by the adverse views, however influential the source from which they emanate.

When he was invited, in 1925, to join the Hilton Young Currency Commission, most of his friends were opposed to his undertaking a mission in which he should, necessarily, plough his lonely furrow. If I remember right, the Indian Merchants Chamber (Bombay), of which body he was the representative in the Imperial Legislative Assembly, passed a resolution urging him to decline the invitation. There was a strong and widespread feeling, in Indian business circles, that he could do no good to the Indian cause by serving on the Commission ; and that he would be doing great harm to his own reputation if he should flout opinion so widely held.

In the teeth of opposition, he agreed to join the Hilton Young Commission. As predicted, he was, on the much-vexed question of the ratio, in a separate camp, all by himself. He had wounded many a friend by joining the Commission on what was deemed a futile errand. He had created many a new foe amongst his colleagues on the Commission. An altogether unenviable position !

But Sir Purshottamdas Thakurdas set about his task according to the best of his light, understanding and conviction. In a hostile atmosphere, he asserted his own importance, compelled attention for his own "say," and labouriously gathered all relevant data, hitherto confidential and otherwise, for the strengthening of his own case. He must have, I suppose, at a very early stage of the enquiry, lost all hope of persuading his colleagues to his own standpoint. And when the deliberations came to an end, he was not afraid of being in a minority of one ; his minute of dissent, like that of Sir Dadiba Dalal in regard to the Babington Smith Committee, stands vindicated and is final and conclusive proof that numbers and wisdom are not necessarily synomymous.

Now, I come to the pith and essence of this episode. At the commencement, Sir Purshottamdas Thakurdas voluntarily chose a path, which meant great unpopularity. At the end, he re-won the good opinion of those who so strongly disagreed with him.

Popularity may come ; popularity may go ; but Sir P. T. goes on for ever in the path chalked out by himself.

In tactics, he is a moderate ; in loyalty to the cause, he is an extremist. In negotiations, he is all tact and sweet reasonableness ; on fundamentals, he is adamant and will not swerve by a hair-breadth. In erudition, he is poorly equipped ; but his commonsense is infallible. As a director, he has a broad outlook and sympathetic understanding ; but he is stern and severe where he detects vagaries. With his colleagues, he has most cordial relations ; but he is, ever, the most dominant personality.

It is not always that you can agree with him. He can be dogmatic, over-assertive, and even intolerant. But, all the time, you cannot help admiring the very vim and vigour and *nonchalance* of his pugnacity.

"EAVESDROPPER."

INDO-JAPANESE TRADE

By NALINI RANJAN SARKER.

Economically, India and Japan are drifting furthed apart and a first class tariff war is threatened, even if it is not already in progress. At a time when the whole world is trying to feel its way towards better *economic* understanding it is most unfortunate that two good mutual customers like India and Japan should be preparing for *economic* strife.

India has decided to raise the tariff on Japanese piecegoods. As a measure of sheer self-defence it was long overdue. The continued influx of Japanese goods has been threatening India's entire cotton textile industry. As a measure of retaliation Japan is reported to be taking steps to "boycott" Indian raw cotton. It will only be a matter of time for the economic war to spread to the other fronts.

But I am still hopeful that the economic sanity of *both* countries will prevent an open rupture.

The Government of India, I am pleased to note, has expressed their willingness to open negotiations with Japan, and I understand the Japanese Government and businessmen also realise the wisdom of such a course. I would earnestly appeal to the Governments and businessmen of both countries to face the problems calmly and in a spirit of economic goodwill. I understand that some kind of negotiations are going on in London between the representatives of Japanese and British Governments. I am feeling considerable anxiety in that no accredited representatives of Indian business interests are present there. The talk of "division of markets" is ominous. I would like to warn Britain and Japan alike that the Indian market is not for sale, and we do not want a repetition of Ottawa. Whatever agreements are entered into in London would not be binding on us. I would strongly suggest to the Government of India to invite Japan to send a delegation to India to confer with a representative Indian Delegation.

Meanwhile, it would be interesting to examine, in a preliminary and general way, the trade figures to see what scope, if any, there is for an Economic Agreement between India and Japan.

EXPORT TRADE.

In 1931-32 out of the total Indian-export trade in merchandize valued at Rs. 156 crores, as much as 14.03 crores or about 8.7% were taken by Japan. The marvellous progress achieved by Japan as a customer of Indian products may be judged from the fact that in the pre-war year 1913-14 her share of the Indian export trade was only 2.6%. No other country in the world has grown so rapidly as a purchaser of Indian commodities.

The most striking feature of our export trade with Japan is that in 1931-32 Rs. 11 crores or 79% of it was represented by one commodity, raw cotton. Japan is by far the most important buyer of Indian cotton. In 1931-32 she took nearly 50% of the total value of Indian exports of raw cotton.

Pig Iron.—Next to raw cotton, pig iron is a valuable item of export to Japan. In 1931-32 our total exports of Pig Iron to Japan amounted to 1,88,100 tons valued at Rs. 66 lakhs which was nearly 50% of the total Indian exports of that commodity. The importance of Japan as a market for Indian Pig Iron springs from the fact that, as at present organized, an export market is absolutely essential for the Indian iron and steel industry; and Japan to-day is the most important outlet. Recently, on account of increasing production of Pig Iron in territories under Japanese control and in Japan itself, Japan has raised high duties against imports of Indian Pig Iron. Japan has always looked forward to the acquisition of some territory which would ensure a steady, safe and uninterrupted supply of iron necessary for her steel works, preferably, a source directly under her own political control. Manchuria, the conquest of which by Japan is very nearly complete, possesses reserves of iron ore and it is most likely that Japan will, within a few years, become independent of foreign supplies of pig iron. This eventuality will have serious re-action upon the Indian iron and steel industry. If the transformation from dependence upon foreign supplies to complete self-sufficiency is effected too quickly or completely, the Indian iron and steel industry would be seriously affected. I feel, therefore, that it is necessary to open negotiations with Japan in order that she may be persuaded to continue to take fair quantities of Indian Pig Iron and to reduce her purchases, if she must, only gradually and at an agreed rate so that the Indian iron and steel industry may, in the meanwhile, be able so re-organize itself as to develop other markets or to take steps to utilize more and more of its Pig Iron in the indigenous steel industry. Here I think is one fruitful field for negotiations.

Japan will, for some time to come, be dependent upon foreign sources for semi-finished and finished steel. In 1932 she imported iron and steel materials valued at 65 million yen of which the United States, the United Kingdom and Germany supplied about 16% each, and only 3 million yens or about 5% were from India. The semi-finished capacity of the Indian steel industry being in excess of its finished capacity, I think there is ample scope for a trade agreement with Japan with a view to secure for India a greater share of Japanese imports of semi-finished steel.

Dressed Tanned Skins.—In this line, also, Japan is a fairly good customer of India. She has increased her purchases very greatly as compared with the pre-war and war period. In 1931-32 India exported to Japan dressed tanned skins valued at Rs. 25.7 lakhs out of the total exports in that commodity valued at Rs. 3.1 crores. In 1931 India was the largest supplier of leather to Japan, her other competitors being the U.S.A., Germany and Great Britain. India's share of Japanese imports of this commodity was about 40%. It is evident that there is ample room here for the development of trade with Japan.

Oil Seeds.—In oil seeds also, the Japanse market holds out great possibilities for India's trade. Hitherto India does not seem to have devoted much attention to the Japanese market in this direction. In Japan's imports of oil seeds, India occupies but a secondary place. In 1932 out of the total imports of oil seeds valued at 14.8 million yens, India's share was only .8 of a million. China, Manchuria and Dutch East Indies supplied the bulk of it. In ground-nut India exported almost nothing to Japan; and so is the case with seasamum and rape and mustard seed. In all these items China and Manchuria were predominant suppliers. Linseed and castor seed were the only commodities in which India's trade could be described as considerable. Japan offers a very good field for the expansion of our trade in oil seeds, and with greater attention and

better understanding between the two countries, I see no reason why a greater volume of trade in oil seeds could not be transacted. As one of the greatest producers of oil seeds in the world, India has a distressingly low share of Japan's purchase of oil seeds. No doubt, China and Manchuria would offer serious competition ; but if a trade agreement could be concluded between the two countries, I believe, India's oil seeds can find a better market.

We shall now look at the Indo-Japanese trade from the side of Japan. The following are the figures of exports and imports of the Japanese Empire, including Formosa, Korea and other dependencies, in million yens :—

	1930	1931	1932
Exports ...	1,518	1,179	1,456
Imports ...	1,680	1,319	1,524

In comparing the foreign trade figures of 1932 with the previous years, allowance must be made for the very considerable exchange fluctuations. Japanese exports have secured a strong footing in the foreign market, from where it would not be easy to dislodge them. Exports of cotton piecegoods, of course, are by far the greatest items of Japanese foreign trade.

Exports of piecegoods in million square yards for the first 11 months of

	1930	1931	1932
China ...	552	334	289
India ...	374	360	592
Total all countries ...	1,444	1,317	1,821

Thus it will be seen that India has been the growing market for Japan. In 1930 nearly 25% of Japanese export of cotton piecegoods were destined for India. In 1931 it rose to 27% and in 1932 to nearly 30%. India has successively raised her import tariff without any apparent effect in checking the flood of Japanese imports of piecegoods.

Imports — Raw Cotton
(In million pounds in 11 months)

	1930	1931	1932
U.S.A. ...	469	582	1,122
India ...	597	614	342
Egypt ...	22	33	37

Indian raw cotton has lost heavily in the Japanese market in 1932, and the U.S.A. and Egypt have gained. In 1930 and 1931 India was principal supplier of raw cotton to Japan. In 1932 she was completely eclipsed by the U.S.A.

Imports of Pig Iron into Japan from India decreased from 150,491 tons in 1931 to 117,862 tons in 1932.

Imports of Oil Seeds
(in million yens).

	1930	1931	1932
China ...	13	6.5	6.9
Manchuria and Kwantung ...	4.8	2.5	4.3
Dutch E. Indies ...	.9	1.4	2.3
India ...	.7	.6	.8
Total all countries ...	19.9	14.5	14.8

India's share has been practically stationary, whereas, compared with 1931, Japan purchased much more from Dutch Indies and from Manchuria.

Imports of Hides and Skines
(In million yens)

1930	1931	1932
8.7	7.3	7.9

Japan's trade with India
(In million yens)

	1930	1931	1932
Export to India ...	129	100	192
Import from India ...	180	133	117

In 1932 India was the second largest customer of Japan. In the table of Japan's imports in that year India took the third place.

The examination of these figures reveals one fact, *viz.* the extensive trade relation between Japan and India. The Japanese market is considerably valuable for many Indian commodities, actually and potentially. On the other hand, the Indian market is equally necessary for Japanese industries. At present Japan's trade policy and methods are seriously affecting Indian industries. In sheer self-defence India is forced to raised tariffs to stem the tide of Japanese goods. This must only annoy Japan ; and she has not been slow in retaliating. She has apparently laid down a policy whereby she will, in course of time, become very much less dependent upon India as a source of supply for the raw and semi-finished materials required by her. It looks so tragic that two such mutually good customers should continue to fight each other in preference to coming to an agreement. The figures, if anything, prove conclusively what great scope there is in achieving the same. Would it not be possible for India to share with Japan a part of her own great internal market in return for like advantages for Indian commodities in Japanese markets? India is determined to develop her manufacturing industries ; and Japan should realise this great fact and re-construct her trade and export policy accordingly. If Japanese imports hurt the Indian industries, India is bound to take action to defend them, as Japan herself would have done in similar circumstances. It seems to me so obvious that, rather than go on piling up tariffs against each other's commodities, economic good sense and an appreciation of hard trade facts should induce the two countries to arrive at an understanding. I earnestly appeal to the Government and businessmen on either side not to precipitate the crisis but to explore all avenues of settlement.

ORIENTAL GOVERNMENT SECURITY
LIFE ASSURANCE CO., LTD.

INCORPORATED IN INDIA 1874

HEAD OFFICE : BOMBAY

1932 RESULTS

New Business: 29,982 Policies Assuring Rs. 594 Lakhs.
Claims Paid During The Year : 3,816 for Rs. 85 Lakhs.
Funds Increased to nearly Rs. 12½ Crores.
Policies in Force : 2,07,531 Assuring with Bonuses nearly Rs. 44 Crores.
Low Expense Ratio of 21% of the Premium Income.

NEXT DIVISION OF PROFITS

falls to be made as at 31st December, 1933.

Participating Policies effected in the Current Year will be entitled to participate in the Division of Profits if in force as at 31st December, 1933.

Applications for further information should be addressed to:
THE BRANCH SECRETARY,
ORIENTAL ASSURANCE BUILDINGS,
2, Clive Row, CALCUTTA,
or to any of the Company's other offices as undernoted:

INDIAN FINANCE
YEAR-BOOK 1933-34

TO BE READY IN LATTER PART OF JUNE

OUTSTANDING FEATURES:

1. A CONCISE AND COMPREHENSIVE REVIEW OF INDIA'S TRADE, BUDGET, FINANCE, BANKING, INSURANCE, TRANSPORT INDUSTRY AND AGRICULTURE.
2. LUCID EXPOSITIONS AND COMPARATIVE STATISTICS.
3. TEN YEAR FIGURES ARE GIVEN IN MOST CASES.
4. OVER 200 STATISTICAL TABLES.
5. WHERE NECESSARY, CORRESPONDING STATISTICS OF INTERNATIONAL VALUE ARE GIVEN.

THE "HINDU": Non-official enterprise has been able to achieve what the Government failed to do.

THE "TIMES OF INDIA": . . . . . A compilation which nobody . . . . . ought to miss.

THE "LEADER": Excellent book of reference and information.

THE "INDIAN REVIEW." A mine of information, statistical and historical.

THE "HINDUSTHAN REVIEW": . . . . . The politician and the journalist the legislator and the businessman, cannot prize too high.

THE "STATIST." An exhaustive review.

THE "INVESTORS' CHRONICLE". First compilation of its kind in India. No previous attempt has been made either by the Government or by private agency to bring into a single volume all available economic information and relevant economic statistics.

SIR OSBORNE SMITH: Astonishing production.

Sir R. N. MOOKERJEE: Remarkable achievement.

MR. G. D. BIRLA: Undoubtedly a compilation of very useful information.

SIR BASIL BLACKETT. There is hardly any financial or economic information regarding India which does not find some place in the volume.

J. SCHUMPTER: All the more, economists all over the world must be grateful to you.

Price Rs. 5 only.

To subscribers of "INDIAN FINANCE" Rs. 3 only.

Rs. 4 for extra copies to subscribers.

The Managing Editor,

"INDIAN FINANCE," 20, British Indian Street, CALCUTTA.

Sir,

I send herewith Rs..... for of "Indian Finance Year-Book" on the basis of concession allowed to subscribers.

Address.....

NEW CARS FOR OLD

The world-wide depression seems to be moving away and *now* is your chance to purchase a car or exchange your old contraptions for new.

The latest types with all modern improvements are being exhibited at the King's Robing Room, London. Do not miss this rare opportunity which may never occur for another 150 years. Visit the All-India Show and make your selection. Entirely Indian make of excellent workmanship. A glance at the list will convince you. The following cars are worth mentioning:

(1) *Ambedkar Eight*:—This excellent eight cylinder car has a truly depressed body and dash board which can stand any amount of strain. It is supported on reliable British Steel Frame and is, therefore, capable of resisting powerful shocks. This car is popular with Government Officials; and a special design is being prepared for the use of municipalities and local bodies. (Manufacturers:—Depressed Body & Steel Frame Company, Limited).

(2) *Sapru Seven*:—The Car of Kings and the King of Cars. Very great favourite of the Princes. H. H. of Alwar might use it while in Europe. It is of the same design as the Jayakar Touring with a bigger and more powerful body. This car was successfully tested in the Poona-Delhi-Simla trials and bears Government of India Certificate for its excellent work.

(3) *Super Shaukat*:—A heavily built car with strong and spacious body. An extremely roomy and commodious car, which will go up any rough and hilly country on top gear. Contains upholstery and lining from Iraq and Jerusalem. All-Mahomedan workmanship. The factory is financed by Khilafat funds and hence is able to turn out cars of the best and most reliable make. Muslim rulers have a great liking for this car. A hot favourite at the Afghan Court, H. M. Nadir Shah having placed orders for half a dozen. (Manufacturers:—The All-India United Muslim Manufacturers).

(4) *Powerful Purshottam*:—One word is sufficient to express the value of this car and that is its "Individual Capacity." It stands alone in its workmanship. Economy is its watch-word. It never causes any wastage as it has always a Reserve (Bank) Power behind. It is very popular in Big Business circles. Mr. Nailini Ranjan Sarker, President of the Federation of Indian Chambers, has just placed an order for it.

(5) *Jayakar Touring*:—An unassuming little car, economic in running and hence very useful for long distance work. In the Simla-Poona and Delhi-Poona trials of 1930-31 this car was mostly in use and had never a breakdown. It is guaranteed to cross over rough roads without trouble.

(6) *Jehangir (Junior)*:—A small car but with considerable power behind it; extremely smooth running; an altogether showy little thing. Compact engine with considerable explosive power. Easily driven and a favourite with ladies.

(7) *Baby Joshi*:—An extremely nice car for the middle-class and may well be called Car of the Labourer, due to its low price. In spite of the low price, it is highly efficient and can run for days without trouble.

JYOTEENDRA L. MEHTA.

THE GATEWAY OF INDIA

Modernisation of Bankers' Clearing House: New Order is Better Order: Recognition of Status of Non-exchange Banks:

(From Our Correspondent).

Bombay, June 21.

The Managing Governors of the Imperial Bank have been, for some time, considering the arrangements that should be made for a proper organisation of the Bankers' Clearing House at important centres like Bombay and Calcutta. It is felt that the position of clearing houses is not due to any definite planning or scientific growth. On the other hand, by a process of slow, ill-controlled growth for many years, a kind of organisation has been functioning in a way that leaves much to be desired. As it is, the Imperial Bank of India is in charge of all the detailed management; it supplies rent-free premises. There is, often, confusion or misunderstanding arising from its dual *role*. In one sense, the Imperial Bank is the banker to clearing banks; in another capacity, it is the manager of the clearing house. It is felt that clearing arrangements in large towns should be modernised and the clearing houses placed on an autonomous footing. The essence of the matter is that there should be no room for misunderstanding that the clearing house is only a sideshow of the Imperial Bank.

Towards this end, Bombay and Calcutta clearing houses are to form themselves into bodies incorporated under law, with regular Memorandum of Association and Articles of Association. The Association will elect an executive committee, on which exchange banks and non-exchange banks will be represented in adequate numbers. The committee will control all the affairs of the clearing house on the lines laid down in the Articles of Association.

Various meetings have been held in connection with this proposal for the modernising of the clearing house arrangement. It is now believed that, in the very near future, the old organisation will cease to exist and be succeeded by the Association of Clearing Banks. There is to be an admission fee for each member of the Association, as well as an annual subscription. The Imperial Bank is to be remunerated for its loaning staff and premises. There are to be a President and Vice-President,, Secretary and Treasurer. The President and Vice-President are to be, alternately, from the exchange banks and non-exchange banks.

The new arrangement is satisfactory from every point of view. A kind of impression has certainly come to prevail that the Imperial Bank and the exchange banks were all too powerful in the clearing house. It will be recalled that the Punjab National Bank had enormous difficulty in getting admission to the clearing house in Bombay, Calcutta and Karachi. It was believed that the opposition of the exchange banks was responsible for this denial of rights to the Punjab National Bank. In the new arrangement, injustice of this kind is no longer possible, as non-exchange banks are assured of adequate representation on the committee; and, every alternate year, the President will be one of their representatives.

All the existing members of the Bankers' Clearing House shall become automatically members of the new Association. Applications for new membership shall be proposed by one member and seconded by another. The proposal should be made in the prescribed form and signed by the candidate, the proposer and the seconder. It shall be circulated among all members of the Association. Unless three-fourths of the members on the roll of the Association vote in favour of a candidate, no candidate can be elected a member. On election, the candidate will become a member on paying the entrance fee and the annual subscription in advance.

GREAT BRITAIN

BRITAIN AND THE ECONOMIC CONFERENCE

The Economic Conference bids fair to prove a veritable *mela*. No less than 67 nations are sending their representatives to London; and, as the principals and advisors of each delegation may easily be put at about 15 persons, the influx of politicians and economists into London may be put at a thousand. One by one, the delegations are arriving; and the programme already formulated promises the foreign visitors a good round of hard work and equally taxing entertainment. The first day of the Conference is set apart for the inevitable formalities of an international conference with a speech from the King to start with. It is expected that the Prime Minister will, in his opening speech, appeal to the members to be as business-like in their opening remarks as they can be, consistent with the need for a preliminary statement of general policy. The Delegates would probably be asked to state definite proposals. Competent authorities estimate the duration of the Conference at between six and seven weeks, with probably an adjournment at the end of that period. Mr. Ramsay MacDonald is credited with the view that a special committee should continue to function even after the closing of the Conference in order that such decisions as may be arrived at at the Conference could be given effect to; and a fresh conference may be convened, if necessary, to continue the work. A long list of social engagements has also been announced. The delegations from the Empire countries have the additional task of holding frequent consultations among themselves so as to secure a rough unanimity of opinion among themselves. This is by no means a new innovation; for it is usual at all international conferences for the delegations of Britain and the countries of the Empire to meet at every opportunity and decide on the views they would urge.

Pessimism in City Circles.

Optimism in regard to the outcome of the Conference is, indeed, hard to find. City circles are particularly pessimistic. But there is, however, no lack of interest in the proceedings of the Conference; and anxiety is felt about the issue of what may be called the initial obstacles to World Economic Conference. Every where there is a growing sense of the complexity of the problems which the Conference has to tackle. The progress of the aims of the Conference may, perhaps, be traced in the following order. First, an amicable understanding as to the June 15 instalment of war debt payment to America. Secondly, an understanding between France, Britain and America about the temporary, if not permanent, stabilisation of the three important exchanges of the world. Thirdly, a settlement of the war debts question which would bring war debts payments into proper relation with reparation receipts.

Formidable as these problems are, their solution would form just a beginning for the real work of the World Economic Conference. For these questions pertain only to America and a few of the more prominent European nations, the rest of the world having but an indirect interest in them. When these questions are settled, the nations would feel obliged to defer to the wishes of America in respect of silver. What the dicisions will ultimately be would depend upon the kind of international standard which the world would agree to restore. Assuming that America would not seek to impose a bimetallic standard, the proposals in regard to silver might take the same form as the understanding arrived at already between the United States, Canada and Mexico.

It is necessary to mention these as, only in the event of all these being concluded to the satisfaction of the parties concerned, that a proper spirit of co-operation and goodwill can prevail, conducive to a dispassionate study of the problems of the world Economic Conference and the measures necessary to rescue world trade. To indicate such measures would be far beyond the scope of this letter. But so far as Britain is concerned, opinion would seem to be both divided and indecisive. While, on the one hand, there is recognition that the interests of Great Britain lie in the expansion of international trade, as a whole, and the recovery of the export markets, in particular, there is also the feeling that the industrial expansion of Britain's new competitors must inevitably bring about the shrinkage of such export demand and necessitate a corresponding adjustment in Britain's national economy. The Government it is, that will feel most the inconsistency between Britain's historic professions of free trade and their recent policy, distinguished as it is by just those features which Britain will be foremost to denounce in the forum of the World Economic Conference. Once the preliminaries mentioned before have been disposed of, the question that the Conference will have to tackle would be that of artificial barriers to international trade. Exchange control, quotas and import tariffs will have to be tackled; and of these exchange control is, perhaps, the only sin, of which Britain can hold herself innocent. It remains to be seen how the British Government could manage to save her face and at the same time press for those changes without which Britain would have to effect a drastic cut in her standard of living.

The "Economist" Special Supplement.

The *Economist* has, during the week, brought out a Special Supplement on the *Issues before the World Economic Conference.* Its views on the present problems are rightly prefaced with a brief, but extremely succinct, review of the course of world trade and finance since the Genova Conference. It is pointed out how the resolutions of the Genova Conference have been given effect to with a lamentable lukewarmness and the first signs of the depression plunged the nations deeper into the very follies against which the Genova Conference warned them. As readers of these columns might well guess, the solution, according to the *Economist,* lies in a return to the conditions of free trade. By which is meant, not only freedom from high import duties, but also the re-establishment of the historic gold standard and the resumption of international lending. While the conclusions are expressed in unequivocal language, the facts adduced and the reasoning employed do not show them to be altogether inescapable. The *Economist* recognises that it is too much to expect protectionist countries to abandon to their fate industries which have come into being on the strength of such protectionism. It recognises that the service of international debts bears to-day a much higher proportion to the total value of world trade than in olden days. It does not shirk the fact that many of the countries of the world are unable to bear the load of their indebtedness. And in all these matters there is no easy way out. The *Economist* does not favour the idea of any wholesome scaling-down of debts. It does not deem it feasible either to fix a maximum for import duties or, for obvious reasons, a proportionate reduction from the existing levels. In such circumstances, it would have been well if the *Economist* had probed with more care and less scepticism the idea of economic planning in the principal nations and integrating them into a planned world economic system. As it is, there is a cleavage between facts and conclusions which the World Economic Conference must find to be singularly unhelpful.

Air Mail Week.

Commons Debate on Economic Conference.

The debate in the House of Commons on unemployment revealed some of the difficulties which will appear in greater relief when the spokesmen of the Government urge their view points in the World Economic Conference. There was, no doubt, substantial agreement on all sides of the House on the need for stabilisation, a mitigation of quotas and import duties and concerted international action for raising prices. But this is neither an advance on any earlier position nor an explanation of the Government's policy in the recent past. The latter was hinted when Mr. Neville Chamberlain pleaded that the duties recently imposed were intended to "check," and not to "prohibit," imports. That world trade has arrived at a stage in which a check is a check-and-mate is apparently lost on the Chancellor of the Exchequer. Equally unconvincing was Mr. Chamberlain's insistence that over-production was the real cause of the trouble and that restriction holds out the best prospects of recovery. The light-hearted use of a term, which has no definite meaning either among economists or among industrialists, is only one instance of the loose thought which the Delegations of the World Economic Conference will bring to bear on the problems before it. It has been rightly pointed out that the *personnel* of every important delegation shows that the delegates have been chosen less for their economic knowledge than for their political affiliations—a point in which the present Conference is a sad contrast to the Genova Conference.

Less Unemployment in May.

The return of the Ministry of Labour shows that the number of registered unemployed shows a fall of 115,755 between April and May. The number of persons wholly unemployed fell by 72,247 and those temporarily unemployed are less by 37,175. Unemployment for May, 1933, is down by 158,427 since May last year. The improvement in employment has been contributed to by a variety of trades. The seasonal improvement in the building trade has created additional employment for 22,000. And the seasonal decline in the coal trade has had an adverse effect on employment and increased unemployment by about 2,000. But the general engineering, textile and other trades have expanded visibly, pointing to a general improvement in trade conditions.

Increase in Bank Advances.

Another reliable sign of improvement in business conditions is a rise of £11,200,000 in the advances in the clearing bank average figures for May. At the present level of £774,800,000, advances stand at the highest level since last November. It is the first substantial increase since March, 1931, the rise on which occasion is attributed to the increased facilities given to payers of income tax. In estimating the significance of this rise, it may, perhaps, be pointed out that, in normal times, there is, in and about May a seasonal rise in advances. But it should not be forgotten that in the past three years the seasonal rise had been more than counteracted by the continuous and heavy fall which began in 1930. Investments have reached a fresh high record of £513,400,000 as against £300,200,000 a year ago and £517,200,000 in April last. The principal changes are summarised below:

	May, 1933, £ (mill.)	April, 1933, £ (mill.)	May, 1932, £ mill.)
Deposits	1,944.0	1,930.4	1,699.0
Cash	205.6	218.7	179.1
Call money ...	97.7	104.7	113.1
	%	%	%
Bills	346.1	337.8	246.5
Investments ...	530.4	517.2	300.2
Advances ...	774.8	763.6	817.4
Acceptances, &c. ...	96.5	94.2	99.5
Cash to deposits ...	10.57	11.32	10.54
Advances to deposits ...	39.8	39.6	51.3

The German Moratorium.

The elation which the public might generally feel about these signs of revival has been subdued somewhat by the news of the declaration of the German moratorium. Though this was foreshadowed from a long time ahead and the German case is fairly convincing, the *Financial News* is spreading the view that the interests of the holders of German bonds have been unduly sacrificed by those who could, if they chose, have adequately befriended them. Mr. O. R. Hobson, the Editor-in-chief of the *Financial News,* in a signed article appearing in the issue of June 10, urges the holders of German bonds to bestir themselves, lest their interests should go unheeded in the discussion of the coming weeks. There is urgent need, he contends, of a strong and authoritative committee to uphold the interests of the bond holders; and he favours the formation of an organisation of the standing of the recently formed League Loans Committee, of which Sir Austen Chamberlain is Chairman. While one may welcome an organisation of the kind proposed, it is difficult to make out the gravaman of Mr. Hobson's charge against the authorities in Germany. Mr. Hobson does not say that Germany has "deliberately" done "almost everything that she could to avoid paying her external debts"; or that the action of other countries has not made matters much worse for Germany. His charges are confined to what he calls Germany's "obstinate clinging to a fictitious gold standard" and to Dr. Schacht's insistence on the repayment of the Central Bank credit "which he need not have done." It is difficult to sympathise with Mr. Hobson's longing for one more addition to the numerous deserters from the gold standard. A leading article in the *Financial News* of June 9, gives a more pointed case against the German default:

> The first thing we have to complain about is the fact that the last-minute hopes, that the Dawes and Young loans would be exempted, have been disappointed. The service of the loans could perfectly well be continued. According to the estimates of Germany's balance of payments and debt service requirements presented by the Reichsbank itself to the last Standstill Conference, Germany, with a monthly exports surplus averaging Rm. 60,000,000, is earning about Rm. 1,050,000,000 towards a total foreign debt

THE NATIONAL INDIAN LIFE INSURANCE CO., LD.

NOTICE

is hereby given that the Twenty-first Annual Meeting of the qualified policy-holders of the Company will be held at the Registered Office of the Company, No. 12, Mission Row, Calcutta, on Friday, the 30th June, 1933 at 11-15 a.m. for the purpose of electing two Directors.

By Order of the Board,
MARTIN & CO.,
Managing Agents.

CALCUTTA,
19th June, 1933.

Air Mail Week.

service requiring about Rm. 1,425,000,000 (this last figure includes all profits on foreign capital in Germany); on the other hand, the service of the Stand-still debt and the Dawes and Young loans combined requires only about Rm. 350,000,000. The service of the debt is thus only about one-quarter of the whole, and, though Germany is earning enough (if the Reichsbank collected all the foreign exchange) to pay three-quarters of her obligations, it is not to be met. It is idle to pretend that there was no reason for distinguishing the loans, since they are specifically charged on assigned revenues. Either the Reichsbank expects to be surprisingly unsuccessful in collecting exchange or it is surprisingly careless about the public debt service.

FRANCE

PASSING OF THE BUDGET BILL

At last! France must heave a sigh of relief that the Chambers have finally disposed of the budget for 1933. It is strange and amusing reading, the history of this budget. It takes its place on the statute-book five months after it was due to come into effect and after nearly half a year, to which it refers, is over. It has forced the Government to subsist for five long months on monthly credits procured none-too-easily. It wrecked one government and more than one Minister of Finance, namely, M. Germain Martin and M. Cheron. It made seven journeys to and fro between the two Houses of the Legislature. The figures of revenue and expenditure, of savings and deficits, were calculated and recalculated; and the tentative estimates issued from time to time are legion. At last, the final budget has been passed; and there is no further danger of legislative indecision and financial uncertainty. In its final form, the budget bill gives the following estimates of expenditure, revenue and deficit.

Estimated expenditure	...	49,269,789,904 francs
,, revenue	...	45,645,851,509 francs
Estimated deficit	...	3,623,938,395 francs

Chequered History of Budget Bill.

The estimates originally formed by M. Germain Martin in Nov. last provided for loans of 3,500 million francs to enable revenue to cover expenditure. But the fall of the Ministry left the budget problem on the shoulders of M. Cheron, who discarded his predecessor's loan programme. It fell to MM. Lamoureux and Bonnet as Ministers of Budget and Finance to answer this riddle of the Sphynx. M. Deladier formulated a very convenient rule of conduct for himself and his colleagues, namely, "If you cannot do what you ought to do, we will do what we can do;" and the easiest way out of the muddle was to refer the riddle back to the Sphynx itself. The Government's initial proposals involved a deficit of 4,767 francs. But the Socialists, who are an influential bloc in the present Chamber, insisted on certain increases in expenditure, and the abandonment of certain proposals for increased revenue. But the Senate put its foot down on the uneconomic proposals and brought down the expenditure from 50,585 million francs to 49,079 million francs. The expected deficit was scaled down to 3,498 million francs, but 125 million francs of the proposed economies had latterly to be abandoned under pressure from the Lower Chamber.

It is to the credit of the Government that the present year's expenditure has been kept down to 49.25 milliards as against 53½ milliards of 1932. It is significant that from 1925 to 1932 there was not a budget that did not add 3,000 million francs to the national expenditure. The budget for 1934, on which the Government must be already working, will, it is apprehended, show a deficit of 7 million francs, as some of the items of revenue for the current year will not be available in the next and there are also in the bargain certain natural increases in expenditure.

Safegaurds for Budget Estimates.

It is, perhaps, in the light of what awaits the country in 1934 that stringent provisions have been made in the present bill to ensure that the national finances are kept under proper control. Already there is a widespread feeling that the budgetted deficit can remain at that level only on paper and that at the end of the year the actual deficit might be found to exceed the anticipations by a very considerable margin. For already the Budget Minister has told the Senators that it has been found impossible to induce Franch departmental officials to carry out the law. This is rightly interpreted as a practical expression of the truculent spirit in which the French officials have all along regarded the attempts of the Legislature to enforce a reasonable degree of economy in the administration of the national budget. The new budget law includes certain clauses providing for severe disciplinary measures against permanent officials found to be recalcitrant or insubordinate in the discharge of the duties imposed on them by law. Ministers are also precluded from encouraging expenditure over and above the provisions of the Budget Bill and to ensure that allotments are strictly adhered to. The Minister-in-charge of the department concerned and the Budget Minister are made personally responsible for such infringements. There are also measures designed to prevent certain cases of extra levies on payers of income tax, of which there have been instances recently, and also to maintain a stricter control on the management of Government property and commercial concerns.

No New Features.

Barring these punitive measures, the 1933 budget contains no arresting features. The only two radical proposals, namely, a state monopoly for oil and assessment of income tax payers on the basis of what was known as "external signs" have been ultimate-

Air Mail Week

ly rendered innocuous. The provision authorising the assessors to demand details of such outward signs is at best an immaterial concession to the demand for stopping leakages of income tax payable to the State. Various pension abuses are to be eliminated. A new tax on wireless sets has been imposed. A 5 per cent. reduction on all regular administrative expendidture with the exception of salaries and national defences and 10 per cent. reduction on subsidies are also incorporated in the budget. One characteristically French provision is the authorisation of a national lottery for the benefit of the victims of agricultural calamities and pensions to farmer soldiers. The proceeds of this lottery after the reduction of expenditure on prizes and organisation are to be devoted to these purposes ; and it is provided that the appropriations in regard to pensions should be reduced by a corresponding amount.

Fears for the Future

Though there is all-round relief at the conclusion of an unnecessarily and exasperatingly protracted consideration of the budget, there are still grave apprehensions felt about the position of the national budget. At present, the Treasury has the power to call for public subscription of new accommodation for 7,000 million francs before the end of the current year. Another 5,000 million francs may be issued as loans ; and also Treasury Bills for 2,500 million francs. But as was shown in the case of the British credit for £30 million, neither the banks nor the public are particularly anxious to accommodate the Treasury in this matter. For, it cannot be lost on the public that the increase in the floating debt alone during recent times amounts to as much as 15,000 million francs and that the total public debt has increased by over 20,000 million francs to a staggering sum of 290,000 million francs. The balance of trade is adverse to the country to the extent of 1,000 million francs ; and over and above all these, France has the task of maintaining, single-handed, the international gold standard.

GERMANY

THE TRANSFER MORATORIUM

The long expected moratorium was declared on the evening of Thursday June 8th. A meeting of the German Cabinet was held early in the day to consider the letter, which the Reichsbank had addressed to the Government of the League, setting forth the reasons which necessitated a moratorium and the temporary character of that measure. After a decision of the Cabinet in favour of his proposals, Dr. Schacht announced a transfer moratorium on all credits granted to Germany before July 1931, including the Dawes and Young loans, to come to force on July first. As for credits granted to Gtrmany after July, 1931, transfers would be made as far as possible; and Dr. Schacht explained that this date has been chosen, since the present financial situation in Germany had been caused by the banking crisis of that time. It is noteworthy that contrary to rumours that were persistent, the Dawes and Young loans had also been included within the scope of the moratorium. But the existing standstill Agreement is still left unaffected ; and in a statement issued on the same day, Dr. Schacht explained that the Standstill payments would not come under the moratorium since they were made under an agreement which it was not desired to alter by any one-sided action. But Dr. Schacht expressed the hope that London discussions would lead to some agreed alterations, for as at present arranged, the Standstill creditors will in accordance with the Reichsbank's request meet in London on June 13. The Reichsbank has at the same time requested the long-term creditors and the Bank for International Settlements at Basle to assemble next week in London. At these conversations the Reichabank will endeavour to make its contribution to a solution of the transfer crisis. At the London Conference, the unanimous results of the Berlin discussions embodied in the *communique,* referred to in these columns last week, would form the basis of discussions. And it is useful to recall that the principal points on which agreement was arrived at the Berlin Conference, are: (1) that the reserves of gold and foreign currency which are at the disposal of the Reichsbank must be increased in order to maintain its function as a central bank and (2) that Germany's foreign trade should not be subject to restrictions, as otherwise the most important source of foreign exchange would be blocked up.

The following official *communique* was issued on Thursday night:

"As after last week's meeting, the representatives of the short and long term foreign creditors have, in full agreement with the Reichsbank, unanimously recognised that a further decline of the gold and exchange reserves will jeopardise the plain function of the Reichsbank as a central note issuing institution, and that, in consequence, it would be desirable to raise the reserves gradually, the Reichsbank has now addressed a letter to the Government of the Reich setting forth that the Reichsbank will cease temporarily (and it is hoped only for a short time) ; allotments of foreign exchange for all such payments which refer to liabilities entered into before the crisis of July, 1931, with the exception of the existing Standstill Agreements."

The transfer moratorium on payments before July, 1931, does not mean the absolute cessation of payments of principal and interest in Reichsmarks but only on payments in foreign currencies. Private debtors in Germany are still under obligation to make payments into a special conversion fund at the Reichsbank. The Reichsbank promises to convert these reichsmarks into foreign currencies, whenever the German supply of foreign currencies warrants it.

Air Mail Week

One advantage of the transfer moratorium now declared will be that Germany will find it easier to finance the programme of public works expenditure which she has recently taken on hand. Specific measures for the relief of the unemployed have been evolved over a long period by successive administrations ; and now that the State will have under its command larger amounts, it would be possible for the authorities to push ahead with these schemes with greater ease than their originators could at first have imagined. The movement gains an additional impetus from the anxiety of the Nazi Government to make good at least a part of the promises which it had made to the people, with a view to secure their support. Of all such measures, the most important are those relating to the creation of employment. The essence of the programme lies in the constitution of the German Association for Public Works and the issue of one milliard marks in Treasury certificates to facilitate its activity. It is for the Association to permit public institutions, who have on their hands specific schemes of new works to institute, to draw drafts on the associations, using the certificates as security. It is intended that such drafts are to be discounted by the German banks, who will enjoy in respect of these the usual facilities of rediscounting with the Reichsbank. It is here that the liquidity of the German money market resulting from the cessation of foreign payments will be found to be most useful and opportune. The purposes to which this capital is to be devoted are, for example, the opening up of land for settlement and the building of houses, etc. Loans are to be made to individuals on this account, though little is known of the counter obligations of these indidviduals in respect of finding a part of the capital from their own individual resources. Special provisions have been formulated in respect of the works to be instituted by the State and public local bodies. The obligations of normal relationship between employer and employee are obviated here. Men who are employed in such works receive a certificate from the State of the value of 25 marks, which is to be utilised for buying other normal requirements except food. The obligation of finding one meal for such workers is thrown on the public body employing them. The financial plan of the scheme is that the municipality and other bodies enjoying this credit will liquidate the whole amount at the rate of 1/5 per year. Another important provision refers to agricultural indebtedness. The new legislation attempts to make a distinction between obligations dating from before July 31, 1931 and those imposed thereafter, on the ground that the former claims were the result of "false economic standards." Somewhat drastic provisions have been made enabling the conversion of short-term debts into long term debts and establishing an order of priority amongst creditors which can be acquiesced in only in the extraordinary conditions that obtain at present in Germany.

STATISTICAL INFORMATION

FOREIGN TRADE OF BURMA.

The report on the principal variations in the foreign trade of the Province of Burma during the month of May, 1933, as compared with the corresponding period of 1932, shows as follows:—

The combined value of Imports and Exports was Rs. 251.73 lakhs as against Rs. 352.61 lakhs showing a decrease of Rs. 100.88 lakhs.

Imports.

The total value of merchandise decreased from Rs. 115.62 lakhs to Rs. 71.86 lakhs. The following were the principal articles which showed decreases, the value and the amount of decrease being noted against each:—

	Value. Rs. lakhs.	Decrease. Rs. lakhs.
Machinery and Millwork—		
Minning machinery	0.73	2.02
Textiles—		
Cotton, Twist and Yarn ...	0.89	1.42
Manufactures, Piecegoods—		
White	5.08	6.95
Coloured	6.61	12.09

There were no imports of Fuel Oil during the month under report while in the previous May imports recorded under this head were valued at Rs. 2.47 lakhs.

There was practically no import of salt during the month (the value recorded under this head being Rs. 413 only) as against Rs. 1.47 lakhs in the corresponding period of last year.

Exports.

The total value of Indian merchandise recorded during the month was Rs. 179.87 lakhs as against Rs. 236.98 lakhs, showing a decrease of Rs. 57.11 lakhs. The following articles accounted for the decrease, the value and the amount of decrease being noted against each:—

	Value. Rs. lakhs.	Decrease. Rs. lakhs.
Fodder, bran and pollard—		
Rice bran	3.86	3.75
Grain, pulse and flour—		
Rice not in the husk	116.83	62.91

Increases were, however, noticed in the following articles, the value and the amount of increase being noted against each—

	Value. Rs. lakhs.	Increase. Rs. lakhs.
Metals and Ores—		
Tin Ore	2.59	1.24
Zinc or spelter, all sorts ...	2.75	1.12
Paraffin Wax	15.79	6.50
Textiles—		
Cotton Raw	3.53	2.93

FOREIGN TRADE OF MADRAS.

The total value of imports from foreign countries into the Madras Presidency during May, 1933, was Rs. 1,20,28,986 against Rs. 1,44,71,727 in the corresponding period of last year, showing a deficit of Rs. 24,42,741. The commodities that were responsible for the deficit were: Dyeing and tanning substances, Rs. 3,48,474 (−Rs. 3,01,981); grain and pulse 866 tons, Rs. 68,731 (−7,964 tons, −Rs. 7,53,991); mixed or yellow metal for sheathing 9,335 cwts., Rs. 2,65,897 (−8,179 cwts., −Rs. 2,95,130); mineral and fuel oils 1,049,588 gallons, Rs. 1,79,893 (−385,932 gallons −Rs. 1,89,879); cotton raw 45 tons, Rs. 68,855 (−413 tons, −Rs. 2,72,323); cotton twist and yarn 482,279 lb., Rs. 4,56,008 (−527,196 lb., −Rs. 4,93,588); piecegoods grey (unbleached) 3,181,762 yds., Rs. 4,72,338 (−1,652,908 yds., −Rs. 2,51,747); piecegoods white bleached 2,456,049 yds., Rs. 5,41,696 (−880,798 yds., −Rs. 2,01,667); piecegoods coloured 945,784 yds., Rs. 2,18,801 (−62,390 yds., −Rs. 17,251); silk raw 46,375 lb., Rs. 1,44,950 (−18,369 lb., −Rs. 1,74,973); tobacco (unmanufactured) 16,694 lb., Rs. 29,383 (−136,496 lb., −Rs. 2,38,921).

The total value of exports of Indian produce and manufactures from the Madras Presidency to foreign countries during May, 1933, was Rs. 2,16,73,490 against Rs. 1,66,24,524 in the corresponding period of last year showing an increase of Rs. 50,47,906. The commodities that contributed to the increase were: coffee 28,452 cwts., Rs. 16,19,641 (+21,695 cwts., +Rs. 11,80,197); rice not in the husk 8,855 tons, Rs. 8,23,072 (+5,613 tons, +Rs. 3,41,643); tanned or dressed cow hides 894 tons, Rs. 13,61,483 (+367 tons, +Rs. 3,17,932); tanned or dressed goat skins 358 tons, Rs. 17,04,128 (+141 tons, +Rs. 4,56,151); groundnuts 39,750 tons, Rs. 48,96,051 (+18,573 tons, +Rs. 12,09,374) tea, black 4,598,912 lb., Rs. 38,98,058 (+1,463,632 lb., +Rs. 8,42,076); cotton raw 1,563 tons, Rs. 9,36,510 (+1,261 tons, +Rs. 7,31,665); tobacco unmanufactured 2,060,625 lb., Rs. 7,62,917 (+8,97,752 lb., +Rs. 3,44,655).

TRADE OF CALCUTTA IN MAY.

A *Communique* issued by the Collector of customs states that the overseas import trade of Calcutta in private merchandise in May, 1933, showed a slight improvement over that of the previous month, the value rising from Rs. 2.61 crores to Rs. 2.86 crores as against Rs. 2.88 crores in May, 1932.

IMPORTS.

A comparison of the values of the principal imports with the figures for May, 1932, is indicated below, the figures in brackets representing the increase or decrease as the case may be:—

	In lakhs of rupees.
Cotton goods	56 (+ 9)
Machinery and millwork	47 (+13)
Iron and Steel	13 (− 3)
Other metals	12 (− 1)
Oils, mineral	21 (+14)
Chemicals and chemical preparations (excluding chemical manures and medicines)	8 (− 2)
Hardware	9 (+ 1)
Electrical instruments	7 (− 1)
Liquors	5 (level)
Sugar	3 (−11)

Advance in Piecegoods.

The total yardage of cotton piecegoods expanded from 21 millions to 26 millions and the value rose from Rs. 34 lakhs to Rs. 37 lakhs due to increased importation of grey piecegoods.

There was a noticeable improvement in the importation of machinery and millwork. The rise under oils (mineral) was mainly due to heavy importation of kerosene oil from Russia and "other kinds" in general.

The drop under sugar was chiefly due to a considerable decrease in the importation of sugar and molasses from Java.

EXPORTS.

The variations in the values of the principal exports as compared with the trade in May, 1932, are shown below:—

	In lakhs of rupees.
Jute manufactures	148 (level)
Jute, raw	67 (+12)
Hides and skins	24 (+11)
Grain, pulse and flour	9 (−12)
Tea	9 (− 3)
Lac	15 (+ 2)
Pig iron	8 (level)
Manganese ore	2 (− 3)

The United Kingdom continued to be the chief buyer of tea and manganese ore.

Raw jute and hides went to Germany. Gunny cloth, lac and skins were shipped to the United States of America. Gunny bags were chiefly shipped to Australia, the United Kingdom, Union of South Africa and Java. Japan was the principal customer of pig iron.

Rice which formed the bulk of the trade under the head "grain, pulse and flour" went mostly to Mauritius.

COMPANY REPORTS

CALEDONIAN JUTE MILLS CO., LD.

Synopsis of Balance Sheet:

Liabilities	Rs.	Assets	Rs.
Capital	19,00,000	Block (nett)	28,80,728
Debentures	9,00,000	Jute	8,75,717
Reserve	30,84,266	Cloth & Bags	1,30,854
Other Debts	7,02,463	Stores & Spares	1,52,168
Profit & Loss	1,49,322	Outstandings	1,01,769
		Investments	25,90,790
		Cash	4,025
Total	67,36,051	Total	67,36,051

Extracts from Directors' Report:

Report covers the half-year ended 31st May, 1933. The accounts show a nett profit of Rs. 94,511-11-1.

After transferring Rs. 25,000 from Dividend Equalization Reserve and making sundry adjustments, there is a balance at credit of Profit and Loss Account of Rs. 1,49,321-13-11. The Directors recommend dividends on Preference shares at Rs. 3-8 per share Rs. 35,000, and on Ordinary shares at Rs. 10 per share Rs. 90,000, the balance Rs. 24,321-13-11 to be carried forward.

A profit of Rs. 1,84,049-15-2 was realised by the sale of Government Securities and this amount has been utilised to write down the price of jute stocks.

Addition to Block represents principally land purchase.

In accordance with the agreement of the Indian Jute Mills Association, the mills have worked 40 hours per week with 15 per cent. of the total looms silent.

LOTHIAN JUTE MILLS CO., LD.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital	20,00,000	Block (nett)	27,99,103
Reserve	20,32,459	Jute	11,89,688
Debts	2,67,425	Cloth & Bags	1,26,667
Profit & Loss	89,005	Stores & Spares	1,24,629

Accounts of the half-year ended 31st May, 1933, show a loss of Rs. 4,546-9-2.

After transferring Rs. 1,10,000 from General Reserve and making sundry adjustments, there is a balance at credit of Profit and Loss Account of Rs. 1,21,915-0-7. The Directors recommend dividends on Preference shares at Rs. 3-8 per shere Rs. 35,000 and on Ordinary shares at Rs. 5 per share Rs. 79,750, the balance Rs. 7,165-0-7 to be carried forward.

Addition to Block represents land purchase.

In accordance with the agreement of the Indian Jute Mills Association, the mills have worked 40 hours per week with 15 per cent. of the total looms silent.

GREAT EASTERN HOTEL, LD.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital	12,00,000	Block (nett)	37,89,529
Debentures	10,00,000	Stores	1,68,517
Reserves	14,46,146	Outstanding	62,375
Other Debts	3,48,126	Cash	10,631
Profit and Loss	36,480		
Total	40,31,052	Total	40,31,052

Extracts from Directors' Report:

Report.—We have pleasure in submitting the Audited Accounts of the Company for the year ended 31st March, 1933, which shows a trading profit of Rs. 1,81,334-15-9.

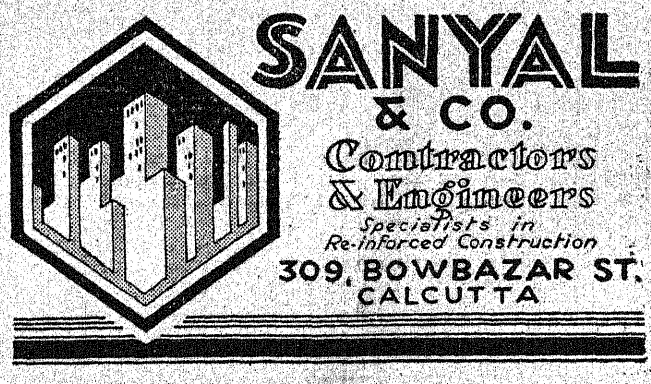
After allowing for Debenture Interest Rs. 65,000 and Income Tax on this amounting to Rs. 11,002-9-8, Depreciation Rs. 50,000-0-5, and transferring Rs. 40,000 to Debenture Sinking Fund, there is an available balance at credit of Profit and Loss Account of Rs. 36,479-9-7, which it is recommended should be carried forward.

Building Scheme.—We are glad to report that in addition to the New Hotel Building extension completed last year, the New Bakery Buildings, equipped with an up-to-date plant and machinery and oven, has been completed during the year under review; whilst by the end of June we expect completion of the Garage Buildings, consisting of:—

14 garages in the ground floor.

Office accommodation on the 1st floor.

2 flats consisting of 4 rooms each on the 2nd floor, which it is hoped will be a source of additional income to the Company.



KESORAM COTTON MILLS.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital	... 35,00,000	Block (nett)	... 33,96,200

Workers' Relief Fund	... 56,232		
Total	... 60,42,199	Total	... 60,42,199

Extracts from Director's Report:

The directors of the Kesoram Cotton Mills submit the audited accounts for the half-year ended March 31, 1933, which show a manufacturing profit of Rs. 2,60,093. After payment of the dividends passed at the last half-yearly meeting from the balance brought forward from the previous half-year, paying directors' fees and interest, providing depreciation on block and making sundry adjustments, there remains a balance to the credit of profit and loss account of Rs. 1,36,522, which the directors recommend for disposal as follows:—Fifth instalment against arrears of preference dividend, Rs. 40,000; preference dividend for the half-year ended March 31, 1933, at 7 per cent. per annum, Rs. 70,000; total Rs. 1,10,000 to be paid and the balance of Rs. 26,522 to be carried forward. The directors regret very much their inability to make any provision for payment of ordinary dividend. The period under review has been a very critical one. Some looms which were working double shift had to be worked single shift and working hours had to be reduced, consistently with the demand. Improvements in quality have been effected such as the production of cloth with 80 and 100 counts of yarn. This cloth has been appreciated by the market. Further economy and improvement are being carried out. The Japanese dumping of piece-goods and hosiery has hit the Indian textile industry very hard. It is a great pity that though the government realised the necessity of protecting the industry much earlier, the announcement of increased import duty was not made before June. Even then, the levy of an additional 25 per cent. is much less than what was recommended by the Tariff Board on the basis of the depreciation of the yen. No pains are spared to cope with the situation, but it is too early to pronounce any judgment about the future. Mr. J. N. Basu retires from the board and, being eligible, offers himself for re-election. The auditors, Messrs. Price, Waterhouse, Peat and Company, also retire and offer themselves for re-appointment.

Report covers the year ended 31st December, 1932. The business of the Bank during the period under report has increased. The deposits have increased from Rs. 20,80,004 to Rs. 24,65,246. There was poor demand for money and it was not found possible to employ funds of the Bank at previous rate of interest. The rates of interest on deposits have been reduced. After payment of interest to depositors and meeting all expenses including those of the Branches there remains a balance of Rs. 1,005-14-3 to the credit of the Profit and Loss Account which is carried forward to the next year.

(*Continued from page 1217.*)

also vitally important from the psychological point of view in re-establishing lost confidence.

Double Taxation.

The International Chamber once again emphasises the fact that double taxation is one of the many barriers that seriously hamper commerce and industry, and confirms the principles laid down in resolutions passed at previous Congresses.

It urges the importance for business of the conclusion of agreements abolishing double taxation, as they would have a definitively favourable influence in encouraging the international exchange of goods and services and capital investments abroad; and points out that, even from the point of view of revenue from taxation, the Governments might gain considerably by the extension of international trade resulting from any concessions made in respect of double taxation.

Mutual Tariff Concessions.

Tht gravity of present economic conditions is such that the World Economic Conference should explore every possibility of immediate collective action to accelerate trade revival.

The International Chamber recalls the principles expressed in the report prepared by it for the World Conference. It proclaims once more that bilateral commercial treaties should be based on the unconditional most-favoured-nation clause and should contain mutual tariff concessions.

In the event, however, that rigid adherence to the unconditional most-favoured nation principle in proposed treaty negotiations delays substantially the readjustment of tariff structures and the removal of trade barriers, the introduction of modifications to this principle can be considered.

Preferential Stipulations.

It would thus become possible, during a period of transition, to conclude bilateral treaties containing preferential stipulations. However, when such stipulations are introduced into a treaty, they should never imply that the contracting States forbid each other to grant the same privileges to other States with which they subsequently enter into negotiation. The stipulations mean only that these advantages are not extended as a matter of right to other nations.

The ultimate objective of commercial policy should remain equality of treatment, which is an essential guiding principle of economic relations. This requires that concessions granted to particular countries, and thus withheld from other nations, should be made available to all countries on a treaty basis as soon as possible.

Foreign Companies.

Governments specially interested in the question of foreign companies are called upon to recognise the urgent necessity of a stable and equitable status of these enterprises.

It would be desirable to convene, at the earliest possible moment, a conference of the representatives of these Governments who, resuming the work of the International Conference in Paris of November, 1929, with special application to the above point, would endeavour to arrive at a draft general Convention establishing some essential principles of such a status.

In view of giving these measures active support as it did on the occasion of the conference of 1929, the International Chamber proposes to extend its previous enquiries through its National Committees, so as to cover every country. It will then set up a technical committee, which, on the basis of the replies received, will consider the possibility of preparing suitable draft texts in order to meet the above requirements.

ORIENT JUTE MILLS CO., LD.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital ...	24,91,000	Block (nett) ...	33,45,869
Reserve ...	14,76,177	Jute ...	14,04,299
Debts ...	10,33,407	Cloth & Bags ...	1,19,909
Profit & Loss ...	1,29,061	Stores & Spares ...	1,01,178
		Outstandings ...	92,648
		Investments ...	60,462
		Cash ...	5,280
Total ...	51,29,645	Total ...	51,29,645

Extracts from Directors' Report:

The audited accounts of the half-year ended 31st May, 1933, shows a nett profit of Rs. 7,701-0-11.

After transferring Rs. 15,000 from General Reserve and making sundry adjustments, there is a balance at credit of Profit and Loss Accounts of Rs. 1,29,060-12-2.

The Directors recommend dividend on Ordinary shares at Rs. 5 per share Rs. 1,24,550, the balance Rs. 4,510-12-2 to be carried forward.

Addition to Block represents land purchase.

In accordance with the agreement of the Indian Jute Mills Association, the mills have worked 40 hours per week with 15 per cent. of the total looms silent.

MEGNA MILLS CO., LD.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.

		Profit & Loss ...	8,70,375
Total ...	1,46,01,101	Total ...	1,46,01,101

Extracts from Directors' Report:

Report covers the half-year ended 31st March, 1933.

The net result of the half-year's working after making allowance for Depreciation is a loss of Rs. 2,50,063-12-7, to this falls to be added the debit balance brought forward from the last Account Rs. 6,20,310-12-11, leaving a balance at debit of Profit and Loss Account to be carried forward Rs. 8,70,374-9-6.

Jute in stock has been valued at or under cost price and finished goods at contract and market rates.

In accordance with the existing agreement amongst the members of the Indian Jute Mills Association the Company's Mills worked 40 hours weekly on the single shift system.

BARNAGORE JUTE FACTORY CO., LD.

The Company proposes to pay a dividend of 5 per cent. on the Ordinary shares for the past year. No dividend was paid on the Ordinary for 1931-32.

The dividend and the 2½ per cent. on the Preference shares are both payable, less tax, on 28th June.

HAPJAN PURBAT TEA CO., LD.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital ...	2,70,000	Block ...	2,20,300
Debts ...	1,29,613	Crop A/c. ...	7,905
		Stores and Spares	1,453
		Outstandings ...	3,803
		Cash, etc. ...	755
		Profit and Loss ...	1,65,397
Total ...	3,99,613	Total ...	3,99,613

Extracts from Directors' Report:

Report covers the year ended 31st December, 1932.

The Revenue Account for the year under review shews a deficit of Rs. 45,272-5-5 and the Profit and Loss Account, after crediting sundry receipts amounting to Rs. 271-6, charging thereto Rs. 16,750-6-9 on account of Depreciation and writing off Bad Advances Rs. 31-8, shews a balance at debit of Rs. 61,782-14-2. After adding this amount to the balance standing to debit of Profit and Loss Account as at 31st December, 1931, this account shews a total deficit of Rs. 1,65,397-4-8 to be carried forward.

Crop for the year 1932 was 1,337 mds. as against 1,595 mds. in the year 1931. The decreased Crop is entirely due to a disastrous hailstorm, which occured at the end of April, 1932.

Cost (manufacturing and office) worked out at As. 12-8 per lb. as opposed to As. 11-11 per lb. for the previous year.

Average selling price for the year under review worked out at As. 6 per lb. as against As. 10-2 per lb. in the year 1931.

GUNGARAM TEA CO., LD.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital ...	4,20,000	Block ...	6,30,000
Reserves ...	3,80,000	Crop A/c. ...	1,58,811
Debts ...	16,944	Outlay ...	7,823
Profit & Loss ...	34,285	Outstandings ...	3,599
		Cash & Invests. ...	50,996
Total ...	8,51,229	Total ...	8,51,229

Extracts from Directors' Report:

Report covers the year ended 31st December, 1932.

The result of the season's working is as follows:—

		Rs.	As.	P.
Gungaram (& Moonee) ...	Profit	40,311	15	8
Ord. ...	Loss	10,873	14	11
Net Profit ...		29,438	0	9

On transfer of the above to Profit and Loss Account, and after sundry adjustments, there is a balance at cridit of that account of Rs. 34,285-5-2, which it is proposed to carry forward.

Crop.—Outturns of tea for the season and average selling prices, compared with those of the previous year, were as follows:—

Crops.	1932.	1931.
Gungaram (& Moonee) ...	9,339 Mds.	7,093 Mds.
Ord.	2,840 ,,	2,656 ,,

Average selling prices:—

	As. P.	As. P.
Gungaram (& Moonee)	5 2	5 2
Ord.	4 7	4 10

Planted Area is as follows:—

	Gungaram (& Moonee).	Ord.
Bearing Area ...	1109.55 acres.	533.44 acres.
Seed garden ...	2.50 ,,	...
Fallow ...	32.64 ,,	37.56 ,,
	1144.69 acres.	571 acres.

Estimates for 1933 provide for a total crop of 10,200 maunds for an outlay of Rs. 2,60,845 including Inland Freight and Sale Charges.

PORIAPUR COLLIERIES LD.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital ...	6,61,600	Block (nett) ...	6,50,302
Mortgage ...	1,88,000	Coal ...	22,240
Debts ...	44,760	Stores ...	6,295
		Outstandings ...	30,029
		Cash & Invests., etc. ...	15,241
		Profit & Loss ...	1,70,253
Total ...	8,94,360	Total ...	8,94,360

Extracts from Director's Report:

The Directors submit the Audited Accounts for the half-year ended 31st March, 1933.

The total raisings for the half-year were 24,908 tons and despatches for the same period were 19,225 tons against 17,273 tons of raisings and 14,328 tons of despatches during the corresponding half-year ended 31st March, 1932.

The Colliery worked on restricted raisings.

Accounts.—After allowing for all charges and carrying Rs. 18,000 to Depreciation Account a balance of Rs. 1,70,253-1-5 remains at the debit of Profit and Loss Account.

Mr. A. E. Mitchell now retires from the Board, but, being eligible, offers himself for re-election. Messrs. Lovelock and Lewes the Auditors also retire, but are eligible for re-appointment. Martin & Co., Managing Agents. Calcutta, 16th June, 1933.

TRANS-ADJAI COLLIERIES, LD.

Synopsis of Balance Sheet:

Liabilities.		Rs.	Assets.		Rs.
Capital	...	4,90,000	Block (nett)	...	3,99,744
Debts	...	39,259	Coal	...	1,472
			Stores	...	4,281
			Outstandings	...	5,077
			Cash & Invests., etc.	...	2,654
			Profit & Loss	...	1,16,031
Total	...	5,29,259	Total	...	5,29,259

Extracts from Directors' Report:

The Directors submit the Audited Accounts for the half-year ended 31st March, 1933.

The total raisings for the half-year were 13,792 tons and despatches for the same period were 9,913 tons, against 4,434 tons of raisings and 5,576 tons of despatches during the corresponding half-year ended March, 1932.

Accounts—After allowing for all charges and carrying Rs. 9,708 to Depreciation Account, a balance of Rs. 1,16,030-10-8 remains at the debit of Profit and Loss Accounts.

Mr. A. E. Mitchell retires from the Board by rotation, but being eligible offers himself for re-election. Mr. T. L. Martin having proceeded to Europe on leave, Mr. P. N. Banerjee was appointed as Directors to fill the vacancy. The Auditors Messrs. Lovelock & Lews also retire but are eligible for re-appointment. Martin & Co., Managing Agents. Calcutta, 16th June, 1933.

PASHOK TEA COMPANY.

Synopsis of Balance Sheet:

Liabilities.		Rs.	Assets		Rs.
Capital	...	3,30,000	Block (nett)	...	2,84,698
Reserves	...	1,70,000	Season, 1933	...	6,749
Debts	...	9,699	Tea sales outstandings	...	36,000
Profit	...	14,958	Advances	...	5,248
			Deposit	...	200
			Investments	...	1,35,484
			Cash balance	...	56,278
Total	...	5,24,657	Total	...	5,24,657

Extracts from Directors' Report:

The managing agents of the Pashok Tea Company (Messrs. Kilburn and Company) submit the audited accounts for the year ended December 31, 1932. The outturn for the season amounted to 3,574 maunds 38 pounds as compared with an estimated crop of 3,400 maunds and 3,038 maunds 73 pounds manufactured in 1931. Of the crop 2,895 maunds 66 pounds were shipped for sale on the London market and the remainder was sold in Calcutta. The average realised for the whole crop is equivalent to 6.891 annas nett per pound as compared with 9.377 annas realised in 1931. They regret to report that the result of the season's working is a loss of Rs. 312 which, with the adjustment of the 1931 accounts, brings the amount at credit of profit and loss account to Rs. 14,958 which they propose to carry forward. A new 4 feet E. C. P. drier, which was purchased at the end of the year, has now been erected and is reported to be porducing improved quality teas. The worn out Paragon drier, erected in 1901, has been dismantled. Estimates for the current season provide for a crop of 3,500 maunds at an expenditure of Rs. 1,30,227, excluding commission to manager. This company has, however, agreed to participate in the proposed restriction scheme, and the above estimate is, therefore, subject to modification in the event of the restriction in crop being agreed to by the indutry.

HAPJAN PURBAT TEA COMPANY.

Synopsis of Balance Sheet:

Liabilities.		Rs.	Assets.		Rs.

			Agency department	...	2,25,957
			Cash balance	...	2,979
			Loss	...	7,09,041
Total Rs.	...	22,11,937	Total Rs.	...	22,11,937

Extracts from Directors' Report:

The directors of the Britannia Engineering Company submit their report and the audited statement of accounts for the year ended December 31, 1932. This shows a gross loss of Rs. 1,42,672, while the agency department shows a profit of Rs. 1,042. After writing off depreciation and charging interest and debenture interest, etc., the balance at the debit of profit and loss account is Rs. 7,09,040, which is carried forward. There was no visible improvement in trade during the year under review and the general depression, so acutely felt in the previous year, was again the cause of greatly restricted enquiries and consequent severe competition which together resulted in exceedingly cut prices and made it impossible to obtain orders at remunerative rates. The works are now manufacturing and placing on the market a cottage industry cotton spinning plant, which it is hoped will in due course prove a remunerative line. The past four years of depression in the engineering trade and the heavy recurring charge for depreciation on machinary and plant, which were purchased at a time when prices were high, are reflected in the large debit balance now accumulated on profit and loss account. In order to bring the balance-sheet values of block, loose tools and plant, etc., more into line with present-day conditions and eliminate the debit on profit and loss account, they consider that steps should now be taken to write down capital and they, therefore, propose shortly to place a scheme to give effect to this.

ASSOCIATED HOTELS OF INDIA LD.

WORLD OF INDIAN FINANCE

Thursday, June 29.

Funds were in abundant supply at ½ per cent. Though the usual adjustments preparatory to the closing of the half-yearly accounts of banks were expected to impart a steadier tone to the money market in the closing week of June, there was no appreciable change in the slack conditions that have been ruling throughout this month. A shade steadier feeling was manifest in Bombay. So far as Calcutta was concerned, there has practically been no demand worth mentioning. This is, possibly, due to the fact that all the principal Indian banks that close their balance sheets in June are situated in Bombay. So far as exchange banks are concerned, the Indian offices do not, perhaps, bother very much about window-dressing. Contrary to expectations, sales of intermediate Treasury Bills from June 21 to June 26 came to Rs. 2,11,75,000. This is nearly three times as much as the intermediates sold in the previous week. Seeing that the purchase of sterling by the Government in this period are almost exactly equal to the gold shipments, it may be assumed that there were no T.T. sales for purposes of investment of foreign funds in Rupee Treasury Bills. In other words, most of the Rs. 2.12 crores of intermediates sold up to Monday should represent the investment of Indian banks. There are abundant indications that at the present rates forthcoming on three months Bills, it is hardly remunerative for exchange banks to take any interest. It follows that from the point of view of exchange banks, they would prefer to wait till six months Bills are made available. On the side of the Government, the sale of so large an amount of intermediates as Rs. 2.12 crores should have been responsible for the postponement of the announcement of six months Bills. It is quite likely that they would like to see, for another week or two, how much more they could "rope-in" by sale of three months Bills. When clear indications are forthcoming that the funds available for three months Bills have dried up or have reached so low a level as to feed only the offer on the tender day, the Controller of the Currency might inaugurate six months bills.

Meantime, this suspense as to whether and when six months Bills will be made available is calculated to make it extremely difficult for bankers to fix up their exchange commitments. For our part, we believe that the present occasion is most suitable for the launching of six months Bills and that nothing is gained by delay. While conditions are yet favourable; and while the bankers seem to be well disposed towards the impending Bills of six months duration, the authorities will do well to relieve the market from the present phase of suspense. If it is their intention to carry on with three months Bills and to avoid altogether six months Bills, that is a different matter. We do not think that it will be possible for the authorities to avoid having recourse to six months Bills. If that is so, the earlier the present uncertainty is removed, the better. In the conditions current to-day, a faily good response is promised for six months Bills. At this time of the year, it is convenient from all points of view to induce the transfer of short-term funds from London to India. From the point of view of the giltedge market, it is undesirable that any large proportion of local funds should be diverted to Treasuries. If the Government require more funds from Treasury Bills, it will be best that the plan adopted is such as to fix up the additional demand against the transfer of funds from London. In simple terms, what we mean is that, if the Treasury is to borrow more than Rs. 1 crore per week from the market, it should borrow it in a way that the excess over Rs. 1 crore is provided by the funds brought in from London.

Thanks to the larger receipts from Treasury Bills, the Government have been able to reduce the ways and means advances taken from the Imperial Bank from Rs. 5½ crores to Rs. 4 crores. This was the position on June 23. On the same day, Public Deposits stood at Rs. 7.81 crores. In the usual course, with Public Deposits at this figure, the Government would have reduced ways and means advances by another crore or Rs. 1½ crores as the aim of the authorities has been to keep Public Deposits roundabout Rs. 6½ crores. That ways and means advances were reduced only by Rs. 1½ crores indicates that immediately following June 23, there should have been heavy Treasury Bills Maturities. In any case, the heavier sales of Treasury Bills in this week should enable the Government to effect further reductions in ways and means advances. Moreover, June is a month which is fairly satisfactory from the point of view of Government revenue.

Land tax in certain provinces like the Punjab and Bengal is payable in June. There is, therefore, a surplus on current revenue-expenditure account during this month. All these circumstances taken into consideration, we are inclined to think that in the statement of the Imperial Bank for the week ended June 30, which will be issued next Thursday, ways and means advances may show a further shrinkage of Rs. 2 crores. It is, of course, necessary to take note of the usual month-early payments which will have to be made on July 1. But, even after providing for this, it might be possible for the Government to bring down ways and means advances to Rs. 2 crores by this month-end.

The position described above should be deemed, in the main, illustrative, and is intended to emphasise the easing in the ways and means position of the Treasury as a result of the better revenue realisations in June and of the additional funds secured by the increase of the weekly offer of Treasury Bills from Rs. 1 crore to Rs. 1½ crores and by the introduction of intermediate Treasuries. But, fairly substantial commitments have yet to be met in the near future; and, while it should always be possible to provide for the smoothest working of the ways and means machinery, the inevitability of larger sales of Treasury Bills has to be emphasised. A maturing loan has immediately to be provided for. Considering that the rupee-rate in the current week showed a markedly firm undertone, it is quite likely that the Controller of the Currency might be purchasing larger amounts of sterling from next week. In which case, provision has to be made for the rupee payments thereagainst. One of the factors that reduced the outgo from the coffers of the Treasury in the last fortnight and that played some part in the materialisation of surplus resources adequate for the reduction of the ways and means advance is the smaller tenders of sterling on the weekly auction days. As it is, the currency authorities are providing for their ways and means adjustments with considerable tact. It may, therefore, be taken for certain that the future plans would also be fashioned in a way that would show a like correctness of judgment. All that we need emphasise is that to the extent that the floating debt has to be increased, such increase should be met by the proceeds of the inflow of funds from London.

From the report of the Controller of the Currency fo the year 1932-33, which has been released to the press in the current week, we notice that against a total visible balance of trade of Rs. 68.30 crores, total remittances amounted to Rs. 48.63 crores. The total visible balance of accounts was, thus, Rs. 19.67 crores. In 1931-32, the total visible balance of trade was Rs. 90.48 crores against which the net remittance of funds was Rs. 34.32 crores. In the result, the total visible balance of accounts was Rs. 56.16 crores. So large a visible balance, for which no account from known statistics could be given, was due to the considerable transfer of funds from India to London partly in anticipation of a collapse of the ratio and partly for political causes. These influences ceased to be operative in 1932-33. The result was that the visible balance was reduced to a normal size and stood at Rs. 19.67 crores. This compares with Rs. 37.70 crores in 1930-31; Rs. 19.97 crores being the average of 10 years ended 1929-30; and Rs. 5.24 crores being the average of 10 pre-war years ended 1913-14. The position may be viewed in another way. Out of the favourable balance yielded on merchandise and Treasure account, a substantial portion was utilised by the Government for their remittance purposes; and a balance of nearly Rs. 20 crores represented the net transfer of funds to London as a result of the invisible items. Considering that Treasury Bills at the beginning of the last financial year were Rs. 47½ crores and were reduced to Rs. 26 crores at the end, it may be assumed that of this decline of Rs. 21½ crores in the floating debt, a substantial portion must represent the withdrawal of London funds owing to the unremunerative rates forthcoming on Rupee Treasury Bills. If this factor were taken into account, the figure of Rs. 20 crores as the net visible balance of accounts is easily explained. At the same time, it shows a fundamentally healthy position. The current financial year has, therefore, begun without any short-term funds in India and without any inroads by invisible items into the surplus on our international trade account. We could, therefore, well afford to induce a flow of short-term funds from London as no embarrassments need be feared, should any occasion arise in the future for their repatriation.

The exchange market has been much the same. But the T.T. rates have been very steady. There is, in fact, more strength than is indicated by the rates. The undertone of the rupee-rate showed marked strength. The quotable rate was 1s. 6 1/32d. for T.T. but even at 1s. 6 3/64d. business could be done for driblets.

The closing rates were: 1s. 6 1/32d. T.T. up to October, with 1s. 6 3/64d. available for July T.T.; 1s. 6d. November-December T.T.; 1s. 5 31/32d. January-March T.T.

Bills may be quoted 1s. 6⅛d. right through; and bankers were asking full rates.

Call money was cheap with lenders at ½ per cent. Union rates were ½ to ¾ per cent. for call, three days notice and seven days notice money. One month, two month and three month deposits were quoted 1, 1¼ and 1½ per cent. respectively.

BOMBAY MONEY MARKET

(By Wire).

(From our own Correspondent).

June 29, 1933.

The money market continues to be very easy, interbank call money being nominally quoted about ¾ to 1 per cent. The rupee sterling exchange has been steady throughout the week, banks selling June-October 1s. 6 1/32d. ; November-January 1s. 6d. ; February 1s. 5 31/32d. ; March 1st 1s. 5 15/16d. As money has been practically unusable and large maturities are due shortly by way of repayment of various Government loans, there has been some support visible in the gilt-edged market, particularly 4 per cent. 1960/70, which has improved to Rs. 95-8, and 1945/55 which has improved to Rs. 110-12-0. 3½ per cent. paper has also been a steady market, the highest done being Rs. 81/- and closing Rs. 80-10. There has been good enquiry for other short-dated loans at slightly improved rates. The new 3½ per cent. loan found buyers at 91 at the close.

The dollar-sterling cross-rate witnessed violent fluctuations during the week closing at the highest 4.39½ ; and one cannot say to what further extent the dollar will depreciate.

FINANCE ABROAD

The week is important for the repercussions of the failure of the stabilisation scheme on the World Economic Conference and on the exchanges. So far as the Conference was concerned, Mr. Roosevelt's refusal to confirm the agreement was a veritable wet blanket, as our London Correspondent remarked in the cable published last week. It is quite understandable, considering the importance that was attached alround to the question of stabilising the exchanges, that the news had a greatly unsettling effect on the deliberations of the Conference. And the statement issued by the American delegation to the effect "that meaures for temporary stabilisation are at present untimely, because they are likely to cause violent price recession and thus frustrate the predominant American desire to raise prices", does not help the situation. Rather, it has confirmed the fears of the delegates that the questions before the Conference are in the eyes of the American authorities subordinate to their own pet policy of inflating prices. The course of prices in America during the week, in which the rumours of settlement first reached the country and were followed within a day by Mr. Woodin's denial of them, showed clearly that it would take a long time before prices in America can dispense with the need for the inflationary prop. In such circumstances, it is no wonder that the feeling in London was so strong that there was talk of adjourning the Conference. Mr. Ramsay MacDonald has seized the occasion to deliver a paternally heartening speech to the delegates pointing out that the second week of every international conference is a period of pessimism, and that, when it passes off, the work of co-ordination would be found to be sufficiently encouraging. For the present, there are two circumstances which serve to protect the conference from a premature break-up. In the first place, it is thought that, after all, America is reserving the question of stabilisation as a bargaining point to secure the consent of France for other schemes of tariffs, debts and exchanges. And the other point is that the French Government at the Conference are understood to be ready to continue to collaborate in the economic sphere provided that all the agreements reached will be effective only after stabilisation of currencies. Thus it is all to the good that the disappointment in regard to the stabilisation agreement has not brought the World Economic Conference to an unnatural end.

The definite repudiation of the Agreement at the Bankers' Conference in London has had its natural effect on business conditions in America and on the exchanges. Our Overseas columns afford a detailed account of the conditions in the stock and commodity markets during the first week of the Conference, the extent to which they were disturbed by the rumours regarding stabilisation and the subsequent recovery on Thursday and Friday, as a result of Mr. Woodin's denial of these rumours. From this it is certain that, however marked the progress of prices and business may be in America, the stage has not yet been reached when it is possible without the aid of inflation even to sustain the present levels, not to speak of making further progress thereon. It is possible that during the time the negotiations were carried on in London, the American Administration at home had been carefully watching the effects of the rumours of such discussions on stock and commodity prices. The actual developments can leave no room for doubt in their minds that another attempt to stabilise the exchanges or the value of the dollar would mean that all the progress of recent months would have to be sacrificed. The political, more than the economic, repercussions of such a hold-up in business are so serious that the Administration must naturally fight shy of allowing further progress to be made with the question of stabilisation. Read in the light of these facts, the statement of the American delegation issued early in the week in London seems perfectly intelligible.

The inflationary boom, as it has aptly come to be called, has proceeded further during the week with the result that at the close cotton prices are the highest on record for the last two years, wheat is over 1 dollar more and unemployment has been reduced by 1,500,000. The Administration is reported to be using all its power to enforce the regulations in regard to minimum wages, while employers are

(Continued on page 1267).

CHEQUES:

Although the use of cheques has increased beyond all anticipation during the past twenty years, there are still many payments settled by other means which could, with advantage, be made by cheque. Comparatively few years ago it was, generally speaking, only persons of means who kept private Banking accounts, but modern methods aim at providing Banking facilities for the million. Lloyds Bank will open an account with a very modest amount, and the facilities it offers to customers cannot be excelled.

LLOYDS BANK

LIMITED.

(Incorporated in England.)

Subscribed Capital £73,302,076
Paid-up Capital £15,810,252

NATIONAL INSURANCE CO., LTD.

7, COUNCIL HOUSE STREET,
CALCUTTA.
(Established—1906.)

Before taking out a life assurance policy it is better to apply all the rigid tests for a good company.

The "National" will surpass any other Company in these tests.

(1) Indian Capital—Indian Management—for the benefit of Indians.
(2) The Company has never contested a claim on a technicality.
(3) The low safe rates of premium provide maximum assurance at minimum cost.

The "National" keeps well ahead of the times and its policy of "fair and square dealing" which began with its founding, ever since 1906, has been continuous.

R. G. DAS & CO.,
Managers.

National Fire & General Insurance
COMPANY, LTD.

The Company issues Policies covering:—

FIRE,

Loss of Profits by Fire, Fire and Material Damage following Riot AND Civil commotion.

MOTOR CARS - - -
MOTOR CYCLES - - -
COMMERCIAL VEHICLES

NATIONAL INSURANCE BUILDING,
7, Council House Street, Calcutta.

BUY

CENTRAL BANK'S 3 YEARS CASH CERTIFICATES

FREE LIFE INSURANCE POLICIES

Every Rs. 88/8 deposited will bring you Rs. 100/- after three years which works out at the rate of 4⅛ per cent Compound Interest.

ADVANTAGES OF OUR CASH CERTIFICATES

1. If you desire to recover your amount after 6 months from the date of the deposit, it will be returned to you with interest at 3 per cent per annum.
2. If you wish to withdraw the amount at any time after 12 months, it will be returned to you with Compound Interest at 3¾ per cent per annum with yearly rests.
3. If you want the amount at any time after 24 months, but before the due date, it will be paid to you with Compound Interest at 4 per cent per annum with yearly rests.

This means that money invested in OUR CASH CERTIFICATES is at your disposal at any time after 6 months and is returnable with interest whenever required.

THE CENTRAL BANK OF INDIA is a purely National Institution managed entirely by Indians. It is the largest Joint Stock Bank established in India, and has the largest amount of deposits ever held by a Joint Stock Bank in India.

For further particulars please apply at any one of our Branches.

CALCUTTA SHARE MARKET

Jute.—This section was fairly steady during the period under review. Hessians improved to Rs. 11-8, while raw Jute advanced at one time to Rs. 34-2. The boom in the commodity prices in America due to inflation programme, and the consequent depreciation of the dollar, had its sympathetic effect on Hessian values here. The cross rate went up to 4.38 and this is the highest rate since England off the gold standard on September 21, 1931. Due to reports of fairly good crop from jute growing areas prices of raw jute are kept down and it is anticipated that unless the report is out there will be very little fluctuations in prices of raw Jute. Business in the stock exchange was confined to speculative stocks only. Howrahs touched Rs. 51-8 and Kamarhattys Rs. 490 which was the highest during the week. Later on prices receded to Rs. 51 and Rs. 485 respectively. Clives were steady at Rs. 28, while Nationals were dealt at Rs. 23-8 to recede to Rs. 23-4. Among other stocks Aucklands were easier at Rs. 190, Ballys were placed at Rs. 147, Barnagores at Rs. 145, Empires came to business at Rs. 39-12, Kanknarrahs at Rs. 454-8, New Centrals at Rs. 410, Unions at Rs. 406, Fort Glosters were steady at Rs. 530 and Orients were placed at Rs. 220, Presidencys came to scattered deals roundabout Rs. 5-12. Reliance appeared to have changed hands at Rs. 72-14. The tone of the market was steady but the volume of turnover was very limited being confined to market speculators only.

Cotton.—This section ruled dull and uninteresting during the period under review. The prices of Dunbars and Kesorams remained unchanged roundabout Rs. 114 and Rs. 3-8.

Coals.—Although there is nothing in the industry to warrant a rise in the price of Coal, shares at present still some enquiry was noticeable for good and selected stocks. Bengals after dropping to Rs. 200 was stabilished roundabout Rs. 204, while Amalgamated were placed at Rs. 12-14, Burra Dhemos were wanted at Rs. 3-12, Burrakurs at Rs. 10-4, New Beerbhooms at Rs. 9-4 cum -/4/- dividend, while a large parcel of Pench Valley changed hands at Rs. 30-12. Raneegunge were lower at Rs. 29-12, Standards recorded a deal at Rs. 24, Borreas Rs. 10, Kalapharis Rs. 10-4 and Talcher Re. 1-9.

Miscellaneous.—This section was well supported, and all sugar shares kept steady at last weeks levels. Carew & Co., on declaration of Re. 1-8 dividend changed hands at Rs. 16-4, Cawnpores were wanted at Rs. 35-8, Ryams were easy Rs. 46-8, while Samastipurs after touching Rs. 17-8 had sellers at Rs. 17-4. New Savans were placed at Rs. 16-8 and had sellers Balarampurs had sellers at Rs. 11-8, while Punjab sugars were dealt at Rs. 328 and Basti Rs. 266, Murree Brewery were steady at Rs. 166, Burma Corporations were steady at Rs. 9-2. Among Electricals, Daccas came to business at Rs. 15-4, while Bengal Telephones were placed at Rs. 15-8. Calcutta Electric Supply were dealt after a long time at Rs. 33, while Lower Ganges Jumna Electric were placed at Rs. 9-12. Among Engineering groups Bengal Irons were wanted at Rs. 2, while on rumours of reduced dividend Indian standard wagons sharply recorded to Rs. 40 with few buyers even at this level. Saran Engineering were wanted on Cawnpore account and were placed at Rs. 6-12 cum dividend, Britannia Biscuits were placed at Rs. 2, while Indian Irons were on offer at Rs. 4-4, B. I. C. ordinary, deferred and preference were wanted at -/13/- and -/10/- and Rs. 111. Midnapores were unchanged at Rs. 70, while Humayun property were placed at Rs. 8-12; Titaghur deferred met with a good enquiry at Rs. 5-10, while Bengal paper were wanted at Rs. 70, Calcutta Landing and Shipping improved to Rs. 7-8, while Bengal Assam Steamship were wanted at Rs. 175.

Banks & Railways.—Imperial Banks fully paids were lower at Rs. 1,185, while the Contributories were steady at Rs. 288, Central Banks were steady at Rs. 22 on strong advices from Bombay. Scattered deals took place in Railway shares, Baraset Basirhat were dealt at Rs. 51 but later on receded to Rs. 49, Howrah Amtas were placed at Rs. 96, Mymensingh Bhairab Bazar rebate, at Rs. 83, Darjeeling Himalayan Railway at Rs. 90.

Government Securities.—Very little fluctuations were noticeable in this section during the week. 3½ per cent. paper at one time improved to Rs. 80-12 but came down to Rs. 80-4 but later on strong London advices improved again to Rs. 80-10. 3 per cent. paper was placed at Rs. 68-4, 4 per cent. 1960-70 was steady at Rs. 94-4, while 3½ per cent. 1947-50 were neglected. 6 per cent. bonds 1933-36 were placed at Rs. 100-5, 6½ per cent. Treasury Bonds were dealt at Rs. 106-4.

Tea.—This section was steady with limited turnover. Hatthikhiras were placed at Rs. 17-4, Loobahs at Rs. 5-4, Naga Hill at Rs. 14-4, Ramchera at Rs. 15-4, Bishnauths Rs. 20-2, Central Cachars Rs. 78, Dauracheras Rs. 11, Dimakusies Rs. 21, Killing Valley Rs. 16-12 and Titabur Rs. 8.

BOMBAY STOCK EXCHANGE.

(By Wire.)

(From Our Correspondent).

June 29, 1933.

The share market here has been fairly active and the abrupt rise during the week in the price of American cotton by 84 cents infused further strength to the bull operators. Cotton Mill shares have been an active section, and prices have improved alround over last week, with particular activity in a few low priced shares, such as New Greats, Colobas and Pabenys, which closed at the highest Rs. 185, Rs. 105, Rs. 141, respectively. Other quotations were also quite steady, Bombay Dyeings closing at Rs. 817-8, Fazulbhoy Rs. 372, Kohinoors Rs. 177, Nagpurs Rs. 344 and Svadeshi Rs. 277.

In miscellaneous section the electric group attracted attention the three respective shares closing at their best, Tata Hydros Rs. 153, Andhra Valleys Rs. 1,390, Tata Powers Rs. 97-5, Burma was a weak spot on account of the passing off of interim dividend. The lowest done was Rs. 395, closing at Rs. 405. Steels were also firm, ordinaries closing at Rs. 53-8; and second preference on investment buying improved to Rs. 86-8.

In the bank section there has been little or no change to report.

JUTE AND JUTE GOODS

JUTE

(From our Correspondent.)

There has not been much change on the jute market during the week under review. Fluctuations have been confined to narrow limits. At this fag-end of the season holders of old crop are not willing to discount spot values. Buyers at the same time are making purchases for immediate requirements. Prospects of the new crop are very good. Pending the publication of the Government Jute crop forecast for the season 1933-34, to be issued on July 4, both buyers and sellers are operating very cautiously.

It is reported that early this month a meeting of the Bengal Chamber of Commerce was held and the question of the last crop report was discussed. The Chamber is reported to have impressed upon the Director of Agriculture, Bengal, the necessity for issuing a supplementary jute crop forecast for the season 1932-33 revising the figures and raising the acreage from 19 to 21 lakhs of acres and yield from 58.5 lakhs to 70 lakhs of bales.

The estimated cultivation of jute during the current season according to private agencies, is about 10 to 12 per cent. in excess of the previous season. The probable yield for the season is estimated at about 80 lakhs of bales, or a quantity which is a little over the estimated consumption of jute in the world according to the present curtailed production. The position, however, would be more definitely known when the Government forecast is out next week. Weather conditions this season have been quite satisfactory. The outturn and quality of jute is therefore believed to be better than the previous season.

In ascertaining what the future trend of the jute market would be, there are two main factors to be taken into consideration. The fairly good crop with the ample stocks in the possession of mills in India, as well as abroad, are at the moment bear factors, and do not warrant any sensational rise in the price of jute, at any rate, during the current calendar year.

On the other hand, the jute goods market has been ruling very steady. The low stocks of hessians have been responsible for this sustained rise. Stocks during the next few month are not likely to show any increase, and thus it can be safely inferred that a very steady jute goods market will continue to react towards higher prices of jute. Even if it does not positively raise the price of raw jute, it will at least keep the prices from falling to very low levels.

At the same time efforts are being made to raise commodity values everywhere if this takes place in all the commodities in general, even with an unsatisfactory statistical position of jute, a sympathetic healthy undertone will be prevalent in the jute market all along.

It appears therefore that the jute market this season will be subject to a wider range of price fluctuations. Outside markets, with trade buying, will pull the prices up. The statistical position and inherent weakness will bring them again down. It will thus be a good market for short operators and chances will be not wanting for long ones too.

October futures has ruled between Rs. 33 and Rs. 34-8 throughout the week. Pending the crop forecast, long bulls and bears are both out of the market. There has been a fair enquiry from abroad near about £17, consequently exporters have been buyers near Rs. 29 per bale, sellers being few and fully reserved.

Mills likewise have shown interest in loose jute at ruling rates. They are interested in new crop but sellers are not willing to commit themselves in advance unless they have been able to cover at least a part of their sales in the mofussil.

Jute Crop.

According to Messrs. Sinclair Murray & Co., the condition of the crop for the week ending June 24 was:

General.—Conditions continue satisfactory and the crop is making good progress. Rivers are rising only very slowly and are generally somewhat lower than at this date last year. Cutting is proceeding only on a very small scale.

Narayanganj.—The weather during the week has been favourable. Plants are healthy and range in height up to 4′ on high lands and up to 7′—6″ on low lands. As there has been no appreciable rise in the river, cutting has been suspended meantime. The river is estimated to be 1′ lower than at this date last year.

Chandpur.—Conditions have continued satisfactory but a spell of sunny weather would be beneficial. Plants are healthy and range in height up to 7′. Cutting is proceeding slowly. The river is approximately 6″ lower than at this date last year.

Chaumuhani.—Conditions are satisfactory although a spell of sunny weather would be beneficial. Plants range in height from 3′—6″ to 7′—6″.

Akhaura.—The weather has been favourable. Plants are healthy and range in height up to 6′—6″. Cutting has commenced on a small scale on chur lands. The river is rising steadily and is approximately 1′ higher than at this date last year.

Niklidampara.—Weather conditions have been favourable and the crop is making satisfactory progress. Cutting has been suspended. The river is steady and at about the same level as at this date last year.

Sarishabari.—The weather has been favourable. The condition of plants is satisfactory and they range in height from 4′ up to 6′—6″. Cutting is proceeding. The river has risen 1′—7″ during the week and is about 1′—10″ lower than at this date last year.

Mymensingh.—The weather has been very favourable. Plants are in good condition and range in height from 4′ up to 7′—3″. The river has fallen slightly during the week and is well below last year's level at this date.

Serajgunge.—Conditions have been favourable. Plants are healthy and range in height up to 7′—5″. Cutting has been restricted owing to scarcity of steeping water. The river has risen 2′ during the week but is approximately 3′ lower than at this date last year.

Bhangora.—Weather conditions have been satisfactory but a spell of dry weather would be beneficial. Plants are healthy and range in height up to 7′—3″. Cutting is proceeding slowly on low lands. The river is about 6″ lower than at this date last year.

Madaripore.—Conditions are satisfactory but a spell of sunny weather would be beneficial. Plants range in height from 4′ to 6′. Harvesting of the Mesta crop continues. The river is steady and is about 1′—8″ lower than at this date last year.

JUTE MANUFACTURES

During the earlier part of the week the market was rather easy. Little interest was shown by buyers abroad, consequently the tone of heavy goods and heavier weight hessian was easy. Nine porters however were steady, though there was a small decline in values.

Towards the close of the week the market however took a turn. Fair business in eleven porters hessian was reported done to South American ports. Buyers for heavy goods were also showing some interest at the decline.

THE SHAHDARA (DELHI)-SAHARANPUR LIGHT RAILWAY CO., LTD.

NOTICE

is hereby given that the Fifty-Fifth Ordinary General Meeting of the above-named Company will be held at the Registered Office, No. 12, Mission Row, Calcutta, on Friday, the 14th July, 1933, at 10-30 a.m. for the purpose of receiving and considering the Directors' Report, the Statement of Accounts and Balance Sheet for the half-year ended 31st March, 1933, and to transact any other ordinary business of the Company.

The Share Transfer Books of the Company will be closed from the 5th to the 14th July, 1933, both days inclusive.

By Order of the Board,
MARTIN & CO.,
Managing Agents.

Calcutta, the 28th June, 1933.

The result was that sellers became scarce and values were forced up. Short sales and bears had to come out covering. Nine porters, that had declined to Rs. 11, touched Rs. 11-9. Similar rise though to a proportionately smaller extent was witnessed in the case of eleven porters hessians and heavy goods, specially heavy cees and B. Twills.

The rise that was witnessed towards the close of the week was due firstly to a better business, but mainly due to the short rise in American Commodity markets, chiefly cotton, wheat and linseed. The hessian market is directly influenced by American prices and directly affected by the rise and fall of cotton prices in America. The short rise of about a 100 points in the course of two days, in cotton prices in U. S. A., was immediately reflected in the local price of hessians and a rise of a little over eight annas was the result.

The recent rise has infused confidence in the hearts of long holders, but they have not so far taken any fresh move.

The present price level of hessians is considered high enough. Further short and steep rise from these levels is very doubtful. Holders are carrying for all positions up to the middle of 1934. Beyond that period, holdings on the parity of present price levels are not considered quite safe, unless the stock position during the next few months becomes still more sound and thus warrants a further rise.

The present short-working arrangement arrived at between the various Calcutta Jute Mills also comes to an end in June, 1934. There is no reason to fear that the same will be renewed for a further period should conditions then demand it. But the market has had a very sad experience of the transitional period when last time negotiation were carried on. The holders therefore think that during the earlier part of 1934 the market may once again be subjected to similar doubtful conditions. With the mentality of the market being what it is, the mills will naturally find it difficult to get large scale buyers for positions onward July, 1934. It is therefore advisable that the position be made clear in time and in a decisive way to avoid undue suspense to the market.

COTTON AND COTTON GOODS

COTTON.

(By Wire.)

(From Our Correspondent).

Bombay, June 29.

The outstanding event during week was Monday's sensational rise in American prices of over four dollars a bale. Weather which was till now favourable is no longer so. In Texas particularly drought is apprehended if rains are delayed any longer. But the almost assured success of the acreage curtailment plan has caused a burst. Inflation still continues by way of further depreciation in the dollar. Cloth and yarn business thrive; and mill activity has grown apace. People rely upon the United States' Governent, which is determined to bring about trade recovery by lifting commodity prices.

In the local market depression still prevails due to option dealers manipulations to keep prices low. To-morrow the July option transactions will be determined, and then the market will have free scope. By continuously ignoring New York uptrend in prices, Broach cotton rates have fallen by about Rs. 30 behind their usual parity with rates of American Cotton. On Tuesday Broach July-August and April-May rates touched Rs. 221 and Rs. 241 respectively and closed to-day at Rs. 210-12 and Rs. 231-8.

While reporting last week it was said that the market is nervous and erratic but the general expectation is that, ultimately, higher prices will prevail. At that time the undertone of the market was quite healthy, but such a short rise as has taken place during the week under review was not anticipated.

Broach July/August that was ruling near Rs. 203 rose in the course of 3 days to Rs. 227/-. The higher levels however could not be maintained, and the quotations at the time of writing are Rs. 217/.

The rise was mainly due to the rise in American Cotton values from 9.25 cents to 10.40 cents for spot in New York. The weekly official report issued in Washington disclosed that the growth of Cotton in the U. S. A. Cotton belt was rather slow, due to unfavourable weather conditions. This, coupled with the talk of acreage reduction, led to very heavy speculative and trade buying in New York. The determination of President Roosevelt to raise internal price levels in U.S.A. by inflation had affected the general commodity markets in U.S.A. Grains and seeds had witnessed a very short rise and by the same token and partly due to the sympathetic effect of other markets, cotton values rose in the same proportion and against the lowest of New York spot of 8.95 cents, we have witnessed 10.45, the highest of the week.

THE BARASET-BASIRHAT LIGHT RAILWAY CO., LTD.

NOTICE

is hereby given that the Fifty-Eighth Ordinary General Meeting of the above-named Company will be held at the Registered Office, No. 12, Mission Row, Calcutta, on Friday, the 14th July, 1933, at 11-5 a.m. for the purpose of receiving and considering the Directors' Report, the Statement of Accounts and Balance Sheet for the half-year ended 31st March, 1933, and to transact any other ordinary business of the Company.

The Share Transfer Books of the Company will be closed from the 5th to the 14th July, 1933, both days inclusive.

By Order of the Board,
MARTIN & CO.,
Managing Agents.

Calcutta, the 28th June, 1933.

The opinion at the moment is that the rise has been too sharp and steep and not fully justified by the existing conditions. This does not necessarily mean any inherent weakness in the market but should be interpreted as indicating the possibility that temporarily unsettled conditions may prevail. It is advisable to take profits at the rise and wait for some time. It must be remembered that a very short rise brings into the market weak operators who multiply their holdings by sheer force of profits. These operators invariably liquidate when the market takes a downward trend from the top, thus accentuating the fall. Sound holders should therefore take advantage of these liquidations which in the long run always prove profitable. At the moment, all the bull factors, such as acreage reduction, inflation, unfavourable weather and bear covering, have exhausted themselves. The market therefore seems to be tending towards lower prices in the course of the next few days.

Bombay Position.

The nervousness that had developed in the cotton market in Bombay during the previous weeks due to the threat of Japanese boycott of Indian cotton has graudally vanished. On the contrary the healthier reflection of American upward move is visible in the Indian Cotton market. There seems to be no reason to anticipate any unexpected crash in the cotton market.

Statistically the position is much sounder. Receipts, though larger than last year, are fully offset by larger exports. Thus the stocks in the Indian markets are smaller than what they were last season.

Receipts of Cotton in Bombay for the period ending June 22, this season are 2.31 million bales against 1.90 million bales during the same period last season. While the exports for the same period are 1.38 million bales against 0.82 million bales last season. Stocks of Cotton in Bombay on June 22, 1933, are estimated at 907,300 bales against 849,500 bales on the same date in 1932.

The all India receipts and exports of Cotton at main Ports are estimated as below:—

June 10. Million bales.	1933.	1932.
Receipts	3.37	2.78
Exports	2.19	1.35
Stocks	1.18	1.43

Calcutta, the 28th June, 1933.

BULLION

GOLD.

Bombay, June 29.

Gold rates which closed last Thursday at Rs. 34 advanced from Monday touching Rs. 30-6-3. It is quoted this evening at Rs. 30-5-3.

Calcutta, June 29.

The market has ruled featureless throughout the week. Quotations have remained almost unchanged except for a small rise that has taken place towards the close of the week. London prices have gone up from £6-2-2 to £6-2-4d. per oz. while the local prices are quoted at Rs. 30-4 per tola.

Stocks in Bombay are estimated at 3 lakhs of tolas with a daily offtake for internal consumption, of about 2,000 tolas. Exports from India are continuing unabated and the total exports since England went off the gold standard amount to about Rs. 133 crores.

Quotations during the week were:—

Bombay:

	Ready.	First Settlement.	Second Settlement.
June 23 ...	30-3-9	30-3-9	30-3-6
June 26 ...	30-4-6	30-4-6	30-4-6
June 27 ...	30-5-6	30-5-6	30-5-3
June 28 ...	30-6-0	30-6-0	30-6-0

London—(Air Mail week).

The supplies in the open market continue to be plentiful. There is no special feature, except that the greater part of the purchases were made on behalf of the continent. The prices fluctuated between 122 sh. 1d. and 122 sh. 6d., the average for the week being 122 sh. 3.08d.

The Transvaal gold output for May, 1933, amounted to 944,604 fine ounces, as compared with 895,097 fine ounces for April, 1933 and 965,644 fine ounces for May, 1932.

The following were the United Kingdom imports and exports of god registered from midday on the 2nd instant to midday on the 12th instant:—

Imports.	£	Exports.	£
Germany ...	1,416,257	France ...	693,106

London.	Bar Gold Fine. Per ounce.
June 22 ...	£6-2-3
June 23 ...	£6-2-2
June 24 ...	£6-2-3
June 26 ...	£6-2-4
June 27 ...	£6-2-0
June 28 ...	£6-2-4

SILVER.

Bombay, June 29.

Silver rates moved within a rupee and a quarter touching lowest on Saturday at Rs. 56-10 for Asad, and highest on Tuesday at Rs. 57-14. It is quoted this evening at Rs. 57-4.

Calcutta, June 29.

Like gold the silver market has also ruled featureless, though the day to-day fluctuations in the London as well as local markets have continued between ½d. and 12 annas respectively. India, China, and America have operated both ways in the London market, speculators being the chief buyers and sellers. So far there have been no fresh developments in the World Economic Conference regarding the stabilisation of Exchange and pending any such developments the silver market seems to remain idle with narrow fluctuations.

Local prices have ruled between Rs. 57 and Rs. 58. The offtake has slightly improved and the stocks in Bombay are estimated at a little below 9,000 bars and those in Calcutta about 1,000 bars.

There has been no import of silver in this week also, the total imports from 1st April amounting to 50 bars only, valued at Rs. 1 lakh. The exports on the contrary amount to Rs. 11 lakhs during the same period.

Quotations during the week were:—

Bombay.

	Ready.	First Settlement.	Second Settlement.
June 23 ...	56 15 0	57 2 0	57 11 0
June 26 ...	56 14 0	56 15 0	57 8 0
June 27 ...	57 2 0	57 4 0	57 13 0
June 28 ...	57 5 0	57 7 0	58 0 0

London (Air Mail Week).

The tone of the market has been steady and fluctuations in prices have been comparatively narrow. Sales on continental acount were made throughout the week, but speculators and Indian bazars also bought. Speculative buying was a marked feature; and this was possibly influenced by the opening of the World Economic Conference, in view of the likelihood of the question of silver being taken up for discussion and settlement.

Business with America was affected by fluctuations in the dollar exchange, and although New York has generally been a buyer, sales were also made by this quarter during the week.

The stocks in Shanghai on the 10th instant consisted of about 130,500,000 ounces in Sycee, 265,000,000 dollars, and 6,960 silver bars, as compared with about 136,000,000 ounces in sycee, 262,500,000 dollars, and 6,960 silver bars on the 31st ultimo.

The following were the United Kingdom imports and exports of silver registered from midday on the 2nd instant to midday on the 12th instant:—

Imports.	£
Soviet Union (Russia) ...	110,000
Germany	38,840
Poland (including Danzig) ...	19,442
Japan	32,611
British South Africa	5,407
Iraq	5,400
British India	14,674
Australia	13,927
Salvage from s.s. "Egypt" ...	2,970
Other countries	2,578
Total ...	245,849

Exports.	£
Persia	13,671
Germany	5,909
France	2,779

TEA AND COFFEE

TEA.

Sale No. 3 was held on June 26, 1933, when a little over 9,000 chests of tea were offered with exports rights and about 2,000 chests for internal consumption. The offerings are far too small when compared with the same sale in 1932. The average price realised was 0-7-11 per lb. for export tea and 0-5-4 per lb. for internal consumption tea against an average of 0-5-6 per lb. obtained during the sale of 1932.

Full Particulars are as below:—

	Chests.			
	Leaf.		Dust.	
	1933.	1932.	1933.	1932.
Export tea offered ...	9,119	16,500	...	...
,, ,, sold ...	7,952	14,357	...	...
,, ,, average price	-/7/11	-/5/6	...	...
Internal consumption offered	2,133	...	2,537	...
Internal consumption sold	1,933	...	2,505	...
Internal consumption average price ...	-/5/4	-/5/2	-/4/10	...

There was a good market for leaf grades which marked an advance of 3 pies while brokens ruled firm at 7½ annas per lb. The market for better quality tea was however disappointing, sellers being forced to accept one anna per lb. less below expected values, in order to effect sales.

QUOTATIONS ARE:— Per lb

Total from April 1, 1932 to June 15, 1932—11,909,599 lbs.

Tea Exports from India.

Exports from India (Northern) from April 1, to June 27:

	1933-34. lbs.	1932-33. lbs.
To U. K.	16,691,207	20,326,983
To out Ports	1,319,321	2,458,356
To Indian Ports	2,190,873	2,460,105
Total exports	20,201,221	25,245,444

Exports from South India from the 1st April to 31st May:

	1933.	1932.
To U. K.	8,143,006	9,886,734
Total exports	8,735,449	10,743,216

CEYLON TEA STATISTICS.

PUBLIC AUCTION SALES.

The Colombo Brokers' Association Weekly Tea Market Report dated June 6, says:—

Black Tea.—The average for complete invoices at the sale of May 30, was 46 cts. as against 43 cts. for the previous sale and 37 cts. for the corresponding sale last year. The average of total offerings was 45 cts. as against 42 cts. for the previous sale and 36 cts. for the corresponding sale year.

Quantity offered on May 30, pkgs. 20,880=1,972,970 lbs.

EXPORTS.

The following figures are taken from the Ceylon Chamber of Commerce Price Current, dated June 5:—

Total exports from January 1 to May 25:—

	Black. lbs.	Green. lbs.	Total. lbs.
1933 ...	102,299,684	239,638	102,539,322
1932 ...	106,896,241	429,650	107,325,891
1931 ...	108,903,662	834,880	109,738,242
1930 ...	105,873,100	733,294	106,606,394

London.

During the week ending June 26, the amount of tea offered for sale comprised 56,108 packages of Indian 26,021 of Ceylon and 9,533 of Java teas. Indian Tea was in fairly good demand. All grades and qualities sold well and the greater part fetched prices above 8¼d. per lb. Greater interest was still centred on low-priced varieties up to 9d. per lb. There was a strong enquiry for the fresh crop whole-leaf Darjeeling.

LONDON TEA SALES.

At the London auctions on June 21, 25,700 packages of Indian tea were submitted for sale.

The market was rather quiet with some irregularity in evidence. There was keen competition in common and low mediums and last week's rates were maintained but good medium sorts were easier to buy.

The following were the lowest prices fetched during the day's auction:—

	Last auction per lb.	To-day's auction per lb.
Common Pekoe	8¼d.	8d.
Common Broken Pekoe ...	8¼d.	8d.
Common Orange Pekoe ...	8¼d.	8d.
Common B. O. Pekoe ...	8¾d.	8¼d.
Common B. P. Souchong ...	8¼d.	8¼d.
The following are the value prices:—		
Clean Common Pekoe ...	8¼d.	8¼d.
Clean Common Broken Pekoe	8½d.	8¾d.
Clean Common O. Pekoe ...	8¾d.	8¼d.
Clean C. B. O. Pekoe ...	8¾d.	8⅝d.
Clean C. B. P. Souchong ...	8¼d.	8¼d.

HIDES, SKINS AND LEATHER.

(From Our Correspondent).

Calcutta, June 29.

Hides—The market has remained more or less featureless during the week. Shippers purchases have been less this week but prices have remained firm practically at last weeks level. There is demand for better quality wet salted hides, supplies of which are not plentiful. The prices ruling are on the basis of 3½ to 4 annas a lb. wet. To-days quotations in the Calcutta market are as follows:

Cow Hides.

	Per 20 lbs. Rs. A. Rs. A.
Argas dry framed arsenicated ...	7 0 to 8 0
Durbhangas	5 0 to 5 4
Patnas	3 12 to 4 4
Dry salted	4 8 to 5 0

Buffallo Hides.

Dry arsenicated	3 0 to 3 12

Goatskins—Arrivals into Calcutta this week were smaller. Prices have remained steady. Shippers purchased about half of that of last weeks. Prices prevailing may be quoted as follows:

	Per 100 pieces.
Good quality	Rs. 120 to 155
Ordinary	,, 80 to 100
Rejected	,, 40 to 50

Leather—there was very little demand for leather this week and there is no change to report in the prices. The market has remained featureless.

SHELLAC.

Market during the week has been firm with an advance in prices over those of last week.

The following are the latest quotations:—

T. N.	Rs.	23	8 0
S. T. I.	,,	24	0 0
I. T. N.	,,	22	8 0
12%	,,	23	0 0
Super fine	,,	26	0 0
Seed lac	,,	17	8 0
Kiri	,,	3	8 0
Stick lac	,,	13	8 0
July futures	,,	25	0 0

Shipments up to June 26th amounted to 22,770 chests.

Daily quotations for T. N. Shellac July delivery for the week ending Thursday the 29th June, 1933 are as follows:—

	T. N. Shellac July Dely.
Friday the 23rd June, 1933 ...	Rs. 24 8 per md. buyer.
Saturday the 24th June, 1933	,, 24 12
Monday the 26th June, 1933 ...	,, 25 0
Tuesday the 27th June, 1933 ...	,, 24 10 seller.
Wednesday the 28th June, 1933	,, 25 12 buyer.
Thursday the 29th June, 1933	,, 26 8 quiet.

Rates for weekly margin payment announced on Saturday the 24th instant Rs. 24-12.

THE ARRAH-SASARAM LIGHT RAILWAY CO., LTD.

NOTICE

is hereby given that the Forty-Seventh Ordinary General Meeting of the above-named Company will be held at the Registered Office, No. 12, Mission Row, Calcutta, on Friday, the 14th July, 1933, at 10-45 a.m. for the purpose of receiving and considering the Directors' Report, the Statement of Accounts and Balance Sheet for the half-year ended 31st March, 1933, and to transact any other ordinary business of the Company.

(*Continued from page 1251*).

heartily joining in their efforts to make wages keep pace with the increase in prices.

While the outer world has no reason to grudge America these apparent, albeit none too reliable, signs of revival, the precipitate decline in the exchange value of the dollar is a matter which naturally causes grave disquiet in the minds of foreigners. The following table shows the closing sterling-dollar rates for the last few days; and it will be seen that as against 4.21⅜ on June 23, the rate on June 28 came down to as low as 4.38¼.

June 23	4.21⅜
,, 24	4.22¼
,, 26	4.21¼
,, 27	4.25¼
,, 28	4.38¼

That almost the whole of the increase in commodity prices is due to, or rather is only a function of the depreciation of the dollar, may be seen from the fact that, whereas wheat in Britain, for instance, has risen by 15½ since mid-April when America went off the gold standard, in New York the rise had been 42 per cent. A special cable of the *Statesman* affords the information that according to the City Editor of the London *Times* the American authorities can markedly influence the movement of the gold value of the dollar, but their power to do so is by no means unlimited. In the autumn, the demand for dollars to pay for cotton and other commodities normally increases, thus tending to force up the gold value of the dollar and bringing down American prices in relation to world prices. It is doubtful whether the American authorities may not be able to counteract the influence of the seasonal depreciation is sterling by measures of actual inflation. For it must be remembered that so far the upward movement of prices in America has been largely of a speculative nature, operators bidding against each other in anticipation of a definite inflationary action. If at the time of the autumnal depression in sterling the Administration should decide to put more measures into operation, it is not altogether impossible that the present pace be kept up. But it must be remembered that so far there have been no indications of any definite policy which the American Administration had set before themselves. They have been content to watch the whole situation. And to try to anticipate future events in a country, where the Administration has ample powers and yet lacks a definite plan, is necessarily a futile endeavour. But what is of importance to-day is that America, which is the author of the Tariff Truce, should have set about rendering it altogether meaningless by embarking on a course of apparently unlimited exchange depreciation. If the present decline in the dollar continues, it is too much to believe that other nations gathered together in the World Economic Conference will stay their hands. A race in depressed currencies is hardly conducive to the formulation of any plan for concerted international action towards the revival of world trade and finance.

WHY YOU SHOULD SHOP AT

CURRIMBHOY'S

There are three chief reasons why you should shop at Currimbhoy's. Firstly, you can be certain that the very best quality cloth is being supplied to you because you can rely on the famous Currimbhoy group of mills where the cloth is made. Secondly, you are supporting Indian Industries when you purchase at Currimbhoy's Cloth Depot. Thirdly, Currimbhoy's fabrics are unequalled in India for their durability and lasting colours.

STATISTICAL INFORMATION

INDIAN FOREIGN TRADE IN MAY.

The trade returns of British India for the month of May, 1933, as compared with the preceding month showed increases in the values of imports, exports and re-exports. The value of imports of private merchandise totalled Rs. 9,79 lakhs, an increase of Rs. 6 lakhs, as compared with the preceding month. The exports of Indian produce and manufactures advanced by Rs. 40 lakhs from Rs. 10,20 lakhs in April, 1933 to Rs. 10,60 lakhs in the month under report. Re-exports also recorded an increase of Rs. 3 lakhs and amounted to Rs. 25 lakhs. The comparison of the trade figures for May, 1933 and the two months April and May, 1933 with those of the preceding month and the corresponding periods of the preceding year, is set forth below:—

	Month of May 1933	Month of April 1933	Increase (+) or decrease (−) in May 1933, as compared with May, 1932.	
	R (lakhs)	R (lakhs)	R (lakhs)	Per cent
Imports ...	9,75	9,69	+6	+1
Exports ...	10,60	10,20	+40	+3.9
Re-exports ...	25	22	+3	+13.6

	Month of May 1933	Month of May, 1932	Increase (+) or decrease (−) in May, 1933, as compared with May, 1932	
	R (lakhs)	R (lakhs)	R (lakhs)	Per cent
Imports ...	9,75	11,83	−2,08	−17.6
Exports ...	10,60	9,57	+1,03	+10.8
Re-exports ...	25	23	+2	+8.7

	Two months April and May		Increase (+) or decrease (−) in 1933 as compared with 1932	
	1933	1932		
Imports ...	19,45	25,05	−5,60	−22.4
Exports ...	20,80	20,01	+79	+3.9
Re-exports ...	47	52	−5	−9.6

2. Treasure on private account including currency notes, showed a net export of Rs. 5,09 lakhs in May, 1933, as against Rs. 4,47 lakhs in the preceding month and Rs. 3,07 lakhs in May, 1932. The import and export figures of gold and silver during the two months April and May, 1933 compare as follows with the corresponding period of the preceding year:—

	Two month, April and May		Increase (+) or decrease (−) in 1933 as compared with 1932
	1933	1932	
	Rs. (lakhs)	Rs. (lakhs)	Rs. (lakhs)
Gold imported ...	16	19	−3
,, exported ...	9,87	7,54	+2,24
Silver imported ...	18	29	−11
,, exported ...	11	9	+2

More Favourable Balance of Trade.

3. Measured by the statistics of merchandise and treasure, the total visible balance of trade in May, 1933, was Rs. 6,20 lakhs in favour of India as compared with Rs. 5,21 lakhs in April, 1933 and Rs. 1,06 lakhs in May, 1932. During the two months ending May, 1933 the visible balance of trade in merchandise and treasure was Rs. 11,41 lakhs in favour of India compared with Rs. 2,69 lakhs in the corresponding period of the preceding year. The balance of remittances of funds in May, 1933 was *minus* Rs. 8,77 lakhs and in the two months April and May, 1933 *minus* Rs. 9,88 lakhs.

Changes in Imports.

4. As compared with May, 1932, the imports of food, drink and tobacco in May, 1933, decreased by Rs. 32 lakhs to Rs. 88 lakhs, and those of raw materials by Rs. 1,53 lakhs to Rs. 1,39 lakhs, and manufactured articles by Rs. 25 lakhs to Rs. 7,29 lakhs. Under food, drink and tobacco, imports of sugar 16 D.S. and above (including beet) declined from 25,500 tons valued at Rs. 28 lakhs to 19,200 tons valued at Rs. 20 lakhs. Imports of rice, not in the husk, fell from 8,600 tons valued at Rs. 8 lakhs to 900 tons valued at Rs. 73,000. Arrivals of wheat amounted to 6,800 tons valued at Rs. 4 lakhs as against *nil* in May, 1932. Under spices, the imports of betelnuts advanced from 97,400 cwts. to 99,500 cwts. in quantity but declined in value from Rs. 10 lakhs to Rs. 8 lakhs. Imports of raw tobacco fell from 745,600 lbs. valued at Rs. 9 lakhs to 106,700 lbs. valued at Rs. 1½ lakhs. The imports of cigarettes increased from 55,000 lbs. to 70,000 lbs. in quantity but the value remained almost unchanged at Rs. 2 lakhs. Imports of provisions and oilmen's stores declined from Rs. 24½ lakhs to Rs. 22 lakhs owing mainly to lesser arrivals of canned and bottled provisions (chiefly vegetable products) and condensed milk. There was a decline of 39,000 tons in quantity and of Rs. 7 lakhs in value under the imports of salt. Under raw materials, the imports of kerosene oil advanced from 4.4 million gallons valued at Rs. 21½ lakhs to 6.8 million gallons valued at Rs. 28 lakhs. Imports of fuel oil dropped from 8.6 million gallon to 5.7 million gallons in quantity and from Rs. 17 lakhs to Rs. 10 lakhs in value. Imports of lubricating oils rose from about 1 million gallon valued at Rs. 8 lakhs to 2 million gallons valued at Rs. 16 lakhs. Import of petroleum, dangerous flashing below 76°F. including petrol, benzine and benzol recorded a decline of 1.2 million gallons in quantity and of Rs. 14 lakhs in value. Imports of cocoanut oil improved by 132,000 gallons to 518,000 gallons in quantity and the value recorded a slight increase and stood at Rs. 5 lakhs. The imports of ra wcotton, chiefly from Kenya Colony, the United States of America, and Egypt decreased by 17,000 tons in quantity and by Rs. 1,49 lakhs in value.

Imports of raw silk fell by 109,000 lbs. in quantity and by Rs. 6 lakhs in value. Arrivals of raw wool rose by about 1 million lbs. in quantity and by Rs. 4 lakhs in value. Under manufactured articles the imports of cotton yarn and manufactures decreased by Rs. 27 lakhs. The imports of twist and yarn rose from 3.9 million bs. to 4.1 million lbs. in quantity but the value fell from Rs. 34 lakhs to Rs. 30 lakhs. The total imports of cotton piecegoods showed an increase in quantity combined with a decrease in value. Imports of grey goods rose from 23 million yards valued at Rs. 35 lakhs to 28 million yards valued at Rs. 36½ lakhs in May, 1933; those of white goods improved in quantity from 30 million yards to 32 million yards but the value declined from Rs. 57 lakhs to Rs. 53 lakhs while coloured goods fell from 30 million yards worth Rs. 64 lakhs to 24 million yards worth Rs. 47 lakhs. Under iron and steel there was a decrease of Rs. 7½ lakhs of which sheets and plates accounted for Rs. 7 lakhs. The imports of machinery and millwork, including belting, advanced by Rs. 20 lakhs. The imports of motor cars in May, 1933, numbered 656 and those of motor lorries, buses and vans 321. The value of motor cars imported in May, 1933, rose by Rs. 6 lakhs as compared with May, 1932. The imports of dyes obtained from coal tar fell by 1.3 million lbs. in quantity and by Rs. 14 lakhs in value. There were noticeable increases under silk piecegoods (+Rs. 9 lakhs) and woollen piecegoods (+Rs. 2 lakhs) while there were decreases under piecegoods of cotton and artificial silk and rubber manufactures (−Rs. 3 lakhs each).

CENTRAL BANK GOLD BARS (FIVE TOLAS AND TEN TOLAS) ARE AN IDEAL GIFT.

Editorial Comments

CENTRAL BANK THREE-YEARS CASH CERTIFICATES ARE AN IDEAL INVESTMENT.

FINANCE IN 1932-33.

Mr. J. W. Kelly, Officiating Controller of the Currency, has issued his annual report for 1932-33; and we congratulate him on the extended scope and expanded tables of the review. It was to be expected that in an analysis of the salient features of trade and finance of a year during which numerous world events of great significance took place, the description of the international factors bulks larger than was usual in earlier reports. The review for 1932-33 begins with the sad thought that "it is not possible, unfortunately, to record any material improvement in the conditions which existed at the close of the preceding year". In the world situation, the most encouraging feature, in Mr. Kelly's view, was the wide recognition "that the problem of raising the level of prices is essentially international in character and that no one nation can solve it by unilateral action either by way of altering the basis of its currency and credit or by endeavouring to direct the flow of trade in its own favour by manipulating the tariffs". We are not sure if Mr. Kelly is right in the conclusions he draws. For, even as he wrote these lines, he must have recalled to mind the case of the United Kingdom which, by the use of tariffs, was certainly endeavouring to reduce imports, to strengthen the domestic industries, and to coax larger exports. He should also have been aware of the determination of the United States of America to utilise depreciation of currency as a lever for raising prices and of the great success which had already attended this experiment. Again, in the matter of the War Debts settlement, America has been stubbornly refusing to recognise this as an international issue and has been insisting that each debt agreement should be negotiated on its own merits. We should, therefore, think that the experience of 1932-33 was all against concerted action. Each for himself and the devil take care of the rest—this was the spirit underlying all the policies and actions of the various nations in the past year. To the extent that Mr. Kelly pins his hope on the alleged recognition of concerted action, his promises fell to the ground; and his hope is, therefore, doomed to disappointment. We have, thus, to confirm the pessimistic note struck in the closing paragraph of his review of international trends, as the more correct indication of the 1932-33 story.

* * *

Turning to domestic developments, the Controller of the Currency could record a few bull points. The year was practically free from political excitement. Continued and increased activity in the sugar industry was a notable feature of 1932-33. There was more demand for sugarcane; and this enabled cultivators in certain districts to change over from unprofitable crops to cane. After twelve years of utter stagnation in the capital market for industrial concerns, the flotation of a large number of sugar propositions was a welcome and heartening change. Striking improvement was noticed in the financial position of the Government of India, the improvement apparent towards the end of 1931-32 receiving further emphasis and acceleration in 1932-33. Mr. Kelly admits that the improved Government finances were mainly due to the continuance of the exports of gold on a large scale (amounting to 8,526,241 fine ounces of the value of Rs. 66,84,09,847) which "not only enabled the Government to make purchases of sterling over and above their immediate requirements, and thus reinforce the position of the Home Treasury, but also brought increased revenue from certain import duties as it is clear that a proportion of the profits on gold sales must have been utilised for increased purchases of imported articles". Mr. Kelly refers to the controversy whether the gold exported in the last two years is mostly distress gold or whether it has been parted with as a business proposition to realise the profit from the prevailing premium. His own view is as follows :

> "While it is probably true that a certain proportion of the gold exported in recent months has come out because holders had to realise their savings to meet current expenditure owing to the very low prices obtained for primary commodities, it is equally certain that a large proportion, possibly the larger proportion, has been sold as a purely business proposition to realise the premium. It is well known that bullion dealers all over the country have been very active in collecting gold for sale to the export market, and in some districts special purchasing agencies were opened by exporters. It is reasonable to infer that many holders who parted with their gold would not have done so but for the allurement of an immediate profit which was pressed on their notice persistently."

* * *

It is difficult to follow Mr. Kelly's reasoning in the above extract. Just because bullion dealers all over the country have been active in mofussil centres in collecting gold for sale to the export market, does it follow that it was that propaganda which induced many holders to part with their gold? As we have often stated in these columns, we have made elaborate enquiries at various centres all over the country; and we are convinced that the gold sold out for profit bears a small proportion to the total quantity of gold that has been released from mofussil hoards. The Controller of the Currency makes a broad generalisation and wishes us to accept the accuracy of his conclusion that a large proportion, possibly the larger proportion, has been sold as a purely business proposition to realise the premium. When, as the Controller of the Currency himself admits, there has been such considerable controversy over this question, is it not up to him to devise ways and methods for ascertaining exact facts and securing the relevant figures from a number of typical centres? The strength of Government finance has been based on gold exports. Gold shipments are due, in our opinion, to the extreme distress prevalent throughout the country. In other words, the comfort of Government finance has its origin in the distress of the population. When the matter is looked at from this point of view, it should cause great disquietude and concern.

* * *

We believe that the time is past when the authorities should be complacent over a development that occasions such grave misgivings. If the authorities are able to prove that a substantial portion of the gold disgorged is not distress gold, nobody would be happier than urselves. But we are not prepared to accept generalisations unsupported by adequate enquiry. In the absence of a reliable investigation by the Government; and in view of the fact that we, on our part, have made such examination as is possible within our limited resources and ability, we do put forward the distress gold problem as the most disquieting factor of the current financial situation in India and as an issue that should engage the immediate and earnest attention of the Finance Member.

* * *

Mr. Kelly administers to himself the comforting thought that a proportion of the profits of gold sales must have been utilised for increased purchases of imported articles. The figures he hae given in state-

ment II do not bear out this conclusion. It is true that imports in 1932-33 were about Rs. 6½ crores higher than in 1931-32 ; but it must not be forgotten that the earlier year witnessed the acutest phase of the boycott campaign. The basis of comparison is, therefore, not with 1931-32 but with earlier years. Imports in 1932-33 came to Rs. 132.27 crores as against Rs. 125.72 crores in 1931-32 ; Rs. 163.58 crores in 1930-31 ; Rs. 242.59 crores being the average of the ten years ended 1929-30.. Our own view is that most of the proceeds from gold sales have been utilised either for payment of Government dues by way of taxes or liquidation of debts which had become too onerous. By every criterion, the economic condition of the country was most distressing during 1932-33. The Calcutta index number of wholesale prices dropped from 92 in April, 1932 to 83 in March, 1933; during this period the index of wholesale prices in the United Kingdom fell only from 102 to 98. In America, where there was no depreciation of currency during this period, the fall was six points from 66 to 60. In Japan there has been actually a rise of nearly twenty points from 116 to 134. In other words, in spite of depreciation of currency in Britain, there has been a small drop in the index of wholesale prices ; even though there was no depreciation of currency in the U.S.A., the decline was only six points ; Japan was the one country which was able to utilise the depreciated currency for the purpose of raising the price level. India is at the other extreme and is a painful instance of a country which has depreciated her currency but done it so clumsily that the decline in prices has been quite steep.

* * *

This is entirely due to the lack of policy and plan on the part of the Government in regard to currency and monetary matters. Every other country has been trying to make the most of the situation which has necessitated the departure from the gold standard. India has done nothing, in a scientific way or by well laid plans, to get the fullest advantage of a welcome lowering of the gold value of the national currency. The same doleful tale is told by the foreign trade figures. Our total exports in 1932-33 were only Rs. 135.65 crores as against Rs. 160.55 crores in 1931-32 ; Rs. 225.63 crores in 1930-31 ; Rs. 325.72 crores being the average of the ten years ended 1929-30 ; and Rs. 194.67 crores being the average of the ten pre-war years ended 1913-14. The balance of trade in merchandise was, therefore, reduced to the paltry amount of Rs. 3.38 crores in 1932-33 as against Rs. 34.83 crores in 1931-32 ; Rs. 62.05 crores in 1930-31 ; Rs. 83.13 crores being the average of ten years ended 1929-30 and Rs. 71.74 crores being the average of ten years ended 1913-14. For a country which requires anything like £25 million to £30 million for her Home Charges and, possibly, another £25 million for the invisible items, the materialisation of the situation in which the merchandise balance of trade is a bare Rs. 3 crores is a most omenous feature. For the time being, the situation was saved by continued gold exports. On treasure account, there was a balance in favour of India of Rs. 64.92 crores in 1932-33 as against Rs. 55.65 crores in 1931-32 ; in the earlier years the adverse balance on account of treasure was Rs. 24.47 crores in 1930-31 ; Rs. 39.80 crores being the average of the ten years ended 1929-30 and Rs. 28.54 crores being the average of the ten pre-war years ended 1913-14. In other words, where we should have a normal adverse balance of Rs. 30 crores, abnormal features were responsible for a favourable balance of Rs. 65 crores. The change caused in the international balance sheet by the peculiar developments in the gold situation is, therefore, of the order of Rs. 100 crores. But for the adventitious aid of this Rs. 100 crores, what would India's position have been in regard to her international balance sheet? Is it safe to bank on a continuance of this abnormal position? In the result the total visible balance of trade was Rs. 68.30 crores in 1932-33 against Rs. 90.48 crores in 1931-32 ; Rs. 37.62 crores 1930-31 ; Rs. 43.33 crores being the average of the ten years ended 1929-30 and Rs. 43.20 crores being the average of the ten pre-war years ended 1913-14.

THE WORLD ECONOMIC CONFERENCE

The second week of the Economic Conference has been aptly, though only implicitly, commented on by its Chairman, Mr. Ramsay MacDonald, as a "period of pessimism." It is a difficult matter whether, as the British Premier contends it is typical of most international conferences, it will be followed by a period in which the stock taking will reveal more heartening features. For in this the Chairman of the Conference cannot be counted among its detached observers; and one must make one's own judgment as to the prospects or threats ahead. The diary of events and summary of news relating to the Conference, which we provided last week and which will be continued to the close of the Conference, will, we are sure, provide material for each of our readers to make his own independent judgment. And here we shall attempt only to take stock of the situation and indicate the criteria that are applicable to the work of the Conference. It is a matter of common knowledge that, though the World Economic Conference is by far the more impressive gathering, the centre of importance lay in the Conference between the representatives of the Treasuries and Central Banks of France, Britain and the United States. To their credit it must be said that they exerted themselves towards an agreement in regard to the stabilisation of currencies. But before the end of the first week, it was authoritatively announced in America by Mr. Woodin, the Secretary of State, that the rumours regarding

stabilisation were unfounded. The motive, significance and effects of this announcement are dealt with at length both in our "Overseas News" and "Finance Abroad" columns. Here it is important to note that the first definite result of the conference of international statesmen, economists and financiers has been thrown over-board with little ceremony. And the only comfort that is left to a world watching the fortunes of the Conference intently is that the disappointment has not been allowed to wreck the Conference altogether. It is reported, though official confirmation is still lacking, that the French Government are prepared to continue their co-operation, if it is expressly understood that none of the agreements that may be arrived at at the Conference is to come into force till the question of stabilisation of the exchanges has been satisfactorily settled. Considering the American claim that the inflationary policy far outweighs in importance the success of the World Conference and Mr. Chamberlain's plea that the British quotas are only efforts at regulation of production and marketing, the French demand regarding stabilisation might well be conceded. Its importance and value lie in the fact that it has served to counteract the pessimism which set in with the news from America and the desire, which was noticeable among certain sections, to have the Conference adjourned. Thus we are still in the stage in which the very continuance of the deliberations has to be hailed as something of an achievement. Without letting this prejudice our vision of the future we may now proceed to catalogue and assess the work that has so far been done.

* * *

The first sub-committee to lay claim to definite progress was the silver sub-committee; and though this committee starts with the initial advantage of a definite understanding between the United States, Mexico and Canada, it is yet to prove itself equal to the task of reconciling the conflicts between the Chinese and American viewpoints, on the one hand, and the interests of the producers and the holders of stocks like the Government of India, on the other. In all probability, the lack of political influence for this country may render the latter question a much less serious obstacle than the former. But so long as China will find it difficult on her own, to change to a gold standard or the foreign countries are unwilling to help her in that regard, China will naturally insist that the Conference must attempt rather to stabilise the value of silver in terms of gold than to provide safeguards for a higher level of prices for the white metal. But America is interested only in a free, but strong, market for silver; and so far there has been no sign that this conflict of opinions and interests has made any progress towards satisfactory reconciliation. The Monetary Sub-committee has reached agreements only on such principles as have by now come to be accepted as maxims for a primer on monetary science. It is not much of an achievement that agreement was secured for the proposition that in the present stage of world economy and finance gold is not needed for internal circulation. Nor is the other resolution accepting 25 per cent. gold reserve, with provision that it should not be abused for an excessive issue of notes, calculated to help world finance in its present stage. For as we have repeatedly urged, the problem is not one of providing for a shortage of the metal but for setting in motion forces calculated to set right the present maldistribution. It is clear, therefore, that unless this resolution is supported by specific agreements in regard to the resumption of international lending and adjustment of grave disturbances in the balance of payments, the agreement in regard to a lower gold reserve would be of no practical help. When committees with comparatively simple tasks have failed to show any impressive results, it is not to be expected that the Sub-commission which is considering the question of co-ordination of production and marketing would have made much tangible progress. The principles enunciated by them are only the commonplaces of any discussion on restriction of production with which the numerous schemes that have been discussed during the last two or three years have made even the man-in-the-street only too familiar. It is necessary to refer also to the negotiations which were going on privately in London between the great wheat-producing countries. It is reported that the negotiations are nearing conclusion and that a substantial reduction in the acreage amounting to 15 per cent., proposed by America, is having the approval of Canada and Argentina, and that the approval of Australia is confidently awaited. If this repot is true then there should be reason for hope that one of the basic commodities will have the benefits of an international regulation of production. But it is unfortunate that not only is no attention paid to Russia but that there is reason for the Soviet Government to take umbrage at the manner in which the

proceedings in London have been conducted. Herr Hugenberg's reference to Soviet economy as "internal collapse" is at best inopportune ; considering the plight to which capitalist economy is now reduced.

INDIA AND THE CONFERENCE.

There will be widespread satisfaction in India that so far, the representatives of India at the World Economic Conference have stood by the interests of this country. In saying this we are aware that we have no more than the necessarily brief cables on which to base our judgment. It is reported that the memorandum of the Indian Delegation has been submitted; and the press and the public are entitled to ask why arrangements had not been made for the release of the full text in this country. It is bad enough that the Indian Delegation should be so unrepresentative of public opinion or the commercial community; and it is worse that Government should not have deemed it advisable to keep the public better informed of the doings of India's representatives. So far, the only two questions, in which India is more intimately interested, are the future of silver and the lowering of tariffs and trade barriers. On both these questions, our views are well-known; and in a recent issue we tried to clarify the viewpoints which the Indian Delegation should urge on the World Economic Conference. We are gratified to find that our views have commended themselves to the official members of the Delegation. Both Sir George Schuster and Sir George Rainy have laid proper emphasis on the need for keeping the protective tariffs of this country outside the scope of the Conference scheme for lowering trade barriers. And Sir George Rainy has referred pointedly to the need for allowing India a free hand for developing the cultivation of sugarcane and the manufacture of sugar. The present indications are that the demand for alteration in our present plans will come rather from the sub-commission for the co-ordination of prduction and marketing than from the Committee concerned with tariffs. It is gratifying that Sir George Rainy insisted that any scheme for the regulation of production must leave India free. For our part, we would go further and say that if the sub-commission interprets its task aright, it should insist on India developing her sugar resources to the utmost, so that the problems of the export industries will be simplified to that extent.

* * *

So far as the silver problem is concerned, Sir George Schuster appears to have done no more than promise India's co-operation in any scheme for the improvement and stabilisation of the price of silver. We have referred to the world problem of silver in another article in this section; and in the light of the conflict between the Chinese and the American viewpoints, it appears we are yet far off from any definite proposals in the silver committee. But we have no hesitation in warning Sir George against truckling to the producers' demand that all redundant monetary stocks should be kept indefinitely away from the market. India has already lost 20 million ounces without the feeblest attempt to strike a bargain; and yet her bargaining power in matters concerning silver is far from inconsiderable. We hope that India's "representatives" will stand by her to the last.

THE HEAD OF THE "BRAIN TRUST".

An Esteemed Correspondent writes :—

In the land of the Anti-Trust legislation, chronic law-breaking breaks out in a "Brain Trust". Brains do not lend themselves to commercial cornering. But in America the constitutional position of the President requires a circle of trusted advisers. He comes to power on the wings of a party; and though his stay at the White House during the term is assured, he has to satisfy a thousand and one rival claims. Supporters and opponents alike call for tactful handling. Problems, intricate and colossal, emerge from nowhere. Hence the importance of these advisers. Journalists and newsmen, more than the politicians, get at the power behind the throne; and so it is that Raymond Moley has been the most talked about man in America, since November last. The Economic Conference and America's part therein threaten to push him on to wider spheres. Just when the world was heaving a sigh of relief at the sight of an advocate of lower tariffs in White Hall, Moley breaks in with his gospel of self-sufficiency. Internationalist Hull is in hourly dread of being superseded at the headship

of the Delegation by the Professor. And the European delegation dread him even more.

* * *

Roosevelt and Moley have felt drawn together precisely because they signify two opposites. Woodrow Wilson set the fashion for the President gathering round him those who will form a complement to his own qualities. Wilson was a professor; and his advisers were politicians. Roosevelt being a practical politician, has gone all out for pedagogues; and the closest shrewdest and the most trusted of them is the present arch-priest of American isolationism. Though his impact on economics is the most sensational, Prof. Moley is not an economist. His special field is criminology. He has conducted more than one crime investigation, in Missouri, Illinois, Virginia and California, to mention only a few. He conducted the work, and won his spurs, too, with a singular freedom from puritanic zeal for virtue. He abhors social reformers as men devoid of a sense of humour, though he himself made a successful clean-up in more than one State. He was efficient as a Professor, but broke on ground in his conduct of the class room or his relations with his students.

* * *

The point is Raymond Moley is the nimblest brain amongst the President's advisers. Roosevelt's quick eye spotted Moley on the New York State Crime Commission; and since then both have been good friends; The President calls him "Ray"; and "Ray" calls the President "Governor". Mr. Roosevelt had a pretty clear idea of the tasks which faced him as President. The problems were perplexing enough; but there was Congress in the bargain with its undisciplined opinion, and volatile and mischievous opposition snapping at the head of the State at every turn. Moley's task is clear-cut. It is to find ways and means of overcoming or circumventing Congress opposition or Congress interference when it oversteps the limit of human tolerance. In other words, Raymond Moley is the Professor of Political Practice. If you find any ingenuity in the methods of evading the Congress, you may confidently put it down to Professor Moley. The authorship of the Inflation Amendment to the Farm Bill is his. This trick of allowing token payment to lead to a *fait accompli* in regard to war debts, I wager, is also his. Now that the Congress has adjourned, for a six months furlough, Moley must be busy making the most of his tactical gains at the expense of Congress. But his inrush into international economics still baffles me. May it be that because he drafted the Amendment he does not like to see the inflationary programme thrown overboard by an excess of internationalism?

SUGAR FACTORIES IN SOUTH INDIA.

As we have expressed our opinion more than once that the cry of over production of sugar is premature and that there is still room for more factories, little surprise will be felt at our welcoming a new venture in this field. There is no doubt a risk in concentrating too many factories in any single area but so far, most of the factories have been started in the provinces of Behar and United Provinces. There are still great potentialities in the Bombay and Madras Presidencies for the establishment of new sugar factories. From this point of view we welcome the announcement of the flotation of a new sugar factory at Hospet near Bellary in South India. The Company has been started with an Authorised Capital of Rs. 20 lakhs, out of which only Rs. 14 lakhs has been issued at present. Hospet is conveniently situated near such important markets as Hubli, Dharwar, Belgaum and Guntakal. There is great opportunity for the disposal of the sugar to be produced by the new concern in these places.

* * *

The conditions in South India are very favourable to new sugar companies as very few sugar factories exist there so far. The new company which has been floated under the name of the Hospet Sugar Mills Ltd., the prospectus of which is published elsewhere in this issue, starts under very heartening conditions. The Madras Presidency produces excellent cane; and the Coimbatore sugarcane variety is famous for its yield and is now being adopted throughout Northern India. Labour is cheap, plentiful and excellent. There is still room for many more factories in the presidencies of Bombay and Madras; and the few that have already been started have good prospects of success before them.

"RAILWAY ACCOUNTS AND FINANCE."

EAVESDROPPER WRITES:

Long ere this, I owed it to my friend, and former colleague, Mr. L. A. Natesan, to welcome and review his new publication, *Railway Accounts and Finance*. This is a quarterly issued under the auspices of the Institute of Railway Accountants and Auditors. To say this is to furnish the assurance that, for apt and authoritative articles, Mr. Natesan can fall back upon a host of officials of good judgment, great erudition and vast experience. I have no doubt that with an editor like Mr. Natesan, and contributors like the eminent members of the Indian Audit Service, *Railway Accounts and Finance* is assured of a bright and useful future. In the April number, Major Wagstaff writes on Railway Returns; Mr. K. V. Iyer on Depreciation Accounts; "Argus" on the "Human Factor in Railway Accounts." Apart from special articles by these competent writers, there are useful statistical tables bearing on Railways, and information pertaining to the Institute's activities.

TEST PAPER ON LAW AND ORDER

By G. L. M.

Some time ago, a circular was issued to schools all over Bengal asking the authorities to arrange for a weekly lecture on law and order. The object was to infuse loyalty into the minds of the school children so that before their vacant minds are filled up with seditious propaganda, they would be full of better stuff.

The idea is excellent. It is clear that the minds of the school children should not be poisoned with politics. It is alsa obvious what *politics* means in this country. To salute the Union Jack, to observe the Empire Day, to give three cheers to the local Collector is not *politics* at all. Because these are unrelated to a political movement. But to wave the National Flag, to observe the national days and to flock to revere national leaders is definitely to mix up education with *politics*. These are not a part of the established political system. Such things should be prohibited if the right kind of political notions are to be pumped into the receptive and unresisting minds of children.

I do not know how these precepts in law and order are proceeding and what is the progress, intensively, in the loyalty of the students towards authorities from Sir Samuel Hoare to the local Sepoy. But I submit that the time has come to examine the results of the experiment and to test the loyalty of the students, their dislike and hatred of political leaders and movements and ideas and their stock of unadulterated general information and knowledge gathered from unimpeachable sources (that is, sources which cannot be prosecuted under the Ordinance Laws). Here is a sample of such an examination paper which I present for the use of educational authorities without any fee or charge.

Below is the first instalment containing a few sections. The other sections will follow next week. Educational authorities must place orders for copies of the forthcoming issue from now.

Part I.—General Information (including Geography).

1. State the feminine genders of:—
   (*i*) The Viceroy.
   (*ii*) The Governor (*Be Tactful*).
   (*iii*) The Collector.
   (*iv*) The Magistrate.
   (*v*) The Man-in-the-Street. (*Be Careful*).
2. Draw a map of your Province showing:
   (*a*) the number of police thanas.
   (*b*) the places where the largest number of dacoities have occurred.
   (*c*) the places where punitive police are posted.
   (*d*) the places where punitive taxes have been imposed.
   (*e*) the places which are "declared areas."

Or

Sketch a plan of the United Provinces showing the tours of Sir Malcolm Hailey and marking with big red dots the places where he delivered the strongest speeches against the Congress.

(Don't attempt to answer both the questions at the same time.)

3. (*i*) Is Sir C. P. Ramaswamy Aiyer
   (*a*) An official?
   (*b*) A non-official?
   (*c*) An Indian State servant?
   or (*d*) A British India public man?
   (*ii*) What was he on
   (*a*) 30th September, 1932?
   (*b*) 1st April, 1933?
   (*iii*) What would he be and where would he be on the 21st October next? Can you guess? If so, what else can you *not* guess?

Part II—Economics.

1. Blame briefly the Congress for the following:—
   (*a*) Fall in General Prices.
   (*b*) Failure of Crops
   or
   Overproduction of Commodities.
   (*c*) Decrease in Railway Passenger Traffic.
   (*d*) Increase of Railway Accidents.
   (*e*) Increase of Abduction Cases.
   (*Use strong adjectives*).
2. Show that World Depression is so-called because it is due to all possible factors in the world except the Government of India's monetary, financial and fiscal policies.
3. Can the spinning wheel be described as a revolutionary instrument because it revolves? (*Argue in a circle*).
4. Define "Freedom of Trade" in the light of the Indian summer sun and prove clearly (to your own satisfaction at least) that the conception prohibits Swadeshi which is not "honest" as defined by the Secretary of State and the Bombay Government.
5. Can India's Currency system be described as one based on Bi-metallism because our Government are prepared to part with both her gold as well as her silver?
6. Sir George Schuster has assured the public that gold cannot be eaten. Can silver be eaten? If not, can paper be eaten except by children? Can you eat sterling securities?

(*Practical experiment should be made and result recorded.*)

7. Show by round figures and horizontal or vertical tables that financial stringency of the Bengal Government is due to
   (*a*) excessive expenditure on preservation of law and order owing to the contentment of the masses.
   (*b*) payment of extravagant allowances to the detenus.
   How would you cut them (*i.e.* the expenditure and the allowances, not the masses and the detenus)?
8. Refrain from commenting upon
   (*a*) Sterling loan sequel.
   (*b*) Silver deal to meet British war debts to America.
9. How distressed you would be if it was suggested that the gold exported from India was "distress" gold?

25 YEARS TEST

REVEALS THE BEST

Service: For over 25 years "The Indian Mercantile" has served the Indian Public with complete satisfaction.

"Dependable" is no exaggerated description of this indigenous concern which has at the time Assets exceeding three times its paid-up capital and has paid, with rare exceptions, handsome Dividends since its inception.

Life policies issued by this Company are scientific, up-to-date and designed to meet individual requirements at competitive rates of premium.

Agency Terms are unique and treatment sympethetic.

THE INDIAN MERCANTILE INSURANCE CO., LTD.,

11, Bank Street, Fort, Bombay.

WORLD ECONOMIC CONFERENCE

NEWS OF THE WEEK AND AIR-MAIL WEEK

(From Our Special Correspondent.)

(*By Cable*).

London, June 29.

Exchange chaos has proved even more intense and threatening than was anticipated. The steep fall of the dollar has alarmed countries still on the gold standard. While rumours on the one hand, are afloat, that one or other of the countries on gold are on the verge of abandoning the gold standard, they are promptly denied by the official representatives of the countries concerned. But nervousness still prevails, and the former idea of asking Mr. Ramsay MacDonald as Chairman of the Conference, to declare against any further abandonment of the gold standard has developed into a demand that Britain should assure the smaller gold standard countries of support for their currencies. The Bank of England fights shy of such commitments and normal support is all that is promised.

The situation at the moment of writing is charged with anxiety and apprehension, resentment and passion. The increase in the Amsterdam bank rate from 3½ to 4½ per cent. is the first omnious reversal of the lower trends of international money rates.

But the critical conditions have helped to strengthen the demand for stabilisation of currencies. The force of a united demand is brought to bear on Professor Moley who in spite of, or, equally, because of, his belief in the genuineness of the boom at home, may relent from his unhelpful attitude towards the Conference. The work of the committees and sub-committees, though by no means very encouraging by itself, is still sufficiently definite to form the basis of further progress, if the blighting influence of exchange chaos is removed. It seems almost certain that, if the threat to the currencies continues, the demand for adjournment of the Conference will prove irresistible.

DAY TO DAY DIARY OF EVENTS

June 23:

A statement has been issued by the United States Delegation to the Conference (following, it is understood, secret instructions from Washington) pointing out that measures for temporary stabilisation are at present untimely, because they are likely to cause violent price recession and thus frustrate the predominant American desire to raise prices.

The attitude of America towards this question has given rise to a feeling in London that America is using stabilisation as a bargaining weapon. The delegates are irritated at the protracted discussions and failure to reach an agreement, and there are even suggestions for an adjournment of the Conference. British delegates, however, hope that before long an agreement with America will be possible.

The sub-committees (including that dealing with technical problems), reached a general agreement yesterday that under modern conditions monetary gold is not required for internal circulation.

June 24:

The Soviet Government has presented a note of protest against certain passages in the Hugenburg memorandum submitted to the Economic Committee of the World Economic Conference. The memorandum is said to contain a direct appeal for "joint effort to end revolution and inner collapse, which found a starting point in Russia." Russia protests against what she describes as an "appeal for war against the Soviet." The note adds that "such hostile declarations are contradictory to the obligations assumed by the German agreement under the pact of friendship and neutrality, concluded in Berlin in 1926."

There has been a lull in the proceedings of the Conference at the week-end. A detailed examination of the work before the delegates is expected to be taken up on Monday. The present attitude of the French Government at the Conference is reported to be that they will take part in the discussions in the Economic sphere, provided that no agreement will be effective until after stabilisation of currencies.

June 26:

Good progress is reported in the discussions on the future position of silver. It is understood that agreement on the lines of Senator Pittman's resolution is likely. Sir George Schuster offered India's co-operation in the efforts to solve the problem.

The Indian Delegation in a memorandum emphasises the desirability of reducing tariffs, but points out that there must be reservation with regard to Indian protective duties.

June 27:

The Monetary Technical sub-committee adopted a resolution in favour of excluding gold currency and gold certificates from internal circulation, and also advocated uniform gold cover for central banks not exceeding 25 per cent. But such elasticity is not to be abused to unduly increase the volume of notes and credits. The resolution will be submitted to the second sub-committee.

A hastily convened secret meeting of the central banks of those European countries still on the gold standard has unanimously affirmed that Holland, Switzerland, France and Germany shall remain on the gold standard, and the French representative shall urge Mr. MacDonald (as Chairman of the Conference) to express himself against a further departure from gold.

Mr. Neville Chamberlain, in his speech before the World Economic Conference, said that "while general re-organisation of the existing debts was not necessary, direct negotiations might be advisable in individual cases, between debtors and creditors. Senator couzens (America) following Mr. Neville Chamberlain made an important pronouncement on war debts. While admitting the need for improving prices, Mr. Couzens said that the burden of debts must be simultaneously lightened. This was not however an invitation to default.

June 28:

The stand made by Australia against any regulation of wheat production is reported to be proving an embarrassing problem for the Conference.

India is expected to oppose with equal strength any scheme of restriction in sugar growing. Sir George Rainy, in his speech on the 27th indicated this, saying that it was scarcely possible, after having decided to protect the industry in India for a certain period, to go back on the decision.

World Economic Conference:

POINTS FROM DELEGATES, SPEECHES

France (M. Daladier):

The crisis was due to "Pyramids of inflation built up without regard to the realities of the position." First in order of remedies should come the stabilisation of currencies. Then comes the restoration of freedom in the movements of gold. Agreements between producers with the object of adjusting production to consumption must be organised and supervised and extended to agricultural products. There should be a 40 hour working week by international agreement; and an international programme of public works to "mobilise hoarded capital" should be arranged.

Italy (Signor Jung).

The question of war debts should be disposed of before other subjects are taken up. "Monetary manœuvres" will not cure the situation, but may make it worse. It is not logical to "deplore an excess of productive equipment and at the same time promote an expansion of that equipment by forced injections of credit." It is impossible to increase the sound stimulus of credit merely by acting on its supply. The restoration of conditions in which international investment would be possible is essential.

South Africa (General Smuts).

The problem is to raise world prices. The Lansanne Agreement placed the gravest responsibility where it belonged,—on the shoulders of the United States. But the United States was slow to fall into line. The techinical, financial and the political aspects of the problem must be separated from the political aspects. On the technical question, a great measure of agreement already exists among the experts. Committees of experts should, therefore, be appointed to report on these questions.

Japan (Viscount Isshi).

Haste in the restoration of the Gold Standard would be dangerous. Japan is ready to consider appropriate temporary measures to stabilise Exchanges. An International cheap money policy is devisable and Japan will consider proposals for solution of the silver problem. There should be un-restricted application of the most-favoured-nation clause.

I. L. O. Resolution (Sir Atul Chatterjee).

The attention of the Conference is to be directed to the following objectives:

(*i*) The restoration of stable monetary conditions.

(*ii*) International co-operation to prevent fluctuations in the price level.

(*iii*) The elimination of restrictions on Trade.

(*iv*) An increase in purchasing power.

(*v*) The mobilisation of idle capital by public works and by collaboration between creditor and debtor countries.

Germany (Baron Von Neurath):

Problems connected with commercial policy cannot be solved until a satisfactory agreement is reached on credit and financial principles. A gold currency is meaningless if the free circulation of gold is not restored. Above all, the "great political questions which are still awaiting solution" must be settled.

Poland (M. Koc).

The stabilisation of the currencies of the Great Powers should come first. Th Conference should establish a framework for bilateral agreements to remove trade restrictions.

Austria (Dr. Dollfuss).

The methods of central banking co-operation which had assisted Austria should be extended. Officially recognised bodies representing the international loan holders should be established where possible. Wheat-importing countries can lower tariffs only if wheat-exporting countries regulate production.

Belgium (M. Hymans).

Free flow of capital and goods should be restored. A free Gold Standard should be established. In order to secure greater commercial freedom, a derogation from the most favoured nation clause would be logical and legitimate.

U. S. A. (Mr. Cordell Hull):

The policy of isolation is futile and foolish. Trade restrictions should be abandoned. The first step should be immediate agreement by all countries to the proposed Tariff Truce. A provisional monetary policy should be found to ensure stability during the period while the groundwork is laid for enduring reform. All countries should "stimulate the natural sources of employment, restart the wheels of industry and commerce, and so build up consumer power that the rise in price will, of necessity, follow". Then the question of permanent international standard must be faced, and "the proper functions of the metals, gold and silver," laid down.

Portugal (M. de Matta):

Portugal is unable to accept the bimetallic system, apart from silver as a subsidiary courage, for which Portugal has already enough silver. The working of an international credit institution on reserves provided by Central Banks would fail owing to practical difficulties. The conference should agree to standardise customs nomenclature, and should agree to bilateral or multilateral trade agreements on the lines of the British proposals.

China (Dr. T. V. Soong):

More important than a rise in price of silver is stability in its value. China rejects regional or national isolation. She derives to maintain a fiscal policy which will not prevent the entry of foreign goods, for she has not used her newly-acquired tariff autonomy to build up a tariff wall.

THE CHAPARMUKH-SILGHAT RAILWAY CO., LTD.

NOTICE

is hereby given that the Thirty-Fourth Ordinary General Meeting of the above-named Company will be held at the Registered Office, No. 12, Mission Row, Calcutta, on Friday, the 14th July, 1933, at 10-35 a.m. for the purpose of receiving and considering the Directors' Report, the Statement of Accounts and Balance Sheet for the half-year ended 31st March, 1933, and to transact any other ordinary business of the Company.

The Share Transfer Books of the Company will be closed from the 5th to the 14th July, 1933, both days inclusive.

By Order of the Board,
MARTIN & CO.,
Managing Agents.

Calcutta, the 28th June, 1933.

V. K. ARAVAMUDHA AYYANGAR

CORRECTIVE TO AMATEURISM ; AID TO PROGRESSIVISM

Mr. V. K. Aravamudha Ayyangar, C.I.E., is, as an officer of the Finance Department, a round peg in a round hole. He has a special flair for routine finance as well as for "high finance." At the same time, he has the kind of intelligence, equipment and nimbleness which guarantees success for any other specialised branch of work he may undertake.

His versatility is not less remarkable than his acuteness ; nor is his capacity for taking infinite pains less noteworthy than his keenness and alroundness. In other words, whatever the task that is set to him, he can be relied on to give hundred per cent satisfaction.

In all my experience, I have never come across one to whom the phrase "keen as knife edge" could be so aptly applied. He is all impatience ; he sees all aspects of a question all at once ; he is energy personified ; he ever sets himself the highest standard and is restless till that standard is attained.

If glorious discontent is the spur to ambition ; and if restlessness is the fountain of all activity, Aravamudhu has both discontent and restlessness in a supreme measure.

He is, at once, a loyal and surpassingly helpful lieutenant, and an efficient and tactful officer whose staff love to work under him. He was the "right hand" of Sir Basil Blackett whose affection and regard were expressed in the very way of his pronouncing the name "Aravamudhu" in sending for him. And, to a man, sectional superintendants and clerks and *chaprassis*—the entire staff, high and low—were proud and hapy to work under one who could inspire in all the feeling that they *together* made up the team marked out for splendid achievement.

Another notable trait. Too long a stay in the Secretariat is calculated to make one routine, prosaic, settled in a groove, altogether incapable of enterprise, and sceptical of originality. Aravamudhu has not been blunted and (excuse the mixed metaphor) fossilised by the Secretariat. His eagerness to know more and more of whatever has to be known has saved him from the smug self-complacency which one sees on all hands in Olympus. His insatiable ambition for achievement that will bear the impress of his personality has kept alive the spirit of adventure, the capacity for original thinking, daring plan and execution which shows initiative.

He has assimilated all that is best in the Secretariat training. His thorough efficiency is a product of eight years' contact with Simla-Delhi. But he has not succumbed to the monotony and featurelessness of life and outlook which prolonged stay in those centres induces. His efficiency is not a wooden, mechanical affair ; it is elastic, dynamic and vivid efficiency.

In the India of tomorrow, it is officers of this training and calibre who will be the mainstay and strength of the administration. Our future ministers will find in the Aravamudhus a body of permanent officials who are a timely and effective corrective to amateurism and who, at the same time, will aid and effect intelligently and enthusiastically, all plans inspired by progressive and constructive nationalism.

Professor Harold Laski is never weary of emphasising that Britain owes not a little to the integrity and trustworthiness of the permanent Civil Service ; and from this point of view, he has paid the most eloquent tribute to veterans like Sir John Anderson. The Sir John Andersons of the New Administration in India are the Aravamudhus and Sundarams, the Raos and Bajpais, the Shamlals and Shahs, the Misras and Sundaresans.

There is cause for profound satisfaction that a fairly good supply is available of such Indians, trained in the best and worthiest traditions, self-respecting, incorruptible, devoted to duty, honourable by every standard, thoroughly Indian in outlook, and jealous of the country's interests.

And we cannot have too many of them. India has been so long in subjection and our public men have been so long compelled to be in the *role* of irresponsible critics, that when popular ministers take charge of affairs not in a make-believe fashion but with a real measure of responsibility, there is bound to be an interregnum of conflicting ideals, opposing policies, clumsy amateurishness, and lack of balance. All hope that the interregnum will be safely tided over is to be derived from the assuring thought that the Indian Ministers will find themselves provided, from the start, with a trusty Indian *personnel* in the permanent service.

I have known Aravamudhu in all aspects of work—as the all-in-all in the Finance Department in Sir Basil's *regime* ; as rotting, in neglect, in the Commerce Department ; as the live secretary of the Central Banking Enquiry Committee ; and as a Budget Officer who had to get ready a complete Emergency Budget in less than a fortnight. In all phases, in all manner of work, he has always proved that what Aravamudhu could do, Aravamudhu alone could do.

I might, perhaps, modify the last statement by adding that what counts in his case is not so much the *what* as the *how* of the work. Aravamudhu has a style of performance and execution, all his own.

I need cite only one instance. As Secretary of the Banking Enquiry Committee, he was guiding the work of over a dozen subsidiary enquiries of a provincial character. He had then to tackle the voluminous evidence gathered by the central committee. He had to deal, in fact, with a crowd rather than a committee The masterly and thorough way, in which the results of the provincial and main enquiries are analysed, marshalled and recorded in book form, is a conclusive tribute to his capacity for detailed work and to his organising ability—to the happy blend of the skill for analysis and the genius for synthesis. The report of over five hundred pages was actually dictated by him in less than a fortnight ; and, during the very fortnight, he was quite full up with other routine matters.

Alike for quantity and quality and versatility of work, there is none like Aravamudhu.

"EAVESDROPPER".

A copy of this Prospectus has been filed with the Registrar of Joint Stock Companies.

Application will be made in due course to the Committee of the Bombay and Calcutta Stock Exchange for permission to deal in and for a quotation for the shares.

THE HOSPET SUGAR MILLS, LIMITED.

(Incorporated under the Indian Companies Act, 1913-1920).

AUTHORISED CAPITAL - - Rs. 20,00,000

Divided into 100,000 Ordinary Shares of Rs. 10 each and 10,000 Cumulative Preference Shares of Rs. 100 each.

PRESENT ISSUE:

ISSUED CAPITAL - - - Rs. 14,00,000

Divided into 70,000 Ordinary Shares of Rs. 10, each and 7,000 Cumulative Preference Shares of Rs. 100 each.

The said Preserence shares shall confer on the holders the right to a fixed cumulative preferential dividend at the rate of 8 per cent. per annum on the capital for the time being paid up on the said shares. The Preference shares rank both as regards dividend and capital in priority to the Ordinary shares but without any further right to participate in the profits or assets.

The right of voting at General Meeting is one vote for every share.

Payable as follows:—

Ordinary Shares:—Rs. 2-8 per share on application, Rs. 2-8 per share on allotment and the balance by 2 calls of **Rs. 2-8** per share payable at intervals of not less than three months between each call.

Preference Shares:—**Rs. 25** per share on application, **Rs. 25** per share on allotment, and the balance by 2 calls of **Rs. 25** each payable at intervals of not less than three months between each call.

The Eastern Underwriters Syndicate has Underwritten Shares of Rs. 7,50,000.

MANAGING AGENTS:

Messrs. JOHNSON & CO., Bellary Cantonment.

REGISTERED OFFICE: THE CANTONMENTS, BELLARY CANTT.

PROSPECTUS

Objects of the Company.—The Company has been formed to carry out the objects set out in the Memorandum of Association, and particularly for the purpose of establishing and carrying on the business of Manufacturers of Sugar from cane and all its by-products consequent on such manufacture.

It is intended to erect and equip a Sugar Factory of the latest design. The Plans and Specification have been drawn up by Messrs. Mirrless Watson Co., Limited, of Glasgow, Scotland, Engineers, Founders and Specialists in Sugar Machinery, whose experience in designing and manufacturing machinery extends over a period of fifty years. It is anticipated that the Factory will be erected and ready to work by December, 1934.

The Factory will be situated at Hospet, adjoining the Station of that name on the M. and S. M. Railway, with a crushing capacity of 400 to 450 tons of cane per day and capable of being readily extended later to a capacity of 600—700 tons per day. The Company is in a position to purchase very suitable land for a factory and it is proposed to acquire about 20 acres.

Cane Prospects.—On the basis of a daily crush of 400 to 450 tons approximately 1,500,000 Maunds of cane would be required during the season, and from 2,000,000 to 2,500,000 Maunds of cane on the basis of 600—700 tons per day. It is estimated that there should be no difficulty in securing these quantities within a reasonable distance of the proposed Factory.

From enquiries which the Directors have made, they believe that the growth of the existing cane on the lands in the locality and in the neighbouring districts, fertilised as they are by the silt of Tungabadra Canals, has been remarkably strong and that the rapid extension of the area under cane has only been held back by the lack of Factory facilities to deal with the crop. The area which would be required to supply the proposed Factory with cane per season would, the Directors understand, be a very small percentage of total suitable land. The whole of the sugar cane area is under Tungabadra Canals which afford excellent facilities for the sugar cane crop. Irrigation is of the highest importance not only for the promotion of growth but as an insurance in the case of drought. The cane grown belongs to the Pundia variety, one of the best canes in India and has about 14 per cent. sucrose content without any disease whatsoever.

Estimated Cost.—The estimated cost of the Factory with its equipment will be Rs. 8,50,000 delivered at site and erected. To this falls to be added a further sum of approximately Rs. 2,50,000 for lands, buildings, necessary warehouses, staff-quarters, railway sidings and other items, leaving a balance of Rs. 3,00,000 available for working expenses.

Estimated Profit.—One of the main factors affecting any Sugar Company's cost of production is the price of cane delivered at the Factory. As already indicated, the Company's Factory will be well situated and, in consequence, transport charges should be reduced to a minimum. It may be added that this is the first Factory being started in the district.

It is estimated that the Company's Factory will produce a minimum of 135,000 Maunds of Sugar per annum together with the resulting production of molasses. The plant will be kept working even in the off season as plenty of jaggery is available, and white Sugar will be manufactured by refining jaggery.

Taking the above factors into consideration and assuming that the market price of Sugar remains about the present level, it is estimated that on a production of 135,000 Maunds of Sugar and including the proceeds from the sale of molasses, a profit may be expected after allowing for depreciation and all charges, of approximately Rs. 2,80,000, which represents nearly 20 per cent. on the capital now offered for subscription.

Market.—Hospet is conveniently situated with Bellary, Gadag, Bijapur, Hubli, Dharwar, Belgaum, Guntakal, Adoni, Kurnool, Anantapur, Gooty, etc., and other important centres where there are very good markets for sugar. The whole of the Company's manufactured Sugar will be consumed in those districts. Arrangements can readily be made for the disposal of molasses as there are Distilleries in the district and surrounding districts.

Owing to the Import Duty on foreign Sugar imposed in March, 1932, exporting countries such as Java, etc., are curtailing their production and rapidly exhausting their surplus stocks. It may thus be reasonably expected that an appreciable rise in prices of Indian produced Sugar may occur, thereby increasing the profits of the Company.

The introduction of the Chadbourn system in most of the Sugar-producing countries has resulted in closing down of a number of factories in Java. The world stocks of Sugar are rapidly declining. The inevitable result will be a steady appreciation in the world Sugar prices. All these circumstances are conducive to the growth of the Sugar Industry in India.

Protective Duty on Sugar.—The outlook for Indian Sugar generally has been considerably strengthened by the passing of the Sugar Industry (Protection) Act 1932, Act No. XIII of 1932, by the Government of India protecting the Industry until the 31st March, 1946. In respect to this period the basic duty on Sugar has been fixed at Rs. 7-4 per cwt. until 31st March, 1938, and for the remaining 8 years will be determined in due course following a statutory enquiry. At present the duty on Sugar is actually Rs. 9-1-0 per cwt., *i.e.*, the basic rate of Rs. 7-4-0 per cwt., plus a surcharge of 25 per cent. In addition the Act authorises the Governor-General in Council to increase the basic duty at any time, after enquiry, to such an extent as would provide against the risk of Sugar being imported into India at such a price as is likely to render insufficient the benefits intended to be conferred by the Act.

Taking 1930 as a normal year, India imported about 1,000,000 tons of Sugar whereas at present, she produces about 200,000 tons of Sugar. It will thus be seen that there is still a great field for expansion of the Sugar Industry in India. Even with an addition of a further 150 Sugar Mills to the present number, India will remain able to hold her own in Sugar and in the circumstances, no inter-competition need be feared.

The Sugar Technologist to the Government of India, Imperial Council for Agricultural Research, Mr. R. C. Srivastava, B.Sc., says as follows:—"Whilst the high Rule of Import Duty is undoubtedly the most potent single factor contributing to the expansion of the Industry, the present period unlike the period of post-war boom possesses a number of additional advantages which give hopes that the expansion that is now taking place will be on a sound and lasting basis. Amongst these special advantages the mention may be made of the low price of land, and material due to all-round acute economic depression, to the low price of machinery due to restriction of Sugar production in practically all the countries of the world excepting India, and the low price of cane, coupled with a large area cultivated in Sugarcane is under the present agrarian conditions, the only paying crop. It is only on rare occasions that such a combination of favourable circumstances takes place, and it is to be sincerely hoped that full advantage will be taken of the present opportunity."

Further, looking to the very low rate of interest prevailing in the world at the present time, the return of the investments in the Sugar Industry of India is extremely promising as after the passing of the Sugar Protection Bill of 1932, all Sugar Companies in India have been declaring handsome dividends and the Share values of all the Companies have since been greatly appreciated. To substantiate this we have only to review the different state of some of the existing concerns since 1931.

Name of Factory.	Capital paid up Ordinary.	Reserve Fund.	Paid up per share.	Market Price	Last Div.
	Rs.	Rs.	Rs.	Rs. A.	
Cawnpore Sugar	15,00,000	82,00,781	10 Ordy.	38 8	10
			100 Pref.	132 0	8

Punjab	9,63,000	11,26,591	50	150 0	20

The Director of Industries, Madras Presidency, Madras, says:—"Consequent on the high degree of Protection afforded to the Sugar Industry in India, a great deal of public interest is now being concentrated on the setting up of factories for manufacture of Sugar. The future of the Sugar manufacturing Industry in India seems to be assured for some time to come, for not only has the industry received a decided impetus from the Protection of White Sugar by Tariff Rate but there is an increasing demand for Sugar as against 'Gur' while owing to the adoption of improved types, increased quantities of sugarcane are becoming available."

The Madras Presidency is one of the most suitable parts of India for Sugar Cane and a campaign has already been launched by the Agricultural Department with a view to the further expansion of the area under this crop. The Sugar requirements of this Presidency can, it is estimated, be met by bringing in an additional extent of 35,000 acres under Sugar Cane cultivation. New factories are springing up in Northern India, and it is not desirable that Madras Presidency should lag behind in the development of the Industry that is now actively in progress. There seems no reason, in fact, why the Madras Presidency should not be made self-supporting in the matter of its supplies of Sugar within a reasonable period.

Minimum Subscription.—The minimum subscription upon which the Directors will proceed to allotment is five per cent. of the shares now offered for subscription.

Contracts.—The following Agreements have been or will be entered into by or on behalf of the Company:—

(1) An Agreement between Messrs. Johnson & Co., and the Company for the appointment of the former as Managing Agents of the Company on an allowance of Rs. 1,000 per month, and ten per cent. of the profits of the Company.

(2) An Underwriting Agreement between the Eastern Underwriters Syndicate and the Company whereby the former have underwritten shares of Rs. 7,50,000 on an underwriting commission of five per cent. and usual brokerage as provided in the said Agreement.

(3) An Agreement between Ramaswamy and Company and the Company whereby the former have agreed to supply 1,500,000 Maunds of Sugar Cane at current market rate.

The preliminary expenses as estimated will not exceed in the aggregate Rs. 15,000 including registration, Solicitors' fees, printing and advertisement charges, survey, etc., but exclusive of brokerage.

Brokerage not exceeding two and a half per cent. will be paid to bona fide brokers, bankers, etc., at the discretion of the Directors.

Interest of Directors.—R. Narsingarao Garu is interested as a partner of Messrs. Johnson and Company.

Directors and Qualification.—The Articles provide for the payment of Rs. 50 as Directors' fees for every meeting attended by them, and the payment of travelling and other expenses of attending a meeting (including hotel charges, etc.), and any other expenses properly incurred in connection with the business of the Company to any Director who may be called upon to perform extra services.

The qualification of a Director will be the holding of shares of the value of Rs. 5,000.

Application for Shares.—Application for shares should be made on the form below and forwarded together with the amount payable on application to the Company.

Where no allotment is made, the deposit will be returned in full and where the number of shares allotted is less than the number applied for, the balance of the deposit will be applied towards the amount payable on allotment.

The Agreements referred to above can be inspected at the Registered Office of the Company during business hours.

Prospectuses and forms of applications for shares can be obtained at the Registered Office of the Company.

(1) V. SUBBIAH.
(2) V. DHARMALINGAM PILLAI.
(3) R. NARSINGARAO GARU.
(4) CHARLES JAMES COURT.
(5) C. McGOVAN.

Dated this 3rd day of May, 1933.

A crooked figure may attest in little place a million ; and a comma in the wrong place may make a million a crore. In dealing with big figures, it were, therefore, wise to be alert about the placing of the comma and to count the ciphers carefully. Else big figures will make you cut a sorry figure. This is what happened to the sub-editor in the *Times of India* and the editor of the *Hindusthan Times*. A telegram from Ceylon, describing the assets of Lord Inchcape in that island, stated that they were worth Rs. 40,000,000. The artist, who devises headlines in our Bombay contemporary's office, credited the noble Lord with a fortune of Rs. 40 crores. If he had counted the ciphers, he would have had no difficulty in knowing the truth which is Rs. 4 crores. He was misled by the misplaced comma. But, then, he might have remembered that, in Ceylon, rupees are in vogue ; but the totals are made up not in terms of lakhs and crores as in India, but in terms of millions as in Britain and elsewhere. A Ceylonese would be correct in stating that Lord Inchcape left estate of the value of Rs. 40 million in Ceylon ; an Indian would have to say that the estate was valued at Rs. 4 crores.

* * *

The purveyor of the ever-delicious "Cup of Tea" in the *Hindusthan Times* was carried away by the head line. And, imagining the successor to the title to be the owner of so vast a fortune, he has suggested that it should suffice for his purchasing the island. This done, the present Lord Inchcape should, "by virtue of his marriage, knit it into a federation with Sarawak ; and then reign in happiness, free from income tax and death duties". Quite a pleasant prospect if that were possible. But, then, you cannot own Ceylon for a paltry sum of Rs. 40 crores.

* * *

Amongst those who made fortunes of stupendous size in India, Sir David Yule comes easy first. My own idea is that no one else has so far made a heap even quarter as big as Sir David. At the time of his death, assets belonging to him and his family should have amounted, in my opinion, to anything like Rs. 50 crores. Of these, a substantial portion was invested in India. Even during his life-time, Lady Yule should have possessed considerable property in her own name. The Yule fortune was, far and away, the biggest shaking of the Indian pagoda tree. Good old N. R. Iyer was the watchdog of these crores. Ramjee, as in duty bound, succeeded to a task he deemed sacred ; and he was barely twenty when he took on so onerous a responsibility. No one has commanded, in the Indian money market, more resources than young Ramjee ; and he has guarded each rupee of the property entrusted to his care, with a fidelity canine in staunchness and fervour. But Ramjee's health has been causing concern ; and, over long periods, he has to be absent from Calcutta. It is, I think, for this reason that something like a repatriation of the Yule funds to Britain seems afoot.

* * *

The estate was mainly in the form of investments in various trust companies headed by the Calcutta Discount Company. A good many of the subsidiary companies were taken into voluntary liquidation in the course of this month. I wonder whether this means that any large parcel of stocks, shares and bonds will be thrown on the market. The companies owned big blocks of shares in the various concerns of Andrew Yule & Company, government securities, and debentures of the more important local bodies. Well, there need be no misgivings that any forced sales will be made, as the liquidation is in the capable hands of Mr. F. G. Roberts of Messrs. Spicer, Pegler and Company. I must add that while the Yule estate continued to own considerable shares in the concerns under the managing agency of Andrew Yule, the shares of Andrew Yule and Company, Limited, are held, more or less entirely, by Pierpont Morgans. Sir David sold out his holdings in the managing agency firm nearly fifteen years ago but retained most part of his investments in the shares of concerns belonging to the group. Does the liquidation of the investment companies mean further attenuation of the Yule link with India?

* * *

By the retirement of Mr. J. Sime, another Yule link with India has snapped. The late Mr. N. R. Iyer and Mr. Sime grew into the exact pattern and type which Sir David's taste and judgment approved. They were just what their "boss" would like them to be—neither more nor less. They just knew their business and did not know aught else. What they knew, they knew in all thoroughness. What Mr. Iyer did not know about book-keeping and accounts was not worth knowing. And what Mr. Sime did not know of jute, jute industry and jute mill management was, by the same token, not worth knowing. Iyer organised Andrew Yules' accounts in such fashion that, for decades, they have maintained the reputation of being the only managing agency firm in India, the accounts of whose concerns are closed on the very last day of the financial year. A wholesome rule observed in this office has been that if a concern closes its books on June 30, the officer-in-charge could not leave the office on June 30 unless he has signed the final accounts. The Directors have the balance-sheet in their hands on July 1. Their approval is secured within a couple of days. The documents go to the press for printing within the first week. The shareholders get them in the second week. The meeting is held in the third ; and the dividends paid out in the fourth. The entire credit for the organisation of accounts in a manner which allows of such noteworthy expedition belongs to Mr. Iyer. Likewise, the buying, selling and manu-

facturing organisation of the jute mills has been so well-planned by Mr. Sime that Andrew Yules' mills have always enjoyed the highest reputation with the investing public for integrity and clean management.

* * *

Neither Iyer nor Sime had any political ambitions nor any use for Society (with a capital S). In this, they followed the example of Sir David, who, multi-multi-millionaire that he was, was content with the modest flat on the top floor of his office. Sir David never knew what "swanking" was. Except during the period when he was nursing the Alliance Bank while the latter was suffering from galloping consumption, he did not bother about the doings and goings-on in Government House. Sime told me, if I remember right, that the first social party he attended in his life was the one I gave Sir George Schuster and Lady Schuster early this year. He came in unnoticed, occupied a remote table and left as unnoticed. He hated limelight. Iyer was even more eccentric in such matters. Nearly ten years ago, the Indian business community of Calcutta entertained Mr. S. N. Pochkhanawala at a Garden Party. They were most anxious that Mr. Iyer should attend the function; and pressed me to request him. I met Mr. Iyer; at the very outset, he wished to be excused, saying that he had never attended any party in all his forty years in Calcutta. On my pressing him most earnestly, he gave his consent but insisted that I must go over to his bungalow on the appointed day and escort him to the Garden. I kept my appointment; but Mr. Iyer's courage failed him at the last moment. He pleaded with me, almost piteously, that I should let him off from the engagement. And the party to Mr. Pochkhanawala had to go on without Mr. Iyer's presence.

* * *

Of a retiring disposition, Iyer and Sime were, however, capable of real warmth and intimacy with those admitted to their friendship. They were child-like in their simplicity. They had all the spontaneity and impulsiveness of children. The two Biggest Businessmen were yet two Big Babies. Wordsworth has defined the hero as one who carries into his advancing years the faith and fervour of childhood. Sime and Iyer fulfilled the ideal of Wordsworth as few of their age in these days of hustle and noise could fulfil. Sime's leaving India was characteristic of the man. He attended the office as usual; no one had any idea that it was the last day of his attending office; he quietly left for the station in the afternoon, without taking formal leave of anyone. "I have not the heart to say Good-bye to my men"—he said in a note he left behind.

* * *

To revert to my first theme. In regard to financial topics, not only alertness in the matter of figures but accuracy in the matter of facts is essential. A journal of practical finance and trade was discussing, the other day, the problems before the World Economic Conference; and in its description of the prominent facts in the post-war history of the world, the following statement was made:

> "With the possible exception of England, India and America, no one of the major countries reverted to the gold standard at the pre-war gold parity".

* * *

America did not have to revert to gold standard as she was, all through, on gold basis. India did not revert to pre-war parity. The new ratio immediately after the war was twentyfour pence, and the ratio adopted in 1927 was eighteen pence, as against sixteen pence in force in the pre-war era. Financial journalism is a hard task master. We, who look after this little show, feel as though we have a weekly examination every Saturday, against which we have to keep burning the proverbial "mid-night oil" each day of the week.

A Correspondent writes:

May I suggest that Eavesdropper has been unduly bitter in his comments on Sir C. P. Ramaswami Iyer's selection for the World Economic Conference?

I readily admit that the stars of Sir C. P. have been specially propitious in the Willingdon *regime*. But, on the strength of intrinsic ability and versatility, does not the Madras Knight deserve all the luck he has had and is having?

You may just refer to what the late Mr. Montagu has to say of your countryman in his Diary. Mr. Montagu says, Sir C. P. is very, very, very clever. What an emphasis from one so knowing!

If Lord Willingdon has showered his favours on Sir C. P., he is, to be sure, in good company.

While dissociating myself as regards your views on Sir C. P., I am, however, in agreement with you in your condemnation of the under-representation of the Indian element in the delegation.

To have planned a Consultative Committee were mere redundancy. To have offered seats, on such a superfluous and meaningless committee, to men of the calibre of Sir Purshottamdas Thakurdas and Mr. A. Rangaswami Iyengar was to add insult to injury!

These gentlemen, who did not see any insult or injury to their country by accepting the invitation to be "assessors" with the First Parliamentary Committee, have certainly done well in declining to serve on the subsidiary and secondary committee of W. E. C. delegation.

My case was that Sir C. P. Ramaswami Iyer, however competent to represent the Natives States or the Government, has ceased, long ago, to be in touch with non-official opinion. Lord Willingdon may have full confidence in him; but the Indian public have none.

JAPAN AND INDIA

By M SENDA

The present crisis in Indo-Japanese trade relations is rather unfortunate, in as much as it was possible to have avoided it, with a little more understanding of each other's points of view.

In Japan, for some time past, the impression has been gaining ground, that Indian businessmen as well as the Indian Government were bent upon closing the door, on Japan's trade with India. For this view there were sufficient reasons. It has been pointed out in Japan, that during the last few years, duties on imported cotton goods mainly aimed against Japan, have been raised steadily. In 1930 for instance, it used to be said that Japanese labour was more efficient and therefore the Indian mills had to be protected. In 1931, it was the financial distress of the Government that necessitated the imposition of a surcharge. In 1932, it was the depreciation of the yen that was affecting the position of mills and duties on cotton goods from foreign countries were raised at one jump from 31½ per cent. to 40 per cent. The last straw on the camel's back has been the abrogation of the Indo-Japanese Trade Convention this year, followed by the raising of cotton duties to the record level of 75 per cent.

The Indian point of view on the other hand, has been, that India has a perfect right to develop her own industries in any way she chooses. The Indian argument in effect states, that no matter how inefficiently Indian mills are being run, because they are Indian, their products must have the maximum of advantages in the home market. The talk of "infant industries" in reference to the cotton textile industry in India, is puerile, for this industry at least, has a history which goes back to half a century ago. The Bombay mill owners demand, not the protection of an infant industry but rather the prevention from premature decay of an adult industry. It has been pointed out by them, that during the last few years their mills have been losing heavily, inspite of the fact that they have been supplying 80% of the home market. It has been shown that though Japan's share in the Indian market has increased during the last three years, the increase on the whole is insignificant. It has been found that this small increase in Japan's share happens to have coincided with the depreciation of the Yen. The conclusion has therefore been arrived at, that in as much as the Indian mills are suffering from the severe competition of imported Japanese piecegoods, further duties have to be imposed on the latter. That the logic of the above, should fail to make any impression in Japan is obvious for, it would be unacceptable in any other country as well. The Japanese people hardly understood the fact that the above arguments expressed nothing more than the doctrine of economic nationalism.

It is this point that I have been attempting to impress on my countrymen, for some time past. My regret is that I have not had more time to do so. Shortly before the abrogation of Indo-Japanese Trade Convention, in view of the increasing complaint of Japanese competition, our Consul-General had informed the Japanese Government of the situation here, and had suggested that nothing short of rigid control of exports from Japan, would bring about a change. As far as my information goes, our Government had realised the need for such action earlier, and at the time were busy examining various proposals for the control of exports, which, had been submitted to it by different trade organisations. I may cite here an incident to show that we Japanese businessmen in India, were fully convinced that if Japanese competition was really proving too severe, it was our duty in deference to Indian wishes to try and lessen it as far as possible. It was brought to my notice that a high official in the Government of India had made an informal protest to our Consul-General, against Japanese competition in the coastal shipping of India. He was reported to have said that if competition of this nature increased, Indian opinion would very likely be provoked to demand the introduction of a Bill for the protection of Indian Coastal Shipping. On hearing of this I sent a cable to my people asking them to refrain from such shipping activities as would aggravate the situation in India, and Mr. Miyake our Consul-General sent a similar message to the Foreign Office.

Just at the moment when we were doing everything possible to bring about a situation for the starting of amicable negotiations with our Indian friends, the abrogation of the Indo-Japanese Treaty was announced by the British Government. We Japanese, had at least expected, that the Indian Government before taking any drastic step, would as a matter of formal courtesy, discuss the situation with our own Government. If they had only intimated to our Consul-General, that we should do something to restrict imports from Japan in order to mitigate the severity of Japanese competition in India, I am almost

THE GATEWAY OF INDIA

Poona-Cynosure of all Eyes: Ex-occupant of Yerwada and Present Occupant of Ganesh Kind: Sugar Development in Bombay: Sir Victor Sassoon's Shattered Hopes:

(From Our own Correspondent)

Bombay, June 27.

Thanks to the Yerwada Jail, Poona has become, once again, famous. During the twenty-one days of the Mahatma's fast, leading figures in the Indian political world were gathered in Poona in anxious watch over the austere performance. Then came the marriage of Gandhiji's son with the daughter of his most trusty *chela*, Rajaji. Press correspondents were equally avid over this social event, and newspapers were full of the details of the wedding, photographs and everything complete. In a fortnight's time, all such leaders as are out of jail are again expected to undertake a pilgrimage to this centre, with a view to consider the issues raised by the temporary suspension of civil disobedience.

If the ex-occupant of the Yerwada Jail is thus the centre of activity and bustle and conferences, the present occupant of Ganesh Kind is no less the centre of like activity and talks and discussions. In the current week, Sir Frank Noyce is spending three days with Sir Frederick Sykes. The Member for Industries and Labour is sure to discuss with the Bombay Governor, questions far beyond the scope of his sphere. All said and done, he is a limb of the Central Government; and he should be taking to his chief and colleagues in Simla first-hand news of Gandhiji's ideas and intentions as interpreted by the official eavesdroppers. At the first week-end of July, Sir Harry Haig will be camped in Poona; and weather and rains are not the only topic which would engage his conversational powers. What does Gandhiji propose to do? What is the real and full significance of the following statement contained in the Mahatma's manifesto on the eve of the fast:

> "I would like to take up the thread at the point where I was interrupted on my return from England".

Does this mean that Gandhiji would, as soon as he is fit, ask for an interview with the Viceroy? If he does ask for an interview, what should be, in the Bombay Governor's view, the terms and conditions on which Lord Willingdon could agree to see the Mahatma? If Gandhiji does not seek an interview, is there any other special action which the Government should take, so as to clarify the position? These are some of the questions on which intimate talk as between Sir Frederick and Sir Harry would, doubtless, take place.

Lord Willingdon, on arriving in Poona in July-end, will come armed with the answers furnished by the Home Member. By that time, the congressmen would have met and chalked out their future programme. The date for the temporary withdrawal of civil disobedience is due to expire at just about that time. The Viceroy's visit will, thus, coincide with a week when stirring events of some kind or other are bound to happen. Is it to be peace on enduring foundations or war once again? The last week of July will decide the momentous issue. All-India will be looking forward to the fateful week with trembling and anxious interest.

Bombay is keen on taking its due share in the increasing activity, manifest in the last two years, in regard to the flotation of sugar manufacturing concerns. Its experience in the twenties was not quite happy. Tatas sponsored a sugar proposition, which was well-received by investors though the shares were placed on the market right at the fag-end of the boom period. The venture proved, however, to be a still-born child. The company did not start work; and the moneys were refunded to shareholders. Sir Lalubhai Samaldas started the Nira Valley Sugar Company. The capital was Rs. 30 lakhs, of which half was underwritten by Sir Lalubhai and the other half by the Tata Industrial Bank. When the prospectus was published in the papers, and applications were invited, there was but poor response from the public. The Tata Bank was left with a substantial proportion of shares; and these holdings came into the possession of the Central Bank of India in the post-amalgamation period. Meantime, the factory was set up; and even manufacturing was begun. Somehow, the company could not make any headway. Troubles of all kinds followed; and, ultimately, it was taken into liquidation. The shareholders, against Rs. 100 paid-up per share, got nothing. The third venture of importance was the Belapur Company, promoted by Marshall Sons & Co. The initial years were marked by exceptional difficulties; capital was reduced; and management was transferred to Brady and Company. Thanks to brighter conditions for the sugar industry, created by increasing import duties, Bradys have made of the Belapur Company one of the best sugar propositions in India. The success of Belapur and the rapid expansion of the industry in Northern India have inspired in Bombay the realisation that something ought to be done in this matter at this end also.

The Government have invested quite a lot of money in the Deccan canals; and they are anxious to ensure a satisfactory return on the investment. The tracts served by these canals could be brought under sugarcane cultivation; the soil is suitable; the water supply is adequate; large areas of land in close proximity are available; climatic conditions are quite satisfactory. Could not something be done to encourage sugarcane growing in the canal tracts? The Deccan Canals Financial Improvement Committee, under the Chairmanship of Mr. B. S. Kamat, emphasised, a year ago, the suitability of various tracts in the Nira right bank canal area for the intensive growth of sugarcane. It is the paucity of communications that has been responsible for retarding the development of irrigation in general and of the sugarcane industry in particular. This was brought to the particular attention of the Special Officers, Messrs. Kirkness and Mitchell, when they were on tour in the Bombay Presidency last November, and they recommended that a further special enquiry into the necessities and possibilities of improvement in the communications in the area should be made.

Accordingly Messrs. W. A. Evershed and R. O. C. Thompson, Executive Engineers, were appointed by the Government of Bombay and the Railway Board respectively, with instructions "to examine and report on the communications required to develop the Nira right and left bank canal area, and particularly to what extent those areas require: (*a*) new roads; (*b*) improved roads; and (*c*) railway extensions and connections to enable agricultural produce to reach its market most economically. In the event of branch railway lines being considered necessary, to make recommendations as to the gauge on which these should be constructed."

> (1) the construction of a 2 ft. 6 in. gauge railway from Baramati passing through or near Asu, Dharanipuri, Nateputa, Malsiras, Akluj and Velapur to Pandharpur;
>
> (2) the completion of the road from Phaltan to Baramati station, including bridges over the river Nira at Sangvi and over the river Karha in Baramati;
>
> (3) improvement of the road from Akluj to Sangam at the confluence of the rivers Nira and Bhima; and
>
> (4) increased grant for maintenance of the road from Phaltan to Lonand.

While the Government are thus actively interested in finding all ways and means for the fullest exploitation of Bombay Presidency's potentialities for sugar cultivation and manufacture, the investing public are sure to accord good support to enterprises planned on sound lines, and sponsored by people who command the confidence of investors. It is felt that the United Provinces and Behar have overdone the sugar factories stunt; and that it is now the turn of Bengal, Bombay and Madras to explore local possibili-

ties and potentialities and to take suitable action in a joint effort between Government and private enterprise.

Sir Victor Sassoon, who left India in a huff nearly two years ago, has come back a disappointed man. He was fed up with political turmoil in India ; and fixed on China as his future scene of main activity. One could not congratulate him on the alternative he chose. In India, whatever the "agitators" might do to annoy the illustrious baronet, there is a settled form of government. In China, it is difficult to know the nature and scope and powers of the various rival governments. The new pasture turned out to be as arid as the old ; and Sir Victor is back in India, wailing that while China is still ready for foreign advice and co-operation, "the difficulty is to produce an atmosphere of sufficient security which would justify a joint development of the country with foreign interests. Whilst I was there, there were several attempts made to establish basic industries with foreign help but nothing concrete has transpired out of them up to now." Those, who can recall the impudent interview which Sir Victor gave to the press on the eve of his leaving India, would be interested to know the talk he had with the press representative prior to his saying *au revoir* to the Celestial Empire.

I might, in this context, refer to the rumours, current here, that it is contemplated to transfer some of the E. D. Sasoon group of cotton mills from Bombay island to more suitable upcountry centres. It will be remembered that Sir Victor owns a mill in Koilpatti, an important cotton centre in South India. The results in this mill are reported to be quite satisfactory. There is a lot to be said in favour of the transplanting of mills from costly Bombay to a cheaper mofussil place. If the rumours prove correct ; and the E. D. Sassoons transfer any of their mills to other centres, the experiment would be watched with great interest by those connected with the textile trade.

Everyone has been talking, over this fortnight, about the silver deal as between the Indian and British Governments. The official apologist has suggested that it was a mere book entry ; that it was no more than a routine transaction ; and that all adverse comment owed its origin to prejudice, ignorance and political passion. Our contemporary, who has put in, as is his wont, a good word for the authorities, must have strange ideas about what is meant by book entry. I might proffer the advice that before it discusses book entries next time, it should learn some of the rudimentary principles from our friend Sir Shapurji Bilimoria or Mr. N. M. Raiji. Our friend can as well ask his banker to transfer the cash balance from his account to mine ; but would he like this mere book entry ? As for the sale being a routine transaction, 20 million ounces of silver are not sold and bought every day. It is a stupendous transaction as anyone acquainted with the bullion market knows. One can, however, understand its facile assumption that the British Treasury could have bought this quantity from China or from the open market and its naive suggestion that such purchases would have made no difference to the price, when it is borne in mind that the *role* of an official apologist in the case of a government which constantly flouts well-informed Indian opinion is no easy one.

While those connected with cotton mills keep saying that the Japanese threat to boycott Indian cotton is mere bluff, those in the cotton trade are more alive to the realities of the situation. The East India Cotton Association makes an appeal to the Japanese Cotton Spinners' Federation to take stock of the present situation and take steps with a view to reconsidering and revising their decision in order that the harmonious trade relations between the Japanese and Indian cotton merchants which have existed for over three decades may not be disturbed to the detriment of both parties. The E. I. C. Association puts in a strong plea for the formulation and consideration of constructive proposals for co-operative action and warns members of the Association engaged in the cotton trade with Japan that they should, at this juncture, act in such a manner as to avoid the possibility of putting any strain on the cordial and harmonious relations which existed between the two parties before the unfortunate decision taken by the Federation to boycott Indian cotton.

"WATCHMAN."

(*Continued from page 1285.*)

sure that we could have influenced our government to take early action in the matter. Unfortunately, no such opportunity was given to us and before we had sufficiently recovered from the shock of the sudden notification of the Indo-Japanese treaty, the enhancement of cotton duties by another 25 per cent. was announced. The last two events coming as they did one after the other, caused intense resentment in Japan and the Japanese Spinners at an emergency meeting carried the day, when one resolution after another was put up to support the boycott of Indian cotton.

Personally speaking I am against retaliations and counter retaliations. Japanese duties on pig iron as well as the prohibition of the imports of rice from India, may be looked upon as retaliations against the raising of duties on Japanese piecegoods in India. As far as I am aware, the latter came first. The retaliation method has not however achieved anything except mutual distrust, and I think it is time that we sought other alternatives of restoring trade equilibrium between Japan and India.

In the matter of closer co-operation between India and Japan, Mr. N. R. Sarker's statement which appeared in the Press last week, seems to me very reasonable. If Indian opinion supports his point of view, there is every possibilty of an agreement being worked out to the satisfaction of both India and Japan. As I understand Mr. Sarker, he is for a freer scope to be given to Indian exports to Japan. In exchange it is hinted, that similar facilities would be available to Japanese manufacturers in India. The question seems to me to pivot ultimately on arithmetical calculations. It is necessary for instance to ascertain what percentages of the imports to Japan, India would like to be reserved for Indian products. It is also essential to know the share of the Indian market, which will be available to the Japanese manufacturers, without exciting unreasonable animosity. I shall be flying to Japan shortly, in order to return to this country with the Japanese Trade Delegation, which the Japanese Government are sending to discuss the terms of a new agreement with India. I am going to Japan to study the Japanese case as well as to place the Indian views before the Japanese public. By the time we come back, I hope Indian businessmen will be ready with their plans, so that we can proceed to negotiate terms directly, in the spirit of "give and take" as has been suggested by Mr. Sarkar.

Much-vexed Silver Deal: Treasury's View-point; Sugar Manufacturer versus **Sugarcane Grower: What to do with the Mahatma?**

(From Our Own Correspondent).

Simla, June 26.

The recent silver transaction of the Government of India continues to be an exciting theme. The Treasury officials feel that they are being judged, not on the merits of the issue, but on political grounds ; and that the transaction is being criticised without anyone of the opponents attempting to consider it on merits. The trouble really has arisen over the action, or inaction, of the Secretary of State in respect of announcement regarding the price of silver arranged with the British Government.

* * *

It seems that the price was settled before the transaction was agreed to ; and Simla's opinion was settled before the transaction was agreed to ; and Simla's opinion was emphatically in favour of announcement of the price along with the announcement of the sale. That would have shown that the price settled was not lower than the market price ; and that, in fact, it was higher. Which means that the Government of India got rid of surplus silver at a price which could not be obtained in India, and that the Paper Currency Reserve was strengthened through this transaction.

* * *

The Treasury view here is that the price U.S.A. gave to U.K. was of no consequence. U.K. has bought India's silver in a straight transaction ; and U.S.A. has a right to give whatever credit it chooses to give to a debtor nation. However, the position remains that the Government of India hold that they have done everything in the interest of India and that if only the price at which they agreed to sell silver had been announced, the present charge against them would not have assumed the same force.

* * *

It is true that when you talk this matter over with the officials concerned, their case appears convincing ; but past experience is that whenever Indian commercial opinion has gone against them, it has always been found that that opinion is ultimately in the right. It may be that future developments will show that the present action to part with silver was likewise not wise. Meantime, the main question remains unanswered : When all indications point to a brighter future for silver, why did the Government of India agree to the sale of so large a quantity of the white metal ?

* * *

I hinted recently at the possibility of sugar excise duty being considered at a not distant date. There is no doubt that this item of taxation is being kept very much in view as a good source of revenue. At present the Government are realising a good deal of customs revenue from machinery imported for the purpose of setting up sugar factories in India. But it is anticipated that by 1934-35, India would have imported all the machinery necessary for the purpose of making her self-contained, so that this redeeming feature would disappear and the loss would have to be made good.

* * *

The forthcoming Conference in Simla will not be directly concerned with this question of excise duty ; but Sir George Schuster will ever keep it in the back of his mind. The stage for the Conference is being set by Sir Faz-h-Hussain's department ; and I am told that quite a bitter controversy would arise in one respect. The official calculations are that, after providing for the 10 per cent. profit which the Tariff Board calculated, the cultivator can be given for sugarcane a much higher price than he receives at present. So that it is felt that under protection, capitalists are profiteering.

* * *

It is admitted that the profits so made are being reinvested in the industry and that to that extent it is proving of benefit to the country ; but the real point is that some attempt must be made to fix a graded scale of the prices which the cultivator must receive for his sugarcane and that this scale can follow more or less the lines of the Sugar Committee report.

* * *

Politically, Simla seems very much concerned a to what to do with Gandhiji. They would like to put him back into jail if they get an excuse for doing so. But Mr. Gandhi is not likely to give them an excuse easily. However, Sir Harry Haig is going to Poona in the beginning of July to talk matters over with the Bombay Governor and see what course of action should be pursued with regard to the Mahatma and his congress colleagues. It is also expected that, by then, congress leaders would take counsel and frame their programme so that the Home Member would be in Poona in time to hold important discussions with the Bombay Government on the subject.

* * *

And if matters do not mature by then, there will be the visit of Lord Willingdon to Poona by the end of July, when his Excellency visits Bombay to receive Lady Willingdon on her return from England. It is clear that the Government of India are not prepared to make any compromise with the Congress and that it will take the first opportunity of giving congressmen another fight by putting them into jail in case they revive their allegiance to their programme of direct action in any form.

GREAT BRITAIN

FIRST ROUND OF WORLD CONFERENCE.

The curtain has risen on the World Economic Conference. 168 representatives of 66 nations, big and small, gathered under one roof, statesmen of diverse views and different calibre, innumerable ideals and ambitions in conflict, the tragic paradox of mankind starving in the face of plenty—these tend to make the show in South Kensington the most showy ever played on the stage of international politics. Whether the *denouement* will be as tragic as the paradox which the Conference has to solve, or whether its proceedings will drag on in the serio-comic manner, so characteristic of international conferences, is yet in the womb of the future. The first week has shown no definite turn either way. The plans so far adopted have followed the path of least resistance. There is, indeed, every attempt to preserve the atmosphere of serious business. There is also anxiety that the Conference should get to brass tacks as early as possible. The speeches have been short and crisp. There is a laudable attempt to avoid premature clash of opinions and interests. Even Mr. Ramsay MacDonald's reference to war debts, in the face of repeated warnings from America that the debts question should not be entangled in the discussions, has ultimately been passed over as an indiscertion, though it is, undoubtedly, a piece of calculated indiscretion. Signor Jung spoke of war debts somewhat at length only at a later stage of the Conference when the resentment against America was more pronounced and everyone, who has a kick against America, was sure of an applause, though a silent one, in the Conference.

British View of Conference Problems.

The opening speeches of the leaders of the various delegations were never meant to be serious contributions, to the solution of the problems before the Conference. Mr. Chamberlain had, however, prepared an alaborate statement of the views by which his country would stand in the future deliberations. But the statement revealed in full what was characterised in these columns last week as "the inconsistency between Britain's professions of historic free trade and their recent policy distinguished by just those features which Britain will be foremost to denounce in the forum of the World Economic Conference." The statement of policy has, no doubt, been carefully prepared by the Secretariat which is assisting the leader of the British Delegation ; and at best it can only be an ingenious defence of the economic heresies of which Britain must hold herself guilty. The gist of his speech has been ably summarised with a tinge of sarcasm which does little to distort or misrepresent the views of the Chancellor.

> "Does the Government believe a return to gold to be desirable or beneficial? Yes.
>
> Is it willing to return to gold before every existing difficulty is already remedied? No.
>
> How, in any case, is stabilisation to be achieved? First, we arrange for a provisional stabilisation between the principal countries; next every country stabilises permanently when how, and at what rate it pleases.
>
> Does Mr. Chamberlain deprecate trade barriers? Yes.
>
> Does he deprecate his own tariffs or intend to mitigate them? No.
>
> Does he require the removal of 'prohibitions and similar trade barriers'? Yes.
>
> Are our own quotas trade barriers or prohibitions? No, they are scientific international philanthropy. The trade barriers are the other man's quotas—the ones which for some unknown reason do not involve 'co-ordination of production and marketing' in the same way.
>
> Does Mr. Chamberlain favour 'open-market operations?' Yes; it pleases America; though presumably the ridicule which he poured upon Mr. McKenna in a public speech now falls on himself.
>
> De we favour public expenditure as a business sti-theory: but the reservation concerning the 'extent to theory: but the reservation concerning the "extent to which in each country such schemes had aleady been promoted in the past' effectively disclaims any intention to co-operate in practice.
>
> Do we desire a rise in prices? Yes.
>
> That is all we are certain about. But the onlooker will be thankful that that is outside the immediate functions of government."

This is by no means a caricature of the Chancellor's speech. Each one of the answers given above will be found in substantially the same form in one part of the speech or another. And since all these views have been aired times without number in the House of Commons by the spokesmen of the Government, there is no room for doubt that they have been affirmed in the Conference also. That such an uninspiring policy should have been enunciated by Great Britain, to whom the world looks for a definite lead, is a bear point of first magnitude in regard to the prospects of the Conference.

Formation of Blocs.

As has been observed, the clash of opinions is not yet. Attempts have been made in certain quarters to form *blocs* of countries and delegations in the Assembly of the Conference. The British Empire *bloc* attracts the most attention, for it is already committed to measures like Imperial Preference which Britain, at any rate, is anxious should not be torpedoed by the decisions of the Conference. All available intervals are snatched for informal conference between the delegations of the Empire nations. But the authorities have been anxious to explain that this is only in accordance with the established practice at all international conferences and that there is no sinister design on the present occasion to mobilise the forces of the Empire against opposing interests. But it is felt, at the same time, that the formation of such *blocs* would have the effect of drilling, so to say, opinion in the Conference and to that extent facilitating the ultimate decisions. The Little Entente, it is reported, has already formed a solid *bloc* of its own. So have the Oslo Powers, which include Belgium and the Scandinavian countries. If the other smaller nations are fairly left out of account, it will mean that only the bigger nations have to make up their minds and to point the lines on which discussions are to be carried on. Indeed, the Belgian delegate pointed out that they are looking to the big nations but that the big nations have not yet troubled to come to grips.

Co-ordination of Committees' Work Postponed.

The Conference, for its part, has been content to divide itself into committees, one for the financial and the other for economic questions. The question of co-ordinating the labours of both the committees seemed at one stage to be perplexing the minds of the leading statesmen. But it was later on decided that committees, as a rule, may try to work independently, making where necessary the assumptions without which it is difficult to proceed farther. For instance, the committee working on tariffs and quotas should presume for purposes of their work that the committee on monetary affairs would be able to achieve some working scheme of stabilisation of exchanges. Once the committees make progress independently on these lines, the work of co-ordination could be done later by either a joint conference or by persons specially appointed for the purpose.

Fluctuations in London New York Crossrate.

It is an unpleasant comment on the efforts of the Conference that the first two days of its sittings should have been overshadowed, on the one hand, by

Air Mail Week

the wide fluctuations in the sterling-dollar rate and, on the other, by the uncertainties in regard to the war debt payment. As regards the latter, Mr. Neville Chamberlain was tantalising the House of Commons with hourly promises of a full official statement which, however, could not be made till a late hour. But when it came, it was satisfactory to all parties concerned, though Mr. Roosevelt's insistence on not characterising the resultant situation as a default somewhat jarred on those who think that a drastic scaling down of war debts is the first step towards the progress of the World Economic Conference. As for the exchanges, the dollar was seen to sink as low as 4.20¼, though later the closing was somewhat better. One can imagine the feelings of the delegates when they came out of the Conference and learned the gruesome details of the day's fluctuations in the exchanges. The present position of the exchange market, which is such as to put out of gear all the accumulated knowledge and equipment of the most veteran members of the market, should have helped the delegates to realise more poignantly the dangers of exchange chaos. And it is in that sense the happenings of the first day are not an altogethther unmixed evil.

Agreement among Central Banks.

But, one must reflect, at the same time, that in the earlier stages, at any rate, the Conference counted for little by the side of the representatives of the Central Banks and the Treasuries of England, France and U.S.A. who were closetted in conclave about the same time in Exhibition Road. The fortunes of this Conference, as of the exchanges which were the subject of their discussions, had the same tantalising fluctuations during the week. It was at one time reported that the British and American delegates were as far apart as were their respective countries, geographically over the rate at which the cross-rate should be stabilised. It was clear from the outset that it would be some time before the French delegation would have any practical importance in the discussions. For it was a straight issue between the British and the Americans ; and it was only after the two countries agreed upon the necessity of provisional stabilisation that any useful discussions could be carried on between France, on the one hand, and the two English-speaking nations, on the other.

Price Inflation versus Exchange Stabilisation.

From the beginning, the Americans stuck to the view that any scheme of provisional stabilisation, even if it should be possible to arrive at an agreement as to the exact rate, should not be allowed to interfere with the monetary programme decided on by the Administration at home. This is, perhaps, understandable in view of the fact that the monetary programme of the American Government has been formulated with reference to interests in that country which are far more important, politically, and economically, too, than the issues before either the Bankers' Conference or the Economic Conference. The practical import of this objection was that, should the talk of stabilisation be found to interfere with the much-desired rise of prices in stocks and commodities, the American Administration should be free to throw overboard the whole scheme and pursue a

Air Mail Week.

policy framed with sole reference to the needs of America's internal economy.

Pooling of Exchange Funds?

Such a firm attitude on the part of the American delegates suggested the impossibility of arriving at any agreement between the Governments concerned; and the negotiations were, therefore, directed to the conclusion of an understanding among the central banking institutions of the respective countries, with a view to the maintenance of the rates at agreed levels. Once such an agreement was arrived at, it might even be possible to pool the resources of the respective Exchange Equalisation Funds and to operate such a fund from a centre like London and under the direction and supervision of a committee representative of all the three interests and inclusive of Dr. Sprague, who may be trusted to understand American and British interests in their proper relation.

Mr. Woodin's Bombshell.

Towards the close of the week, rumours were rife that an understanding on these lines had been arrived at among the delegates and that it only remained for the formal sanction of the Governments concerned. Later on Friday night, however, in the small hours of the morning came the news that Mr. Woodin flatly denied the truth of such reports and questioned the competence of the American delegation in England to conclude any such arrangement without a reference to the President and the Treasury at home. This seems to be the ignominious conclusion of the labours of the Bankers' Conference during the first week of the momentous sessions now going on in London.

Embargo on U. S. Securities.

This latest instance of American isolationism is, no doubt, to be condemned. But at the moment, it does not lie in the mouth of the British Government to charge America with lack of enthusiasm for Conference ideals. For the latest instance of contrast between profession and practice is, perhaps, the worst, considering that it has come so soon after Mr. Chamberlain's pompous pleas for the free movement of international capital. On Monday evening, the Treasury addressed a letter, over the signature of "N. Chamberlain," a letter from the General Purposes Committee to Sir Archibald Campbell, Chairman of the Stock Exchange Committee, on the subject of the embargo on the purchase of foreign securities. The purpose of the letter is, ostensibly, to clear up certain doubts revealed in the enquiries which had been addressed to the Treasury in the last fortnight. But in reality it would seem to be an attempt to cripple the last vestige of freedom which has been left for the capital market in London. The Chancellor's purpose seems to be to tighten the control over the influx of capital abroad through import of securities. While the embargo on public issues and its later amplification following the results of the Boots deal have, no doubt, blocked, in large part, the copious flow, there is still the freedom of banks, who deal in foreign securities and of the members of the stock exchange, to buy foreign-owned securities for purposes of sale to investors in Britain. Mr. Chamberlain attempts to defend his interference with this procedure on the ground that "the large inflow into London during this year of short term money from abroad may have obscured, but it is certain has not removed, the intrinsic weakness in our position and this county is not in my judgment at present in a position to invest large sums at long terms to foreign countries." But Mr. Chamberlain has not thought it possible to make any public request discouraging ordinary private investments abroad by individuals. He affirms that there have been instances "in which brokers and others in this country have been asked by foreign owners to find a market in this country for large blocks of securities by distributing them among a considerable number of buyers without actually making an intermediate purchase." The crux of the letter, therefore, is:

> "This, of course, equally conflicts with the general objects which I have in view, and there may be other technical means for carrying through transactions of a similarly injurious type. I trust that the members of the Stock Exchange will assist me by discouraging any such transactions by every means in their power."

As regards the interpretation of this letter, the *Financial News* pointed out in its issue of Friday, June 16, that the voluntary embargo was extended to the buying of all U.S. securities by the British investors, unless the securities happen to be on the books of an arbitrage dealer. On the publication of the letter, the *Financial News* re-asserts its point of view on unimpeachable authority and contends that, though it is not plainly stated in the Chancellor's letter, it is still implicit in it and particularly in the passages on the possibility of a "public request discouraging ordinary private investments abroad by individuals" and the "other technical means for carrying through transactions of a similarly injurious type."

The Austrian Loan.

Towards the close of the week, it was reported that the Austrian loan of 100 million schillings will be issued in London on July 10. It is expected in some quarters that the French issue for the same amount would, in all probability, be made on the same day. Bur according to a report in the *Financcial News* this is not settled and the delay is attributed to the opposition of French socialists to Dr.

TALKING ABOUT INVESTMENTS

—the claims of a profit-sharing Endowment Assurance Policy merit most careful consideration. Such a Policy for, say, Rs. 10,000 creates a capital which can never depreciate, gives full protection for wife and child from the moment the first premium is paid, forms an acceptable security to your Banker for the purpose of an over-draft, and materially increases in amount as time passes.

Life Assurance receives practical Government encouragement in the shape of Income Tax rebate. It is the only form of Investment favoured in this way by Government. You will be wise to take full advantage of it.

The Standard Life Assurance Company is the Pioneer of Life Assurance in India, and is a Mutual Company over 100 years old and with funds amounting to over £23,000,000. No Office in the world carries out its valuation on a more stringent basis, which means immense reserves and great bonus-earning capacity.

The Company's position is well summed up in the following extract from a recent article in the financial press:—

> "It is one of the outstanding life offices of the world; and every year its accounts carry fuller evidence of thorough soundness from top to bottom, which means a high level of security and a high rate of profit for the policyholders."

Write-to day stating date of birth, when full particulars will be sent to you, without obligation on your part.

Air Mail Week.

Dolffus, the Austian Chancellor. Dr. Dolffus, according to a cable fom Paris, conferred on Friday even ing with M. Paul Boncour, the Foreign Minister and M. Daladier, the Prime Minister. It will be recalled that the French part of the loan was promised by M. Herriot at Lausanne and that the consent of the French Parlement had been obtained several months ago but owing to the socialist opposition refered to above, the matter has been held up so far. The recent progess made on this subject may in large part be due to the closer contact between international statesmen, which the World Economic Conference has rendered possible. It is understood that there will also be 8 million schillings from Switzerland, 4 million schillings from Czechoslovakia and 3 million schillings each from Holland and Belgium. Even earlier in the week, it was rumoured on the strength of the continued stay of Herr Dolffus in London, despite the emergence of internal troubles in Australia, that the Austrian loan would be placed on the British market before long. It may not be well known that the amount of the loan promised to Austria internationally was 300 million gold schillings of which the British share amounted to 100 million schillings or £3,400,000. But the effect of this agreement on the market must not be construed as an exception to the general rule of avoiding as much of the export of capital from abroad as possible. For the effect of the whole transaction would be only to convert the short term credit granted by the Bank of England into a long-term loan under the guarantee of the Treasury. But as the original credit of the Bank of England was granted previous to the suspension of the gold standard, the present sterling equivalent of 100 million gold schillings may leave a balance which might be loaned to Austria.. It is expected that on account of the sympathies, which Austria has evoked in foreign countries by her spirited resistance to Nazi influence, all obstacles in the way of her loans being placed in the foreign markets will be removed and that before long the loans will have been duly completed.

UNITED STATES OF AMERICA

War Debts and Stabilisation.

The American public is no less perplexed or pained at Mr. Roosevelt's handling of the June 15th instalments than the debtor nations, whom he held in painful suspense till the last minute. There was little idea of what was going on between the Administration and the Governments of the debtor countries till the President himself made an announcement on June 14. From this and other papers available it would appear that the United States Government addressed on June 9, 1933, the following letter to Sir Ronald Lindsay, who duly communicated it to Sir John Simon on June 10 :

> "I am requested by the Secretary of the Treasury to notify you that 75,950,000 dollars interest is due and payable on June 15, 1933, on account of your Government to United States pursuant to debt agreement of June 19,, 1923.
>
> The debt agreement of June 19, 1923, requires thirty days' advance notice, in case your Government desires to make payment in obligations of United States issued since April 9, 1917, but I am requested by the Secretary of the Treasury to advise you that he will be glad to waive the requirement of thirty days' advance notice if your Government wishes to pay in that manner."

The British Reply.

The brevity of this communication would seem to be appropriate to either of the two views which the Administration could possibly take of the ultimate fate of the June 15th payments. The Treasury had ample reason to believe that over the question of June 15 payment the foreign countries, Great Britain included, would be decidedly unwilling to make a regular payment involving an acceptance of the continued binding character of the debts settlements. In that case, it is natural that the Administration should not try to anticipate any manner of recalcitrance on the part of the debtor nations. If, on the other hand, difficulties were apprehended even then, any lengthy reference to the binding character of the debts would be clearly uncalled for. As might be expected, the British reply, which was received by Sir Ronald Lindsay from Sir John Simon, the Foreign Minister, on June 13, recapitulated in full the entire history of the case from the time His Majesty's Government made representations to the President about the December 15 payment. The British attempted in that letter to make out that the December 15th instalment was paid "under the belief that it would greatly increase the prospects of a satisfactory approach to the whole question." The British Government have always been prepared on their part to expedite the settlement of the question before the June 15 instalment fell due. While they must make it perfectly clear that they do not regard the suspension of the June 15 payment as in any way prejudicing the ultimate settlement, they consider that "the payment could not be made at this juncture without greatly imperilling the success of the Conference and involving widespread political consequences of the most serious character". One significant point made in the letter of Sir John Simon is that after the Lausanne Conference there was marked tendency for prices to rise but that this tendency was reversed when the prospects of a final settlement of inter-governmental operations receded while the December payment was accompanied by a sharp fall in prices, which was felt in America at least as much as in Europe. Experience, therefore, appears to show, contends the British Government, that the effect of the payments upon the prices is very direct. It is, indeed, cogently argued on this basis that "the payment of the further instalment of debt at this juncture would inevitably be judged to mean that no progress whatsoever has been made towards such a settlement, and would therefore deal a damaging blow at the confidence of the delegates. . . . His Majesty's Government therefore, proposes to make an immediate payment of 10 million dollars as an acknowledgment of the debt pending a final settlement".

Mr. Roosevelt Accepts Token Payment.

In his reply to the British Government the President emphasised the statement that the payment of 10 million dollars is "as an acknowledgment of the

debt pending a final settlement". And while recording his reservation of opinion on the statement concerning the World Economic cause and effect contained in His Majesty's communications, he agreed to accept 10 million dollars. But he at the same time emphasised that it is not within the President's discretion to reduce or to cancel the existing debt owed to the United States, nor is it within his power as President to alter payment contained in the existing settlement as such power rests with Congress. And in the same communication the President suggested that His Majesty's Government might provide for such representations concerning the entire question of the debt to be made in Washington as soon as convenient.

President's Defence before the Country.

Following the despatch of this communication to the British Government, the President issued a statement in Washington. The President urges that he is still sticking to the policy announced in November, 1932, ,to the effect that a debtor may at any time approach a creditor with representations concerning the debt and to ask for readjustment of the debt or its chance of repayment. But he urges "it seems the part of fairness and wisdom to postpone formal representations on the debts subject until later, as the World Economic Conference has begun under most favourable auspices and it is vitally necessary that during the opening days of the Conference difficult and possibly protracted discussion of the debt be avoided.

In his statement issued in Washington, the President has attempted at once to assert his rights under the Constitution and to reassure the country that nothing has been done to impair the sole authority of the Congress to alter the amount and method of payment of the debt. Two points, he urged with special emphasis and reminded the electorate with particular earnestness. One was the fact that he had informed the British Government that such representations and suggestions as may be made to him by the British representatives when they discuss the problem in Washington, will be submitted to Congress for information and consideration when Congress next meets. The other point is that the World Economic Conference now being held in London does not include in its programme any consideration of the debts owed by the various governments to the United States and that the American delegates have been instructed not to discuss debts with the representatives of any of the debtor governments. Most important of all is that, in as much as the payment of 10 million dollars by the British Government is "in acknowledgment of the debt pending a final settlement", he has no personal hesitation in saying that "I do not characterise the resultant situation as a default".

No explanation about 50 cents.

While Mr. Roosevelt has been at pains to explain the constitutional position and his policy and actions thereunder, his statement makes no reference to the acceptance of 10 million dollars in silver and that, too, to be credited to the account of the British Government at the rate of 50 cents. an ounce, as against the then ruling rate of 36 cents. an ounce. Apparently, Mr. Roosevelt takes the view that, in as much as the Inflation Amendment to the Farm Bill has conferred on him the power to accept silver in payment of war debts at a maximum rate of 50 cents. per ounce, the rate at which he would accept silver is a matter solely for his discretion. As such it is on a par with ordinary administrative acts and does not require to be explained at length to the country at large. At the same time, it is not a matter on which opposition could be assuaged by a lengthy explanation; for, while the war debt diehards might be placated by the insistence that the whole matter still remains in substantially the same form for Congress to tackle as it pleases, opposition to the rate of 50 cents. cannot be undermined in a similar way. It is also possible that the President has reckoned on the support of the silver interests, in an action which is calculated in the long run to benefit them and the price of silver in which they are so much interested.

Is Mr. Roosevelt in for trouble?

Despite the careful wording of the President's announcement, indignation in anti-revision circles at the President's handling of the war debts question has not been reduced. On the other hand, they feel that the President's attempts to circumvent the Congress opposition are being slowly intensified and that the token payment on this occasion is the first instance of such arbitrary action, calculated to injure the interests of the taxpayer generally and of those, in particular, who have suffered on account of the disequilibrium in the national budget. After all, it must not be lost sight of that France, Belgium and Poland have defaulted two war debt instalments outright and that Great Britain, Italy, Czechoslvakia, Roumania and Latvia offer only a partial payment. The effect would be that the United States budget will be unbalanced by a further 132 million dollars. People, therefore, naturally ask why the President lets off the foreigners and takes it out of the veterans. The measure which provides for economies in regard to pension to veterans has already been turned down by the Senate and a new bill has bee substituted providing for much less serious cuts in the bonus payments.

Congress Adjourns till January.

From the personal standpoint of the President, it is well that Congress has adjourned till next January. But it is too much to hope that it will altogether give up its battle with the administration. The Representatives will stay with their constituents for a period of six months before they assemble again; and this contact with the country will most naturally have the effect of stiffening further their attitude on the question of war debts. It is true that before Congress adjourned, it was cosgratulated by the President on the spirit of "co-operation," it had shown. But there is no doubt that during the last three days of its session its relations with the President had been strained by the question of war debts. And when Congress meets next, it will most probably be presented with some sort of a patched up settlement, for it to ratify or to disown

as it pleases. It is believed that Sir Ronald Lindsay had already begun the preliminary negotiations towards such an agreement and before long a Debt Mission from Great Britain may arrive in this country. Other nations must also follow suit. But criticism of Mr. Roosevelt's handling of the problem seems to proceed from all sides. While the diehards may naturally be expected to condemn passionately the acceptance of a token payment, even those who are in favour of a revision of debts are dissatisfied with the President for not having engineered some sort of an understanding before the June 15 instalment fell due. One may imagine what their feelings will be when, owing to the Congress adjournment, no definite settlement can be reached till January next. So that December 15, 1933, will see no improvement on the position of a year before except for the inexorable course of events.

New Legislation and Market Trends.

Business reports have continued to be satisfactory during the week. But the approach of the Congress session to its close, when all important legislation is brought to a head and their passage expedited, together with the rumours regarding the stabilisation has interfered with the progress of business at certain points. Traders were, therefore, inclined to watch Washington with feelings bordering on apprehension. Important pieces of legislation were being rushed through including the Industrial Recovery and Railroad Co-ordination Bills as well as proposals of new taxation. The most controversial piece of legislation is the Glass Bill, which provides for the guarantee of bank deposits by the creation of a Deposit Insurance Corporation. As this involves the payment by strong banks for the protection of the weak, it is believed in some quarters that it amounts to confiscation of property and that, therefore, the Bill might be outside the legislative competence of Congress. But it is certain that opposition to the Bill must dwindle and that before long the Bill will be duly passed and signed by the President and put into operation. This is one of the instances of a legislative measure before the Congress interfering with progressive dealings in shares in the stocks exchange. The Farm Credit Administration Bill had a number of alterations at the hands of the Senate ; and the Senate included a provision to amend the Cotton Futures Act, whereby a tax of 1 per cent. per bale is levied on all cotton sales and contracts. On Tuesday, June 13, the President signed the Home Mortgage Re-financing Bill, which provides for the issue of 2,000 million dollars of 4 per cent. Government bonds for the re-financing of farm mortgages by the Reconstruction Finance Corporation. In Wisconsin, a "complete plan has been evolved providing for the transfer of farm mortgages to the Reconstruction Finance Corporation by all closed banks in return for cash. The Corporation will in return take the Farm Land Banks bonds issued under the new Farm Bill. Needless to say, mortgages which are now valued at 51 million dollars will be written down to 35 million dollars.

Business Progress.

As mentioned already, business reports continued to be very encouraging. The Good Year Tyre and Rubber Co. is reported to have increased wages in its cotton mills by 10 per cent. Domestic consumption of cotton in May is estimated to be 635,000 bales compared with 471,000 bales in April and 332,000 bales in May, 1932. Reports from a wide range of business, including leather, textiles, steel, motor cars, meat-packing and electrical machinery, show that employment is steadily increasing, according to the Department of Commerce. The Department of Labour, in fact, estimates the increase in employment during May at 4.8 per cent., and further says that wages have increased by 11.5 per cent. Electrical power production for the second week of June showed a gain of 7.4 per cent. over the figures of a year ago. Car loading figures show an increase of 55,000 above the figures for this time last year. According to *Steel* steel mill activity has risen to 48 per cent. of its capacity ; and it is expected that by July 50 per cent. would be reached, after which a seasonal decline might ensue without detriment to the improved outlook of the industry. The prospects of the sugar industry are expected to improve, as a result of the demand of the Department of Agriculture that the industry should conclude a definite agreement on sugar production and export quotas. No reduction of the import duty of Cuban sugar would be considered till a quota plan including Cuban imports has been definitely agreed to. But it remains true at the same time that there is as yet no sign of real consumer buying.

Stabilisation Causes Slump in Prices.

The stock exchanges and commodity markets reflected the hopes and fears of the markets in regard to the legislation before the Congress and in regard to stabilisation. The grain markets were affected by the fear of new impositions. Bank shares were down in the middle of the week owing to the repercussions of the Glass Bill on the earning capacity of the bankers, which is bound to be affected by the deposit insurance provision, which is regarded in some quarters as a heavy burden on the larger banks. It was on Thursday that the full weight of the stabilisation rumours was felt on the stock markets. The opening was distinctly lower ; and at no stage were the previous day's levels regained. 7 point losses were fairly widespread and trading was less active at 4,899,000 shares compared to 5,555,000 shares on Wednesday. Mr. Woodin's denial of the stabilisation agreement gave a much-needed impetus and turnover recovered to the level of 5,710,000 shares.

Government's Policy re. Stabilisation.

The course of stock and commodity prices during the last two days of the week under review is a significant clue to the policy of the Administration in regard to the question of the stabilisation of the exchanges. It is by no means likely that the Administration can be blind to the importance of an agreement on stabilisation to the further progress of the World Economic Conference. And it is, therefore, quite credible that the representatives of the American Treasury and the Federal Reserve system have proceeded with the discussions on this question with the representatives of the Treasury and the Central Banks of France and Great Britain. It must have been the idea of the Administration to watch the effect of the reports about the progress of negotiations in the Bankers' Conference in London on the stock and commodity markets and then to determine their policy in the light of such developments. If such had been the plan of the Government, they have been amply rewarded by the definite trend of the markets during the last three days. The slump on Wednesday should leave no room for doubt that, in spite of the continued reports of good business pouring from all quarters, prices at the present stage are being maintained only by the strength of speculation, which in turn is sustained by the anticipations of further inflation. It is, no doubt, regrettable that a position has been brought about, in which the upward trend of prices can be kept up only by the promise of further and further inflation. But once such a situation has been brought about, the Administration will have to risk a great deal of unpopularity, if not far worse dangers to the structure of industry, if at this stage it should take upon itself the responsibility for arresting all too suddenly the encouraging developments of the last two months. It is still a question whether it is time for the American Government to take what may be called the long view of things. If the World Economic Conference shows

definite signs of a useful agreement amongst nations in regard to tariffs and trade barriers, then it might be worth while for the American Government to sacrifice its pet policy of inflation to the requirements of international economic understanding. But to-day the Administration must enjoy the sympathy of all classes in their decision not to take a pre-maturely precipitate step and abandon their policy of coming to the succour of trade and finance with inflationary measures. Mr. Woodin's statement given below, whatever may be said from other standpoints, was just the thing that the American markets needed :

> "Various reports from London published to-day concerning an agreement by the American delegates to stabilisation in some form have been brought to my attention. Such reports cannot be founded on fact. Any proposal concerning stabilisation would have to be submitted to the President and the Treasury, and no suggestion for such a proposal has been received here. The discussion in London in regard to this subject must be exploratory only, and any agreement thereon will be reached in Washington, not elsewhere."

It is also understandable that foreign countries should regard this as an unkind cut at the Conference.

GERMANY

DR. SCHACHT CONFERS WITH FOREIGN CREDITORS.

With the decision of the Berlin Conference to continue discussions in regard to foreign obligations at the time of the World Economic Conference, the scene of activity in respect of this question has shifted to London. The first notable development, during the week, is the formation of a committee to protect the interests of German bond holders, with a view to protect the interests of British long-term creditors, and consisting of Sir Arthur Worley, Bt., British Insurance Association (chairman) ; Mr. Richard Guinness. The Association of Investment Trusts ; Mr. J. H. Gifford Johnston, the Association of Investment Trusts ; Mr. E. H. Lever, British Insurance Association ; Mr. Cecil Lubbock, Council of Foreign Bondholders ; and Mr. D. Reid, Council of Foreign Bondholders. A meeting of the committee was held on Tuesday at which American and other foreign financial exports met the British members to consider agreement as to a united policy. One of the members, in an interview to a financial daily, suggested that the interests of the long-term creditors are not coincident with the interests of the short-term debtors and that no effort will be made to join hands with them. But he felt that the situation was so obscure that the committee could promise nothing more than that they would do their best by the British bondholders and that everything rested with the outcome of their consultations with Dr. Schacht.

The first conference was held on Friday between Dr. Schacht and the representatives of the long-term creditors from Great Britain, Sweden, Holland, Switzerland and the United States together with the representatives of the Bank for International Settlements. Though the situation was freely discussed, it was impossible, in the nature of things, to come to any definite conclusions. But it is believed that agreement was arrived at in regard to certain principles which, if followed, might slowly unravel the tangle of these perplexing problems. The first question that came up was that of all the long-term loans, the Dawes Loan should be given priority before all the others. A similar demand was made in regard to the Young Loan also ; but Dr. Schacht agreed to the priority of the Dawes Loan and was also prepared to have regard to the predominant view of those present at the meeting that the next priority should be given to the Young Loan. A suggestion that cropped up was that the sinking fund provisions for the Young Loan should be waived, to facilitate the recovery of the exchanges. And it was decided to refer this question to the Bank for International Settlements. Another principle that was ageed on was that payments of interest should be given priority over repayments of capital, whether on long-term or short-term credits. As usual, it has been decided unanimously that the contact between the Reichsbank and the creditors should continue so that definite decisions could be arrived at before July 1st.

Meetings were also held in London by the representatives of the Foreign Bankers committee and the German representatives of the Reichsbank at Martins Bank. It may be remembered that in the meetings held in Berlin it was agreed between the representatives of the Foreign Bank Creditors Standstill Committee and Dr. Schacht that the statutory meeting of the Committee of the Foreign Bank Creditors fixed for July 3 should be held instead in London on June 17. The creditors were informed that the Reichsbank had sent notice by cable to all central banks that this conference was to take place to discuss the treatment of standstill credits with reference to the measures that had been taken by the German Government. The discussions then foreshadowed took place on June 13, 14, 15 and 16 with regard to certain modifications of the agreement which the Reichsbank requested the creditor representatives to accept. The Conference decided that all repayments of capital under the existing agreement should be temporarily postponed ; and in accordance with this principle it has been decided that certain repayments of capital by the Gold Discount Bank, amounting to about 75 million marks, which should have been made under the terms of the agreement before February 28, 1934, shall be postponed until that date. The Consultative Committee has consented on the request of Dr. Schacht to advise the respective creditor countries to recommend a reduction in the rates of interest now applicable.

GHUSICK AND MUSLIA COLLIERIES, LD.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assses.	Rs.
Capital ...	13,00,000	Block (nett) ...	11,72,216
Reserves ...	1,09,964	Coal ...	20,233
Debts ...	88,065	Stores ...	41,830
		Outstandings ...	65,949
		Cash & Invests., etc. ...	12,685
		Profit & Loss ...	1,85,116
Total ...	14,98,029	Total ...	14,98,029

Extracts from Directors' Report:

The Directors submit the Audited Accounts for the half-year ended 31st March, 1933.

The despatches of coal for the six months were 43,102 tons as against 41,335 tons in the corresponding half-year 1932. The raisings of coal for the same period were 44,322 tons as against 42,954 tons for the half-year ended 31st March, 1932.

The Collieries are working on restricted raisings.

Accounts:—After providing for all charges and carrying Rs. 50,000 to Depreciation Fund there remains an amount of Rs. 1,85,115-14-3 at debit of Profit and Loss Account including the balance of Rs. 1,57,820-2-9 which is carried forward to next half-year.

Mr. A. E. Mitchell having returned from leave has resumed the seat on the board. Martin & Co., Managing Agents. Calcutta, 16th June, 1933.

BRITANNIA ENGINEERING CO., LD.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital ...	10,00,000	Block (nett) ...	8,36,031
Debentures ...	5,00,000	Stock-in-hand ...	3,28,169

		Stores ...	98,893
		Outstandings ...	1,46,971
		Cash ...	2,779
		Profit & Loss ...	7,09,041
Total ...	22,11,937	Total ...	22,11,937

Extracts from Directors' Report:

Report covers the year ended 31st December, 1932.

Trading Account.—This shows a gross loss of Rs. 1,42,672-12-9, while the Agency Department shows a profit of Rs. 1,042-7-3.

Profit and Loss Account.—After writing off Depreciation and charging Interest and Debenture Interest, etc., the balance at the debit of Profit and Loss Account is Rs. 7,09,040-11-2, which is carried forward.

Stocks of Stores and Raw Materials have, as usual, been taken at cost, which is not over current market rates.

There was no visible improvement in trade during the year under review and the general depression, so acutely felt in the previous year, was again the cause of greatly restricted enquiries and consequent severe competition which together resulted in exceedingly cut prices and made it impossible to obtain orders at remunerative rates.

The Works are now manufacturing and placing on the market a Cottage Industry Cotton Spinning Plant, which it is hoped will in due course prove a remunerative line.

The past four years of depression in the Engineering Trade and the heavy recurring charge for depreciation on machinery and plant, which were purchased at a time when prices were high are reflected in the large debit balance now accumulated on Profit and Loss Account. In order to bring the Balance Sheet values of Block, Loose Tools and Plant, etc., more into line with present-day conditions and eliminate the debit on Profit and Loss Account, we consider that steps should now be taken to write down Capital and we therefore propose shortly to place before you a scheme to give effect to this.

ISA BHEEL TEA CO., LD.

The directors have decided to pay off the arrears of Preference dividend for the three years 1930 to 1932. This amounts to 6 per cent. per annum, making a total distribution of 18 per cent.

INDIA JUTE CO., LD.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital ...	87,30,000	Block (nett) ...	17,95,465
Reserves ...	5,05,000	Jute, etc. ...	22,79,615
Debts ...	52,06,847	Stores ...	1,15,610
Profit and Loss ...	2,70,515	Outstandings ...	81,65,584
		Investments ...	22,33,660
		Cash & Deposits ...	1,22,428
Total ...	1,47,12,362	Total ...	1,47,12,362

Extracts from Directors' Report:

Report relates to the half-year ended 31st March, 1933.

The net result of the half-year's working after making allowances for Depreciation, etc., is a profit of Rs. 1,66,889-2-9, to this has to be added the balance at credit of Profit and Loss Account brought forward from the last Account Rs. 1,03,625-5-5, giving a total sum for disposal of Rs. 2,70,514-8-2.

The Directors have carefully considered the question of further depreciating that portion of the Company's investments which is represented by the Megna Mills shares, and are satisfied that the value at which they now stand in the Company's books, which is less than 50 per cent. of their nominal value, is a fair value, and one that at the present time calls for no further depreciation. In this view they are supported by the Auditors and Solicitors of the Company. No allowance for Depreciation of this asset for this half-year has therefore been made and they therefore recommend that the above balance of Rs. 2,70,514-8-2 be disposed of as follows:—In the payment of a Dividend at the rate of 5 per cent. per annum (free of Income Tax), on 23,200 Ordinary shares Rs. 2,17,500, in the payment of a Dividend at the rate of 5 per cent. per annum (free of Income Tax) on 30,000 Deferred shares Rs. 750 equal to Rs. 2,18,250, to be carried forward to next Account Rs. 52,264-8-2, total Rs. 2,70,514-8-2.

Jute in Stock has been valued at or under cost price and Cloth and Bags at contract and market rates.

In accordance with the existing agreement amongst the members of Indian Jute Mills Association the Company's Mills continued to work 40 hours weekly on the single shift system with 15 per cent. of the total looms sealed.

AIBHEEL TEA.

The Company harvested a crop of 1,217,440 lb. in 1932 (against 1,032,320 lb. in 1931). The cost of production was 8.06d. per lb. (against 9.26d.), and the average sale price realized 9.05d. per lb. (against 10,05d.). The accounts show a net profit of £6,034 against £4,315). It is proposed to pay a dividend of 6 per cent. (the same) and to carry £5,151 forward (against £5,287 brought in to the accounts). Floating assets, £60,862; current liabilities, £13,191.

NEW BEERBHOOM COAL COMPANY.

Synopsis of Balance Sheet:

Liaailities	Rs.	Assets	Rs.
Capital ...	19,76,230	Block (nett) ...	18,73,011
Zemindary account	46,632	Zemindary account	55,488
Reserves ...	6,97,271	Stocks ...	1,87,382
Security against royalty ...	6,000	Outstandings ...	4,67,067
		G. P. Security ...	6,000
Unpaid dividends	6,689	Deposits ...	24,515
Debts ...	2 45,449	Investments ...	3,11,232
Profit ...	1,06,688	Cash balance ...	1,60,264
Total Rs. ...	30,84,959	Total Rs. ...	30,84,959

Extracts from Directors' Report:

The directors of the New Beerbhoom Coal Company submit the audited accounts for the half-year ended April 30, 1933. The revenue account shows a profit of Rs. 2,01,568. After providing Rs. 1,10,193 for block depreciation there remains a balance of Rs. 1,06,688 available at the credit of profit and loss account, which they propose to deal with as follows:—To dividend on preference shares at 7 per cent. per annum, Rs. 7,000; to dividend on ordinary shares at 5 per cent. per annum, Rs. 44,406; carry forward, Rs. 55,282. The total raisings of all classes of coal were 274,410 tons, which compared with 201,402 tons in the preceding period and 246,469 tons in the corresponding half of last year. The total despatches amounted to 270,385 tons against 224,296 tons in the preceding half-year and 238,268 tons in the same period in 1932. There are at present no signs of returning prosperity to the coal trade, but on the other hand selling prices have fallen still further and are materially below the low rates ruling a year ago. Victoria west pits have now been sunk to coal, but the further development of this colliery must depend on an improvement in the industry.

KILCOTT TEA COMPANY.

Synopsis of Balance Sheet:

Liabilities.		Rs.	Assets		Rs.

Total Rs.	...	10,28,876	Total Rs.	...	10,28,876

Extracts from Directors' Report:

The directors of the Killcot Tea Company submit the audited accounts for the year ended December 31, 1932. The result of the season's working is a profit of Rs. 25,472 which has been transferred to profit and loss account. After sundry adjustments there is a balance at credit of that account of Rs. 1,16,828. They propose to pay a dividend of 10 per cent. and to carry forward Rs. 71,828. Crop weighed out 10,051 maunds against 7,860 maunds in 1931 and an estimate of 9,000 maunds. Prices for Dooars teas showed a marked decline and the average selling price was 5 annas 7 pies per pound compared with 8 annas 19 pies per pound in the previous year. Planted area remains at 937,76 acres. Estimates for 1933 provide for crop of 9,000 maunds for an outlay of Rs. 2,33.103 including inland freight and sale charges.

DAURACHERRA TEA COMPANY.

Extracts from Director's Report:

The directors of the Dauracherra Tea Company submit the audited accounts for the year ended December 31, 1932. The result of the season's working is a profit of Rs. 17,127 which has been transferred to profit and loss account. After sundry adjustments, there is a balance at debit of that account of Rs. 6,377 to be carried forward to 1933. Crop weighed out at 4,691 maunds as compared with 4,000 maunds estimated and 4,013 maunds in 1931. The average selling price was 4 annas 10 pies per pound against 4 annas 3 pies per pound in the previous year. The area under cultivation is 560 acres. Estimates for 1933 have again been compiled with the utmost regard for the need for economy, and provide for a crop of 4,000 maunds for an outlay of Rs. 90,865, including inland freight and sale charges.

NAGAISUREE TEA CO., LD.

Total	...	8,71,976	Total	...	8,71,976

Extracts from Director's Report:

Report covers the year ended 31st December, 1932.

The season's working has resulted in a profit of Rs. 59,184-9-1 and on transfer to the Profit and Loss Account there is a balance at credit of that account of Rs. 2,73,725-12-4.

Dividend.—We propose to pay a dividendof 45 per cent. and to carry forward Rs. 1,65,725-12-4.

Crop weighed out 10,019 maunds against 8,718 maunds in 1931 and an estimate of 10,000 maunds.

The further depression in prices resulted in the average selling price falling to 6 annas 9 pies per lb. compared with 9 annas 10 pies the previous year.

Planted Area.—The cultivated area remains at 1,138.61 acres.

Estimates for 1933 provide for a crop of 10,000 maunds for an outlay of Rs. 2,68,231, including Inland Freight and Sale Charges.

BATELI TEA COMPANY.

Synopsis of Balance Sheet:

Liabilities.		Rs.	Assets.		Rs.
Capital	...	3,29,100	Block (nett)	...	4,76,742
Debentures	...	2,86,092	Season, 1933	...	13,838

			Cash balance	...	293
			Loss	...	37,269
Total Rs.	...	7,08,525	Total Rs.	...	7,08,525

Extracts from Directors' Report:

The directors of the Bateli Tea Company submit the audited accounts for the year ended December 31, 1932. It will be observed from the undernoted summary of receipts and expenditure that the working of the company for the period under review resulted in a profit of Rs. 4,895. Receipts:—Nett proceeds of 280,946 pounds tea sold, partly estimated, Rs. 1,77,126; miscellaneous receipts, Rs. 1,127; total Rs. 1,78,253. Expenditure:—On garden, Rs. 1,04,440; in Calcutta, Rs. 68,375; total Rs. 1,72,815; surplus, Rs. 5,438; less commission to manager and managing agents, Rs. 543; profit, Rs. 4,895. After adjustment and transferring the above profit and providing for payment of the debenture interest the profit and loss account shows a balance at debit of Rs. 37,269, which is being carried forward. Owing to the impossibility of estimating the final results of the season's working, the payment of the debenture interest which fell due on January 1, was postponed. In view, however, of the profit disclosed by the accounts it is being paid forthwith. Assuming the scheme for regulation of exports and restriction of crop is agreed to, the estimates for 1933 provide for a crop of 320,000 pounds tea at a cost of Rs. 1,53,000 at 7 annas $7\frac{3}{4}$ pies per pound.

SASSOON AND ALLIANCE SILK MILL CO., LD.

Synopsis of Balance Sheet:

Liabilities		Rs.	Assets.		Rs.
Capital	...	5,00,090	Block (net)	...	1,68,316
Reserves	...	4,07,316	Stock-in-trade	...	1,12,620

			Cash ...	...	4,47,216
Total	...	10,07,827	Total	...	10,07,827

Extracts from Directors' Report:

Report relates to the year ended 31st December, 1932, shows a profit as under:—

Profit for this year Rs. 55,690-10-7, balance carried forward from previous year Rs. 19,401-3-2, total Rs. 75,091-13-9, this amount your Directors propose to allocate in the following manner:—To depreciation of Buildings Rs. 10,000 to depreciation of Machinery Rs. 10,000, to Reserve for Income Tax and Super Tax Rs. 10,000, total Rs. 30,000, leaving a balance of Rs. 45,091-13-9, this amount your Directors propose to appropriate as under:—To declare a dividend at Rs. 2 per share (8 per cent.) free of Income Tax Rs. 40,000, to carry forward to next year Rs. 5,091-13-9, total Rs. 45,091-13-9.

The above profits represent the result of eight months working. Owing to the aggressive Japanese competition the company found it impossible to continue working full time and their operatives refusing to work half time, went on strike at the end of August. This being so your Directors trust that you will consider the result satisfactory.

The Mill Buildings, Machinery and Stock-in-Trade have been insured for Rs. 20,23,275 and prospective profits and fixed charges for Rs. 8,00,000 covering a period of Indemnity for two years.

BENGAL COAL CO., LD.

Extracts from Directors' Report:

Report covers the half-year ended 30th April, 1933.

After writing off Rs. 75,000 for Depreciation there is a balance at the credit of Profit and Loss Account of Rs. 2,85,226-9-7 from which your Directors recommend—Dividend of Rs. 5 per share Rs. 2,00,000, provision for Commission to Directors, Managing Agents and Staff Rs. 15,750, carry forward Rs. 69,476-9-7.

Raisings amounted to 447,746 tons against 390,576 tons and 415,425 tons in the two preceding half-years.

Despatches were 545,003 tons against 531,016 tons in the half-year ended 31st October, 1932, and 637,926 tons in the half-year ended 30th April, 1932.

Reductions in costs have been made during the period under review and it is hoped to effect still further reductions during the ensuing half-year.

EAST INDIA TEA CO., LD.

Synoposis of Balance Sheet:

Liabilities.	Rs.	Assets	Rs.
Capital ...	10,00,000	Block ...	10,74,262
Reserves ...	2,55,000	Crop A/c ...	1,94,177

Extracts from Directors' Report:

Report covers the year ended 31st December, 1932.

Crop and Sales.—The following are comparative statistics of outturn and sales for the past three years:—

Year.	Crop.	Sale Average.
1932 ...	671,238 lb.	Re. -/8/1¾ per lb.
1931 ...	675,971 ,,	,, -/9/7 ,, ,,
1930 ...	688,383 ,,	,, -/12/2¾ ,, ,,

Season's Working.—From the undernoted Summary of Receipts and Expenditure, it will be observed the working of the Company for the period under review resulted in a loss of Rs. 73,630, Receipts Rs. 3,42,980-13-6, Expenditure Rs. 4,16,610-13-6, Loss Rs. 73,630.

Profit and Loss Account.—After adjustment and transferring the above loss, this Account shows a balance at debit of Rs. 63,564-15-5, which it is proposed to carry forward.

Season—1933.—Assuming the scheme for regulation of exports and restriction of crop is agreed to, the estimates for 1933 provide for a crop of 624,000 lb. Tea at a cost of Rs. 3,01,100 at As. 7/8¼ per lb.

The labour position on 31st December, 1932, was 2,072 hands.

Area.—The area under Tea on 1st January, 1932, was 1,132 acres, and an area of 88 acres was reclaimed during the year from the areas abandoned in previous years. This makes total area under Tea on 31st December, 1932, 1,220 acres.

Crop.—The crop realised was 8,396 maunds against last year 8,456 maunds.

Estimate.—The estimate for 1933 is for a crop of 7,800 maunds at a local cost of Rs. 2,04,700.

		Profit & Loss ...	31,947
Total ...	8,53,162	Total ...	8,53,162

Extracts from Directors' Report:

Report relates to season 1932.

Crop.—The outturn has been 6,352 maunds as compared with an estimate of 6,000 maunds and an actual crop of 5,852 maunds in 1931.

Climatic conditions were favourable for growth throughout the year and were responsible for the increased crop. The usual good standard of manufacture was well maintained, but the teas met a still further depressed market and realized an average price of 4 annas 7 pies a lb. only as compared with 5 annas 4 pies a lb. obtained for the previous season's crop.

Accounts.—The receipts amounted to Rs. 1,50,907-0-5 and the expenditure to Rs. 1,72,310-8-1, showing a balance at debit of Revenue Account of Rs. 21,403-7-8. Adding to this:—

Balance brought forward from previous year's Account Rs. 9,741-1-9, subscriptions to Octavius Steel & Co., Ltd., Provident Institution Rs. 802-2, total Rs. 10,543-3-9, there is a balance of Rs. 31,946-11-5 at debit of Profit and Loss Account, which is carried forward.

The Estimates for season 1933 are for a crop of 5,161 maunds to cost Rs. 1,34,710.

The Company's export quota under the Regulation of Exports Scheme has been fixed at 4,354 maunds.

JIYAJEERAO COTTON MILLS, LD.

Synopsis of Balance Sheet:

Liabilities.	Rs.	Assets.	Rs.
Capital ...	30,91,020	Block (net) ...	42,35,864
Debentures ...	18,00,000	Cloth, Yarn, etc., ...	11,46,747
Reserves ...	4,46,811	Stores ...	2,21,199
Other debts ...	11,96,450	Outstandings ...	8,94,440
		Cash & Invests ...	23,156
		Profit & Loss ...	12,874
Total ...	65,34,281	Total ...	65,34,281

Extracts from Directors' Report:

Report covers the half-year ended 31st March, 1933, shows a manufacturing loss of Rs. 53,184-15-2. After taking into account the amount brought forward from the previous half-year, paying interest and commission, making sundry adjustments, setting aside depreciation on Furniture and Conveyance and transferring Rs. 1,75,000 from the General Reserve, the Profit and Loss Account shows a net balance, at debit, of Rs. 12,875-6-9, which, the Directors recommend, should be carried over to the next half-year's Account.

The loss that accrued in the period under report is mostly due to the continuous fall in the prices of piece-goods, by which the stocks were affected. Japan has been selling goods at very cheap rates and flooded the market with the same. She has obtained a great advantage by the depreciation of her Currency. Repeated representations have been made to the Government of India to remedy the situation by adequate steps but so far the needful has not been done. If the position remains as it is to-day, the future of the Cotton Mill Industry looks to be very uncertain.

During the period under, depreciation on Buildings and Machinery has not been provided for, as in the opinion of the Board, the depreciation charged in the past adequately covers the same.

APOLLO MILLS, LD.

Synopsis of Balance Sheet:

Liabilities.		Rs.	Assets.		Rs.
Capital	...	25,00,000	Block (net)	...	70,72,699

			Profit & Loss	...	4,19,709
Total	...	87,17,713	Total	...	87,17,713

Extracts from Directors' Report:

Report relates to the year ended 31st March, 1933. The accounts show a loss of Rs. 56,132-0-9 for the year.

Mill Machinery, Buildings and Stocks are insured for Rs. 69,13,010 and the Standing Charges are insured for Rs. 4,94,339.

BRITISH DARJEELING TEA CO., LD.

The crop in 1932 was little changed at 518,000 lb. (against 519,372 lb. in 1931), but the gross sale price fell from 14.95d. to 12.28d. a lb., and the saving in costs was not commensurate with the decline in revenue. The net profit amounted to £3,625 (agxinst £9,358) before placing £500 (against £1,500) to income-tax reserve. It is proposed to pay a dividend of 7 per cent. for the year (against 11 per cent.), involving the reduction of the balance forward from £3,910 to £1,995. Floating assets, £52,000 current liabilities, £8,800.

BARAOORA (SYLHET) TEA CO., LD.

Profit for 1932, £13,371 (against £1,525), to which has been added £1,500 transferred from income-tax account and £6,082 brought forward (after adjustment). A dividend of 5 per cent. is recommended on the Ordinary shares (against 2 per cent.) and £84 is to be added to the providend fund, leaving £10,119. The crop harvested amounted to 3,101,878 lb. (against 2,122,003 lb.).

NATIONAL INDIAN LIFE INSURANCE CO., LD.

Report relates to the year ended 31st December, 1932. During the year 2,025 proposals for assurance of Rs. 30,79,000 were received and 1,261 policies assuring the sum of Rs. 18,54,500 were issued, of which Rs. 1,08,000 under five policies were re-assured.

The extent to which the financial stringency continues is indicated by the policy-loans advanced during the year which, although only 63.6 per cent. of the 1931 total, represent 157.8 per cent. of those granted in 1930. On the other hand the premiums advanced during the year under the Company's system of automatic protection were 156.75 per cent. of those advanced in 1931. These factors together with the drop in individual policy amounts all go to show how seriously crippled is the Company's public by the present conditions.

The total income for the year from all sources was Rs. 9,63,042-12-6, of which the premiums received were Rs. 7,32,580-1-7.

The Life Assurance Fund was increased during the year by the sum of Rs. 1,21,096-10-11 and now amounts to Rs. 41,53,986-8-1; while the total assets of the Company are Rs. 45,58,100-2-5. In the previous balance sheet depreciation in stock exchange securities was shown at no less a figure than Rs. 4,36,547-1, but during the year capital-values improved to such an extent that the whole of this depreciation was recovered and the market values as at 31st December, 1932, were Rs. 1,18,408-7 above the book-values.

The effective rate of interest, that is the rate after deduction of income-tax, earned on the total funds of the Company, invested and uninvested alike, was 5.79 per cent. This is a decrease of .13 per cent. from the rate of the previous year.

The expense-ratio, that is the ratio of expenses of management to premium income, was 38.104 per cent. which is an increase of 2.5 per cent. over the previous year. This is mainly due to the adjustment of the Managing Agents' commission for two years, and also that for the first time the full year's contribution by the Company to the provident fund has been charged. If these items are eliminated the actual expenses were Rs. 3,993-3-2 less than in 1931 although the ratio is .97 per cent. higher, which is attributable to the smaller premium income as above explained. The larger number of proposals for individually smaller amounts has naturally resulted in an appreciable increase in the medical fees paid with a disproportionate effect on the expense-ratio.

Claims arose during the year by the deaths of 78 lives assured under 91 policies securing the sum, inclusive of bonus additions, of Rs. 1,74,210-5; while 215 policies on 214 lives matured by survivance. Of these latter 113 policies on 112 lives were ordinary endowment assurances involving the payment, inclusive of bonus additions, of Rs. 1,60,573-7; and 102 policies on 102 lives were War Loan scheme assurances involving delivery of 5 per cent. 1929-47 War Loan scrip to the face-value of Rs. 2,03,264. The War Loan policies were the last of the special War Loan scheme assurances issued in 1917. This closes the scheme as all the policies have now matured either by death or by survivance.

The premiums outstanding at the close of the books are shown in the balance sheet as Rs. 94,541-11, but of this sum Rs. 71,164-12, i.e., 75.27 per cent. have since been realised.

The Directors have pleasure in recommending the payment of a dividend at the rate of 12½ per cent., free of income-tax, on the paid-up capital of the Company.

LIVERPOOL AND LONDON AND GLOBE INSURANCE CO., LD.

The Directors report that in 1932 the net fire premiums amounted to £4,094,874 and the losses to £2,059,512. A profit of £234,478 has been carried to Profit and Loss. The fire funds now amount to £3,412,949.

In the life department 3,801 policies were issued for £2,068,756, of which £87,817 was reassured. Premiums on new assurances amount to £138,908, or, after deducting the premiums on sums reassured £124,300—whereof £61,673 represents single payments and £62,627 annual premiums. The total net premium income amounts to £819,308. Net claims paid and outstanding (including bonuses) total £539,460, of which £243,228 is in respect of endowment assurances matured. Two hundred annuity bonds have been issued for a consideration of £152,880, these bonds granting annuities amounting to £13,585. Eighty-six annuities, amounting to £4,363, have terminated. The life funds now stand at £9,953,709 and the annuity fund at £707,731.

In the leasehold redemption assurance account the premium income was £21,572, and the fund at the end of the year stood at £171,920.

Net marine premiums amount to £295,282 and the claims to £242,660. A profit of £28,392 has been carried to Profit and Loss Account. The funds now amount to £418,112.

Net premiums in the accident and miscellaneous insurance department amount to £4,858,739 and the payments under claims to £3,392,491. A loss of £122,990 has been carried to Profit and Loss Account. The accident and miscellaneous insurance funds now amount to £5,950,160.

An interim dividend of 13s. 6d. per share was paid in November last, and the Directors recommend a final dividend of 13s. 6d. per share payable on 30th May, making in all 27s. per share, less tax, for the year 1932, being the same as for the year 1931.

The funds of the Company now total £25,566,888.
